

Dear Jordan Hass,

I am writing to you asking you to stop this experimental vaccine from being forced on the public.

I read the following article: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7280638/> . It is completely apparent that many researchers are rushing to vaccinate people for their trials. The researchers explain that the need to rush is because we are in a pandemic.

I ask you, Mr. Hass, are we really in a pandemic?

Also, from this article, the words "could **save considerable time** and many lives. But they may initially seem **unethical because they expose healthy volunteers to a live virus that is killing many people** and for which no cure exists".

Are you ready to hang your whole reputation on voting for something that may expose healthy people to a live virus that is killing many people? Are legislatures really in a position to decide the fate of innocent people who are being forced to be vaccinated with a live virus.

Your name, Jordan Hass, will be attached to the lives of many people if something goes wrong. Are you prepared for that?

Thank you for your consideration,

Susan VanNess
