

I am asking all Legislators on the Legislative Commission to vote AGAINST this proposed NAC update.

Parents are the guardians of their children. This proposed change of REQUIRING all babies born in Nevada to have blood samples taken and retained at the State Public Health Laboratory is an invasion of the babies privacy and invasion of parental rights. This is a case of STATE over reach.

Please either change the wording to, “an offer is available to have your baby....”

Or, vote this down.

Sincerely,

Claudia C Fisher
