

We need elections by paper ballots and voting at the precinct level. HAND-COUNT and same day reporting.

This is important for the Integrity of our vote and the trust of our voters. Voters want transparency and retaining their privacy with their VOTES BEING HAND COUNTED. (not by machines that can be manipulated.)

They want to be able to go to their precinct, vote in person and know that their votes will be counted.

I have canvassed our district to only find that mail out ballots have been sent to vacant buildings and this is unacceptable and does not gain the trust of the voters.

I am a precinct committee person for my district in Incline Village, NV (#8106)

We have plenty of willing citizen volunteers to be trained/vetted and resourced to implement these hand counts that have historically been successful.

Thank you.
