

Hello Mercedes,

I hope this email finds you well.

For the data you requested, please be aware that I will be pulling it from our results during the 2019 Homeless Census. As mentioned, we don't have incarceration data and all of the answers are anonymous. What findings we can share, will be aggregate in form.

Here are some basics and all of these can be found via our website www.HelpHopeHome.org

Here are some general findings (no age restriction)

There is about **5,530** total number of persons experiencing homelessness in Southern Nevada at any given night.

About **14,114** will experience homelessness in our community as some point this year.

About **4% of responders claimed that prior to being immediately homeless, that they were in prison or jail.**

When asked about the top 3 events or conditions that led to being homeless:

- **11% of responders claimed that Jail/Prison was one of their top 3.**
- **2.6% claimed that they did not receive housing assistance when they left jail or prison**

When asked about what is keeping responders from getting permanent housing **2.3% responded** that its because they are currently in jail.

About **30.3%** of responders claimed that they have been in at least 1 jail/prison term in the past 12 months.

Now, we only have a 1 data point when it comes to people experiencing homelessness and age.

When asked about their age, **32% of responders claimed they were age 55 and up.**

These are all the available data based on your request Mercedes. Please be aware that all of these were taken from an aggregate count of census responders.

Let me know if you need anything else. I highly encourage checking our HelpHopeHome website as it will house a lot of the data points you are looking for.

Regards,

Mat Manlangit | Data Analyst – CoC
