

Dear Senate Legislative Oper. & Elections Committee: 03/21/23

SJR7

Please OPPOSE SJR7. This bill does not provide any protection for the unborn. Allowing abortion after the 1st trimester is just plain murder. How is abortion all the way to term, a fundamental right? After the 1st trimester the fetus has formed as a person and is developing inner organs. It feels pain when it's being ripped apart by abortionists. Maybe people should watch an abortion being done and see if they still feel this is a fundamental right. It amazes me that there is more protection for convicted criminals who have brutally murdered people, but no protection for an infant who has committed no crime! Criminals on death row can't be executed because lethal injection is inhumane. Abortion is humane?

The double standard is blinding! A person, who shoots a pregnant woman and both the mother and the baby are killed; is arrested for a double murder. But cruelly aborting an innocent baby will bring no charges against the pregnant individual, the health care provider or individual aiding or assisting. This bill adds more protection for anyone involved in an abortion. Abortion should not be allowed after the 1st trimester.

Vote NO on SJR7.

Thank You,

Ann Sweder
