A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 1

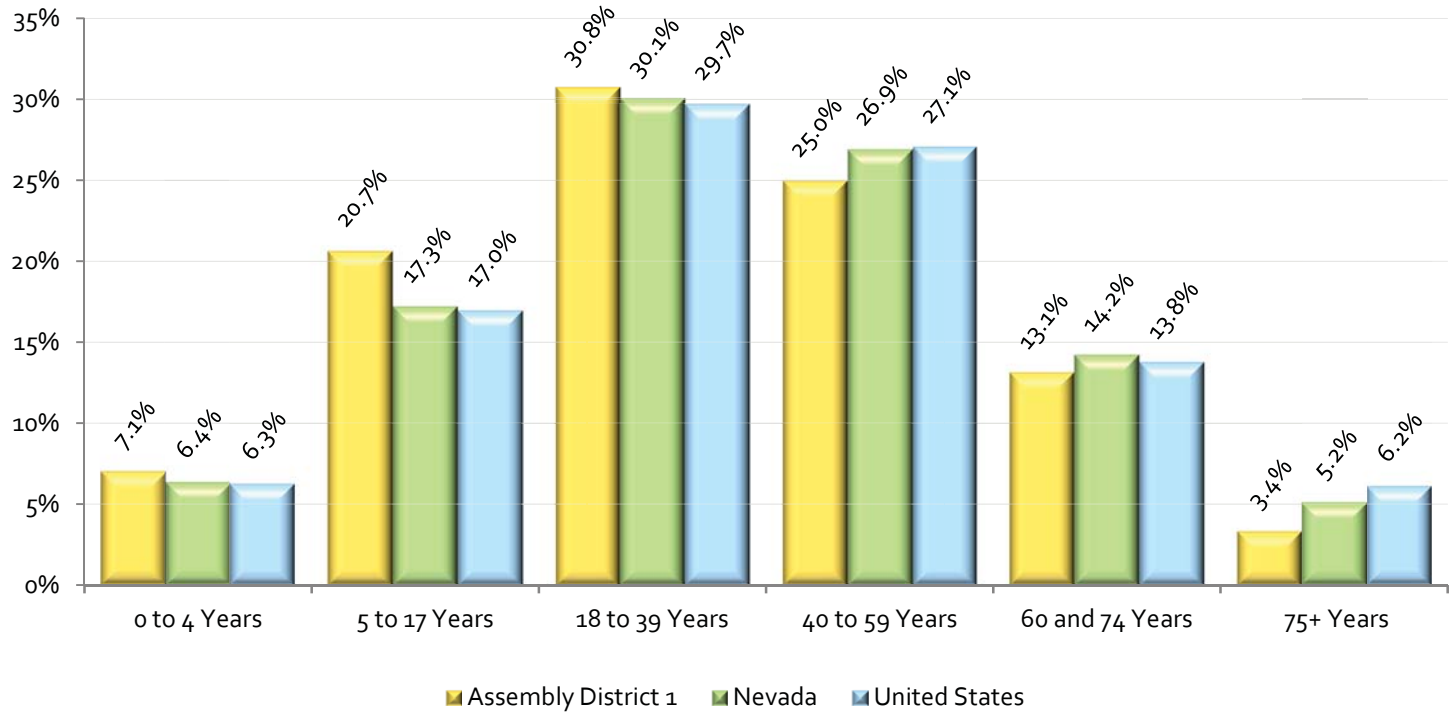

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 1	69,627	33,973	48.8%	35,654	51.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 1	4,929	14,396	21,416	17,393	9,141	2,352
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

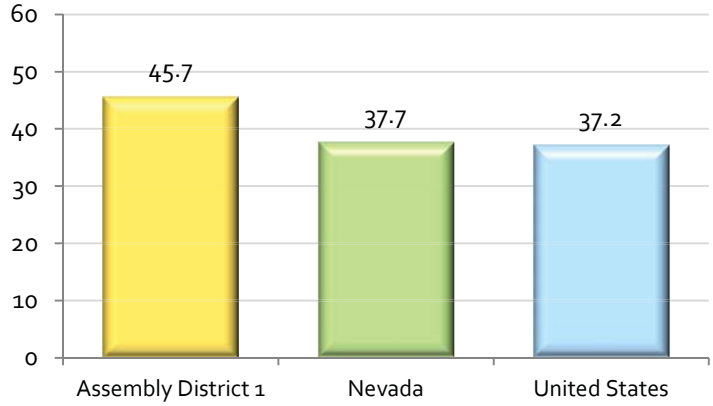

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

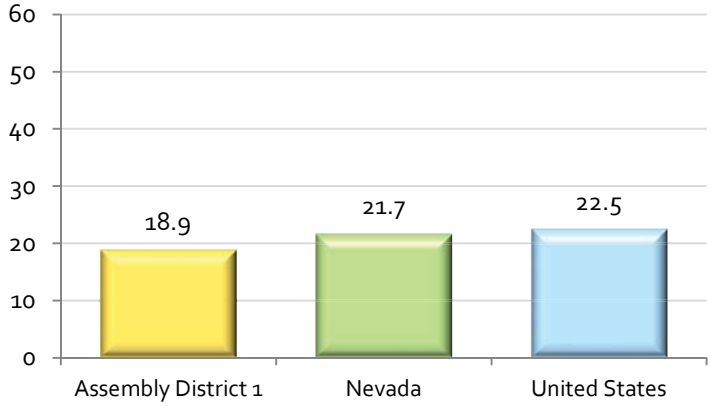

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 2

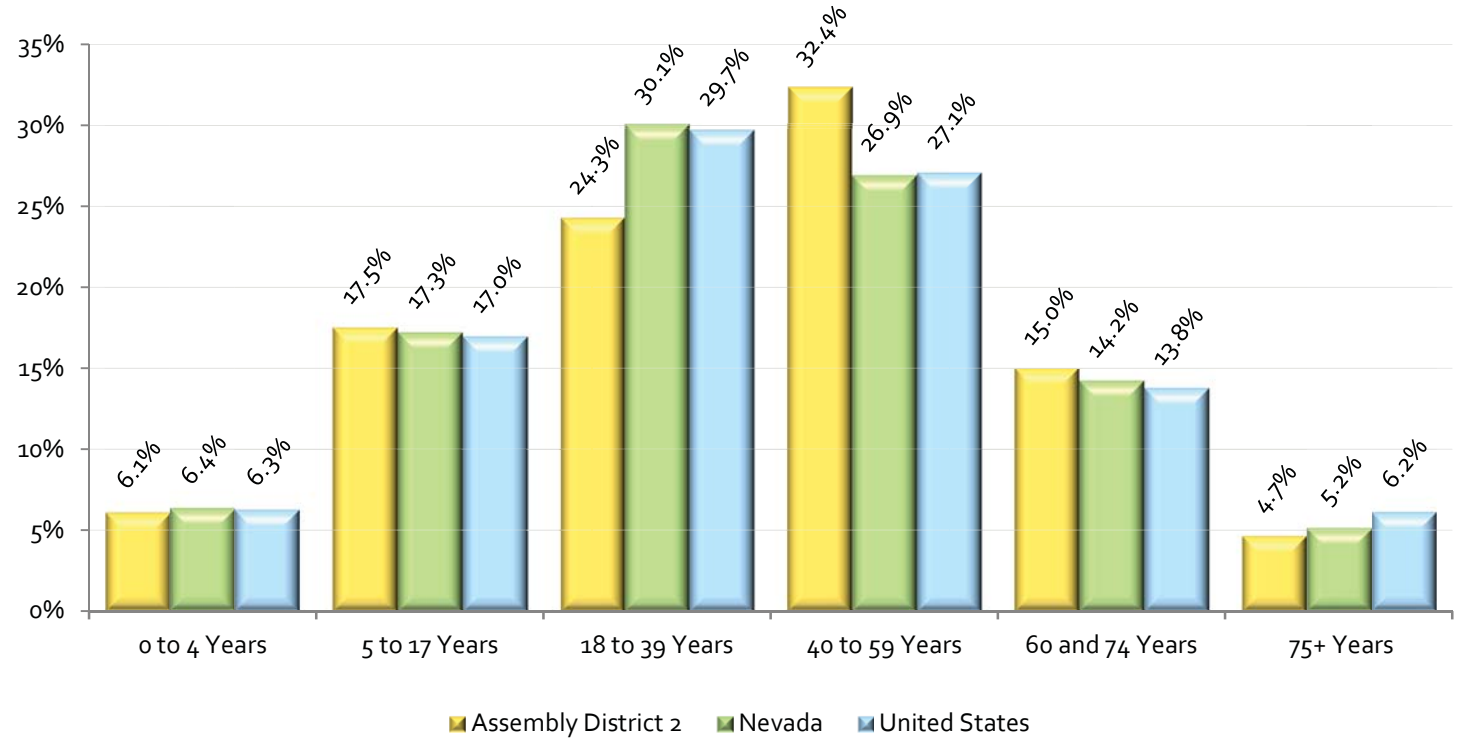

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 2	65,777	32,880	50.0%	32,897	50.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

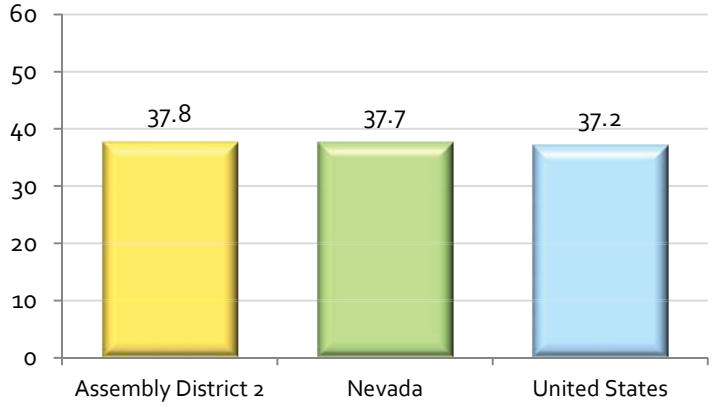

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

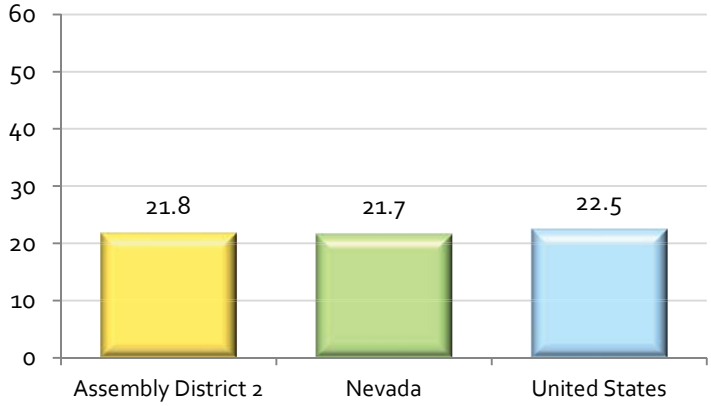

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 3

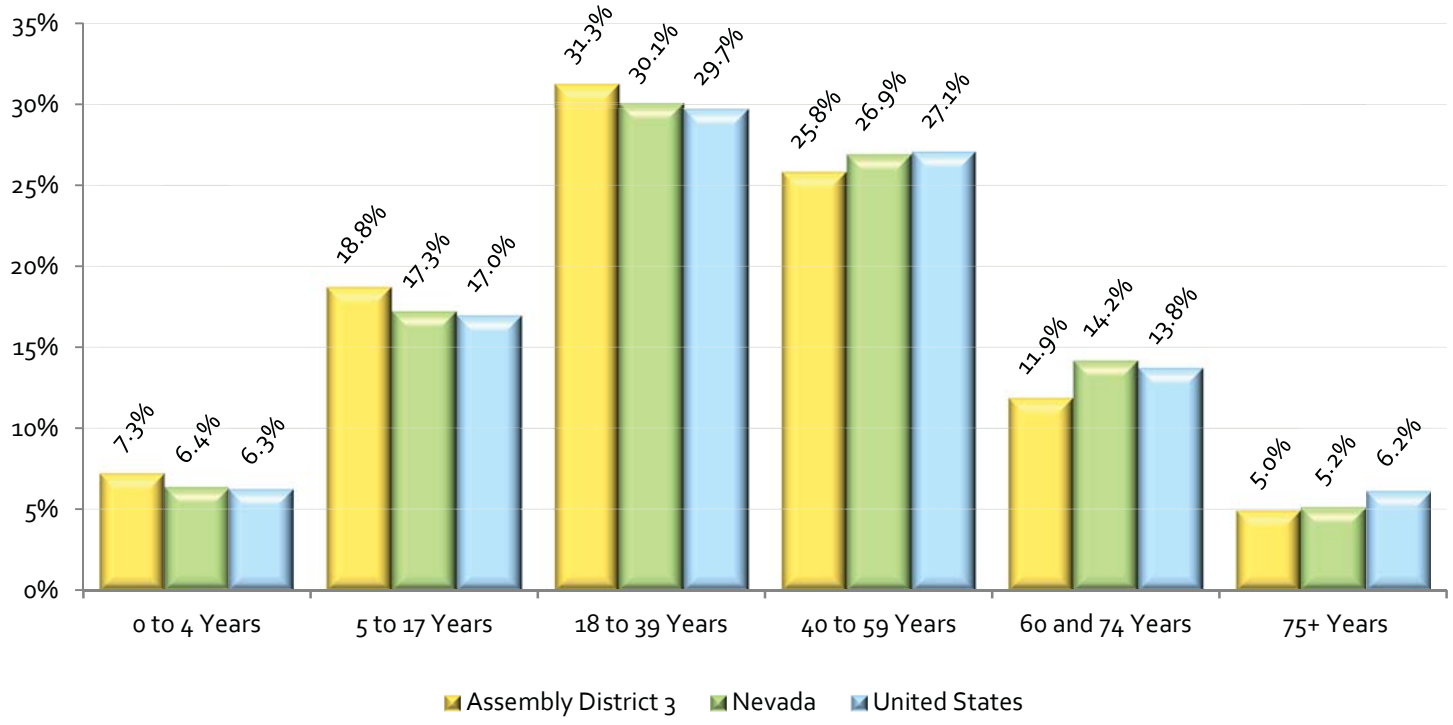

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 3	66,532	34,200	51.4%	32,332	48.6%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

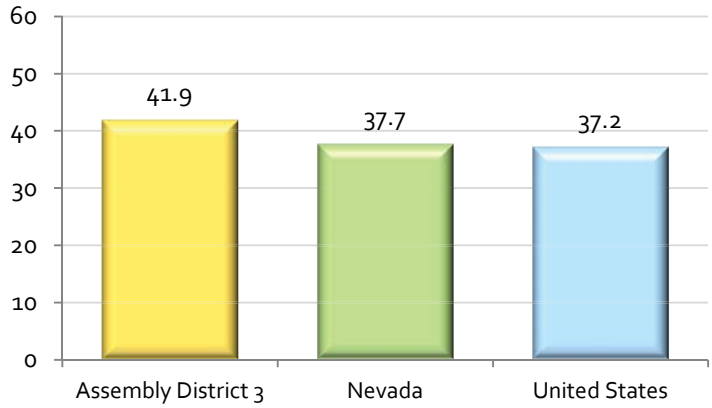

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

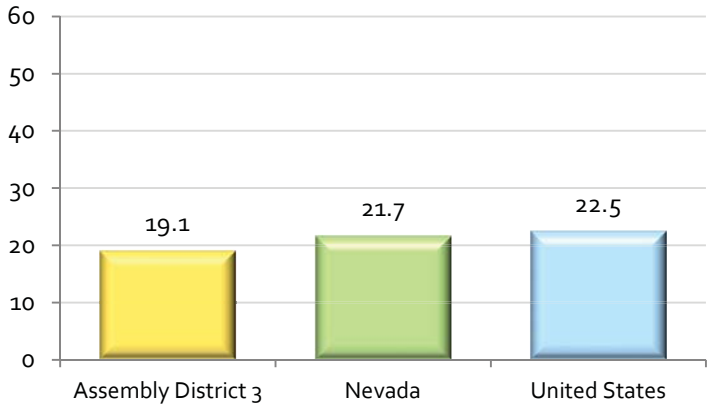

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 4

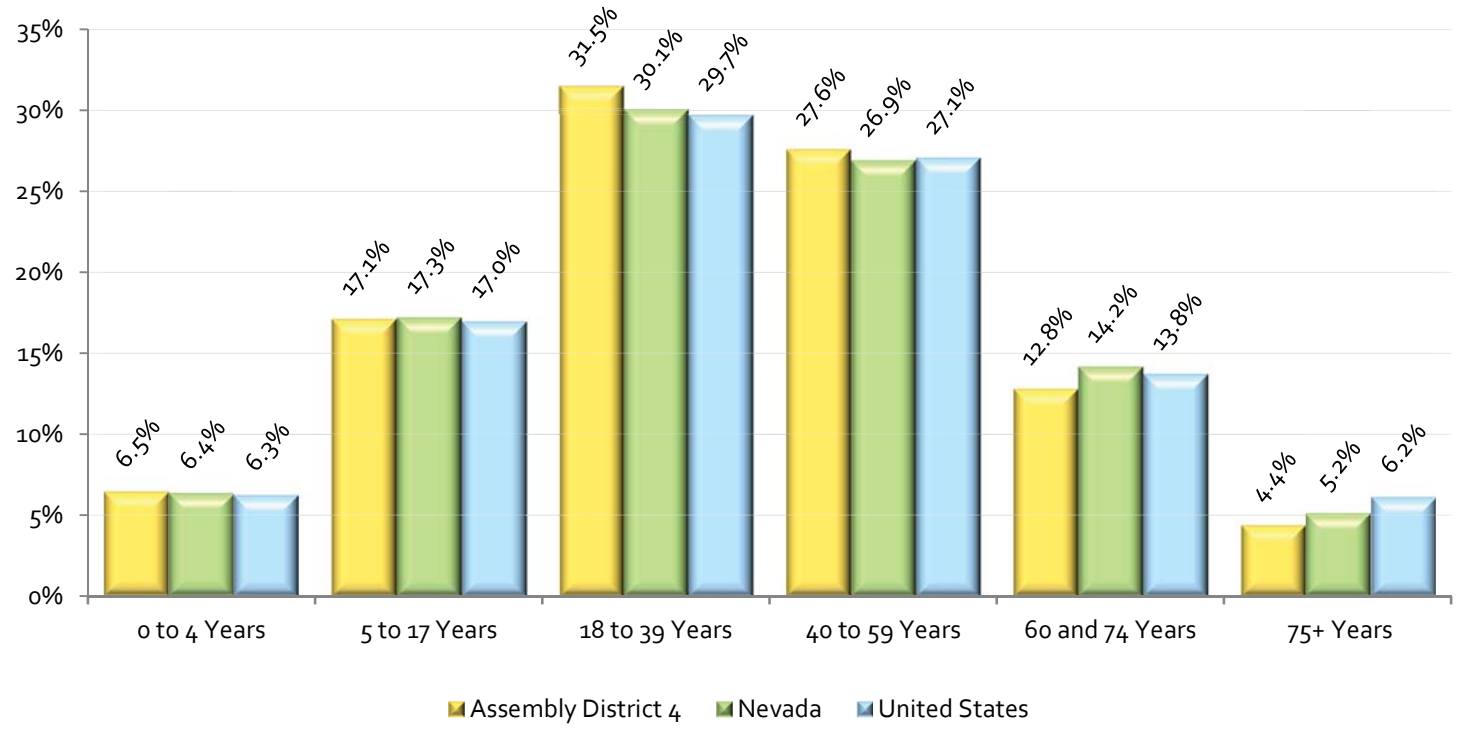

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 4	72,637	35,524	48.9%	37,113	51.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 4	4,719	12,455	22,892	20,038	9,311	3,222
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

