

*Sec. 25. 1. Every individual has a fundamental right to reproductive freedom, which entails the right to make and effectuate decisions about all matters relating to pregnancy, including, without limitation, prenatal care, childbirth, postpartum care, birth control, vasectomy, tubal ligation, abortion, abortion care, management of a miscarriage and infertility care. The right of an individual to reproductive freedom shall not be denied, burdened or infringed upon unless justified by a compelling State interest that is achieved by the least restrictive means available.*

*2. Notwithstanding the provisions of subsection 1, the State may regulate the provision of abortion care after fetal viability, provided that in no circumstance may the State prohibit an abortion that, in the professional judgment of an attending provider of health care, is medically indicated to protect the life or physical or mental health of the pregnant individual.*

*3. The State shall not penalize, prosecute or otherwise take adverse action against an individual based on the actual, potential, perceived or alleged outcome of the pregnancy of the individual, including, without limitation, a miscarriage, stillbirth or abortion.*

*4. The State shall not penalize, prosecute or otherwise take adverse action against a provider of health care, who is licensed by the State, for acting consistent with the applicable scope of practice and standard of care for performing an abortion upon, providing abortion care to, or providing reproductive care services to an individual who has granted their voluntary consent.*

*5. The State shall not penalize, prosecute or otherwise take adverse action against any individual or entity for aiding or assisting another individual in exercising the right of the individual to reproductive freedom with the voluntary consent of the individual.*

*6. Nothing herein narrows or limits the rights to equality and equal protection.*

*7. As used in this section:*

*(a) "Compelling state interest" means an interest which is limited exclusively to the State's interest in protecting the health of an individual who is seeking reproductive health care that is consistent with accepted clinical standards of practice.*

*(b) "Fetal viability" means the point in a pregnancy when, in the professional judgment of an attending provider of health care and based on the particular facts of the case, there is a significant likelihood of the sustained survival of the fetus outside the uterus without the application of extraordinary medical measures.*

*(c) "Least restrictive means" means in a manner that restricts or infringes upon the autonomous decision-making of an individual to the slightest degree possible while furthering a compelling state interest.*
