

Dear Chair Yeager and Members of the Legislative Commission.

Attached is Plug In America's Executive Director's letter of support for the Clean Cars Nevada rule. We thank you for representing the state of Nevada in considering this important step forward to significantly improve the future of transportation for all Nevadans.

Please let me know if PIA can ever assist the Legislative Commission in helping advance electric vehicles in your state over the months and years to come.

Sincerely,

Pete Chipman

Re: Clean Cars Nevada - LCB File No. R093-20

Chair Yeager and Members of the Legislative Commission:

Plug In America appreciates the opportunity to provide comments in support of Permanent Regulation R093-20, the Clean Cars Nevada rulemaking. As consumer advocates for over two million electric vehicle drivers in America, of which over 11,000 are registered in Nevada, Plug In America strongly supports the Legislative Commission's efforts to accelerate the adoption of electric vehicles in the state by adopting rules that will give Nevadans more freedom to choose from the growing list and affordability of electric vehicles available from auto manufacturers.

Plug In America has been a full participant in the Nevada Clean Cars (NCC) coalition's engagement with NDEP and State Environment Commission on this matter, and we urge the Legislative Commission to continue with their recommendation of the proposed regulation by now adopting these rules. Our supporters in Nevada are passionate, and we have attached to this letter a list of the 67 Plug In America supporters who signed our petition in support of the Clean Cars Nevada rulemaking.

Plug In America will continue to participate with the NCC in ensuring that the Clean Cars Nevada rulemaking process is seen through to adoption. We thank the Legislative Commission again for listening to the voices of Nevadans who want access to a clean transportation future, and the significant economic and social benefits therein.

Sincerely,

A handwritten signature in blue ink that reads "Joel Levin". The signature is written in a cursive, flowing style.

Joel Levin
Executive Director of Plug In America
