Three Major Goals of the State Plan

- Infrastructure and connectivity fostering digital-age learning and teaching
- Professional Development
- Technology integration across the curriculum to engage digital learners

A faded background image of a computer lab with several students sitting at desks, working on desktop computers. The text is overlaid in the center.

Infrastructure and connectivity fostering digital-age learning and teaching

2009 Nevada Educational Technology Survey Results

The next slides present narrative responses collected from Nevada school district personnel on successes, professional development and obstacles to successful technology integration in Nevada schools.

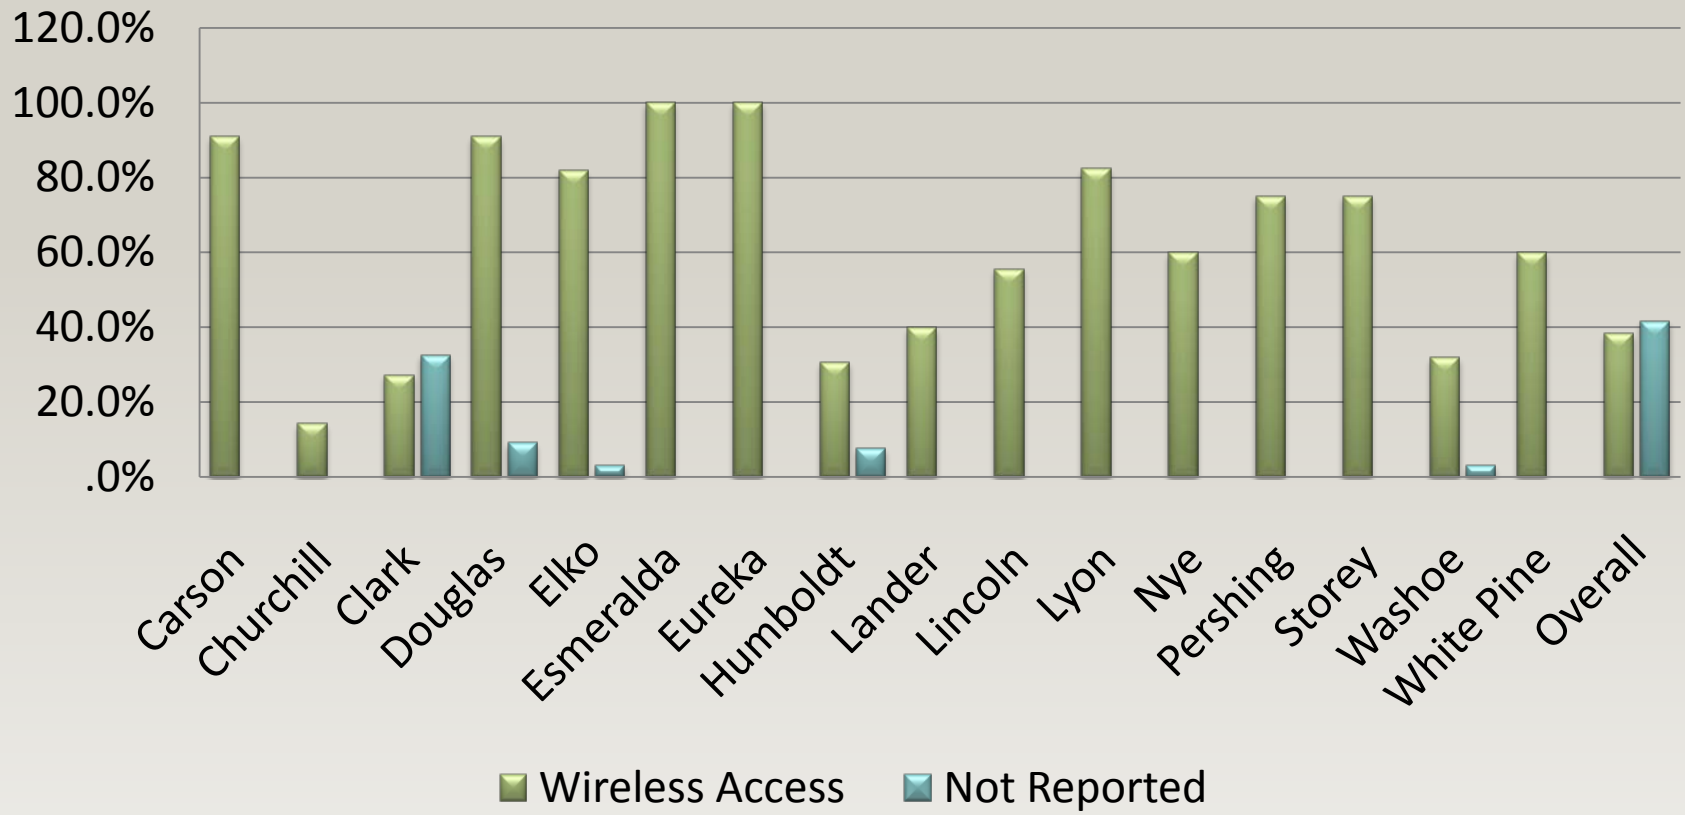

Connectivity

**Percentage of Student Computers Connected to Internet
via High Speed Connection by District**

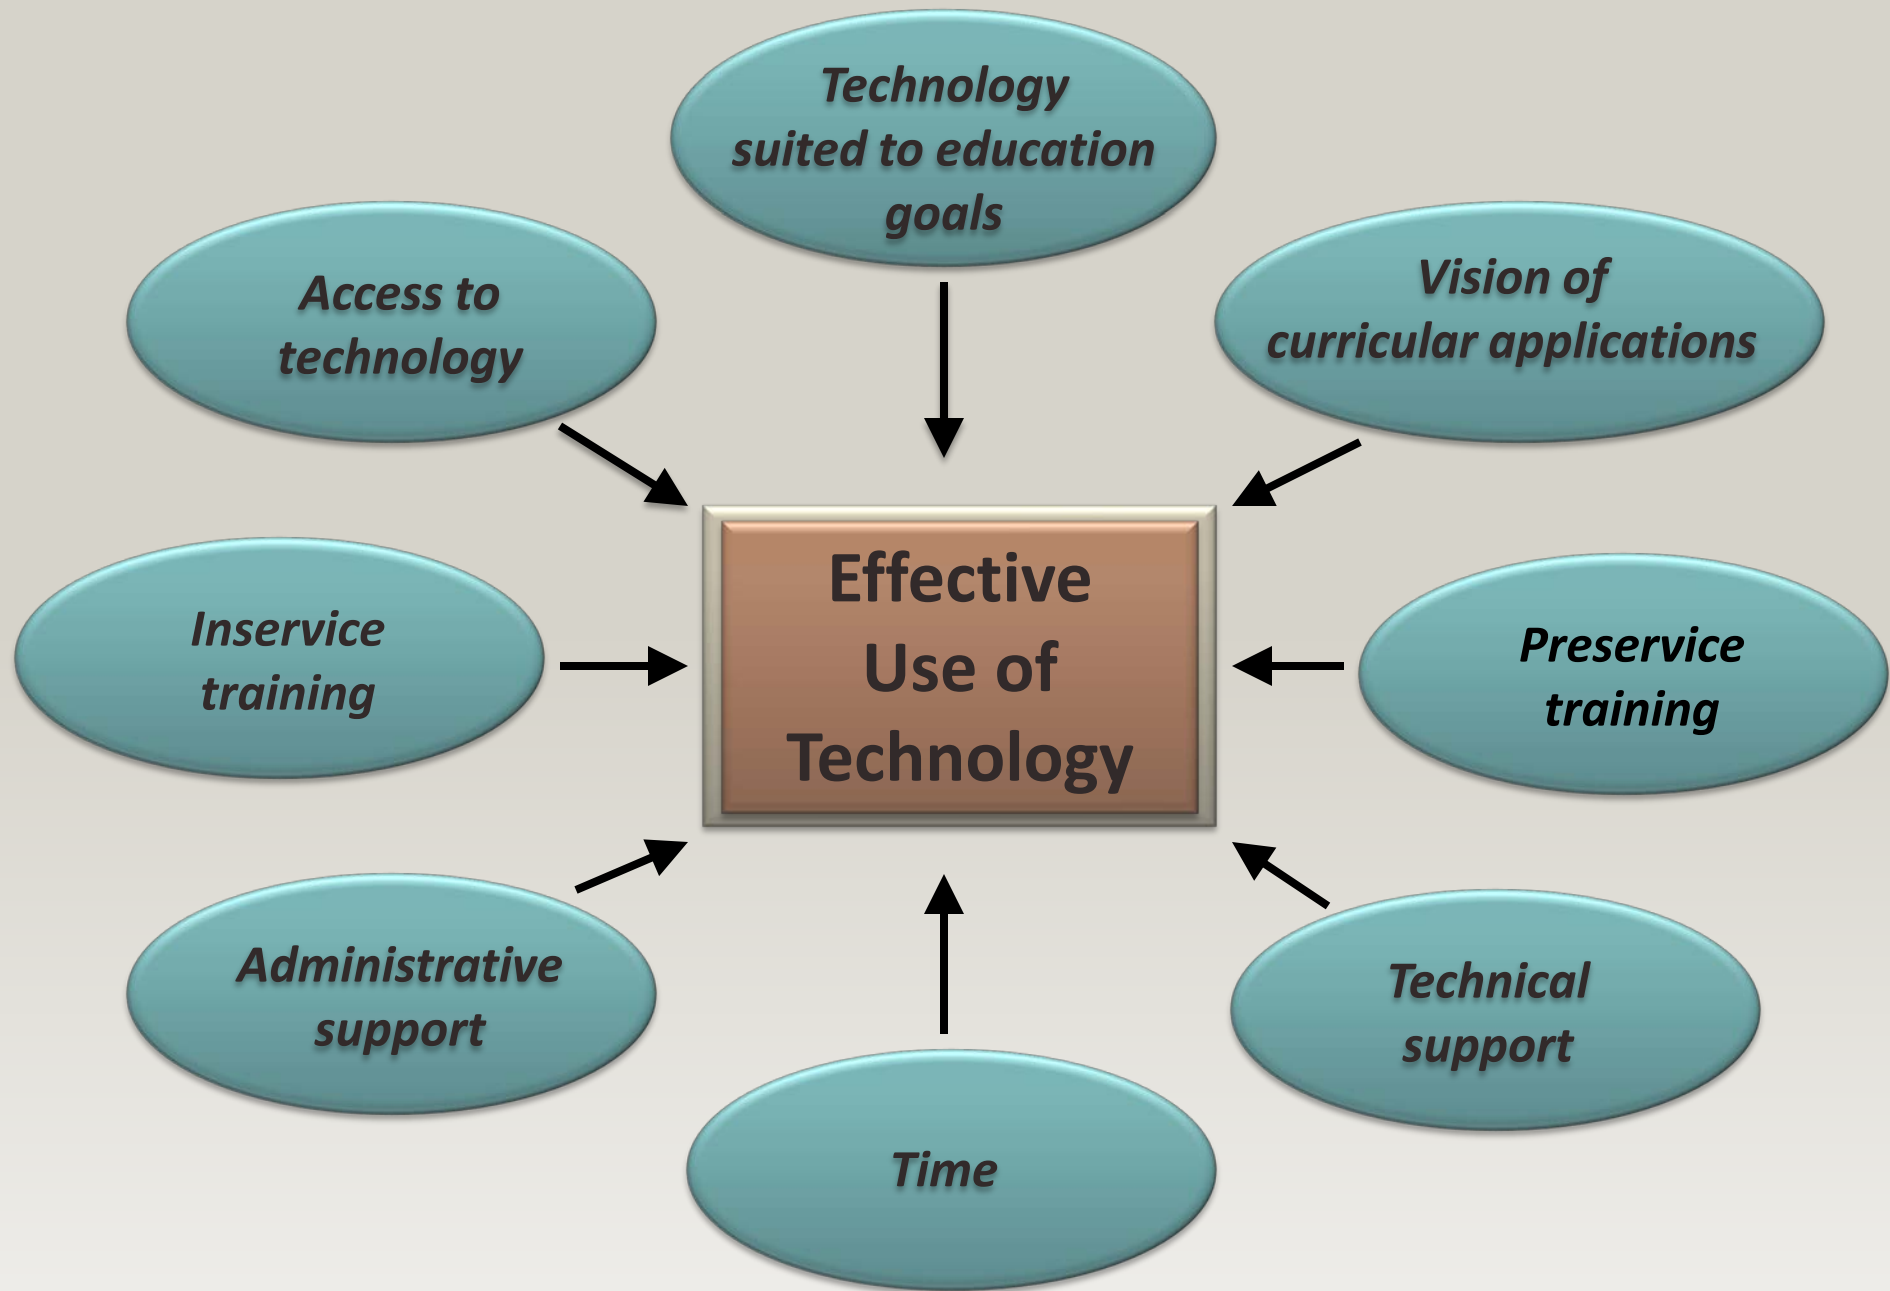

Connectivity

Percentage of Schools with Wireless Internet Access

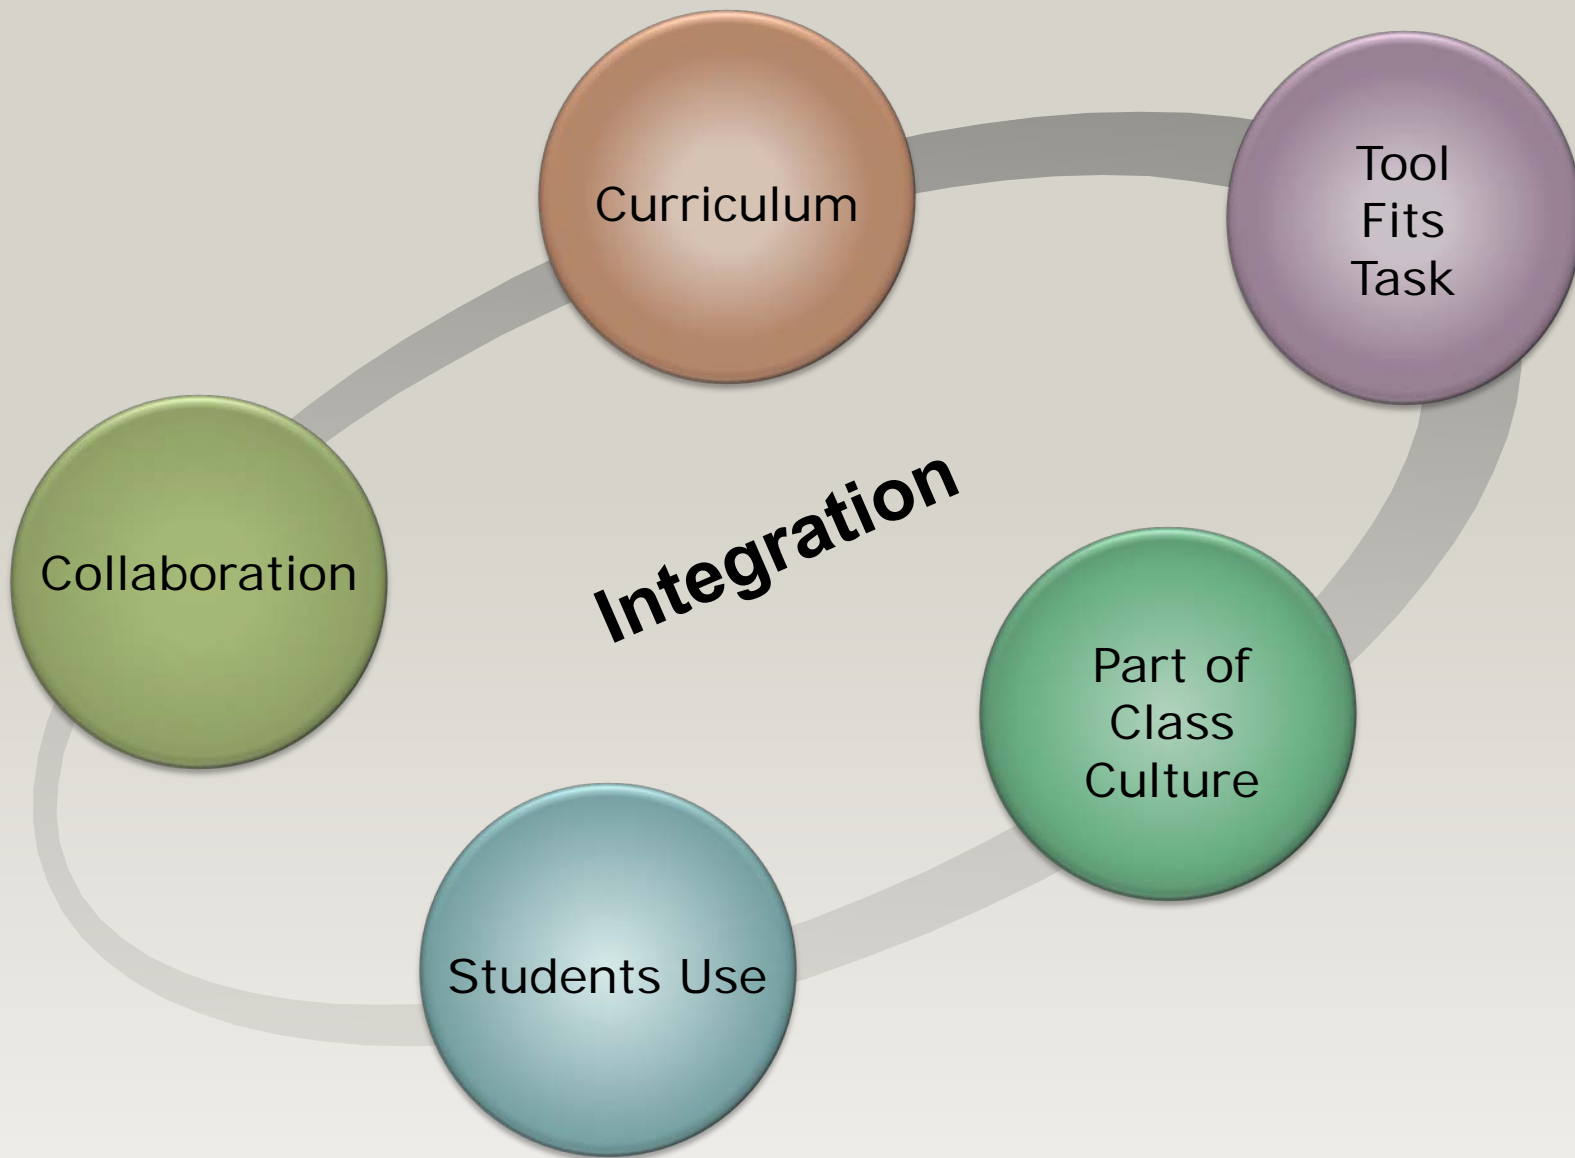

Professional Development

A faded background image of a classroom or computer lab. Several students are seated at desks, each with a computer monitor. One student in the foreground is looking at a monitor, while others are visible in the background, also working on computers. The overall tone is light and educational.

