Nevada Summary	
Population	1.4%
Violent Crime	▲ -2.2%
Murder & Manslgr	▲ -15.1%
Rape	▲ 0.5%
Robbery	▲ -6.6%
Aggrnd Assault	▲ 0.6%
Property Crime	▲ -7.5%
Burglary	▲ -2.8%
Larceny	▲ -0.3%
Motor Vehicle	▲ -28.8%

- Preliminary data suggest that population and crime rates are declining in Nevada as well as in the US. This factor is believed to be result of, among many others, declining birth rates, a higher unemployed population staying home maintaining an eye for thefts and other crime activity.
- The Nevada Department of Corrections offers several educational and vocational programs and work opportunities for its offender population with the intent of providing them gainful skills while incarcerated and upon release.
- The performance of the economy, mass layoffs, and the lack of work opportunities could potentially have an impact on offenders' seeking and finding jobs which could negatively affect recidivism. Thus, the department will begin tracking key economic indicators as well deriving program and labor data of it own offender population with the intent to assess the current economic environment.

	Dec08	12-month % Change	Nov09	1-month % Change	Dec09

₍₁₎ CA and OR costs are for FY 09 and NV and AZ costs are for FY10 generally funded costs.

₍₂₎ Incarceration rates for each jurisdiction were derived from the latest available time period.

Figure 15

INCARCERATION RATES PER 100,000 INHABITANTS

Incarceration rates are useful comparable measures across jurisdictions. They can provide an indicator of the rate at which jurisdictions incarcerate offenders relative to the size of their resident population. Typically rates are derived by analyzing the state's prison population against the state's population for the same time period.

Nevada is among one of the states with the highest incarceration rates of all western states (458 inmates for 100,000 inhabitants). Arizona, Colorado, and Idaho are above Nevada in terms of incarceration rates.

Table 14

Incarceration Rates		
	NV ₍₁₎₍₂₎	US ₍₂₎₍₃₎
2004	472	422
2005	467	433
2006	488	440
2007	496	463
2008	458	464

Nevada's Correctional Population over Time

During the 1998 to 2008 decade, the male correctional population increased by 37.21% or by 3,315 offenders. During 2008, population was on its first down cycle since 1999, with a negative percentage change of .18%. During the same decade, the female population increased by 40.78% or by 303 offenders; however, as it occurred with the male population, from 2007 to 2008, it declined, but at a faster rate than the male population (4.56%). Overall, the prison population changed at a rate of 3.62% per year.

Table 7

HISTORICAL ACTUAL TOTAL INMATE POPULATION											
Ten-Year Period											
Gender	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008

% Change	6.95%	-0.48%	5.90%	1.79%	1.02%	4.35%	8.13%	2.38%	9.13%	1.18%	-0.54%

Figure 10

PRISON INCARCERATION AND RECIDIVISM

An offender's ability to avoid further convictions after release to community is a key indicator of success about the offender as well as of effectiveness in correctional programming. Deriving rates of return is helpful for correctional planning purposes and for assessing an ex-felon's likelihood to re-offend. Although rates are not comparable across jurisdictions, research has concluded that there is sufficient evidence to conclude that, given a number of conditions, an offender is most likely to re-offend within the first three years from release. The probability of return diminishes the more time elapses beyond the first three years. Nevada's return rate is derived by identifying the number of offenders released on discharge or on parole during a given year and calculating the percent of inmates returning back to NDOC within a 36-month period from the date of release. Each release and re-incarceration is accounted for only once during the relevant period of the study, and select types of incarcerations are excluded from the calculations, such as safekeepers (offenders held by Nevada for other jurisdictions) or deaths. NDOC is undertaking new measures to stratify offenders being released by gender and offense group as dictated by new guidelines and laws.

Table 15

Recidivism Rates				
Measured in Terms of Returns to Prison				
Release Year	Releases	Returns Years	Returns	Cum. Rate
1998	4904	1998 - 2001	1134	23.12%
2000	5425	2000 - 2003	1406	25.92%
2001	5585	2001 - 2004	1445	25.87%
2002	5196	2002 - 2005	1370	26.37%
2003	4995	2003 - 2006	1459	29.21%
2004	5387	2004 – 2007 ^a	1295	24.04%
2006	5195	2006-2008 ^b	1233	23.73%

^aDue to technical reasons, the returns rates for the 2004 include re-admissions through May 31st, 2007; thus, rather than a 36-month return rate, a 29 month-rate was derived.

^bDue to data limitations, the return rates for 2006 releases include re-admissions through December 31st, 2008; thus, rather than a 36-month return rate, a 24-month rate was derived.

OFFENDERS ON PAROLE

At Fiscal Year end 2009, there were 2327 offenders on parole of which 16.35% were females and 83.65% were males. The largest offense group for males on parole was violence and for females property. The figures below depict their characteristics.

Table 42

PAROLE POPULATION	SEX	VIOL	DRUG	PROP	DUI	OTHER	TOTAL
MALE	289 14%	791 40%	504 25%	343 17%	54 3%	19 1%	2000 100%
FEMALE	2 1%	81 25%	108 33%	111 34%	18 6%	7 2%	327 100%
TOTAL	291 13%	872 37%	612 26%	454 20%	72 3%	26 1%	2327 100%

Figure 47

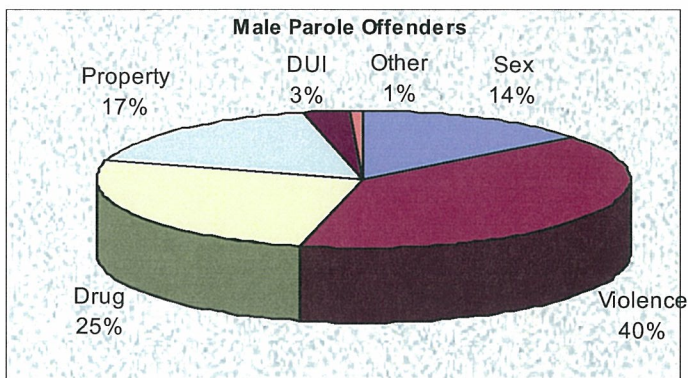

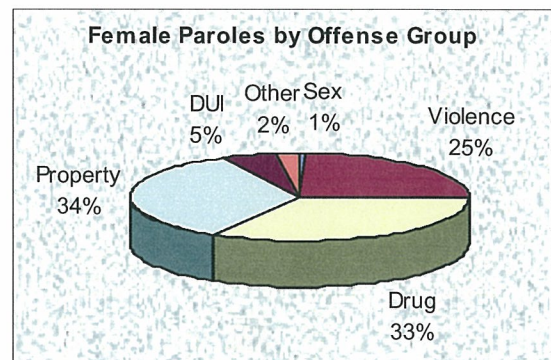

Figure 48

OFFENDERS ON LONG-TERM SENTENCES

Only 19.2% of the state's total correctional population in Nevada is composed of long-term offenders, or 2,523. Of these offenders, 3% are on death row, 3% are females and 97% are males. Under a former law, offenders were allowed to appeal a death sentence an infinite number of times, current laws limits appeals to three per offender. Offenders on a life sentence with parole can eventually be released to the community and remain under the supervision of the Division of Parole and Probation under the Department of Safety.

Table 43

Sentence	Females	Males	Total	%
Death	0	81	81	3.21%
Life	13	419	432	17.12%
Life w/Parole	63	1947	2010	79.67%
Total	76	2447	2523	100.00%