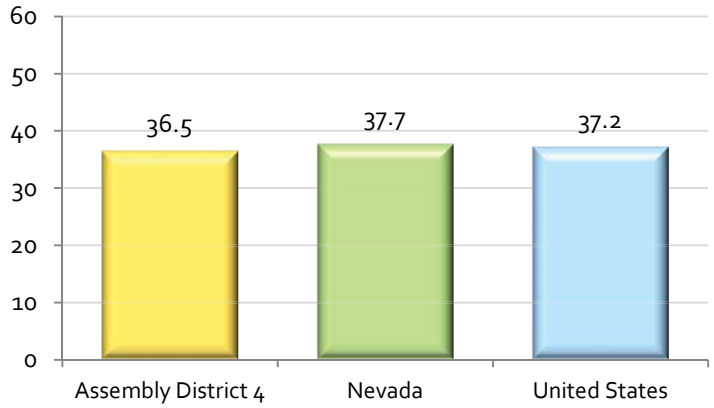

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

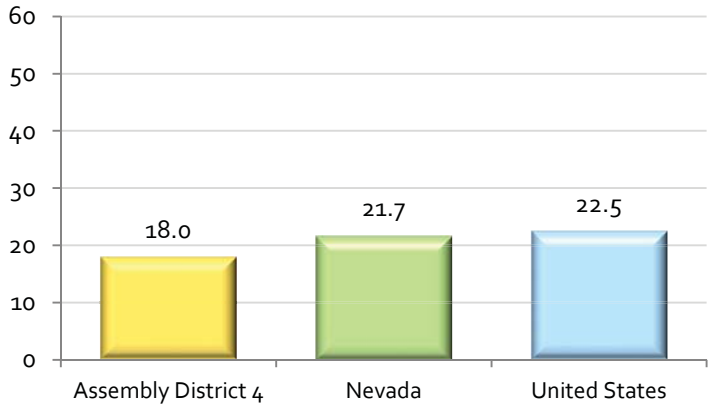

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 5

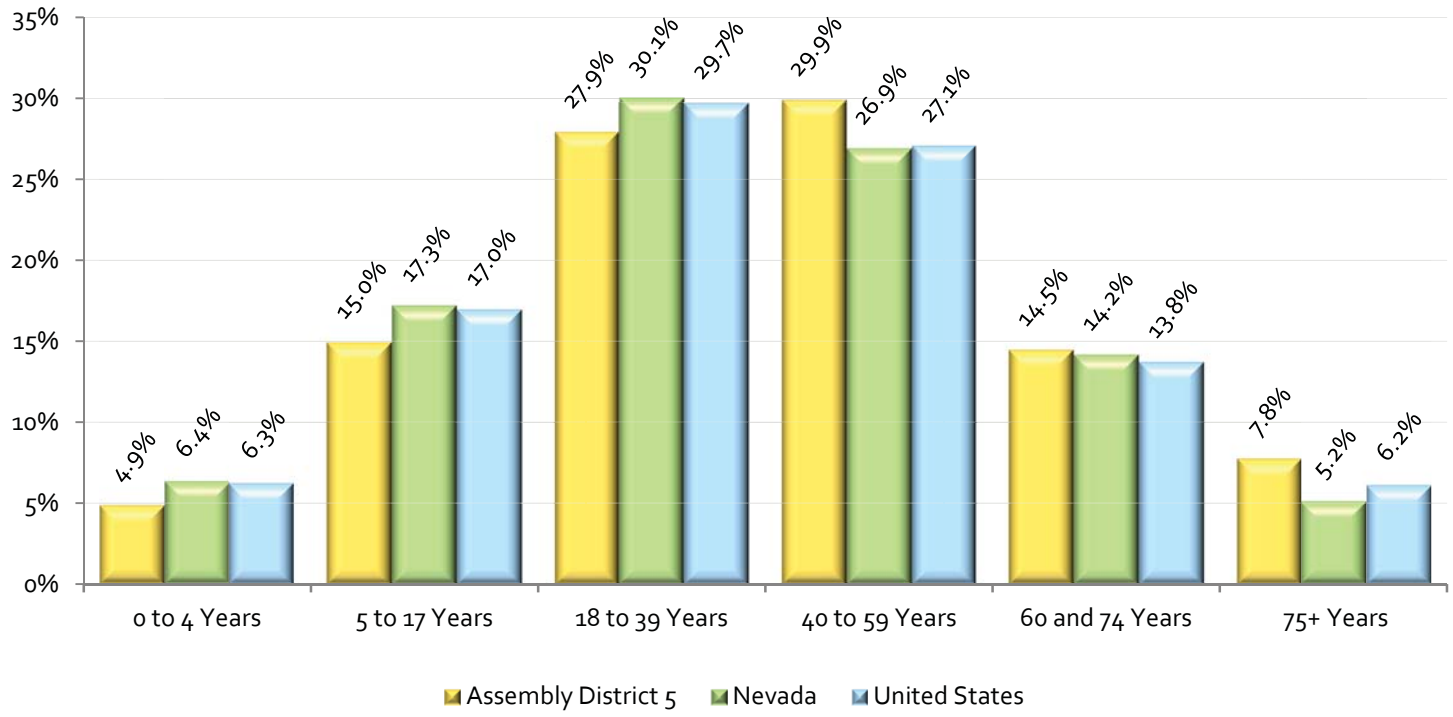

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 5	64,170	31,084	48.4%	33,086	51.6%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Chart 1--Population Distribution by Age

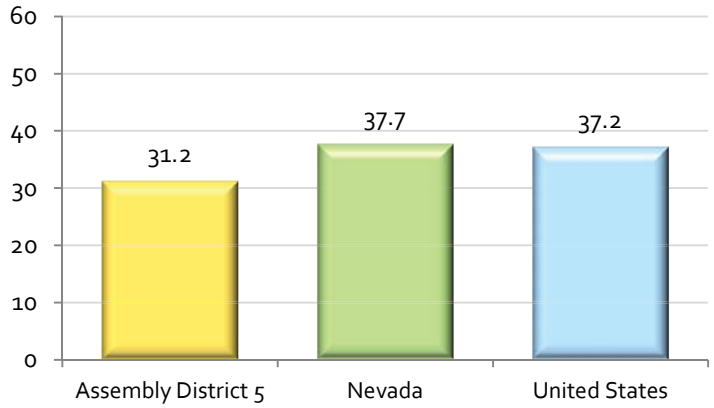

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

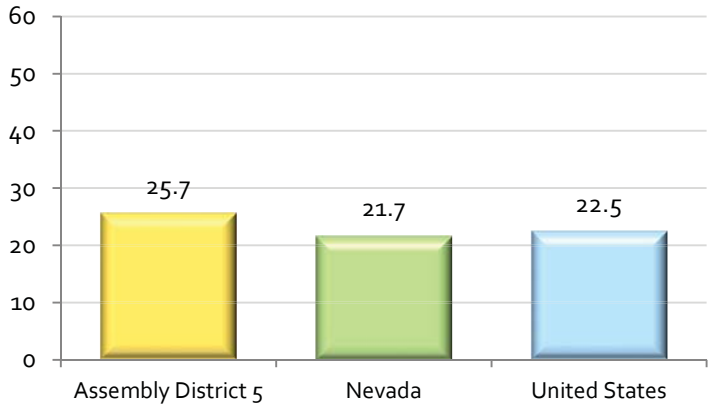

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 6

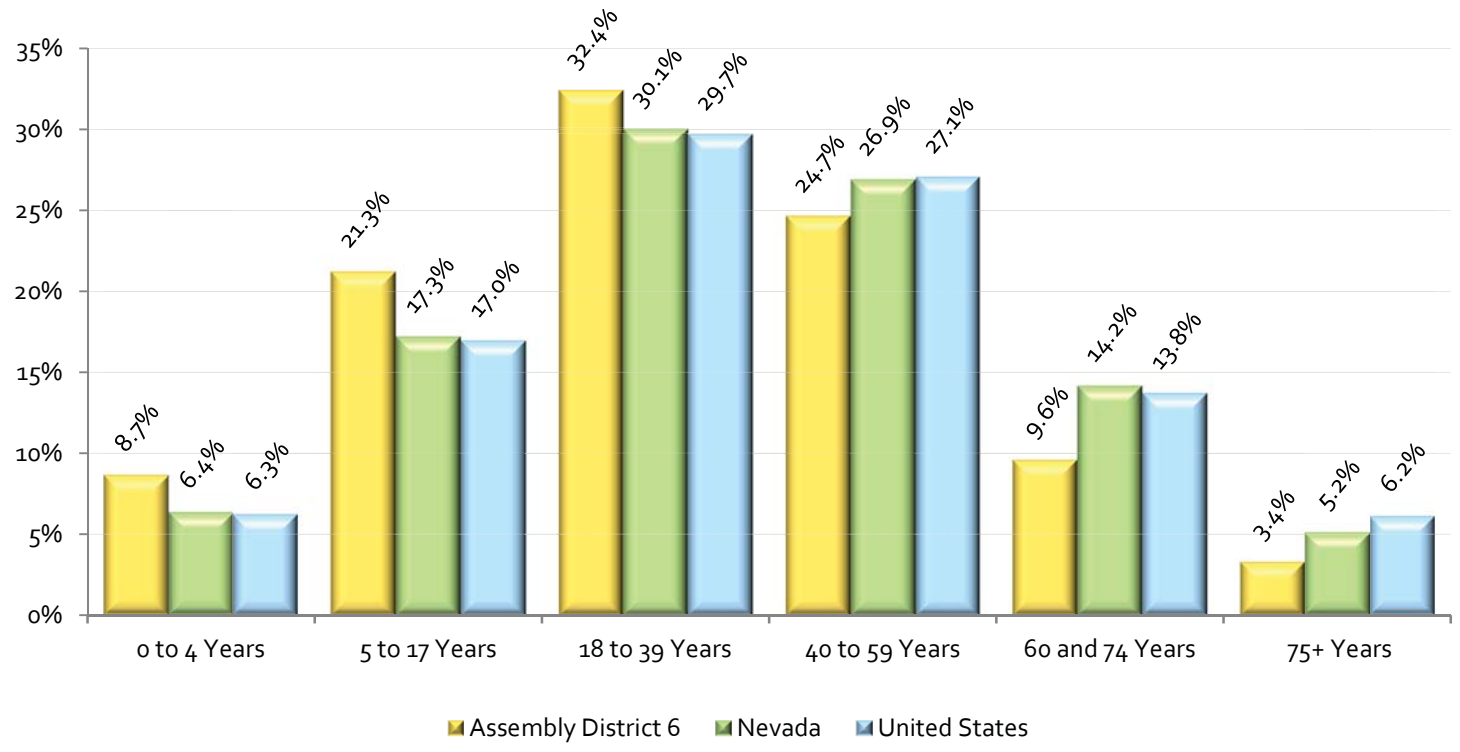

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 6	61,097	30,907	50.6%	30,190	49.4%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

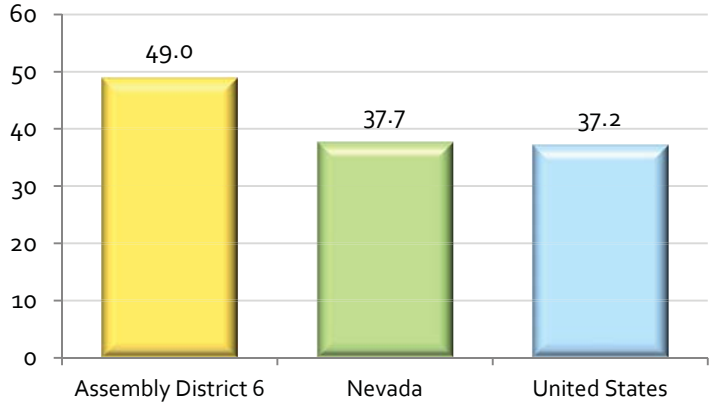

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

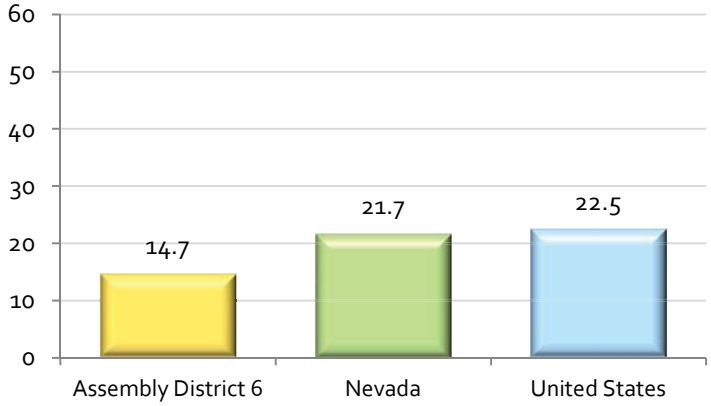

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 7

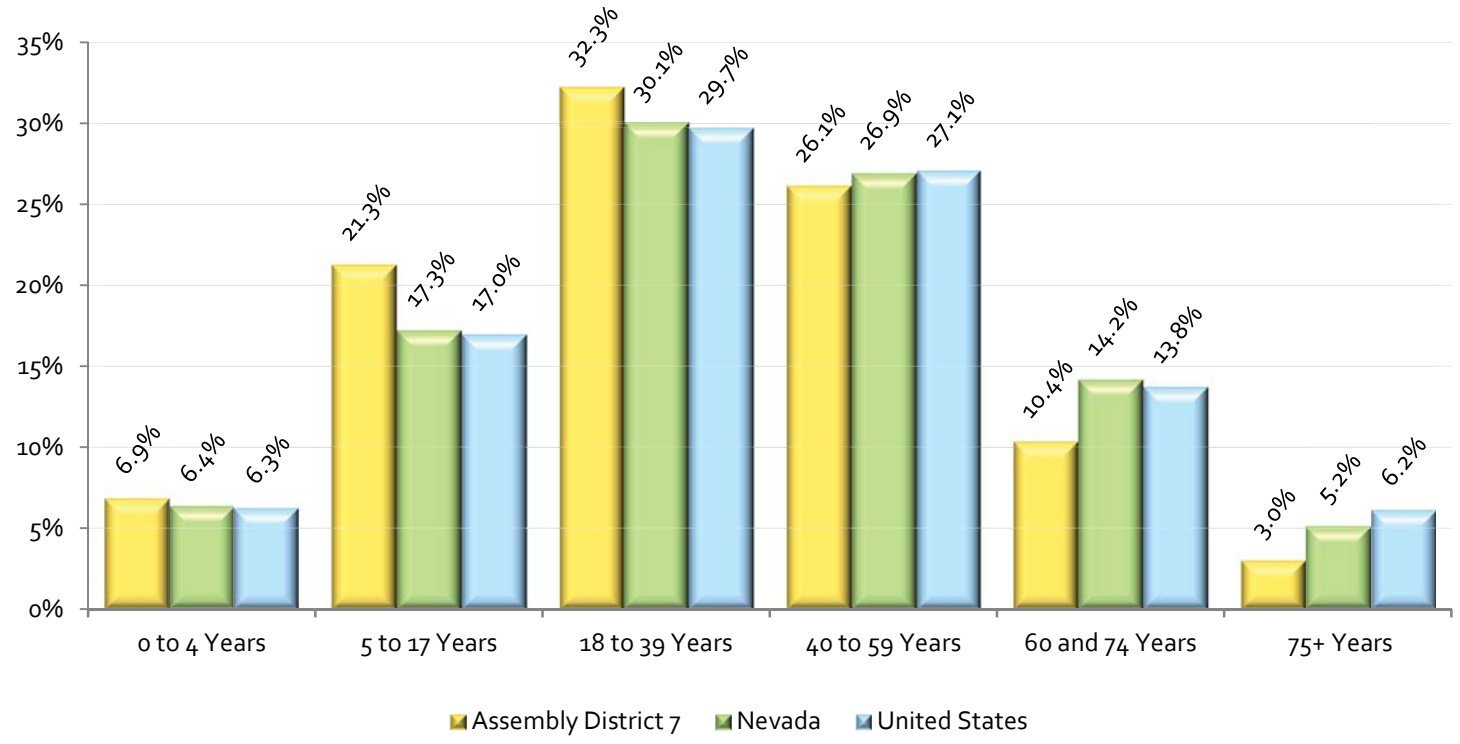

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 7	65,854	32,815	49.8%	33,039	50.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

