

Katree Darriel Saunders for the Record.

"I am opposed to the current format of AB322, which would ban kratom unless the Nevada Board of Oriental Medicine lists it as a registered product. However, I am supportive of the concept itself as smoke shops need regulation in regards to quality, purity, etc. for kratom. I would like to see AB322 amended to require smoke shops to register with the state and to comply with certain quality and purity standards."

Sincerely,
Katree D Saunders
