The Nevada Senate's Simulation Experience

## INTRODUCTORY REMARKS FOR BILL SPONSOR

*Prepared for uLegislate*

*Note: Use of this speech is optional in the uLegislate simulation. If you would like to make your own arguments in support of the piece of legislation, please do! But if you would like some help, we have written these introductory remarks, which you can make immediately after the Secretary of the Senate reads the bill and the President asks for remarks.*

### ASSEMBLY BILL 182

Designates neon as the official State Element of Nevada.

### INTRODUCTORY REMARKS:

Thank you, (Mr./Madam) President. This bill designates the chemical element known as neon as the official element of the State of Nevada. Our state's unique history has long been spelled out in vibrant, colorful, glowing neon tubes. There is no other art form more closely tied to the cultural identity of the Silver State than the art of neon signs, which have been synonymous with Nevada now for nearly a century. From the first neon signs welcoming visitors to our state to the crazy glowing vehicles that now swarm around the darkened Black Rock playa at the Burning Man festival, neon remains a constant element of our welcoming, adventurous spirit as Nevadans. For these reasons and many more, I propose that Neon be adopted as Nevada's official State Element.
