EXPLANATION - Matter in *italics* is new; matter in brackets [omitted material] is material to be omitted.

AUTHORITY: §§ 1 and 2, NRS 679B.130 and 687B.490.

A REGULATION relating to insurance; revising the requirements that a network plan made available for sale in this State must satisfy in order for the Commissioner of Insurance to determine that the network plan is adequate; and providing other matters properly relating thereto.

## **Legislative Counsel's Digest:**

Existing law authorizes the Commissioner of Insurance to regulate insurance in this State. (NRS 679B.130) Existing law requires a health carrier that offers coverage in the small employer group or individual market to demonstrate to the Commissioner the capacity to deliver services adequately before making any network plan available for sale in this State. (NRS 687B.490) Existing regulations set forth certain minimum requirements that a network plan must satisfy for the Commissioner to determine that the network plan is adequate for sale in this State. Existing regulations require a network plan, in order for the Commissioner to determine the plan is adequate, to contain evidence that the network plan provides reasonable access to at least one provider in certain specialty areas for at least 90 percent of enrollees by complying with certain maximum time and distance standards that an individual should have to travel to see a provider of health care based on certain area designations. (NAC 687B.768) Section 1 of this regulation revises the list of required specialty areas and the maximum time and distance standards for network plans that are qualified health plans. Section 1 preserves the requirements in existing regulations for network plans which are not qualified health plans.

Existing regulations require a network plan, in order for the Commissioner to determine the network plan is adequate, to contain evidence that the network plan offers contracts in good faith to all available Indian health care providers in the service area of the network plan. (NAC 687B.768) **Section 1** additionally requires a network plan to offer contracts in good faith to all available federally-qualified health centers and rural health clinics in the service area of the network plan.

**Section 1.** NAC 687B.768 is hereby amended to read as follows:

- 687B.768 1. In order for the Commissioner to determine that a network plan made available for sale in this State is adequate, the network plan must contain, at a minimum:
- (a) [Evidence] For a network plan which is a qualified health plan, evidence that the network plan provides, in accordance with the requirements of 45 C.F.R. § 156.230(a), reasonable access to at least one provider in the specialty area listed in the following table for at least 90 percent of enrollees by complying with the area designations for the maximum time and distance standards in the following table:
