

2023 DOMESTIC VIOLENCE HOMICIDE REPORT

NCEDSV's Domestic Violence Homicide Report is compiled using publicly available resources and archives. Knowing that domestic violence is nuanced and not every incident is publicized, we recognize that there may be deaths not accounted for in this report. However, this report is intended to acknowledge and highlight the tragedy and lethality of domestic violence in Nevada and to raise awareness of its prevalence.

Homicide incidences used in this report were determined as domestic violence related based on Nevada's legal definition of domestic violence defined under NRS 33.018.

Domestic violence affects more than just victims. This report includes the deaths of bystanders in the total number of lives lost as they were directly involved in an incident of domestic violence.

HOMICIDES BY MONTH

- Most public record documents use gender binaries, we acknowledge there may have been victims that identified out of the binary.
- Of victims killed, 80% were women and 20% were male.
- One victim killed her perpetrator in an act of self-defense. She lived.
- There were three additional attempted murder-suicides where the victim died and the perpetrator survived.
- The two perpetrator deaths via law enforcement's use of deadly force were not included in this total as they were not domestic violence homicides.
