You don't often get email from melvin_nario@yahoo.com. [Learn why this is important](#)

Dear Members of the Legislative Commission:

I write in support of the regulations adopted by the Nevada State Board of Medical Examiners on June 26, 2026, implementing Senate Bill 124 and the Transitional Limited Physician (TLP) license pathway.

Nevada continues to face a shortage of primary care physicians. SB 124 created a supervised pathway for qualified, internationally trained physicians to practice adult primary care in this State while working toward unrestricted licensure. The adopted regulations give that statute a clear, workable structure: a written practice agreement, defined supervision, regular competency review, Board reporting, and limits that protect patients.

These rules are necessary for the pathway to function. Without them, supervising physicians and qualified candidates cannot complete the required practice agreement or begin supervised practice in a manner the Board can review and approve. Approval of the regulations will help place additional primary care physicians in Nevada clinics under accountable supervision.

I respectfully urge the Legislative Commission to approve LCB File No. R112-25.

Thank you for your consideration.

Respectfully,

Melvin Nario