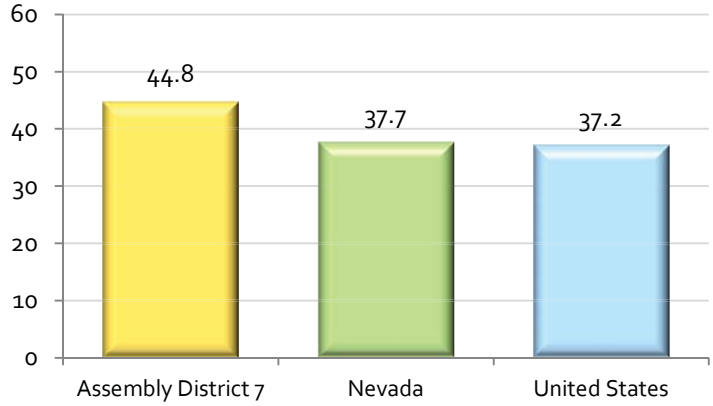

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

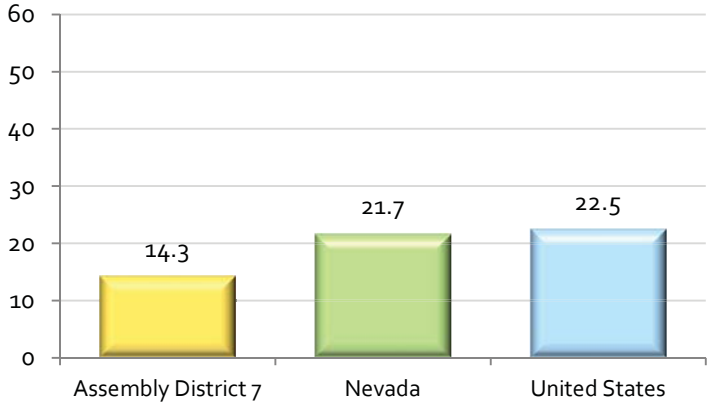

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 8

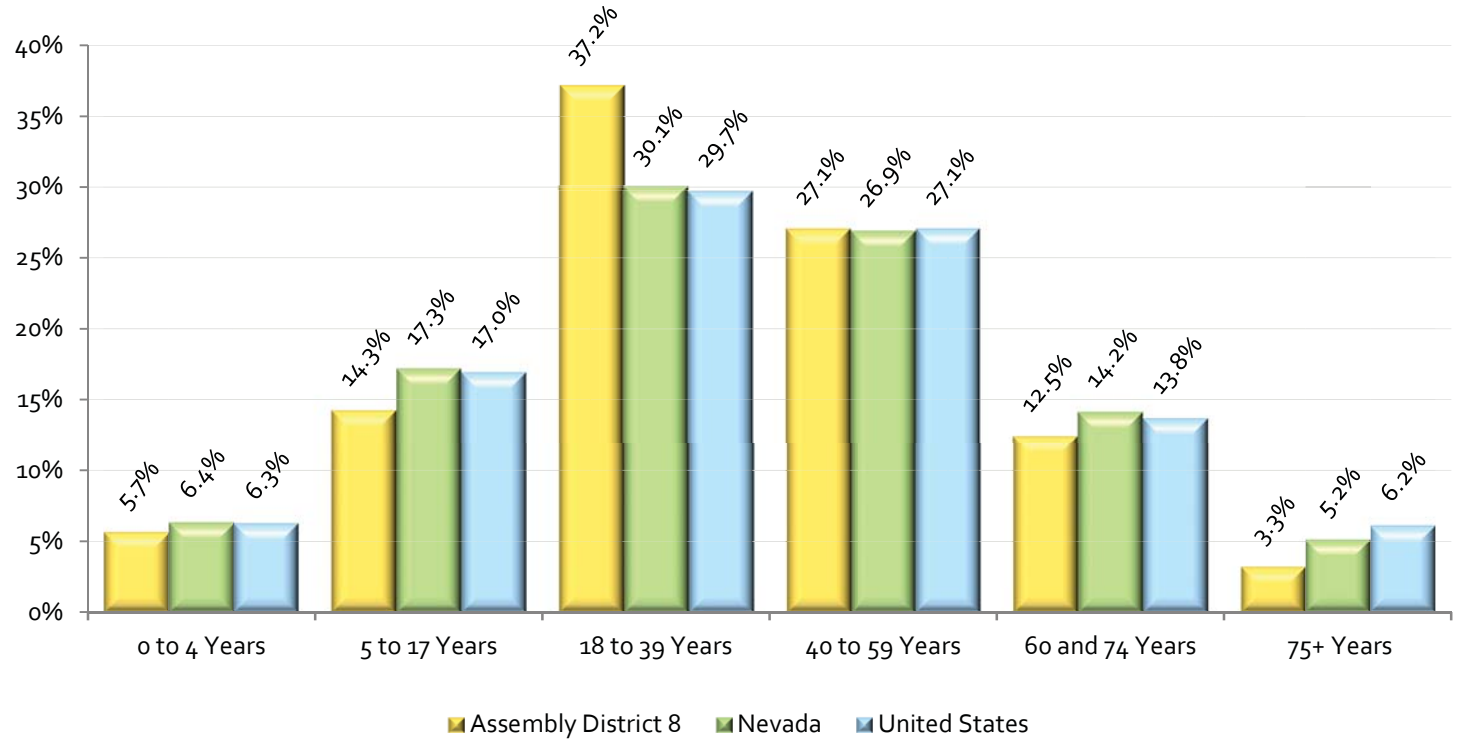

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 8	69,495	36,149	52.0%	33,346	48.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Chart 1--Population Distribution by Age

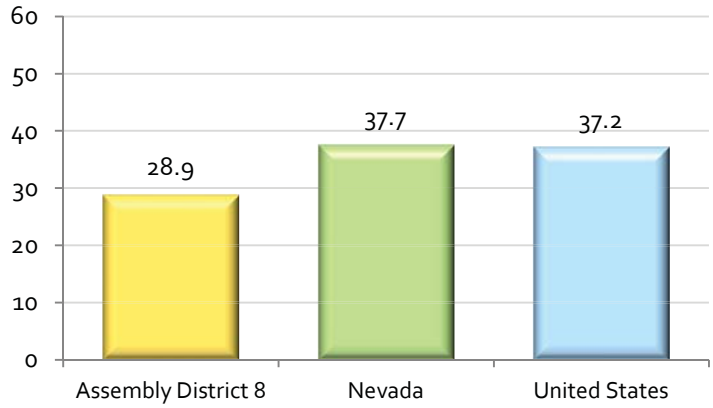

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

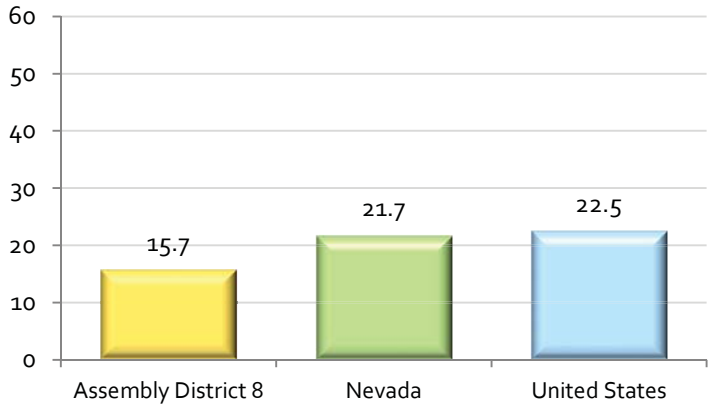

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 10

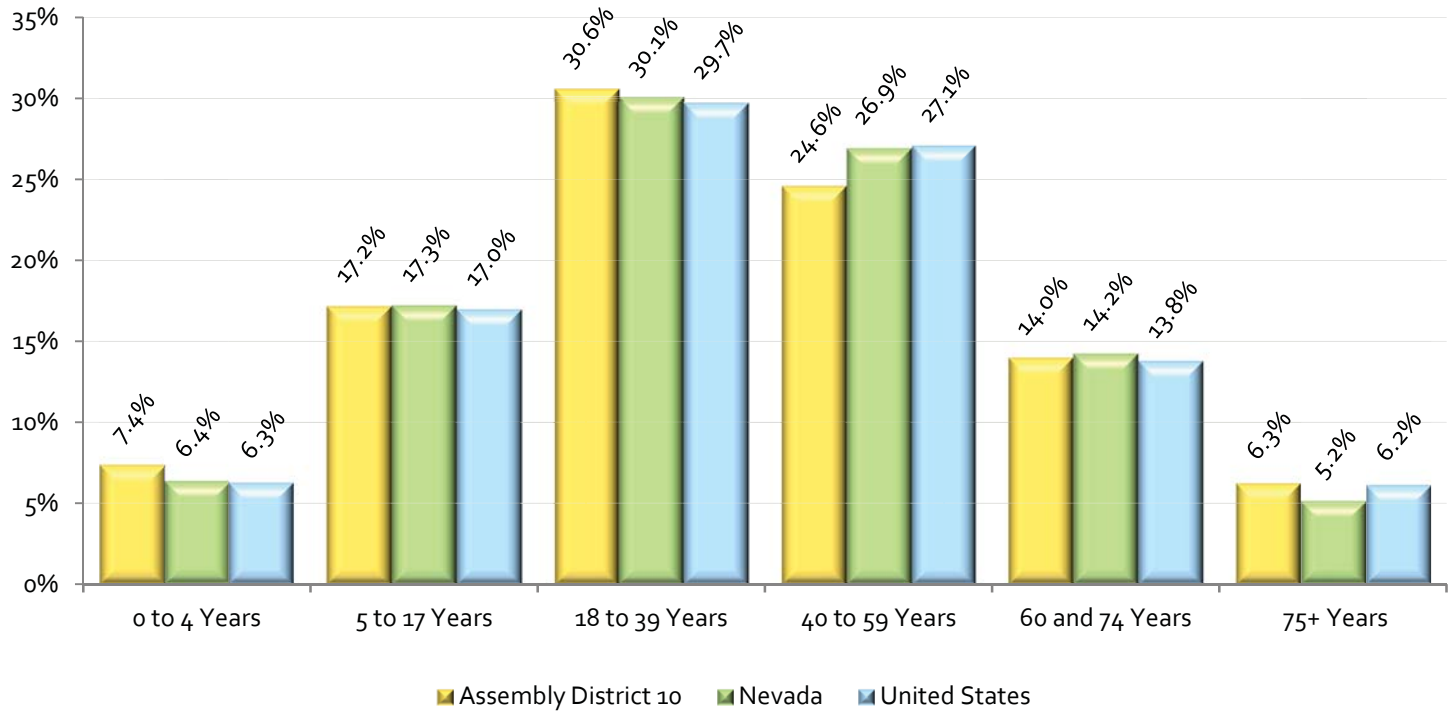

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 10	66,456	34,047	51.2%	32,409	48.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Population Characteristics
Nevada Assembly District No. 10

Chart 2--Median Age (in years)*

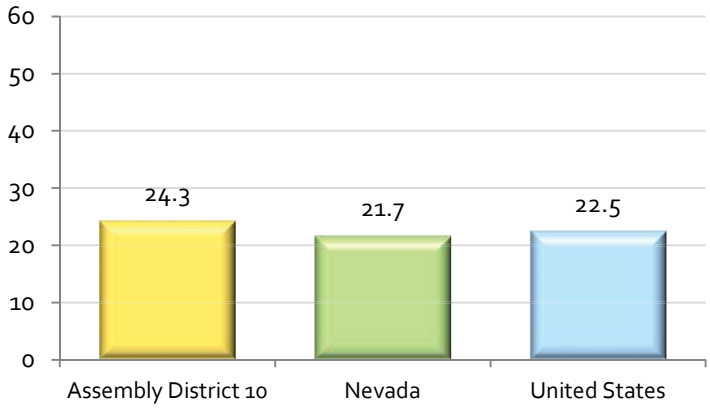

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 11

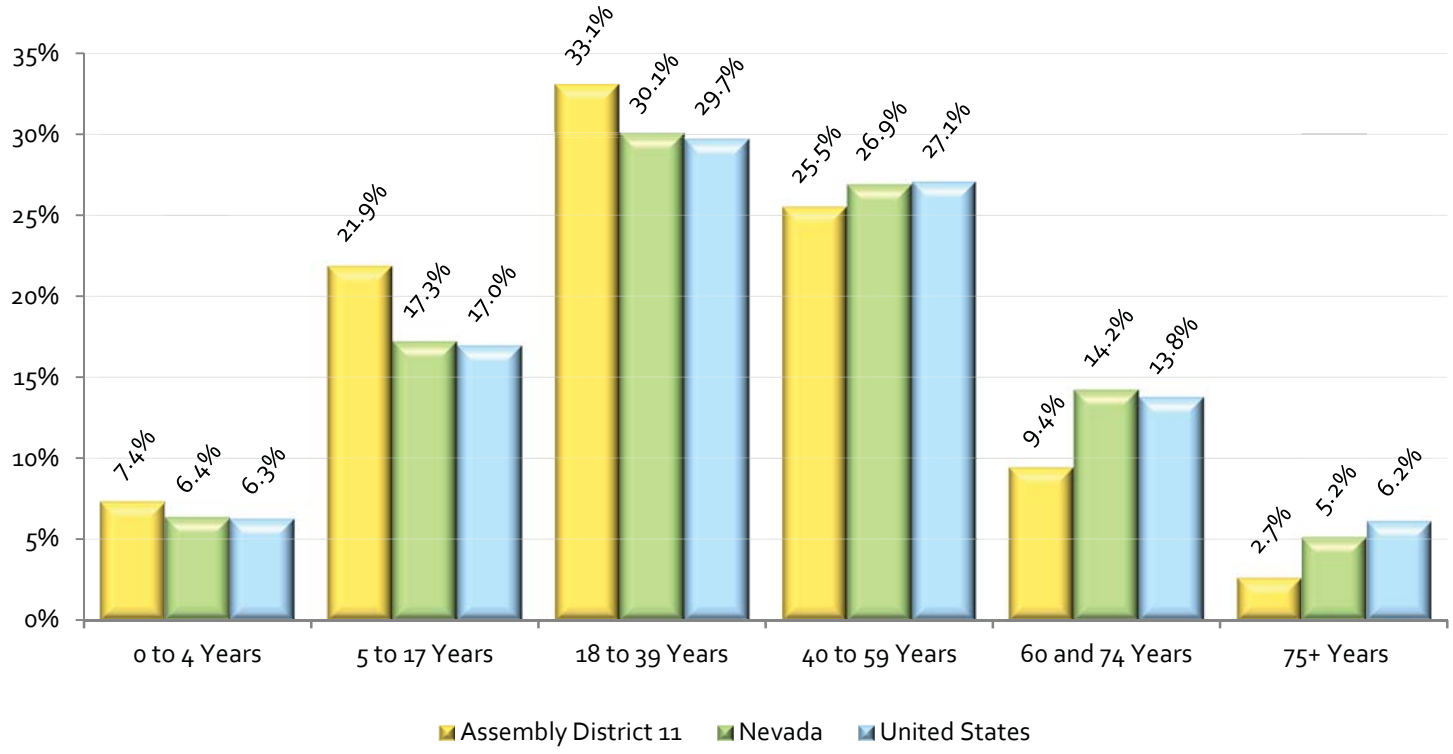

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 11	58,678	31,474	53.6%	27,204	46.4%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

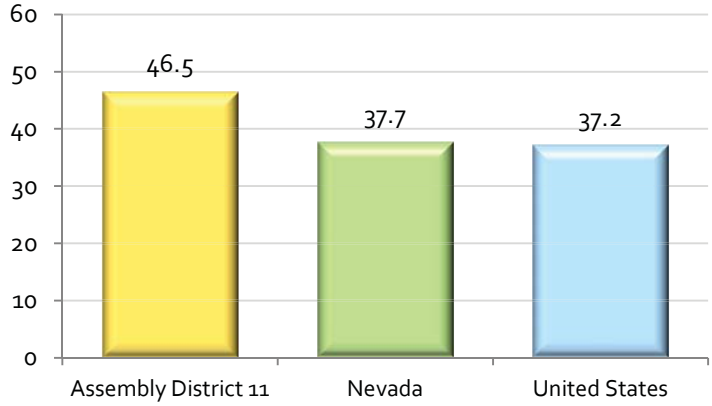

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

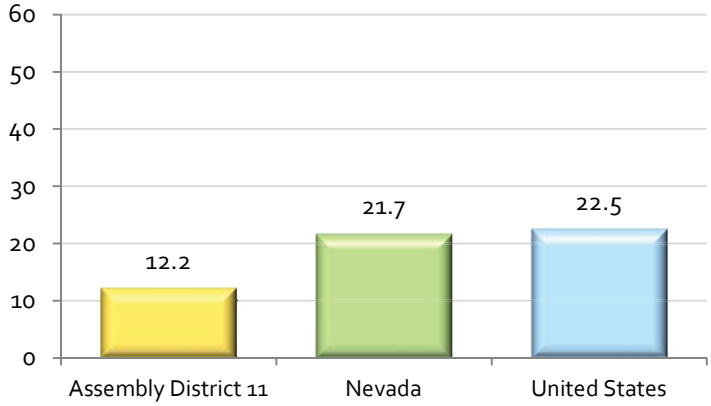

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 12

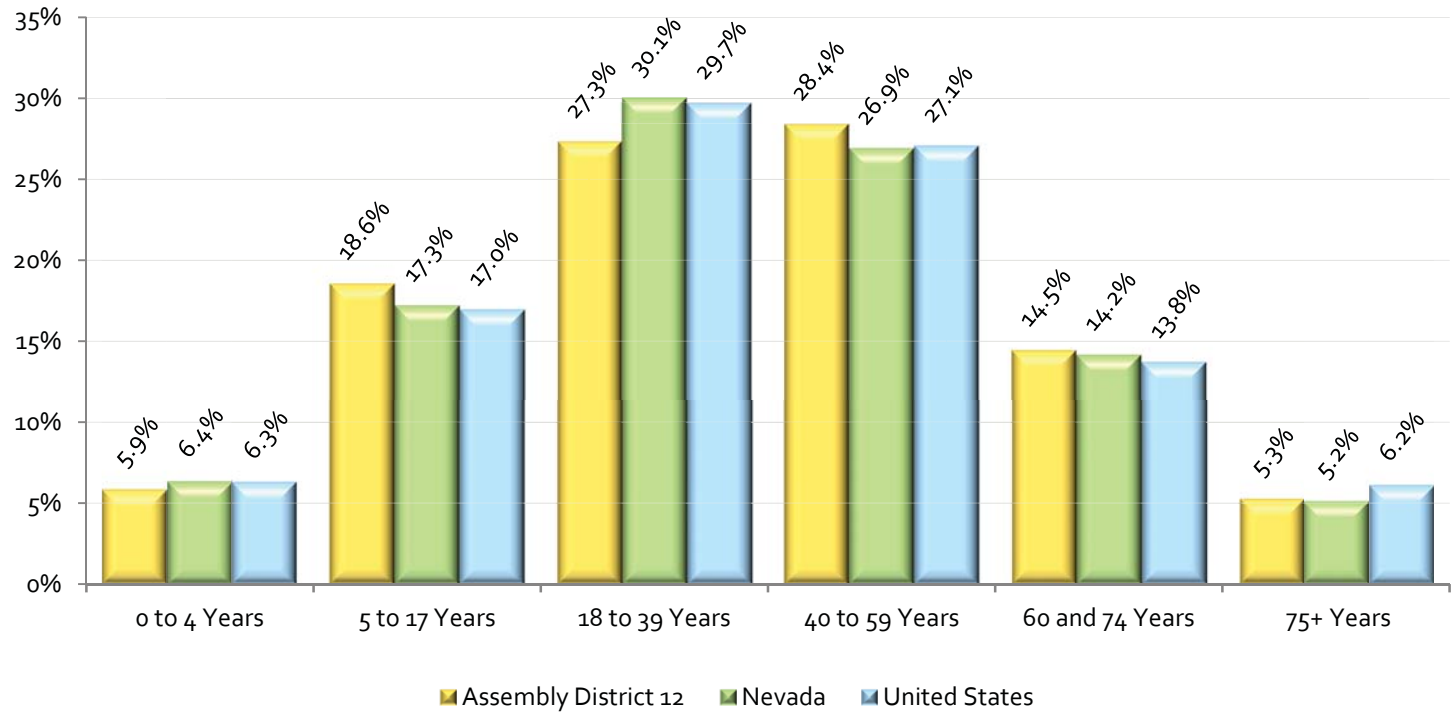

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 12	67,043	32,749	48.8%	34,294	51.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 12	3,946	12,470	18,319	19,048	9,706	3,554
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

