

Hi,

I am writing this letter to help with the passing of SB 330. I was diagnosed with breast cancer in January 2022. I had two lumpectomies and five weeks of radiation. In January 2023, I went in for my yearly mamagram. I need to have a detailed 3D due to my history of breast cancer. I was pulled aside and told my insurance might not cover it. I was shocked...this is something I must have yearly for the rest of my life.

Please insure that every woman that needs a detailed 3D mammagram because of previous breast cancer, will be covered by her insurance.

Best Regards,
Lori Guidotti
