

Support Testimony, SJR7, Joel Falgout, Resident SD15

Hello Chair and committee members. My name is Joel Falgout and I am writing this support testimony to show my support for Senate Joint Resolution 7. As a man, my reproductive freedom has never been questioned. It has been a constant for my entire life. The same cannot be said for my wife and other individuals who can get pregnant. I have four children and the future I want for them includes reproductive freedom not forced procreation. I would also always choose my wife and uphold any decision she wanted to make with her body. The pregnant person is the one who goes through the physical, mental, and emotional changes that pregnancy causes. I cannot imagine not being able to save my wife in the event her life was endangered due to complications from pregnancy or delivery. I would choose my wife every single time because she is the mother of my children and they need her. Please support SJR7 so we can ensure future generations have reproductive freedom. Thank you for your time.
