To my elected state representatives-

I abhor this practice of wildlife killing contests and the excuse of controlling coyote populations is ludicrous. Science has shows that coyotes breed more when their population numbers are down. A simple google search can tell you that but I've included an article for your reference. Any lawmaker that does not take steps to end this practice and actually help reduce coyote populations by letting them live in their habitat naturally (instead of driving them out by inhumane hunting practices and pushing them into cities and towns) is simply ignorant and a poor excuse for a human being. Do your jobs. I'm sick of this crap.

Sincerely

Dijana Besicmann