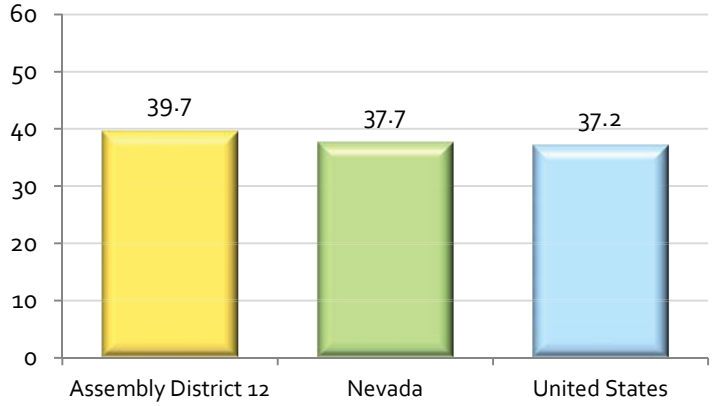

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

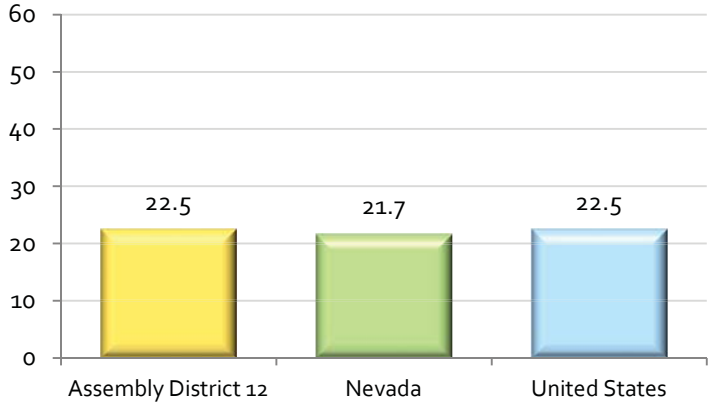

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 13

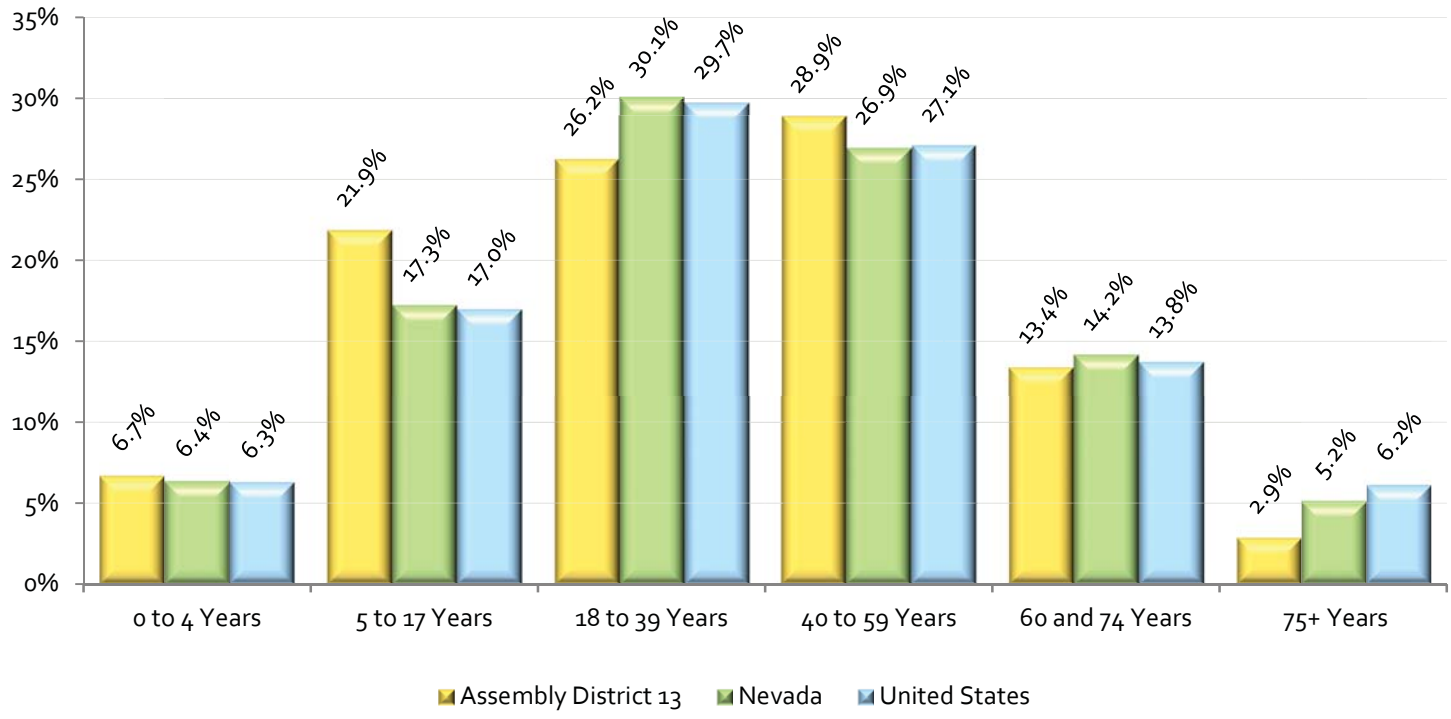

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 13	66,905	32,702	48.9%	34,203	51.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

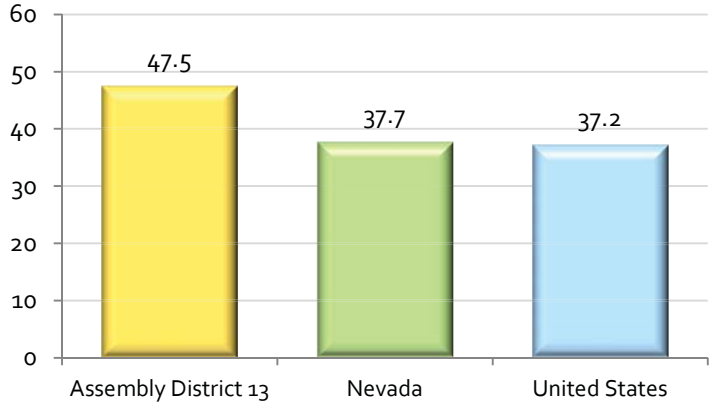

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

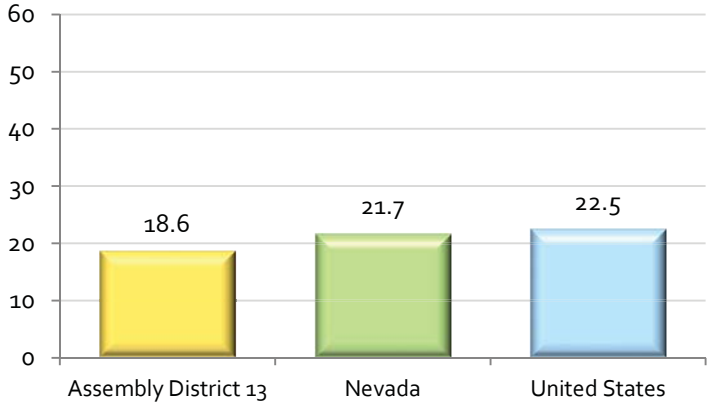

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 14

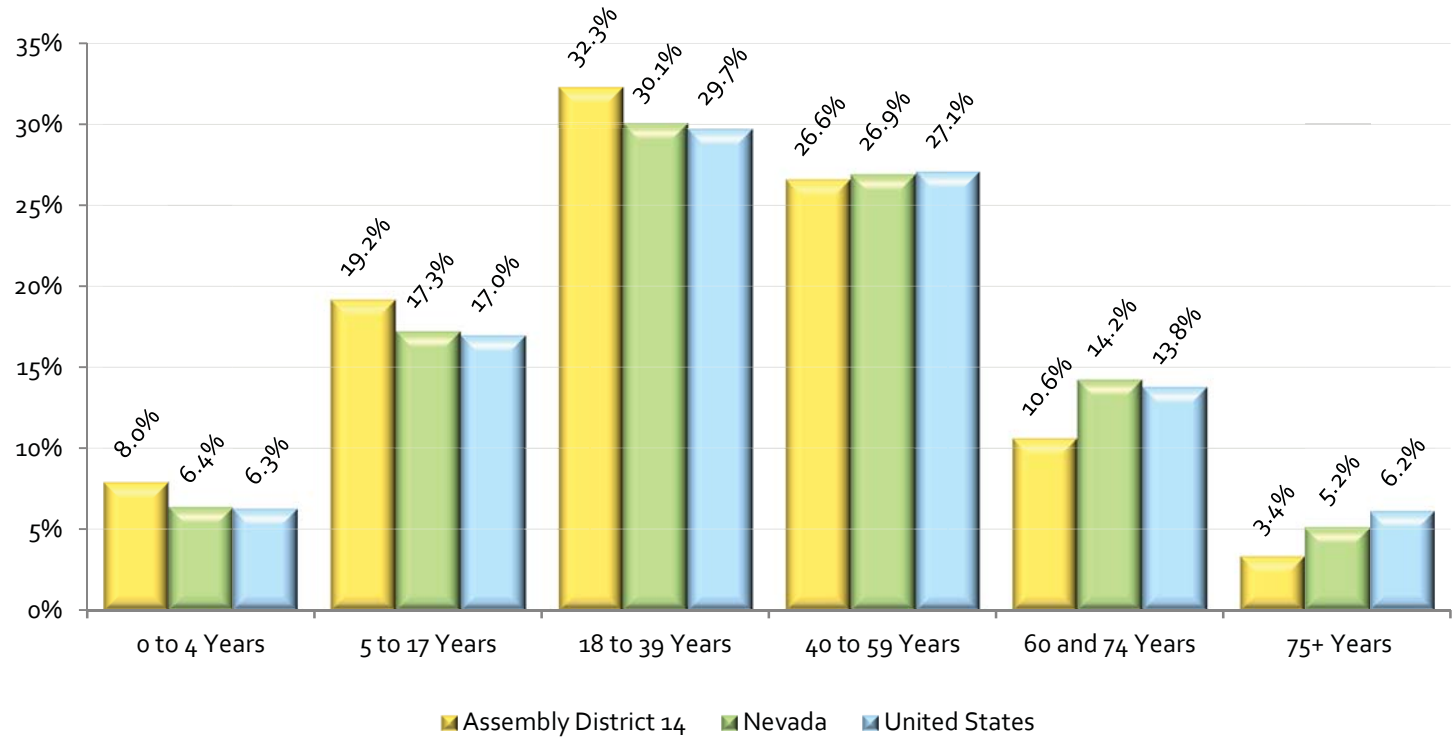

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

Chart 1--Population Distribution by Age

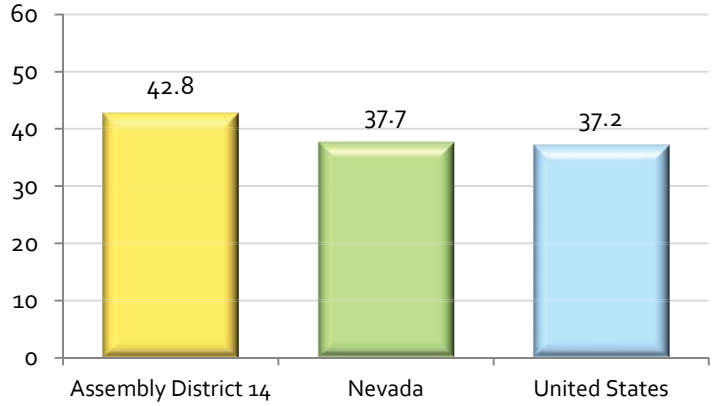

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

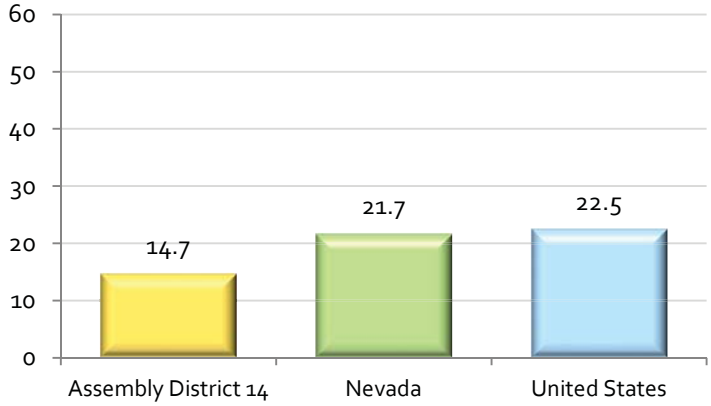

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 15

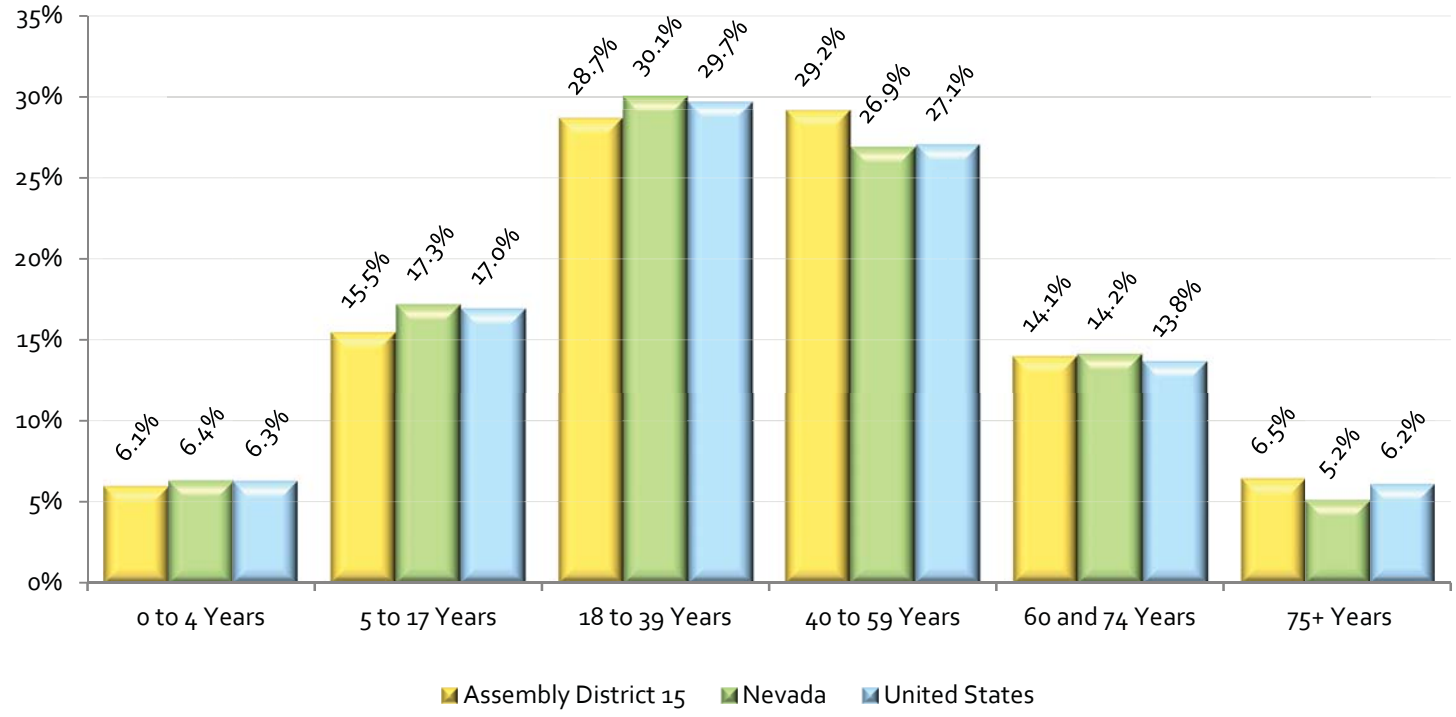

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 15	64,232	33,342	51.9%	30,890	48.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 15	3,891	9,981	18,430	18,752	9,031	4,147
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

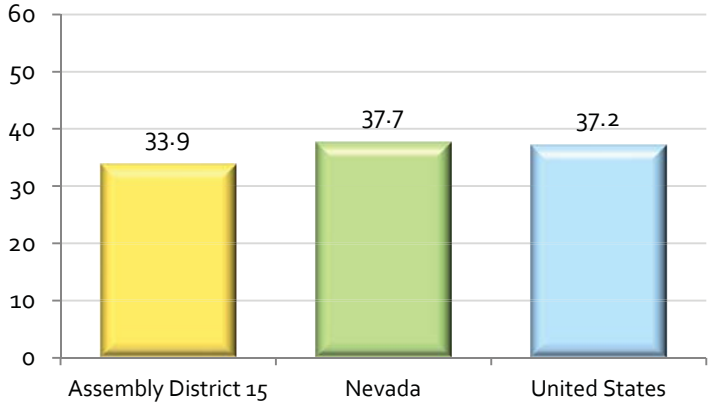

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

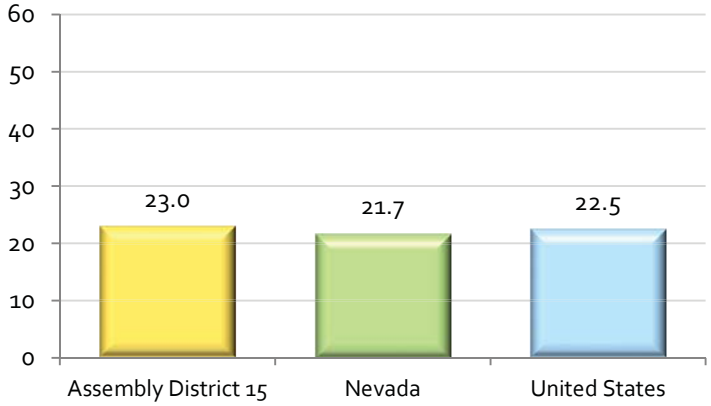

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 16

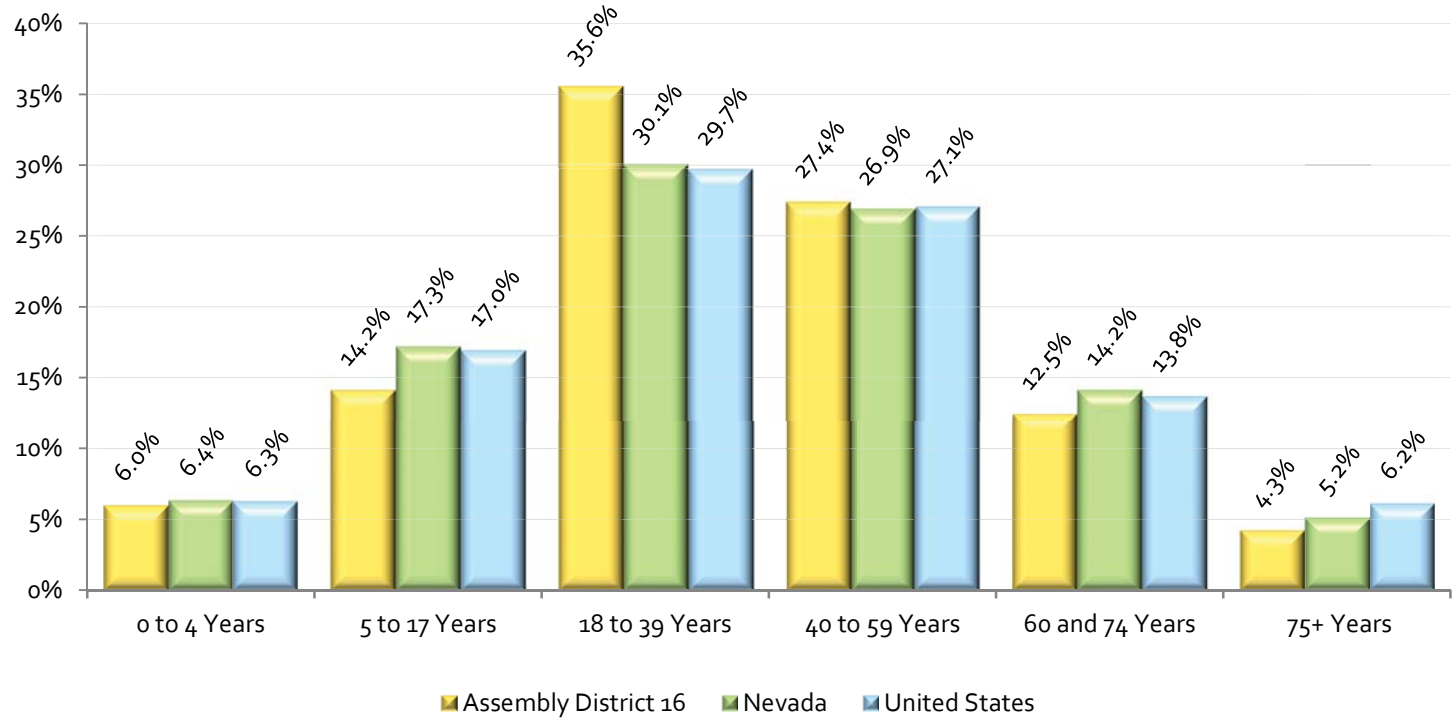

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 16	62,003	33,893	54.7%	28,110	45.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

