PROFESSIONAL STANDARDS IN EDUCATION**

LCB File No. R138-15

Effective June 28, 2016

EXPLANATION – Matter in *italics* is new; matter in brackets ~~[omitted material]~~ is material to be omitted.

AUTHORITY: §1, NRS 391.019.

A REGULATION relating to education; revising requirements to receive an endorsement to serve as a social worker; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law requires the Commission on Professional Standards in Education to adopt regulations prescribing the qualifications for licensing educational personnel. (NRS 391.019) Existing regulations establish the requirements to receive an endorsement to serve as a social worker. Such requirements include holding a current license issued by the Board of Examiners for Social Workers. (NAC 391.320) Alternatively, this regulation allows a person to receive an endorsement to serve as a social worker if the person holds an equivalent license issued by a similar agency in another state and agrees to obtain a license from the Board not later than 1 year after applying for the endorsement. This regulation also provides that an endorsement as a social worker expires if the person who holds the endorsement does not obtain a license issued by the Board within 1 year after applying for the endorsement.

In order to receive an endorsement to serve as a social worker, existing regulations also require a person to have completed an educational program for social workers in schools which includes a practicum in schools. (NAC 391.320) This regulation provides an alternative by allowing a person to receive such an endorsement if the person has completed an educational program for social workers in schools which includes the equivalent professional or practicum experience providing services directly to children of school age and their families.

Section 1. NAC 391.320 is hereby amended to read as follows:

2. In addition to the requirements listed in subsection 1, a person who wishes to receive such an endorsement must:
