

Vote NO on SB394 - A property tax increase for the schools.

Washoe County schools do have many problems and money is not the issue. I have 5 children so am well aware of what goes on in public schools. I also have experience with homeschooling, online schooling as well as Christian and Charter schools. I have done it all.

Money is NOT the issue. The curriculum, the social environment, the teachers, the principals to name a few could be the problems. I have seen students thrive in conditions where little money was involved. It appears there is always a fall back blaming lack of money. Asking for more money is easier than asking if the curriculum (Common Core) or the school social environment (agendas being pushed instead of school subjects - creating a hostile, chaotic, non moral environment in the school and classroom) is detrimental to a child's learning. The student discipline policy, teacher's performance, the principal, the list could go on regarding the decline in Nevada education. The schools are also being overwhelmed with illegal alien children which present other challenges the legal citizens of this state should not be asked to support with more money.

Money is always desirable as it can be used for or by people in exchange for favors, pushed curriculum, agendas and more that is not necessarily advantageous to the children. This is nothing new.

If we are really concerned for the education of our children, some real research that won't increase someone's wealth but will benefit our children should be done.

The citizens of Nevada are already overtaxed and trying to stay afloat.