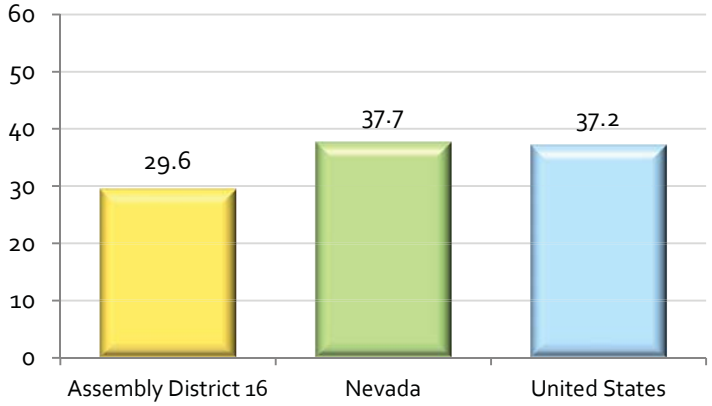

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

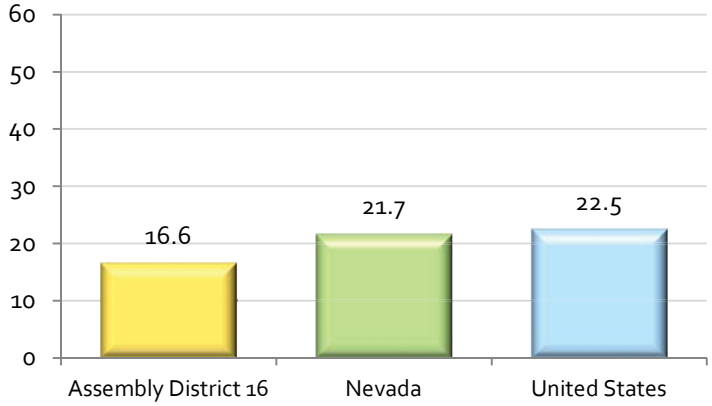

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 17

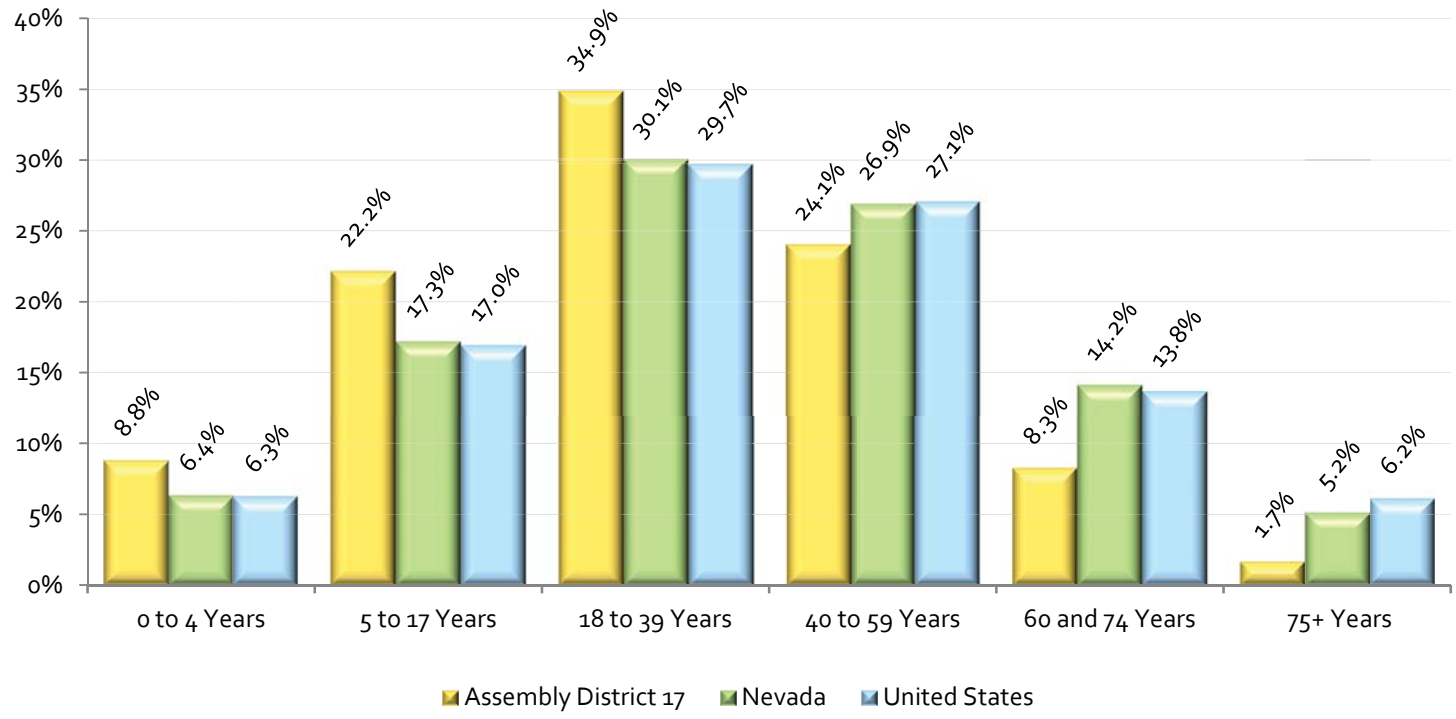

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 17	71,114	35,260	49.6%	35,854	50.4%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

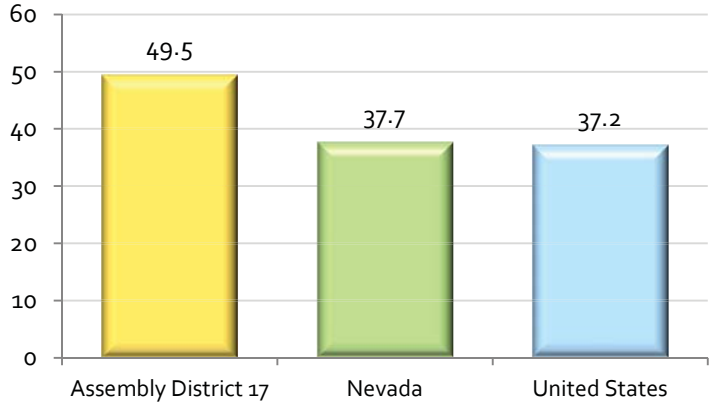

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

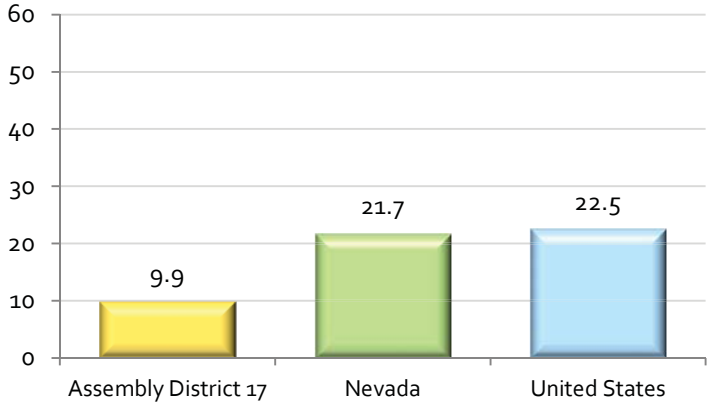

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

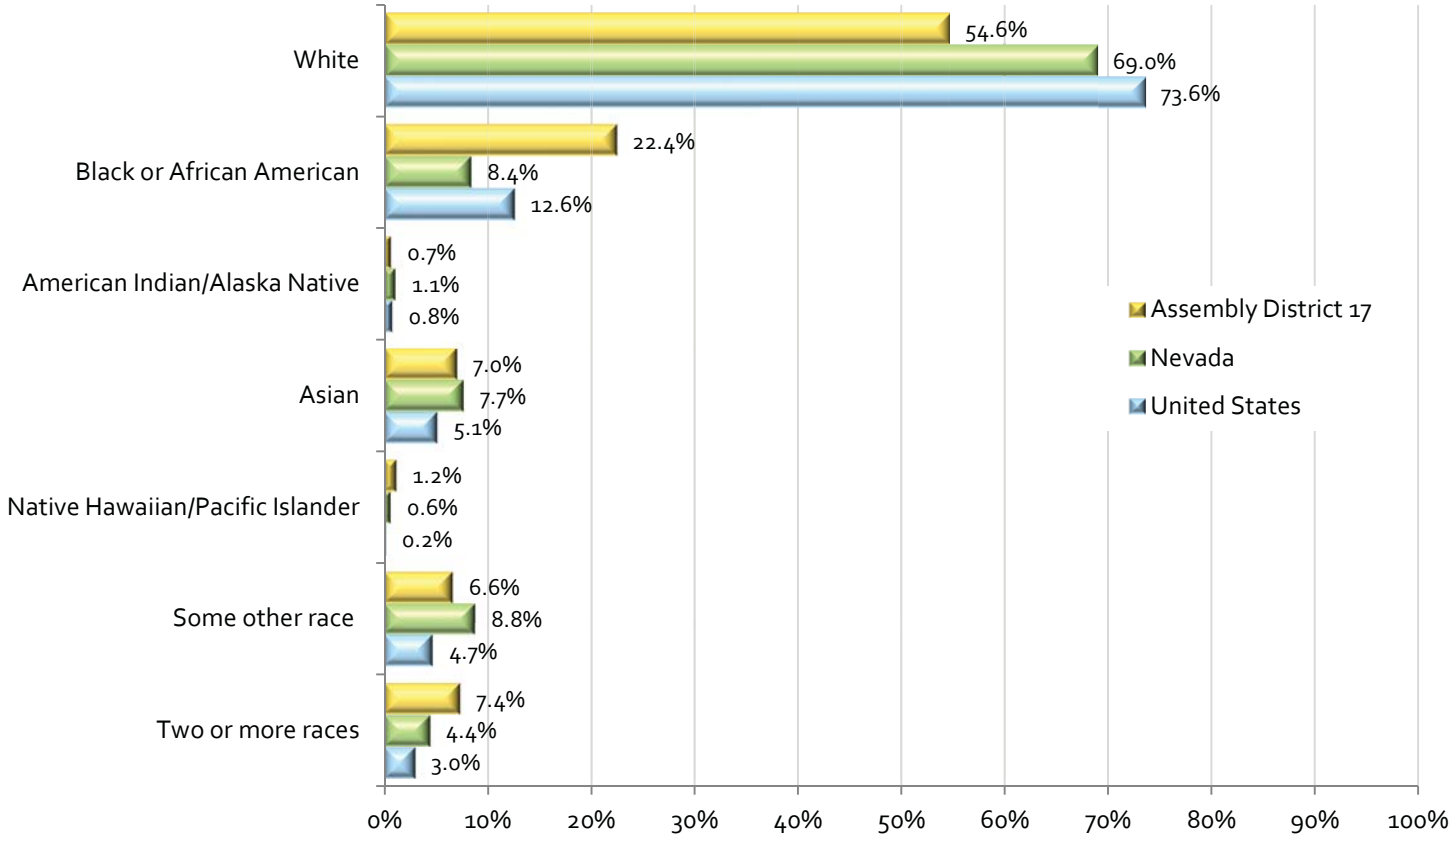

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 18

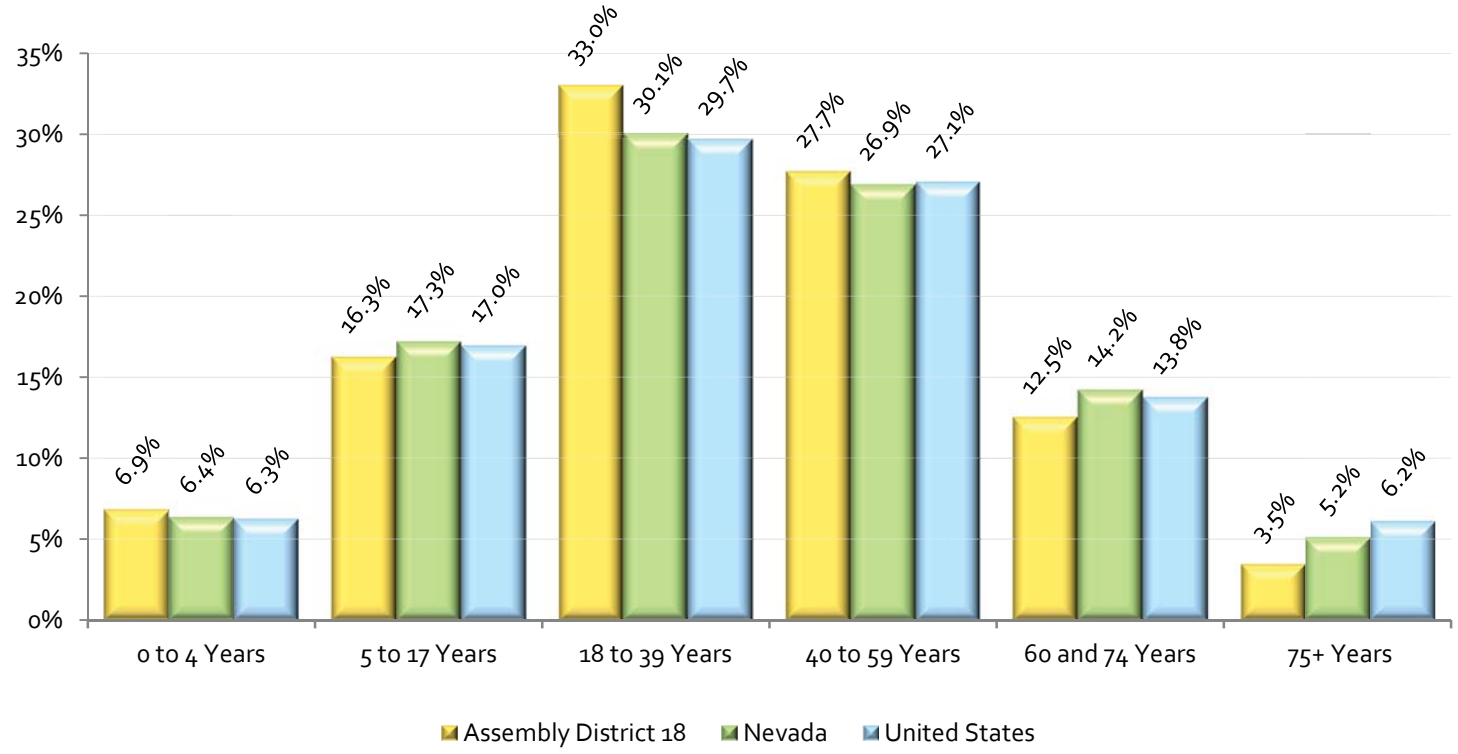

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 18	65,967	32,460	49.2%	33,507	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 18	4,543	10,754	21,792	18,286	8,269	2,323
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

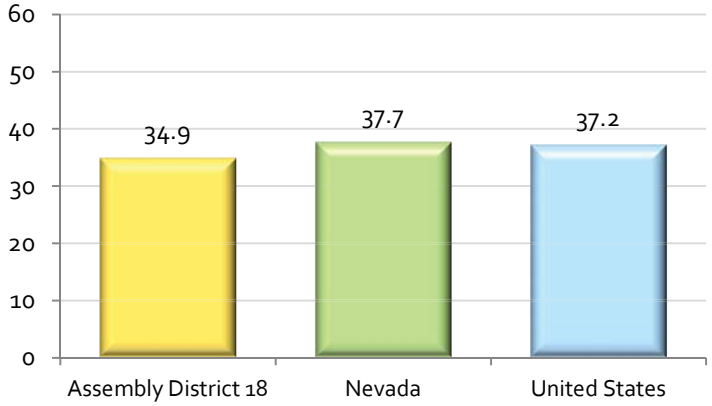

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

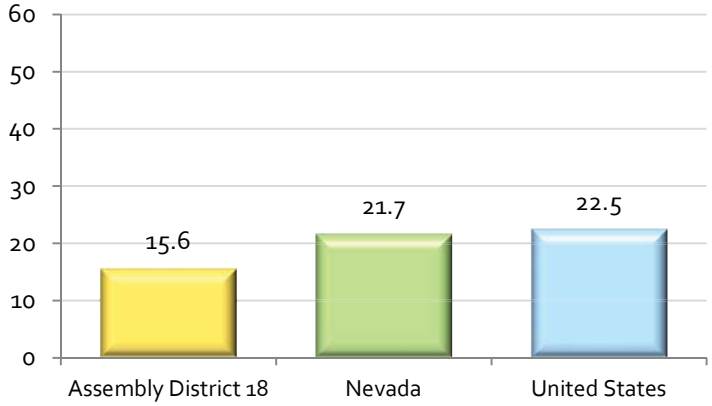

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 19

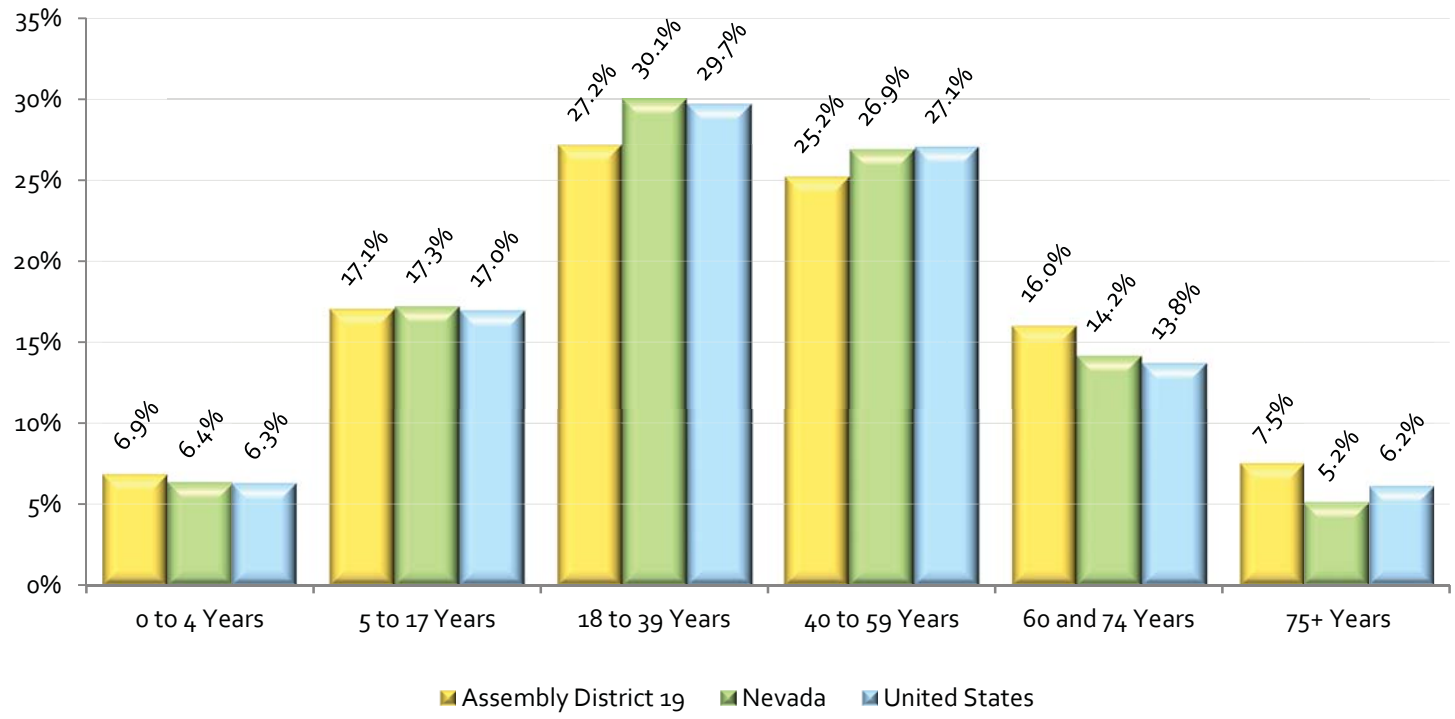

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 19	68,730	34,384	50.0%	34,346	50.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

