

Statewide Taxable Sales: Monthly

Carson City Taxable Sales: Monthly

The chart displays the US Treasury's foreign debt in billions of dollars from July 1997 to July 2023. The blue line represents the actual debt, which is highly volatile, while the red line represents the trend, which is smoother. The debt starts at approximately 17 billion in 1997, rises to about 28 billion by 2006, and then experiences significant fluctuations, including a major spike to over 50 billion in 2011 and a sharp drop to nearly -30 billion in 2014. The trend line shows a general upward trajectory, reaching approximately 38 billion by 2019, followed by a period of relative stability and a slight decline towards the end of the period.

Date	Actual Debt (Billions of Dollars)	Trend (Billions of Dollars)
Jul 1997	17.0	17.0
Jul 1998	18.0	17.5

Esmeralda County Taxable Sales: Monthly

The chart displays the growth of the U.S. money stock over a 26-year period. The blue line shows high volatility, with a major peak of approximately 78 million dollars in early 2007. This was followed by a sharp drop to around 22 million dollars by late 2009. The red trend line shows a long-term upward trajectory, starting at about 18 million dollars in 1997 and reaching over 40 million dollars by 2023. The data indicates a period of rapid expansion in the early 2000s, a period of contraction and stabilization around 2009, and a subsequent period of growth through 2023.

Storey County Taxable Sales: Monthly

The chart displays the real gross regional product (GDP) for Georgia from July 1997 to July 2023. The Y-axis represents the value in millions of dollars, ranging from 200 to 1,200. The X-axis shows the time period in quarters, with labels every two years from Jul 1997 to Jul 2023. The blue line represents the monthly data, which is highly volatile, showing significant fluctuations throughout the period. The red line represents the quarterly data, which is a smoothed version of the monthly data, showing a more stable trend. The GDP starts at approximately 350 million dollars in July 1997, rises to about 600 million by 2006, dips to around 450 million in 2009, and then recovers to about 1,000 million by 2012. It continues to rise, reaching a peak of nearly 1,200 million in early 2020, before experiencing a sharp decline to around 800 million in mid-2020, followed by a recovery to approximately 1,050 million by July 2023.
