COLLEGE DATA

WCSD Class of 2004 College-Going Rate

Percentage of 2004 High School Graduates Immediately Enrolling in Post-Secondary Education¹

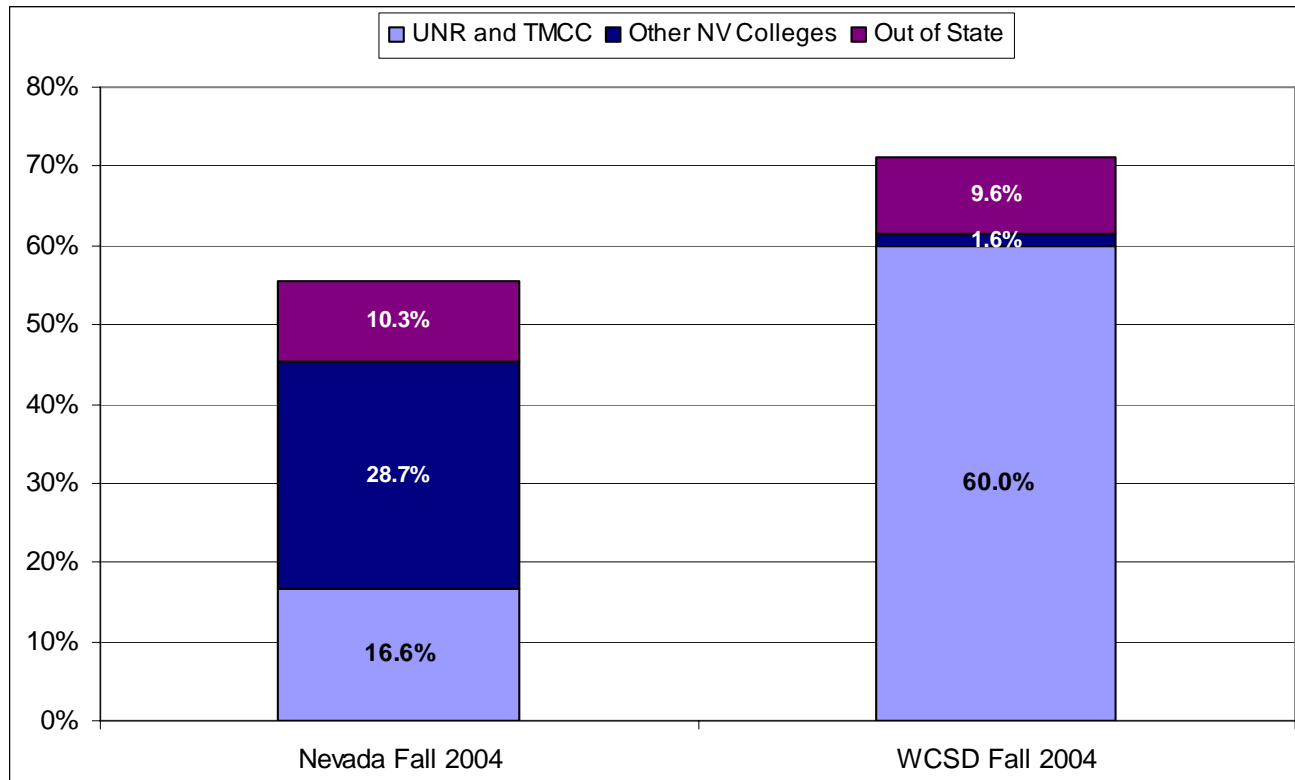

¹ Only high school graduates with standard diplomas are included in the percentages depicted in the college going rate charts. In all other charts in this profile, WCSD rates include adjusted diplomas. Additionally, the Nevada and national rates include charter and private high schools, but the WCSD rate does not. The national rate shown here is based on different data than the national rate reported in previous Data Profiles and is now more closely comparable to Nevada and WCSD rate calculations.