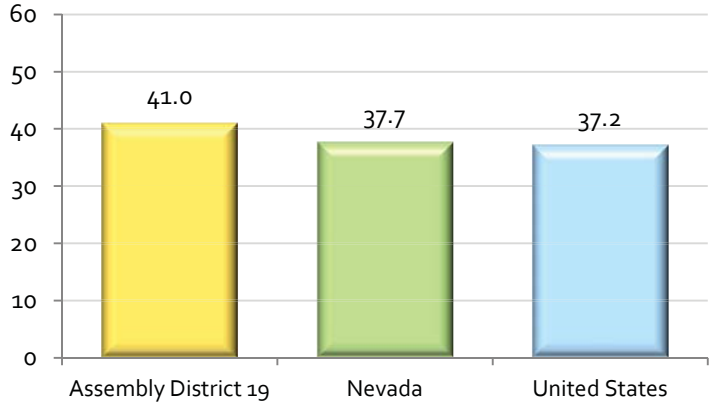

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

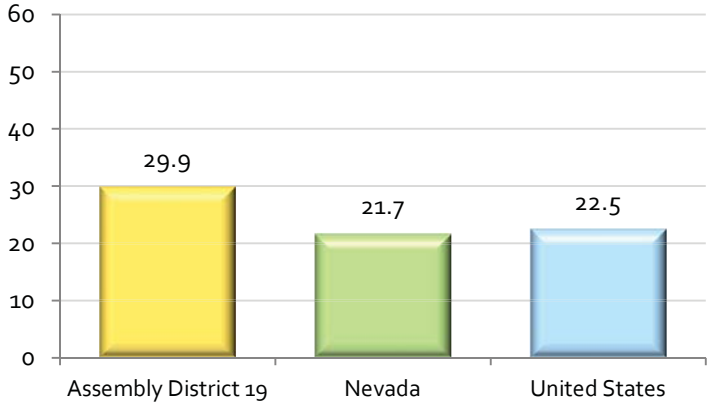

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

Table 11--Median Income*

	All Households	Family Households	Nonfamily Households**	Married-Couple Families
Assembly District 19	$49,625	$58,579	$29,414	$66,135
Nevada	$51,847	$60,916	$34,648	$72,123
United States	$53,889	$66,011	$32,298	$79,956

* The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 20

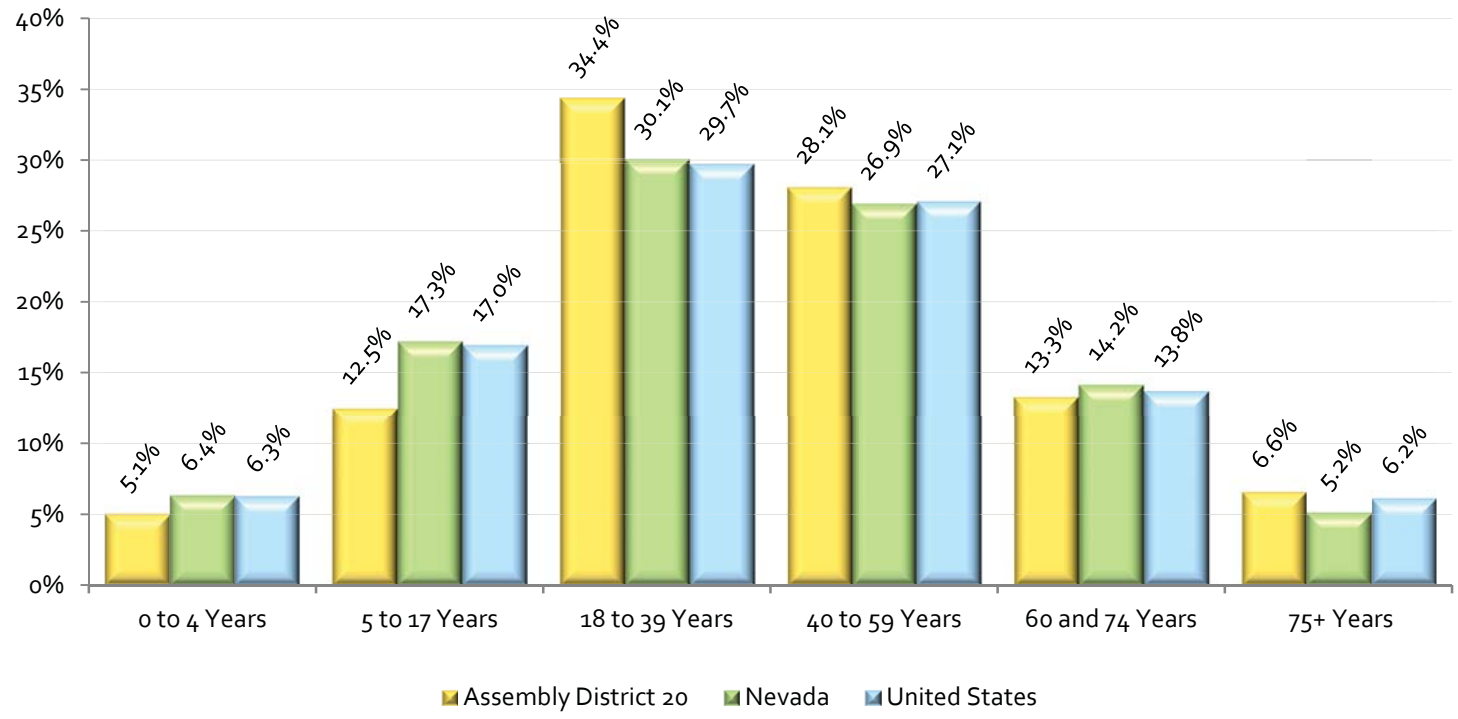

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 20	64,212	32,190	50.1%	32,022	49.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

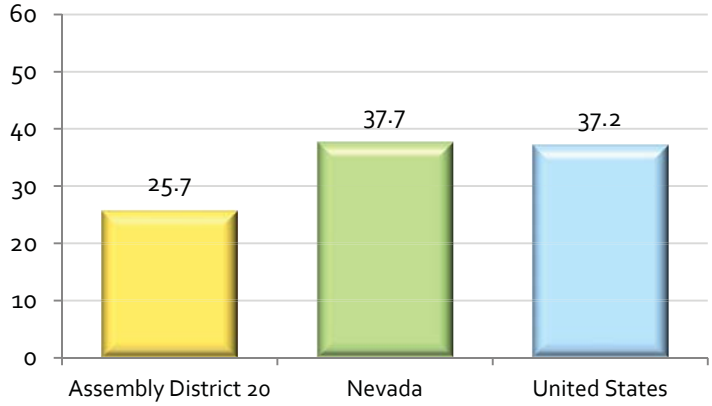

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

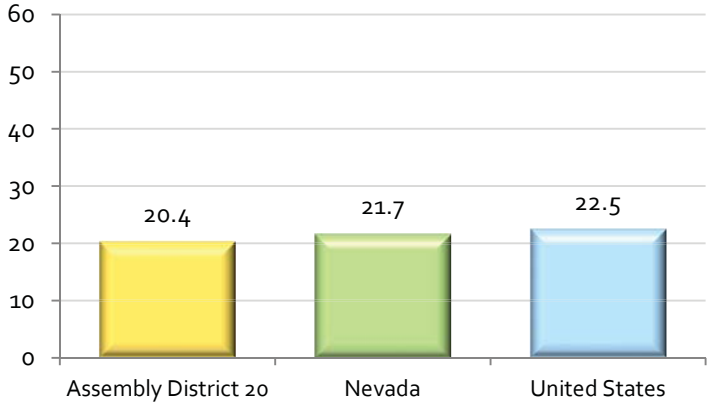

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 21

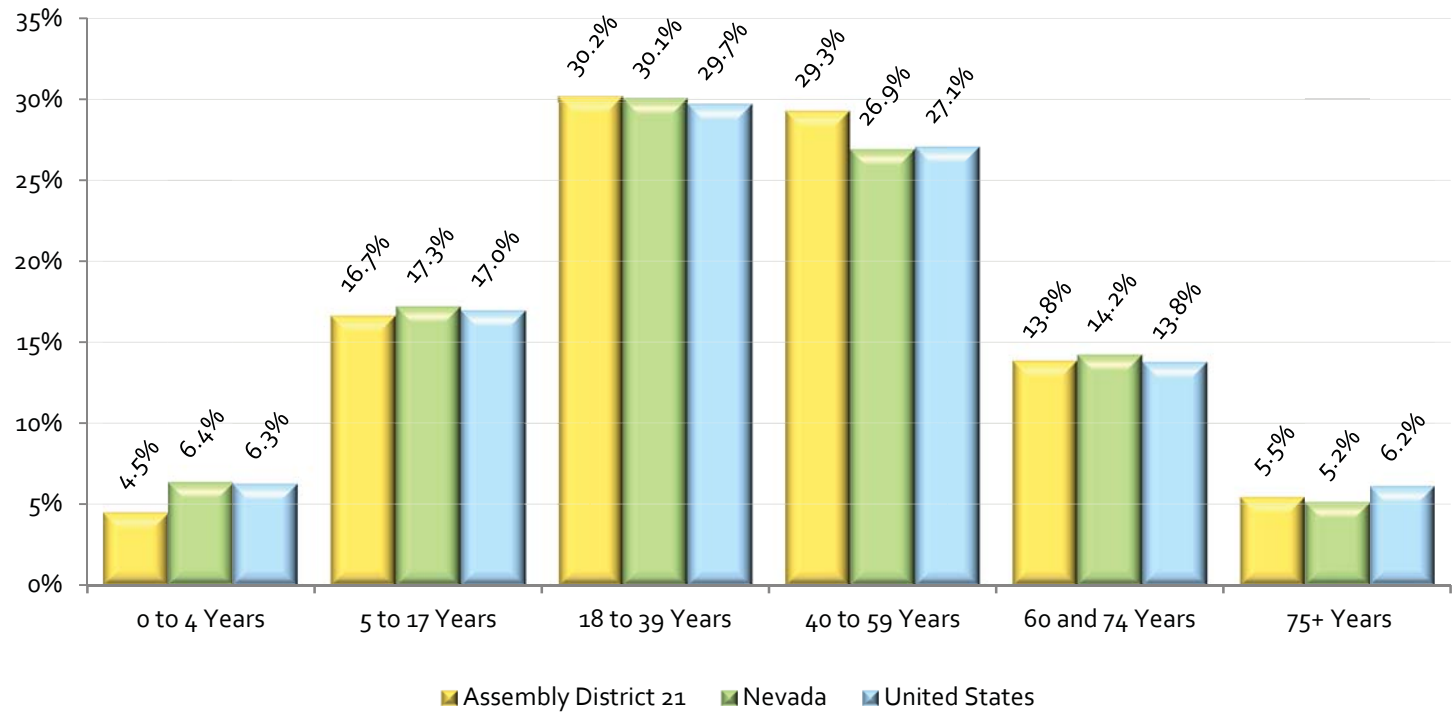

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 21	67,015	33,381	49.8%	33,634	50.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

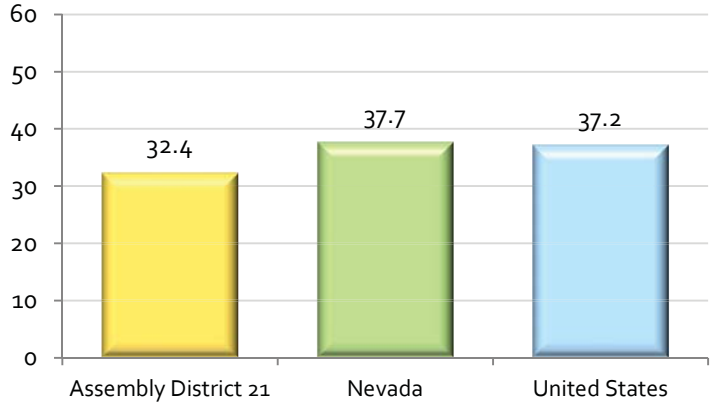

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

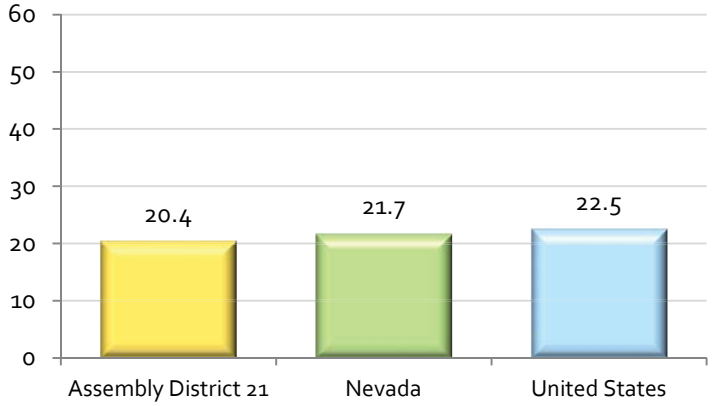

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 22

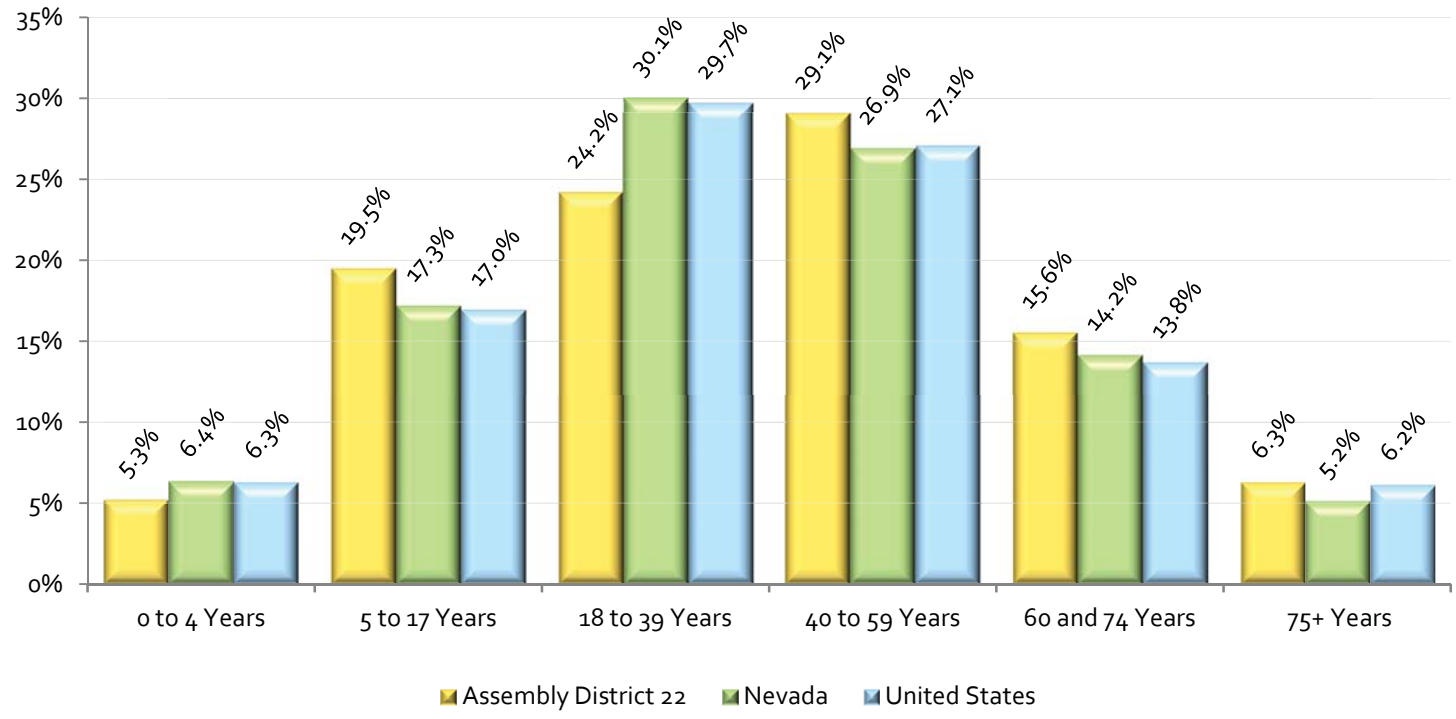

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 22	68,233	32,371	47.4%	35,862	52.6%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