Technology integration across the curriculum to engage digital learners

Successful Integration

Lander County School District

“Smart Boards are used in the Lander County School District classrooms daily. United Streaming information is downloaded onto smart Boards to be used in classrooms. Teachers are also provided with web cams and CPS systems to help them receive instant results on their Smart Board screens.”

Obstacles to Successful Technology Integration

Clark County School District

“...Aging equipment, in turn increases demands on technical support resources. Technology support of learning needs to be woven into curriculum documents and resources for teachers, making clear suggestions for how to use these tools for a variety of activities...”

Obstacles to Successful Technology Integration

Humboldt County School District

"Money"

Lander County School District

"Top Results: time; training/professional development; need for equipment/Smart Boards, Projectors, and Elmo's; Money; need of additional newer computers."

Lincoln County School District

"Insufficient hardware and software, or any supporting replacement schedule, exists to promote systemic change...Lack of sufficient Internet bandwidth, coupled with restrictive legislation, discourages innovative use of online resources and hampers any effort at incorporating online technology initiatives."

Funding Allocated to School Districts

Budget Year	Funds Allocated
1997	\$ 36 Million
1999	\$ 4.2 Million
2001	\$ 9.95 Million
2003	\$ 10 Million
2005	\$ 9 Million
2007	\$9 Million Funding Rescinded
2009	\$ 4.2 Million

A faded background image showing several people in an office setting, working at desks with multiple computer monitors. The image is semi-transparent, allowing the text to be overlaid clearly.

