A REGULATION relating to mining reclamation; revising requirements of an application to participate in a program for the pooling of reclamation performance bonds; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law requires the Division of Minerals of the Commission on Mineral Resources to adopt regulations governing the development and administration of a program providing for the pooling of reclamation performance bonds. (NRS 519A.290) Existing regulations require that a person who submits an application to participate in the bond pool include a statement and documentation showing the structure of the business organization and the financial status of the applicant at the time of the application, including certain information relating to the organizational structure, assets, liabilities and net worth of the business organization and evidence that the financial statements of the applicant have been reviewed by a certified public accountant and are a fair representation of the financial status of the applicant. Existing regulations authorize the Administrator of the Division to waive the requirement to provide such evidence under certain circumstances. (NAC 519A.570) This regulation: (1) requires the applicant to provide evidence that the financial statements of the applicant have been compiled by a certified public accountant, rather than reviewed by a certified public accountant; and (2) removes the authority of the Administrator to waive the requirement to provide such evidence. This regulation also requires that the documentation submitted by the applicant include a signed and notarized affidavit stating that the information submitted by the applicant relating to such assets, liabilities and net worth of the business organization is true.
