Compacts vs. Universal Recognition

	Universal Recognition	Interstate Compacts
Requires practitioners to abide by the scope of practice of the state in which they are practicing	☑	☑
Allows for expeditious interstate movement of practitioners during emergencies	☑	☑
Reduces barriers for out-of-state practitioners aiming to practice within your state	☑	☑
Reduces barriers for in-state practitioners aiming to practice in multiple states	✗	☑
Allows military spouses to maintain a single home-state license for the duration of the service member's active duty, regardless of relocations, without submitting a separate application to each state's licensure board	✗	☑
Allows practitioners to work in multiple states, both in person and via telehealth/telework, without submitting a separate application to each state's licensure board, requiring verification of the current license, or obtaining a new background check	✗	☑
Brings together a coalition of states to establish uniform and enforceable interstate licensure standards that are narrowly tailored to the public protection requirements of a specific profession	✗	☑
Enhances public protection by creating a multi-state database of licensure information to facilitate collaboration on license verification and investigations of potential misconduct	✗	☑
Allows multistate practice without requiring the practitioner to change state of residence	✗	☑
