

I am opposed to Covid-19 Vaccine Mandates, especially a permanent vaccine for Covid-19 which appears to be evolving into a milder virus. Although my family has chosen to get the Covid-19 vaccine, I think mandating Covid-19 vaccines is highly irresponsible. Schools have never mandated a new vaccine before. Vaccines have been on the market for 6- 8 years before they have been mandated in the past. We still don't know the long-term effects of the Covid-19 vaccines and the reports coming in of blood clots and myocarditis are troubling! And since the vaccines neither stop infection or spread, their effectiveness is questionable. Each person should make the risk assessment for themselves.

Sincerely,

Anjanette Milham
