

Vote no on ACR7. Nevada does not need new taxes. What Nevada needs is to stop giving free benefits to people who are not here legally. I believe that's where most of the new tax money will go, as I've seen the many bills that are being presented. If you managed the state of Nevada like it was intended, i.e. taking care of the citizens who are here legally, a new tax might not be needed. It appears you are giving away more money than is available and are now willing to chase away the very people who create jobs. That never ends well. How many free benefits does one need? Helping those "in need" get a job, would be the better answer. Nevada currently has plenty of benefits available if they were not abused by those who should not be receiving them. We don't want any more government services given away "equitably". Try cutting taxes and rein in the giveaways for those here illegally and the need for free benefits might go down. Please vote NO.
