## A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: <https://factfinder.census.gov/>.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: <http://nvsos.gov/sos/>.
