Elementary Schools Promotion Breakfast Participation Increase

November 1-25, 2003

Senior Workers were given the goal at the October Senior Worker meetings to increase their breakfast participation for the month of November. Ideas included having the school office announce the availability of breakfast during morning announcements, posting signs around the school inviting students to eat school breakfast, starting a breakfast club and making sure that the students who were qualified for free or reduced lunch knew that they could also receive a breakfast at the same price. Also discussed was the importance of heating cinnamon rolls and donuts for the students who preferred them hot, and making sure that enough of the hot tray was ordered so that the last student in line was offered the same choices as the first student.

Each Senior Worker was given a chart to record the number of breakfasts the first day of the promotion, midway through the promotion, and the last day in order to chart progress toward reaching their goal.

Evaluation

Breakfast participation for the month of November increased overall by 12% district-wide. The promotion emphasized to Senior Workers the importance of high participation in the breakfast program and put focus on ways to make their breakfast programs more appealing to their customers. The promotion was planned and implemented in a few short weeks with very little added expense.
