I reported these organized crimes to Windmill police station in June 2021 and I sent a letter with the forensic report to Las Vegas FBI in September 2021, however, both government agencies did not offer any help. I recently experienced a severe attack in March 2022 and called 311 a few times for help, most of them were showing sympathy. Unfortunately, they have very limited knowledge on military grade weapons and one of the cops said that there is no one in his unit capable of detecting the perpetrators using these military grade weapons.

Besides the perpetrators using hand-held direct energy weapon (DEW) or laser weapons, they also organized as a group of stalkers working together in uniformity, which included my neighbor next door to me, the unit above me and some others living in the same community. They break into my unit and ransack my belongings, use directional speakers to direct their noise into my unit 24/7 to harass me and put me into a state of fear. These gangsters also Vandalize my vehicle; put dirt and trash at my entrance door, have gangsters talk very loudly while walking by my door in the hallway, Noise campaigns, Noise harassment, use vulgar language towards me. This group of stalkers are getting paid to attack me and destroy my life, this is a hate crime and needs to be stopped, my constitutional rights are being violated as a US citizen.

This non-stop harassment is destroying my life, forcing me to lose employment and even making me homeless at one point in time.

Dear Nevada Legislators, I am here to ask for help to form a special unit to stop these military grade weapon systems attacks and stalking activities as soon as possible. Victims like me can be killed without a trace from these attacks and these are acts of domestic terrorism.