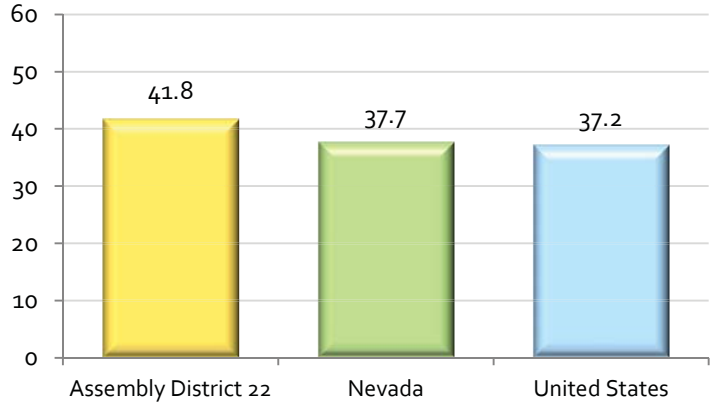

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

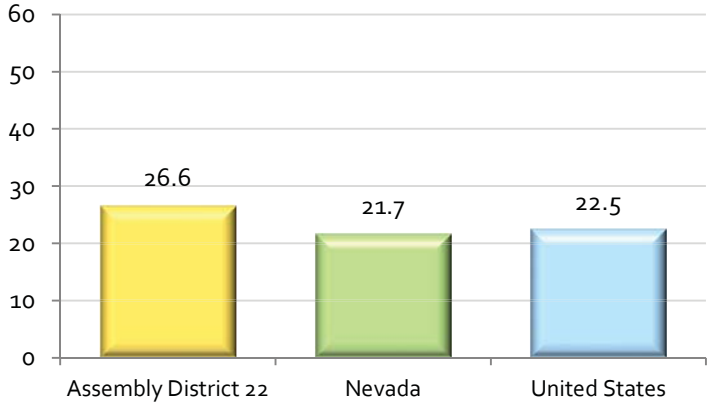

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 23

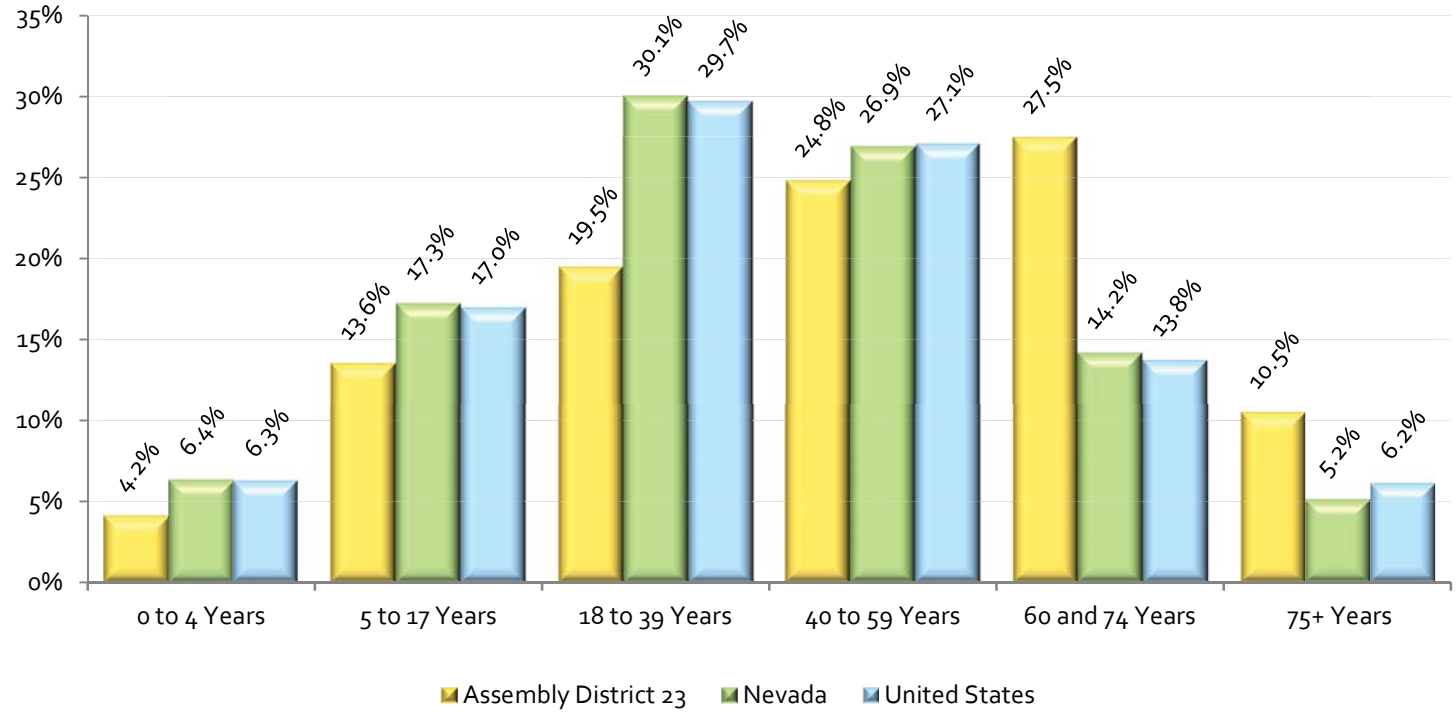

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 23	69,045	34,298	49.7%	34,747	50.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 23	2,895	9,361	13,433	17,118	18,974	7,264
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

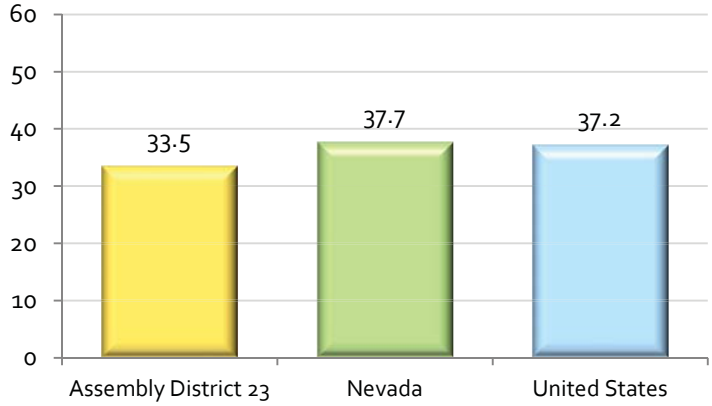

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

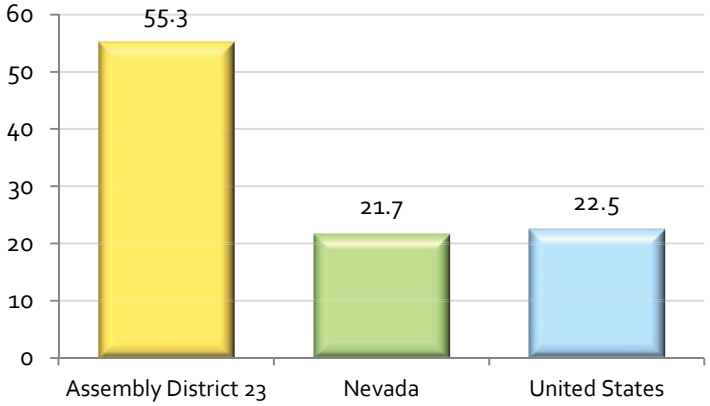

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 24

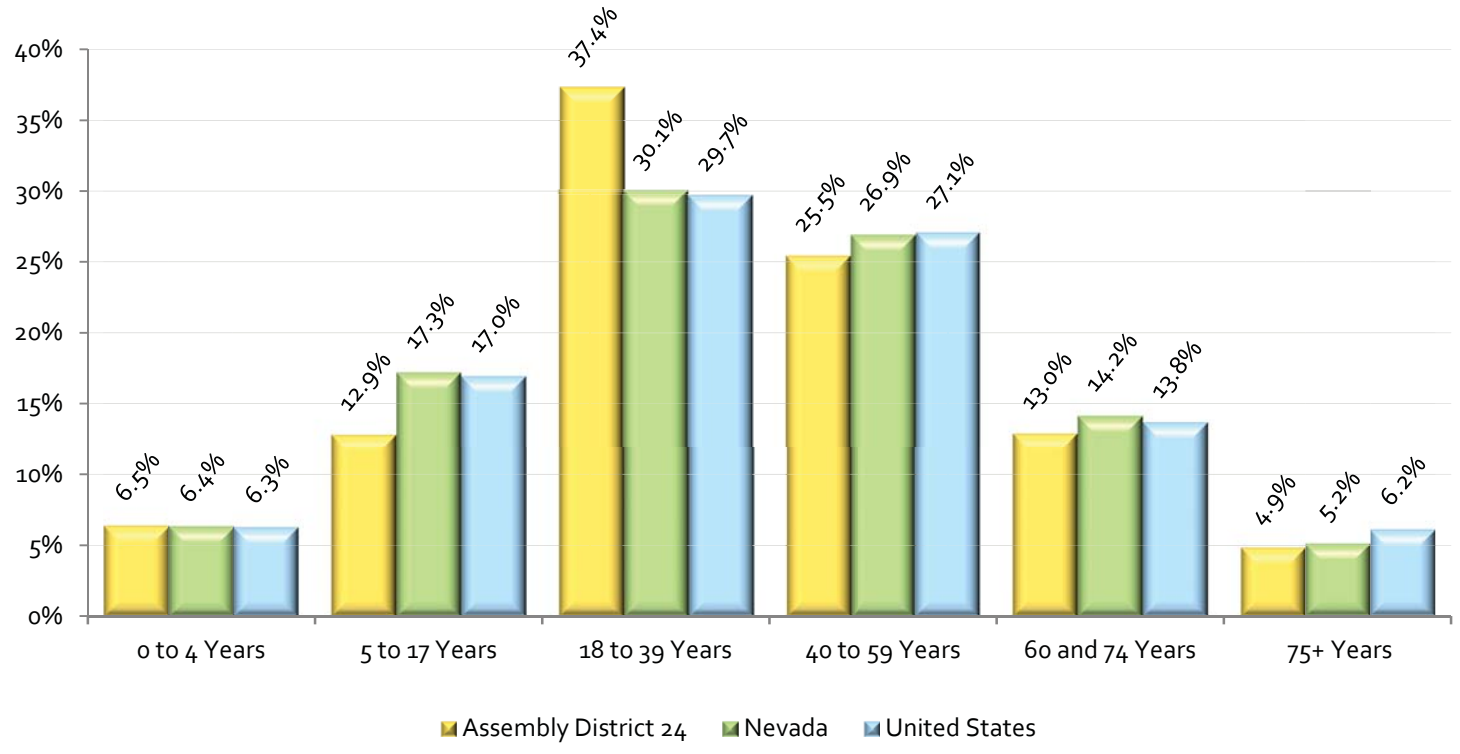

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 24	61,822	31,879	51.6%	29,943	48.4%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

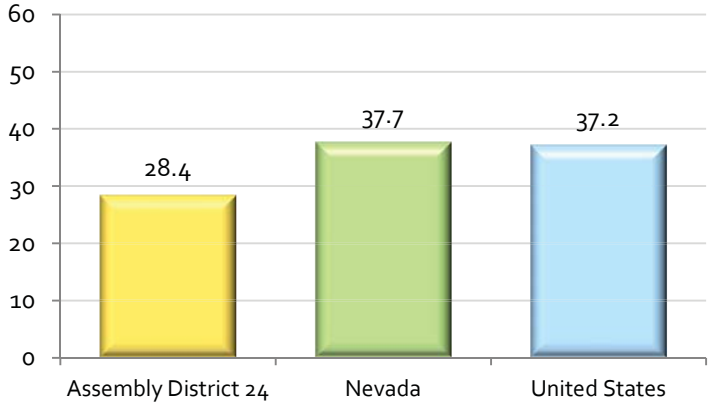

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

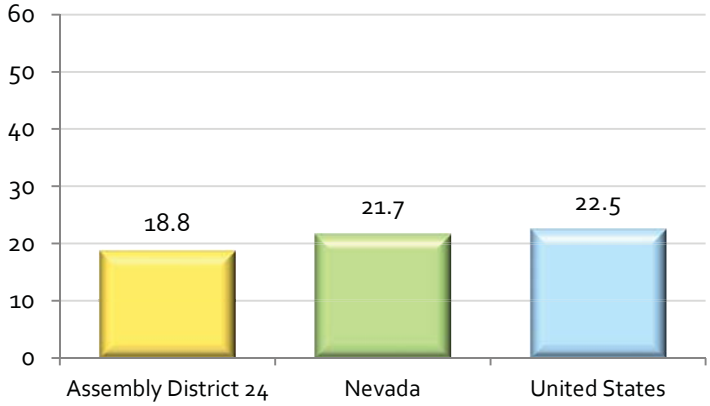

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 25

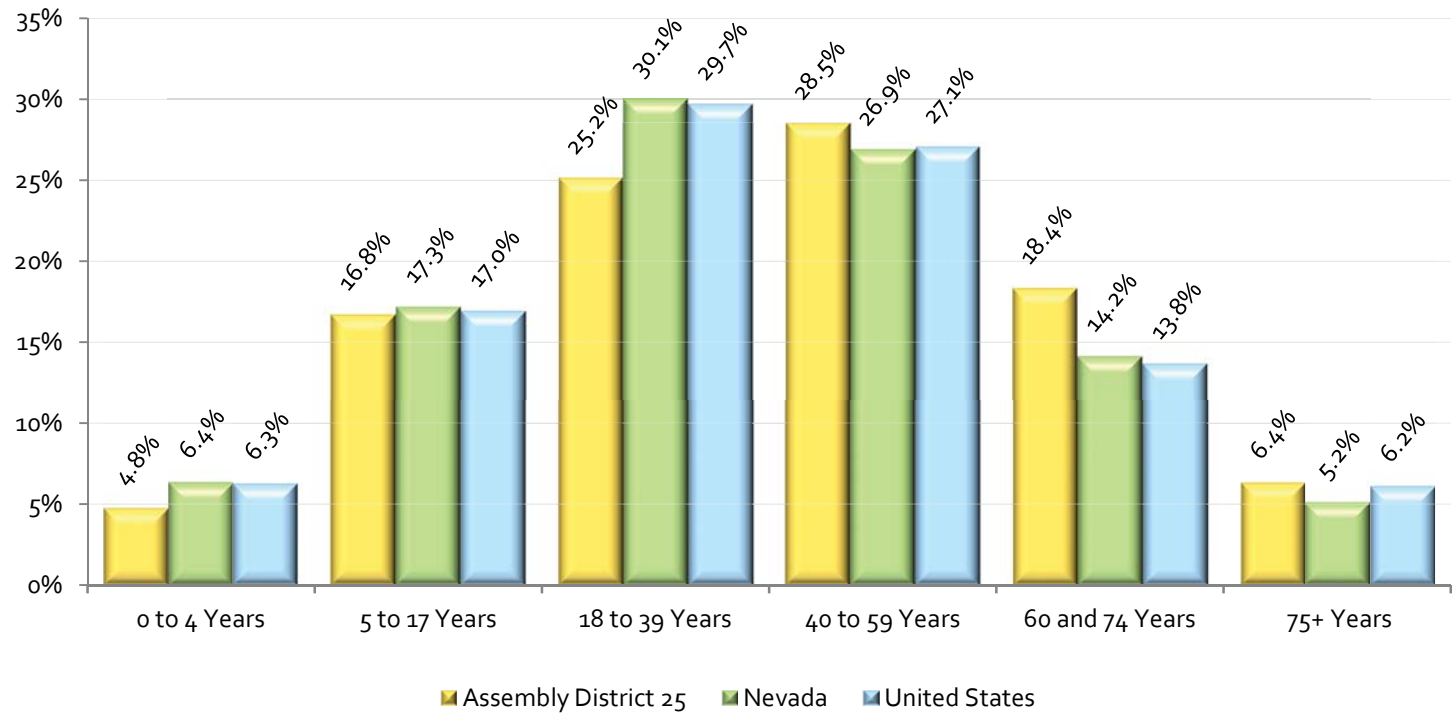

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 25	66,270	32,295	48.7%	33,975	51.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

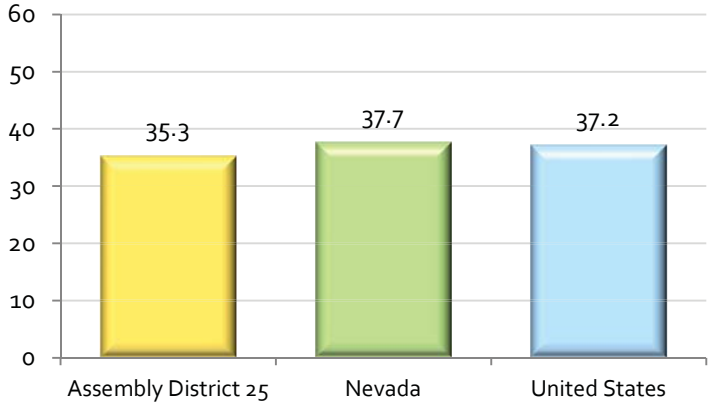

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

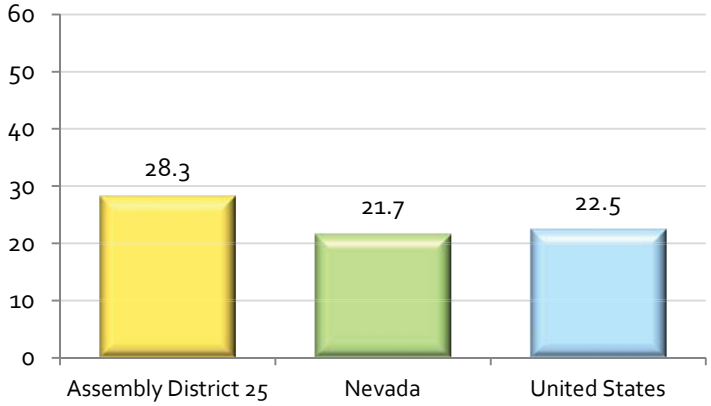

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 26

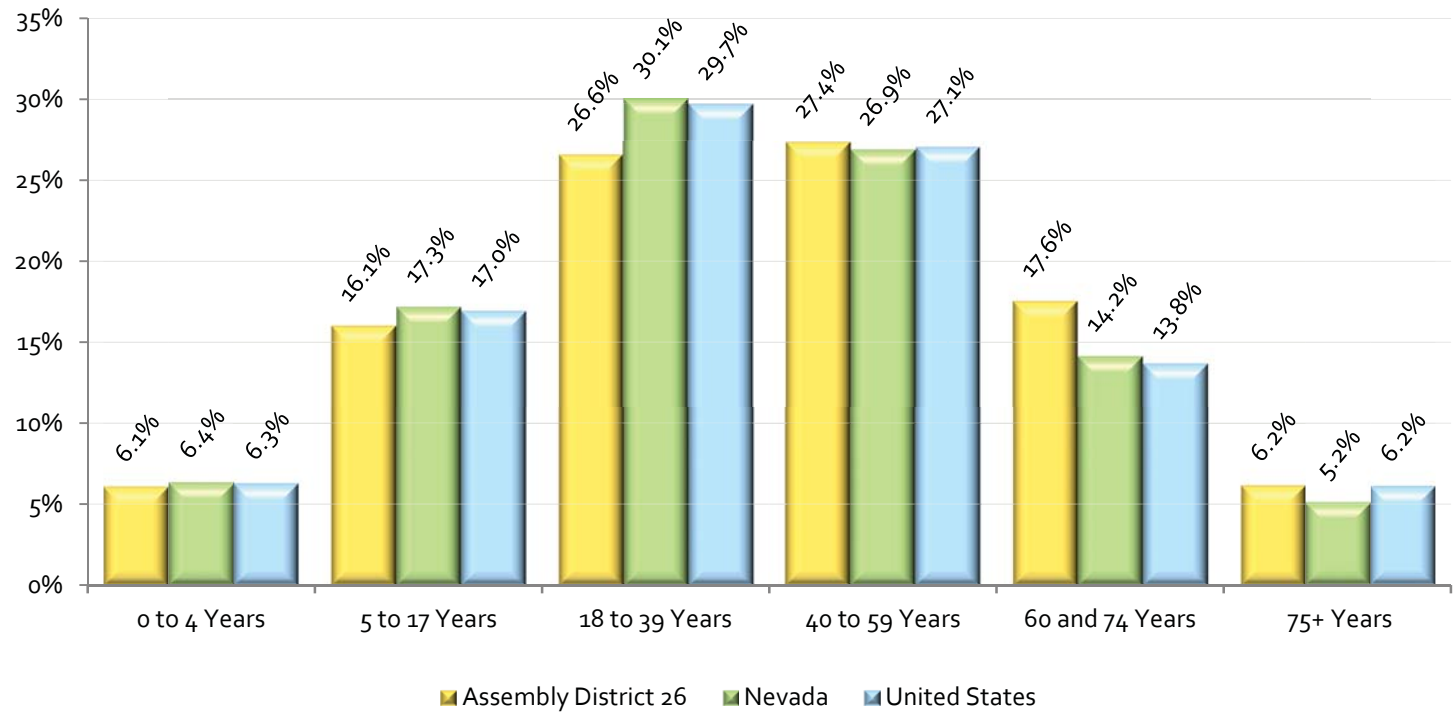

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 26	67,854	34,609	51.0%	33,245	49.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 26	4,173	10,909	18,044	18,581	11,948	4,199
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