Evolution of the Commission

Accountability

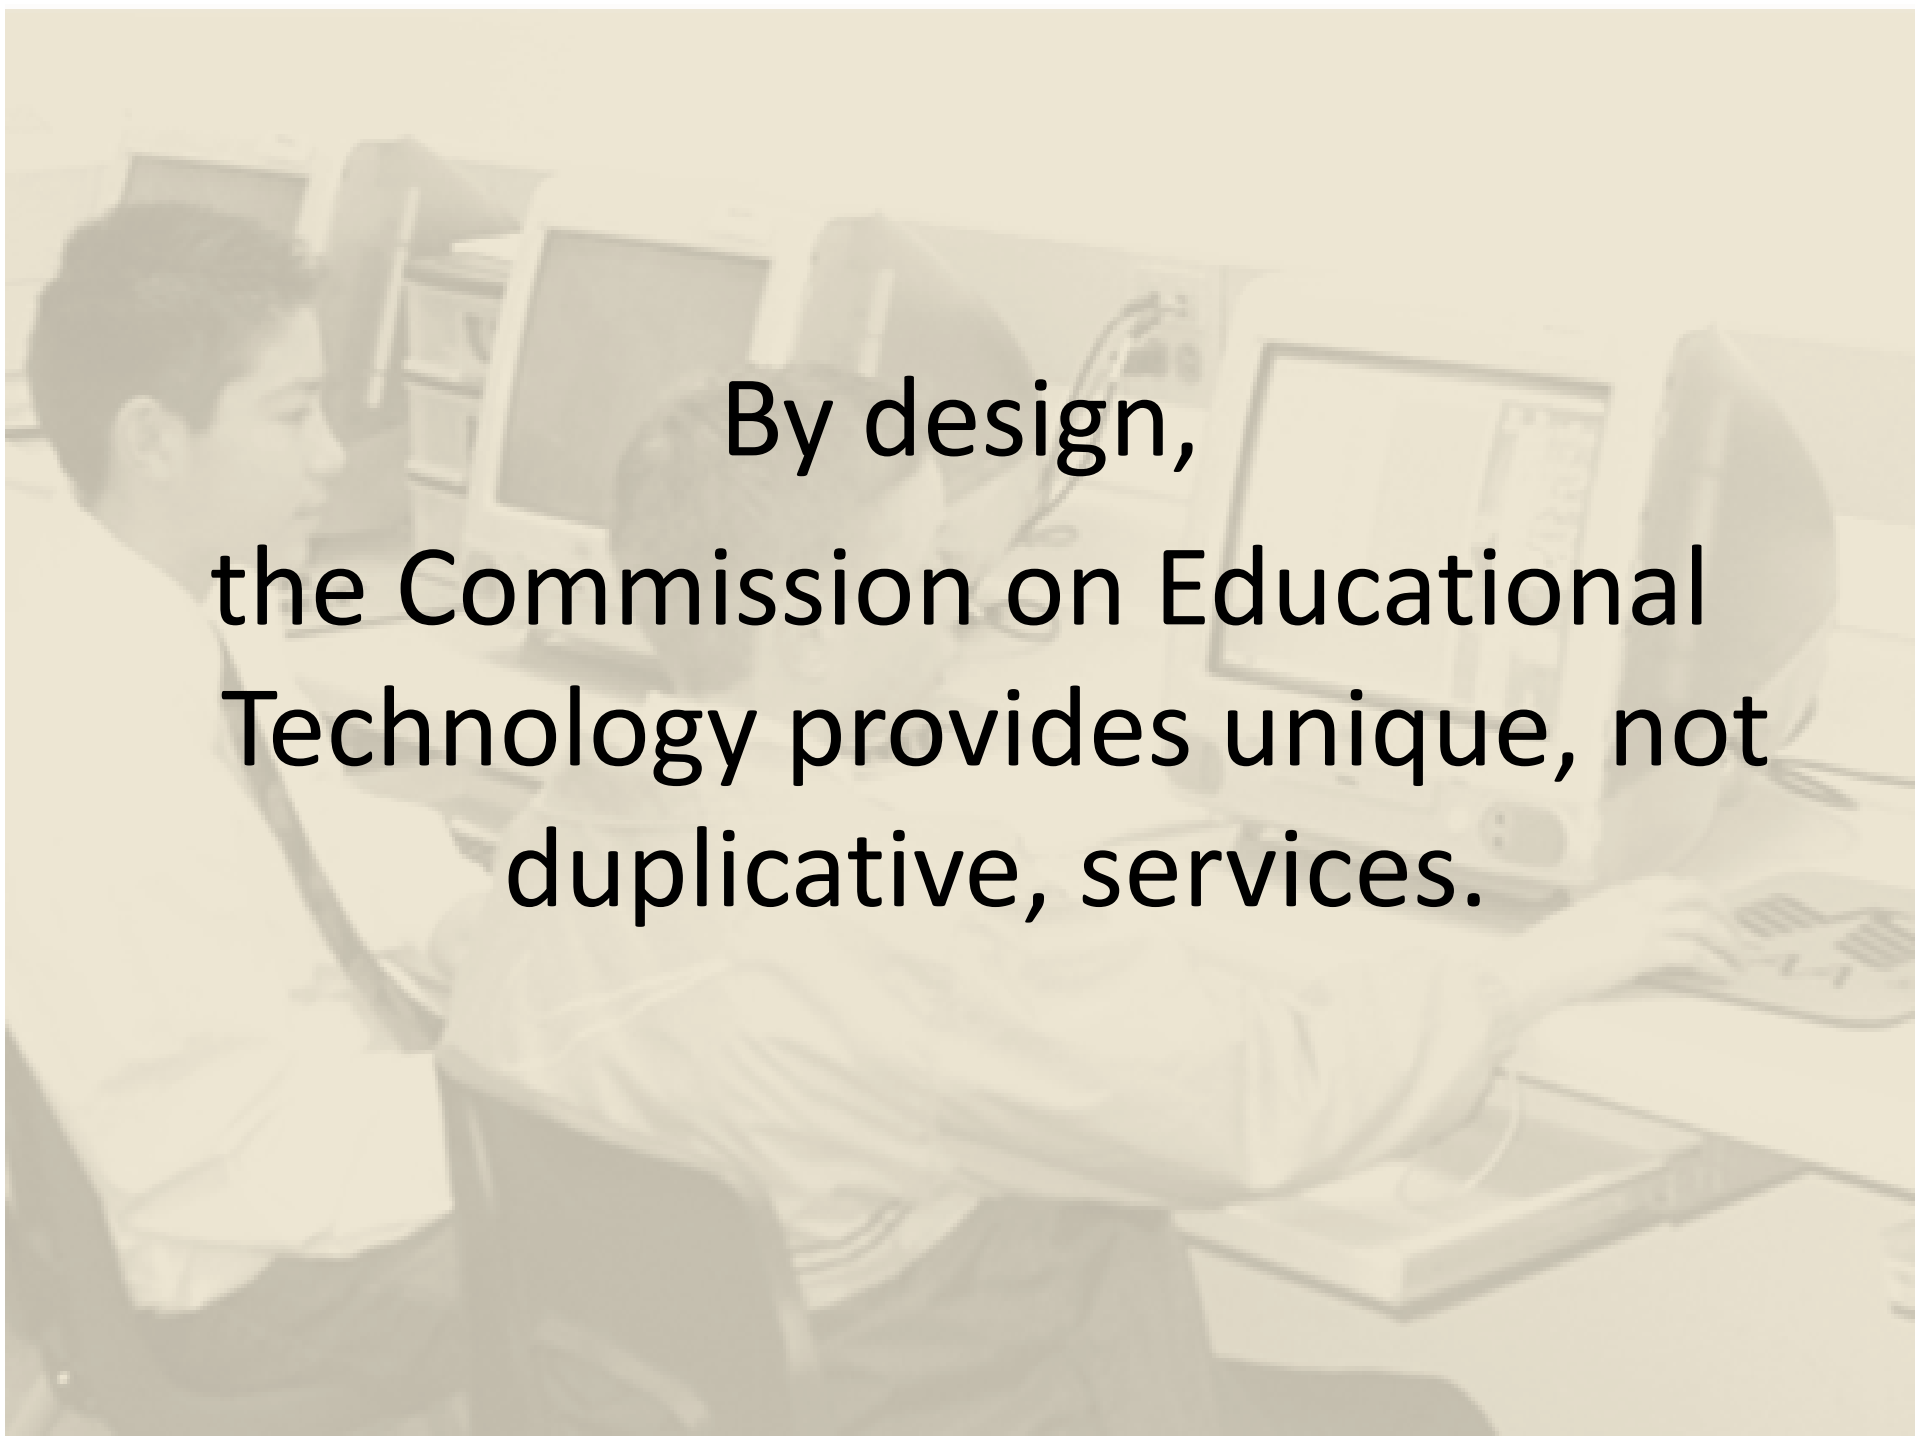

Specific Categorical Funding

Flexible Categorical Funding

Accountability

Today's Commission

- Allocation of Funds
- November Meeting
- Ensuring Federal & State Dollars are Maximized
- Site visits to schools – Elko, Humboldt, Clark, Washoe
- February Meeting
- Oversight Funds

The background of the slide is a faded, light-colored photograph of a classroom. Several students are seated at desks, each with a computer monitor. One student in the foreground is clearly visible, looking at a screen. Other students are visible in the background, also working at their computers. The overall tone is educational and technological.

By design,
the Commission on Educational
Technology provides unique, not
duplicative, services.

Next Steps

- Communication beyond it's current sphere
- Keep the components that are functioning well
- Meaningful integration of technology into the curriculum
