

I am opposed to any COVID vaccine mandates in Nevada. These vaccines have been rushed through, and are not safe. If you and other legislators mandate it, you should agree to be financially liable for any and all harm that may come to those who are forced to have these shots that are known to cause serious, and sometimes deadly, reactions. I, and everyone else I know, are aware of people who have had horrible reactions to these shots. Why do you want to see people harmed by these shots? People who choose to get the vaccine should be allowed to get it; people who don't want it should not be forced to get it. Please do the right thing.

Thank you. Vicki Parson
