To Whom it may Concern:

Pursuant to NRS 422.27482, the Department of Health and Human Services must produce an annual report which lists all employers in this State which have 50 or more employees and the number of full-time employees of such an employer who are enrolled in Medicaid. Section 2 also requires: (1) the report to include information relating to whether the employees of such an employer have access to an employer-based health care plan; and (2) the Director to submit this report to the Governor and the Legislature.

The attached report provides an analysis of exactly this, summarizing the number of Medicaid members this equates to as well as the cost associated with providing healthcare to those members. If you have any questions, please feel free to contact Kyra Morgan, State Biostatistician, at (775) 434-9302.

Sincerely,

Kyra Morgan,
State Biostatistician

Background

The following report considers the cost of providing Medicaid services to members who work for an employer with 50 or more employees for State Fiscal Year (SFY) 2021. This report is produced annually as a requirement of NRS 422.27482 of the 2017 Legislative Session. NRS 422.27482 requires "… the Department of Health and Human Services to prepare an annual report which lists all employers in this State which have 50 or more employees and the number of full-time employees of such an employer who are enrolled in Medicaid."

Technical Notes

Determining if a company has employees enrolled in Medicaid was done by matching Medicaid members to records in the Nevada Department of Employment, Training, and Rehabilitation (DETR). This match provided quarterly wage information and identification numbers of the employers for whom Medicaid members worked during each quarter of SFY 2021.

Employment was then defined using the wage threshold associated with earning minimum wage in Nevada. More specifically, the group of Medicaid members presented in this report represents employees who earned $3,840.00 or more in gross wage earnings for any 12-week consecutive period (one quarter) in SFY 2021, as reported to DETR. This gross quarterly wage represents the minimum wage of $8.00 an hour paid to employees who worked 40 hours per week.

DETR also supplied a file with the employer identification number, company name, and address for employers in Nevada with 50 or more employees. The wage file and employer file were then combined to identify which Medicaid members were employed by companies with 50 or more employees. It is important to note that a Medicaid member may have had more than one employer during the year. The total cost to Nevada Medicaid represents a distinct cost to the state. However, the cost associated with each company considers the complete cost of the employees and dependents of that company and may be duplicated across companies when an individual is employed by multiple employers during the fiscal year.

To determine the dependents of Medicaid members who worked for a company with 50 or more employees, corresponding case IDs (ICIs) were identified for the list of Medicaid members who work for companies with 50 or more employees and all other members of the case were counted.

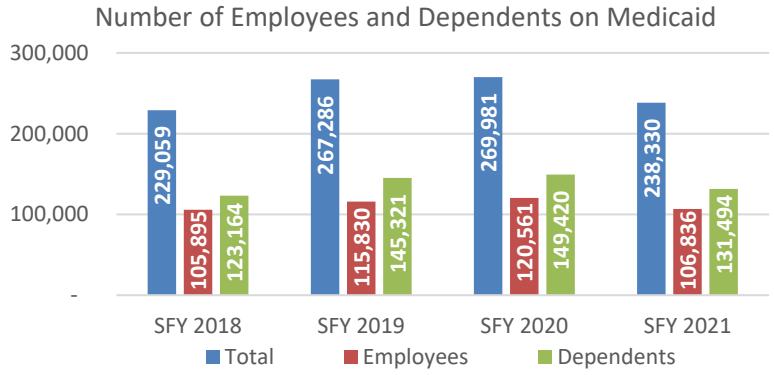
Determining whether or not an employer offered health coverage benefits was done by matching the employer's Employer Identification Number (EIN) against the Department of Labor's Employee Benefits Security Administration's database of Form 5500's filed by the employer. Form 5500 identifies the different welfare, health, and pension plans offered by an employer. A value of 4A in line 8b on Form 5500 indicates that the employer offers a health benefits plan and a value of 4U in line 8b on Form 5500 indicates that the employer has a collective-bargained welfare arrangement. However, not all employers need to file a Form 5500 and may offer health benefits to their employees. The Division of Insurance does not currently track which employers offer health insurance benefits unless there is a consumer complaint.

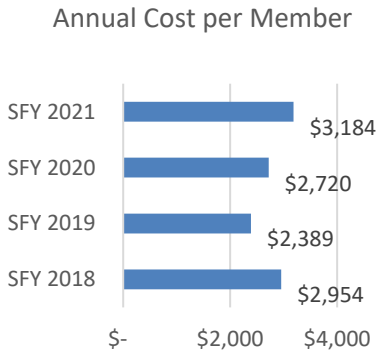
Results

In SFY 2021 there were 106,836 Medicaid members employed by employers with 50 or more employees and 131,494 dependents of those members. The total cost of providing health care to these employees was $471,010,521. The total cost for providing health care to the dependents of these employees was $287,746,441. Combining these results, the overall cost of health care to these Medicaid members was $758,756,963.

