As a citizen of Incline Village, I am very concerned about the continued approval of development in the Lake Tahoe Basin. The threat of wild fires is a constant concern and continued development only exacerbates the problem. Inadequate and outdated evacuation plans currently in place are insufficient for safe evacuation of the current population. I urge the Commission to consider the serious consequences of further development in the Tahoe Basin. Wild fires have become a regular consequence of climate change. Your decisions in this regard could lead to disastrous results in the not too distant future, or they could bring safety and security to those of us who live here.
