

Ballots have to be counted electronically only. Hand count is slow, tedious, a complete waste of time and energy, and most of all unreliable. There are many residents of this (Nye) county whom I would not trust with handling my ballot. The counters are volunteers and unvetted. This is dangerous and unacceptable.

I also do not trust the county clerk's motives in insisting on hand counting. He is a known election denier and supporter of the Big Lie. I hope the commission makes the common sense decision and rejects hand counting in any form and for any reason from now on.
