Subject: School board members election versus election
Date: Monday, August 8, 2022 4:28:38 PM

It has come to my attention that a recent proposal to be heard by the LCB would take away the right of the public/parents to ELECT school board members and place SELECTION/APPOINTMENT of those members in the hands of other bodies. The education of our children and those people who oversee it should never be taken from the hands of the parents. Parents must always be involved in every piece of the education of their children to ensure the greatest level of success. They are, afterall, our children not the government's or the school board's or the teachers' union's despite recent beliefs by certain political factions those bodies to the contrary. I do not support this action in any way. The people who oversee the education of our children must be left to the parents and the CITIZEN voters of Nevada to decide/ELECT. It's not up to bureaucrats elected or unelected. I demand this remain a process of ELECTION not SELECTION. This sentiment is echoed by every voting member of my household.

Regards.

Julie Ideker
