

AB319

Dear Legislator,

The intent of public school has always been to provide children with an education. Nevada does a very poor job at educating it's children. Now turning schools into a social welfare system is preposterous. Providing free meals to children is not in the purview of the schools nor should it ever be. Parents are to provide for the physical and emotional needs of the children; it is their responsibility. Nevada already has multiple welfare systems in place to assist parents who need it when it comes to providing for the physical necessities of their children. Please STOP redundantly throwing our tax dollars away. The fiscal liability and damaging repercussions to the State of Nevada from this bill is staggering.

Vote NO on AB319.

Sincerely,
Reva Crump, M.S.
