

**PLEASE READ MY COMMENTS OUTLOAD AT THE MEETING...I am unable to attend.**

I strongly oppose Vaccine Mandates in general and in particular for College and University Students.

First - it is clear that the "vaccines" do not prevent transmission. So how does it make sense to mandate them on campus? The virus can still spread among the students.

Second - It is UNCONSTITUTIONAL. We Citizens have autonomy over our physical bodies and NO ONE can mandate that we inject an experimental drug into our bodies with conditions attached if we do not. These mandates violate a higher law: the Nuremberg Code. Stop this MARXIST agenda from moving forward.

Third - especially for college age males the risk of Myocarditis is much greater than the risk of the Covid19 illness. Many young athletes all around the country and world are dropping dead with heart complications. Where is YOUR HEART?

Please stop this illogical and insane imposition on the American People. Respect our liberties. The people pushing these mandates are not doctors, none of them have actually treated and cured a Covid19 patient.

Vaxxed get the virus. Un-Vaxxed get the virus. The only sane and logical thing to do is to bolster one's immune system and get prepared. There are so many safe and effective early treatments that work, that stop the vaccine in its tracks.

It would be far cheaper and more effective to furnish every student with a nebulizer and food grade hydrogen peroxide and teach them to do a breathing treatment at the first sign of illness or after exposure to any sick person.

Come on get some brains. Get some guts and DO THE RIGHT THING!!!

Janet Schleimer
