Hello,
I am writing in opposition of SB1 (previously SB509). I urge the legislators to heavily consider the people requesting the people's much needed public funds. These are not serious business people, and all they're looking for is another handout for a stadium scam that they as billionaires can fund themselves. Especially in a premium destination like the magical strip of Las Vegas. They should be paying to relocate here! Instead they will be taking revenue from other surrounding activities and evading property taxes in that area that will be much needed to fund the stadium in the first place. But what hurts more is the need of improving the education system, homelessness, infrastructure, etc. There is better use of these public funds than giving to this rushed bill that's already costing time and money. Please say No on SB1.

Thank you,
Edgar Legarreta
