

For those that do not actually believe in God, this may fall upon deaf ears. For those that do believe in Him, well, we already know the Truth in the Trust and Faith we have in him. My name is Melissa. I am a mother to a very healthy and vivacious 4 year little girl. I have been a Christian all of my life, and rediscovered God as an adult in 2008, so nearly 12 years ago.

Backing up a bit, my husband and I had a precious 2-year old Boxador named Lillie. In 2013 we took Lillie (and our cats) into the Banfield Pet Clinic to have them all FULLY vaccinated, *thinking* we were doing them justice. Literally 6 months later, Lillie had a "lump" on her wrist which made her limp and favor it. We, being ignorant, thought she sprained it by playing in the December Snow; after days of us babying it for her, we took her to Pyramid Veterinarian....after questions and answers, they advised us that blood work would need to be done....blood work for a sprained wrist?! Wow was I shocked when the doctor came in to sadly disclose that our beloved dog had bone cancer! Not even 3 years old yet, and our dog had bone cancer. I cried so much that day and the days to come, wondering how this could be? She is so healthy I thought. After much prayer, discussions, and considering all options with my husband, we felt it was best to lay Lillie to rest. After spending our "last time" with her, we chose to have her put to sleep on Valentines Day 2/14/14, she would have turned 3 on June 1, 2014.

So why am I sharing this particular story with you today? I had asked the vet that was overseeing Lillie's last care, if the vaccines she received just June of 2013 could have caused the bone cancer, and her reply to me was, yes, it is very possible. Well, after this tragic experience, my husband and I started to do our own research on vaccines and what they can do to the body. We were SHOCKED when we read article after study after article after study about what vaccinations have in them; formaldehyde, mercury, aluminum, PIGS blood, mice brains (just to name a few) some even cultured on **aboard baby fetal tissue** (Ahhhhhh). This was not just a one time research day for us, it was an every day consumption because my husband and I were trying to get pregnant and relied more on God now than ever before to show us HIS truth. In Leviticus 11:7, God tells us that Swine/Pig is unclean, not only to eat, but to not even touch the carcass or the blood of this animal because it's an abomination, which by dictionary definition is: "A thing that causes disgust or hatred"....so if God **Hates** the Pig as food for us to eat, WHY then would I ever inject my new born child with chemicals and the blood of an animal that my God tells me is unclean? It is *not* ironic that in Matthew 8:28-34, Jesus chose to cast the devils that were in the two men into a herd of swine; 8:31 so the devils besought him, saying, if thou cast us out, suffer us to go away into the herd of swine. 8:32 and he said unto them, go. And when they were come out, they went into the herd of swine: and, behold, the whole herd of swine ran violently down a steep place into the sea, and perished in the waters. One would have to be blind to not notice the symbolic meaning behind Jesus casting multiple devils into pigs that ultimately die at their own demise. They are an abomination.

Also, most are aware that there has been countless studies done, and much information to research and read about with vaccines being linked to autism. This has been an ongoing battle; if you have not seen the documentary VAXXED, from cover up to catastrophe, you owe it to yourself and your children or your unborn child to watch it. "In it is an investigation into the CDC's destruction of a study linking autism to the MMR vaccine".

Our daughter was born in Spring of 2015; from the time Lillie was put to rest, to the then 6 months later learning I was pregnant, we did sooooo much studying, research, hours of prayer, and put 100% Faith and confidence in God that HE created us in HIS image, and his creation is flawless.....it's up to US to treat and respect our bodies to not (knowingly) put harmful chemicals into our bodies as they ARE the temples of God.

If the privileged, God given right, is taken away from those that *ARE* God fearing Christians, or those that just understand the risks associated with that needle of "substance" going into your blood stream, what fairness is there for US? Vaccines should be a personal choice; a Religious right to protect the bodies that our Lord designed, the temple He gives us while we are here, and the love He had for each of us as each intricate detail was designed and put into existence. If a school or daycare full of vaccinated children fear the one or few children that *aren't* vaccinated from coming into their presence, well what is that saying about the trust *they have* in the their choice to vaccinate? I have always scratched my head on this one, because if your child/their child is vaccinated, and another child is not vaccinated, what fear then shall they have to "contract the illness" IF they have been properly vaccinated? Wouldn't it be the parent(s) of the UN-vaccinated child that should fear?? When you put full Faith in the Lord, all fear is removed. I do think that more and more humanity is waking up and are becoming less and less programmable to "just line up and take it", otherwise, there wouldn't be this debate. It is unlawful, unjust, and unfair, for anyone to dictate WHAT should or should not go into their body or the bodies of their children. Please don't mandate a choice that each should be able to choose. Don't play Russian Roulette with our children. God is in control. It is Him who we should fear. It is him that will determine the fate of every soul that He's created.

Thank you for your time,

Melissa Dillon
