# SEXTING CASE

Two female middle school students were at a birthday party and took/sent nude photographs of themselves from their cellular phones. One of the male middle school students befriended the girls at the party. The girls sent the nude photos to the male student, who later had his phone taken away because his mother could no longer afford it. The phone was given to an adult male who was friends with the male students father. The photos remained on the phone and the adult male posed as a high school student and text the girls who sent the nude photos. The females kept talking to the man and he then threatened that if they did not send more nude photos, then he would put the photos he had of them on-line.