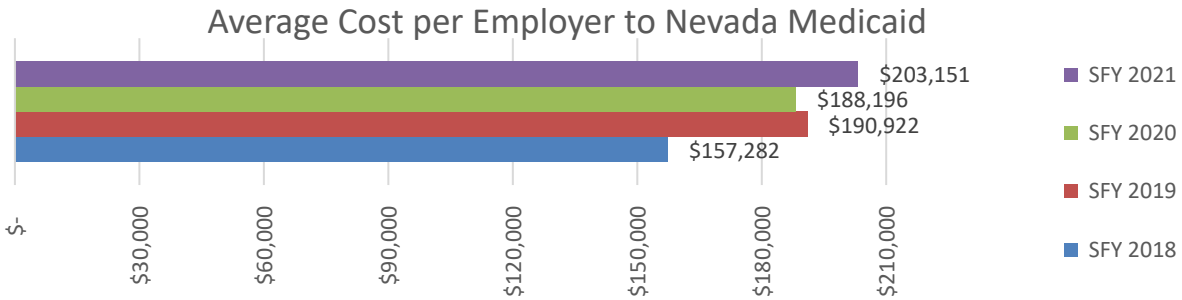
	SFY 2018	SFY 2019	SFY 2020	SFY 2021
Cost to Nevada Medicaid	$ 676,547,896	$ 638,563,801	$ 734,322,050	$ 758,756,963

Over the past four state fiscal years, the annual average cost per this subset of Medicaid members and their dependents has increased from $2,954/member in 2018 to $3,184/member in 2021. The overall cost to Nevada Medicaid has increased, due to most employees and their family members having coverage over the twelve-month period. A pause was placed on redetermination due to the COVID-19 pandemic. The eligible population mostly maintained their coverage over the one-year period.





These companies with 50 or more total employees had an average of 30 employees on Medicaid and 33 dependents associated with these employees on Medicaid, with an average cost to Nevada Medicaid of $203,151 annually and a median cost to Nevada Medicaid of $79,024 annually.



As shown in the table below which displays the companies who made up the top ten employers when ranked by the number of employees and dependents on Nevada Medicaid, this average is highly skewed by the top few employers causing the average cost to Medicaid ($203,151) to be up as compared to SFY 2020 average cost to Medicaid ($188,196). For example, the health care coverage costs associated with Medicaid members who were employed by Amazon.com Services Inc. (and their dependents) alone cost Nevada Medicaid $43,222,910, a 103% increase from the previous year.

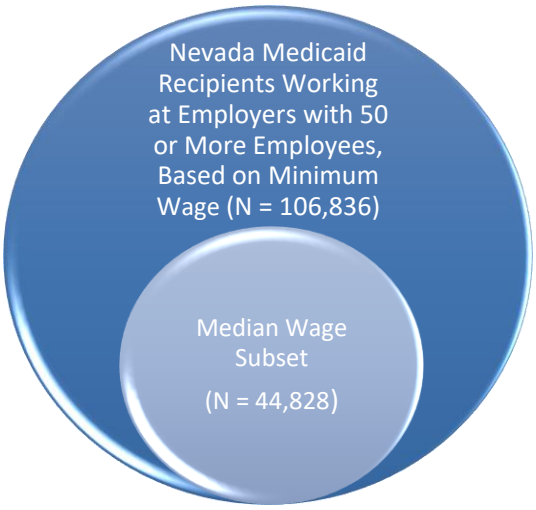
Median Wage Subset

It may also be of interest to consider the number of these employees who earned enough in wages to meet the quarterly wage threshold associated with the median Nevada wage (more specifically, the subset of these Medicaid members who earned $8,904.00 or more in gross earnings in a quarter). This gross quarterly wage represents the median wage in Nevada as of May of 2020, according to the Bureau of Labor Statistics, of $18.55 an hour.[1]



Out of the 106,836 Medicaid members employed by employers with 50 or more employees who earned $3,840.00 or more per quarter, 44,828 Medicaid members (42%) earned $8,904.00 or more in gross earnings in a quarter. There were also 52,021 dependents associated with the Medicaid members in this subset. The demographics associated with this subset did not differ significantly from the demographics of the larger pool of Medicaid members and dependents considered in this report.
