

**PROPOSED REGULATION OF THE
STATE ENVIRONMENTAL COMMISSION**

LCB File No. R004-08

February 8, 2008

EXPLANATION – Matter in *italics* is new; matter in brackets ~~[omitted material]~~ is material to be omitted.

AUTHORITY: §§1-9, NRS 459.826 and 459.830.

A REGULATION relating to underground storage tanks; prohibiting deliveries of regulated substances to ineligible underground storage tanks under certain circumstances; providing exceptions; setting forth the circumstances under which an owner or operator of an ineligible underground storage tank may reestablish the eligibility of the underground storage tank to receive such a delivery; and providing other matters properly relating thereto.

Section 1. Chapter 459 of NAC is hereby amended by adding thereto the provisions set forth as sections 2 to 6, inclusive, of this regulation.

Sec. 2. *“Red tag” means a unique identification device, tag or other mechanism of a design approved by the Division that is placed on the fill pipe of an underground storage tank to indicate that the underground storage tank is ineligible to receive a delivery of a regulated substance.*

Sec. 3. 1. *Except as otherwise provided in subsection 2, an owner or operator of a facility specified by the Division at which an underground storage tank is located shall not request or accept a delivery of a regulated substance to the underground storage tank if the underground storage tank is marked with a red tag in accordance with the provisions of sections 4 and 5 of this regulation.*

2. The Division may authorize a single delivery, or multiple deliveries for not more than 180 days, to an underground storage tank that is marked with a red tag by providing a deferral in writing to the owner or operator of the facility, if the owner or operator demonstrates to the satisfaction of the Division that the delivery:

- (a) Is required because of an emergency;*
- (b) Is for the purpose of testing or calibrating the underground storage tank to reestablish eligibility to receive a delivery pursuant to section 6 of this regulation; or*
- (c) Is required to maintain the availability of, or access to, motor vehicle fuel in any rural or remote area of this State specified by the Division.*

Sec. 4. *An underground storage tank is ineligible to receive a delivery of a regulated substance if:*

1. The Division:

(a) Determines that any required component of the underground storage tank is not installed, including, without limitation, any equipment that is designed to:

- (1) Prevent a spill or overfill;*
- (2) Detect a leak; or*
- (3) Protect the underground storage tank from corrosion; or*
- (b) Identifies a failure in the operation of any equipment specified in paragraph (a) and the failure is not corrected:*

- (1) Within 30 days after the failure is discovered; or*
 - (2) Within any other reasonable period specified by the Division; and*
- 2. The Division places, or causes to be placed, a red tag on the fill pipe of the underground storage tank.*

Sec. 5. *If the Division determines that an underground storage tank located at a facility specified by the Division is ineligible to receive a delivery of a regulated substance, the Division shall provide a written notice of that determination to the owner or operator or an on-site employee of the facility. The notice must include, without limitation:*

- 1. An identification of the underground storage tank;*
- 2. The date the Division makes the determination of ineligibility;*
- 3. The date of placement of the red tag by the Division or the date by which the red tag must be placed on the underground storage tank, if the Division orders the red tag to be placed by the owner or operator of the facility;*
- 4. Instructions for placing the red tag on the fill pipe of the underground storage tank, if the Division orders the red tag to be placed by the owner or operator of the facility;*
- 5. The criteria used by the Division to make the determination of ineligibility; and*
- 6. The specific remedial actions which the owner or operator of the facility must take in order for the Division to reclassify the underground storage facility tank as eligible to receive a delivery of a regulated substance.*

Sec. 6. *If the Division determines that an underground storage tank is ineligible to receive a delivery of a regulated substance and the underground storage tank is marked with a red tag pursuant to sections 4 and 5 of this regulation, the Division may reclassify the underground storage tank as eligible to receive such a delivery if:*

- 1. The owner or operator of the facility at which the underground storage tank is located provides to the Division documentation setting forth the remedial actions taken to install any required equipment or to correct any operational failure of that equipment;*

2. The Division reviews the documentation to determine the appropriateness of the remedial action taken:

(a) Except as otherwise provided in paragraph (b), within 7 days after the Division receives the documentation; or

(b) Within 14 days after the Division receives the documentation, if the Division determines that an inspection of the site of the underground storage tank is required; and

3. The Division removes the red tag or authorizes the owner or operator of the facility, in writing, to remove the red tag after determining that the remedial actions taken by the owner or operator are appropriate.

Sec. 7. NAC 459.9921 is hereby amended to read as follows:

459.9921 As used in NAC 459.9921 to 459.999, inclusive, *and sections 2 to 6, inclusive, of this regulation*, unless the context otherwise requires, the words and terms defined in NAC 459.9922 to 459.9929, inclusive, *and section 2 of this regulation* have the meanings ascribed to them in those sections.

Sec. 8. NAC 459.999 is hereby amended to read as follows:

459.999 If any provision of NAC 459.9921 to 459.999, inclusive, *and sections 2 to 6, inclusive, of this regulation*, or the application of any such provision to any person, thing or circumstance is held invalid, it is intended that the invalidity not affect the remaining provisions, or their application, that can be given effect without the invalid provision or application.

Sec. 9. NAC 459.99925 is hereby amended to read as follows:

459.99925 1. Except as otherwise provided in this section, for an applicant to be eligible for a loan from the Fund with respect to a property, the property must contain the site of a release of a hazardous substance, pollutant or petroleum product and qualify as a brownfield site.

2. An applicant may be eligible for a loan from the Fund with respect to a disposal site only if the Division determines that:

(a) The disposal site poses a threat to human health or the environment because of the presence of a hazardous substance and presents a danger to human health beyond any physical hazards that may be present at the disposal site;

(b) The disposal site was closed before the enactment of the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. §§ 6901 et seq.; and

(c) Corrective action is not required by the Division pursuant to NAC 444.7481 to 444.7499, inclusive.

3. An applicant is not eligible for a loan from the Fund with respect to a property which is eligible for funding pursuant to NAC 590.700 to 590.790, inclusive, or is otherwise subject to NAC 459.9921 to 459.999, inclusive, *and sections 2 to 6, inclusive, of this regulation* unless:

(a) The loan will be used for corrective action on the property exclusively to address a hazardous substance which is distinct from, and not commingled with, petroleum contamination that is eligible for reimbursement pursuant to NAC 590.700 to 590.790, inclusive;

(b) The Division determines that the applicant is not eligible for funding pursuant to NAC 590.700 to 590.790, inclusive, for petroleum contamination on the property and:

(1) The applicant did not cause or contribute to the release of petroleum products; and

(2) The cleanup of the petroleum contamination would protect human health and the environment and result in the redevelopment of the site; or

(c) The loan will be used to continue the remediation of a hazardous substance commingled with petroleum contamination after the issues relating to the petroleum contamination have been mitigated.

4. As used in this section, “disposal site” has the meaning ascribed to it in NRS 444.460.
