My name is Emily Welsh. I am part of Assembly District 31 and am writing to you to urgently pass AB162. This will halt the harmful impact that neonicotinoid pesticides have caused on so many levels. There have been numerous studies documenting the detrimental effect this pesticide has had on all types of life, including us humans. The impact it has had on pivotal species, such as pollinators and song birds have shown how damaging this chemical is to our ecosystem. The younger generation pleads with us to make a difference for the future, so why would there be any other consideration than to show that you are listening to them and want to make that positive difference. Please make the right decision!

Thank you!

Dear Natural Resources Committee,

I live in Assembly District 25, and I support AB 162 as amended. Bees are vital to our food systems and public health, and neonics are threatening the health of bees and the communities they serve. Please vote in favor of banning the sale and use of neonics for ornamental use.

Thank you,
Emily Stapleton

March 1,

Dear Committee of Natural Resources:

I support the approval of AB162 AS AMENDED to ban the sale of Neonic pesticides for ornamental use in the state of Nevada for the following reasons: 1. A healthy bee population is critical to the successful growth of food. 2. Honey Bees are being destroyed at an alarming rate in Nevada - the highest in the country 3. Ornamental use of Neonic Insecticide has immediate and long term negative consequences to our food supply and the resilience of our state.

Please vote to approve this bill.

Please help create a positive future for our children, grandchildren, and all the pollinator species we depend on for our food!
