

AB 161 Proposed Amendments:

NRS 483 Drivers' Licenses; Driving Schools and Driving Instructors

Section 1: Add a mental health professional acting within their scope of practice as an eligible provider to provide the diagnostic statement.

Add a new Section 4 which reads as follows: "All law enforcement officers, new and continuing, must be trained on the designation."

Renumber Section 4 to Section 5.

What these changes will do:

These changes will allow people with autism, who may have anxiety surrounding traditional doctors, the capability to receive a diagnostic statement from a mental health provider instead. In addition, this change would require all law enforcement officers to be trained on the autism driver's license designation.
