Biotechnology & Natural Resources

Need

- Domestic violence offenses continue to increase and even greater increases during COVID-19
- Nevada consistently ranks in the top five states in the nation for the number of domestic violence fatalities

Domestic Violence High Risk Team Model

- Developed by the Jeanne Geiger Crisis Center
- Uses a victim-centered coordinated community response system model
- Communities that have implemented the DVHRT model report:
 - Zero homicides
 - Reduced re-assault
 - Increased use of domestic violence services
 - Improved offender accountability

DVHRT IMPLEMENTATION COMPONENTS

SITE ASSESSMENT & CUSTOMIZATION

- DVHRT and DA-LE Partner Orientation webinar
- Assessment of the DV response system
- Determination of estimated case volume
- Customize Model to community

FOUR-PART DV AGENCY TRAINING SERIES

- Supervisor Training
- Danger Assessment Certification Training
- Risk Assessment Skills and Realities Training
- Identification and Response to Strangulation Training

DA-LE IMPLEMENTATION

- Development of DA-LE Policy
- Development of protocol for connection of high-risk victims to DV services
- DA-LE Train the Trainer event
- DA-LE Officer training
- DA-LE data collection

PROSECUTOR TRAINING

- DA-LE Overview and Strangulation Training

JUDICIAL TRAINING

- DA-LE Overview and Strangulation Training

OPERATIONS TTA

- DVHRT Operations Training
- DVHRT Operations Calls
- DVHRT data collection

POST-IMPLEMENTATION TTA

- DVHRT and DA-LE data analysis
- DVHRT meeting observation and feedback
- Troubleshooting
- Additional training as needed

Unique Elements

- Trauma-Informed Care training required for all DVHRT partners.
- Trauma-Informed Care expert embedded in DVHRT pilots.
- Eligible survivors and their children referred to Extension's Heart and Hope Family Violence Prevention Program.

Pilot Project Goals

- Implement two DVHRTs:
 - North Las Vegas – urban site
 - Elko County – rural site
- Funding
 - SFY22 STOP sub-grant award AG's Office
 - Extension county and state funding
- Outputs
 - 185 high risk survivors
 - 164 offenders

EXTENSION

College of Agriculture,
Biotechnology & Natural Resources

Outcomes

- Early identification of high-risk cases
- At least 90% of victims report no re-assault
- At least 90% of victims use domestic violence services
- 0 domestic violence related homicides
- At least 79% of cases have criminal justice intervention
- At least 60% of offenders detained pretrial

Biotechnology & Natural Resources

Next Steps

- Document and report outcomes
- Identify best practices and lessons learned in Nevada's urban and rural settings.
- Scale model throughout the entire state.
- Seek funding from DOJ ICJR and other sources.