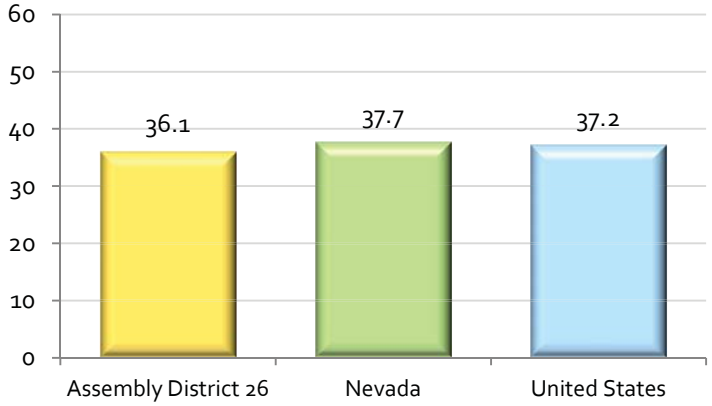

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

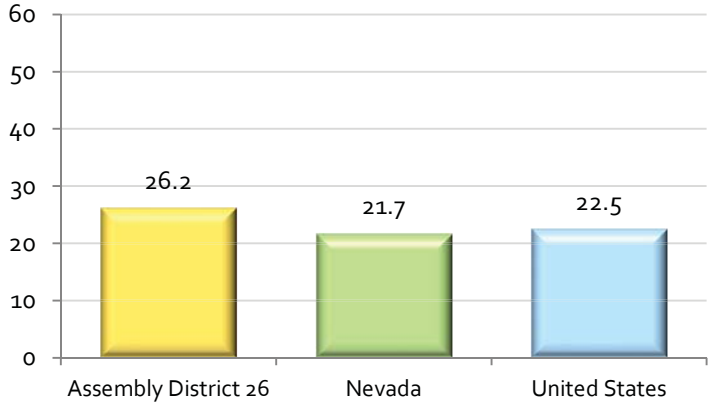

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 27

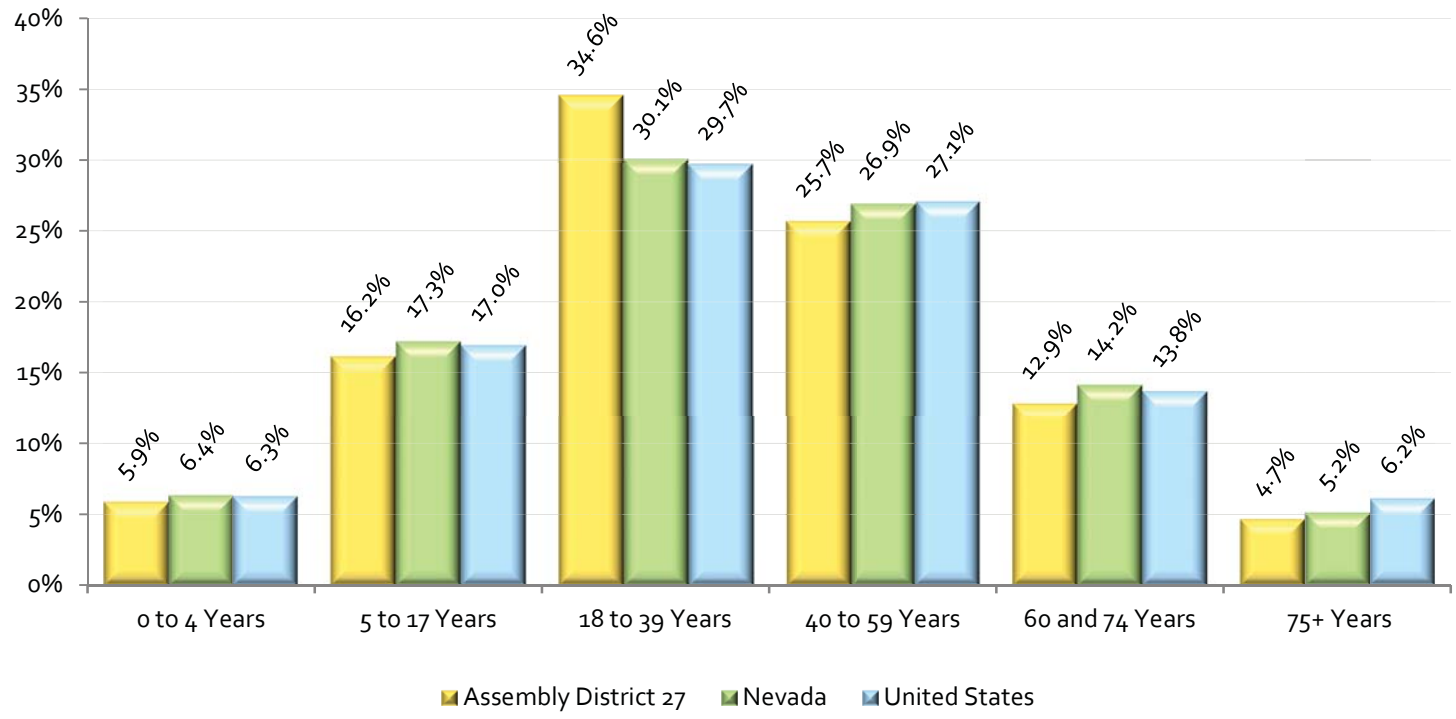

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 27	67,032	33,985	50.7%	33,047	49.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Population Characteristics
Nevada Assembly District No. 27

Chart 2--Median Age (in years)*

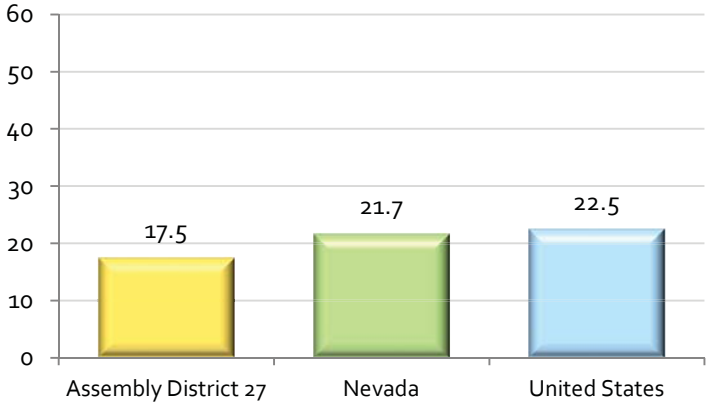

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 28

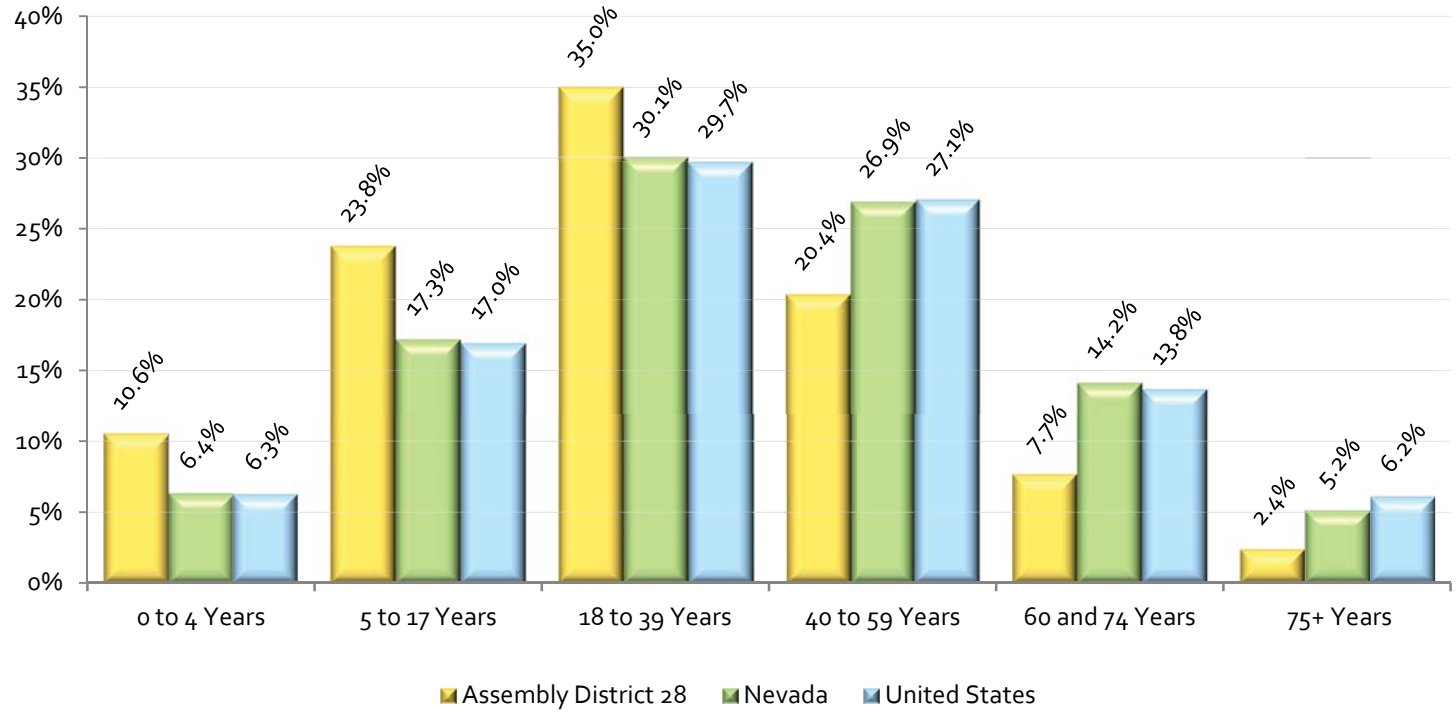

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 28	66,228	33,630	50.8%	32,598	49.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Chart 1--Population Distribution by Age

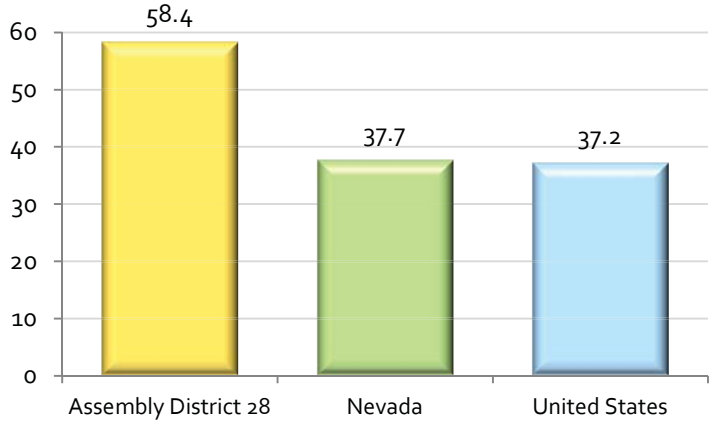

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

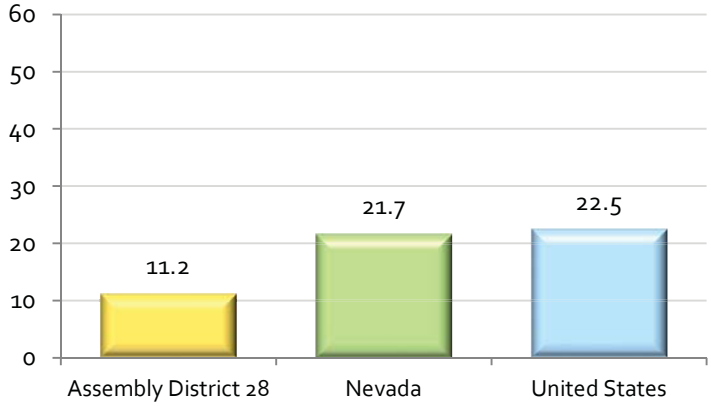

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 29

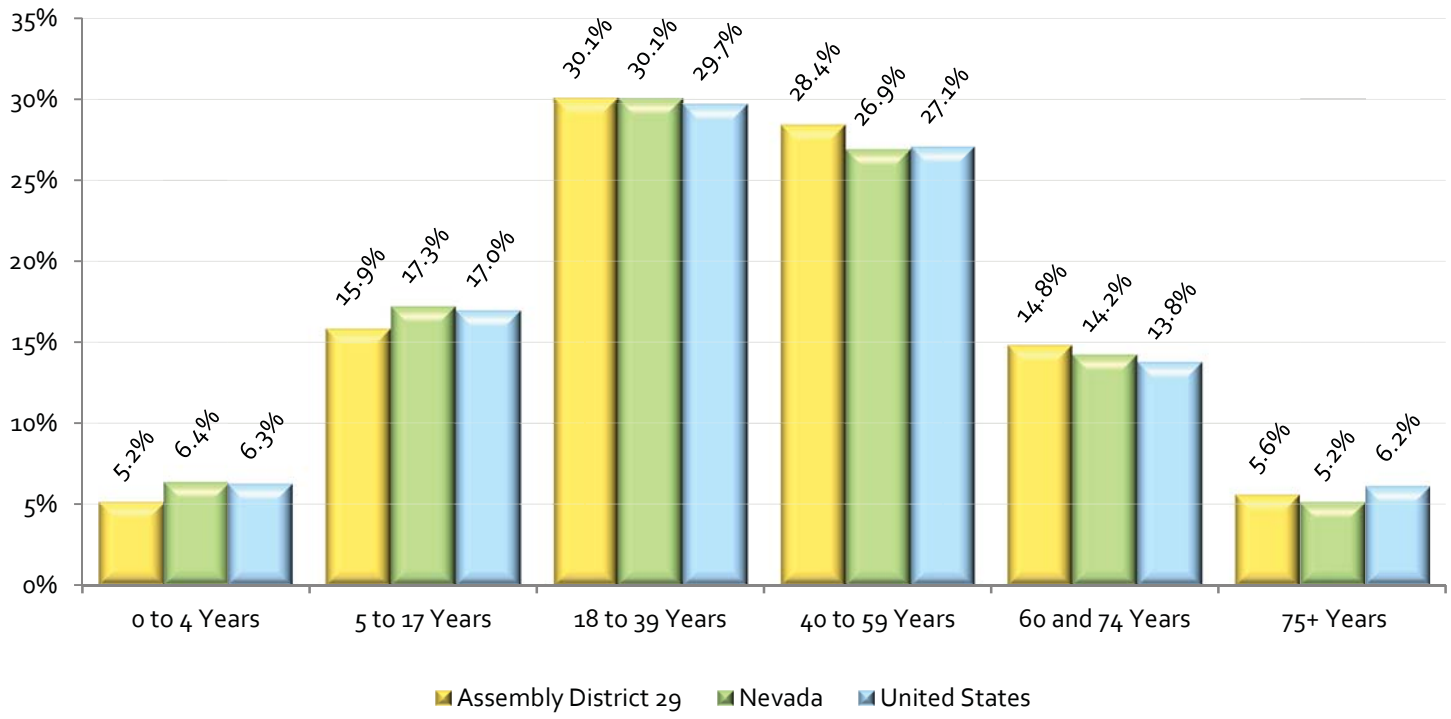

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 29	66,273	32,261	48.7%	34,012	51.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 29	3,424	10,516	19,942	18,853	9,814	3,724
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

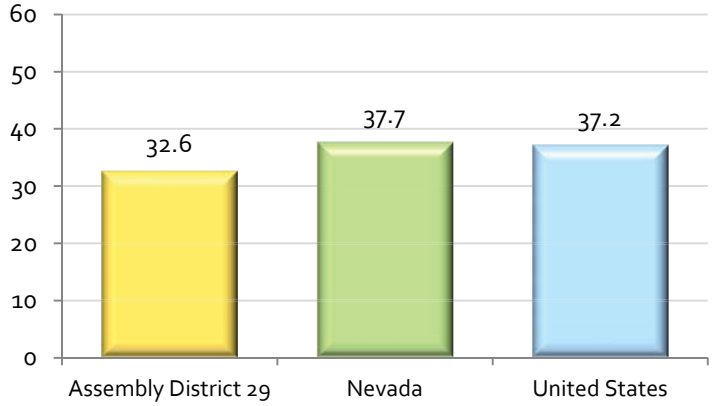

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

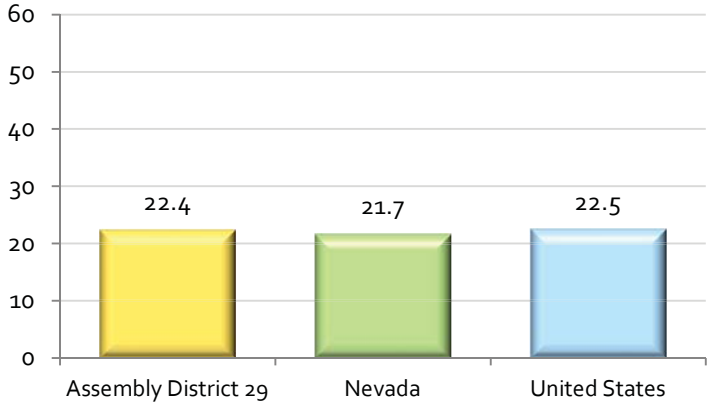

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 30

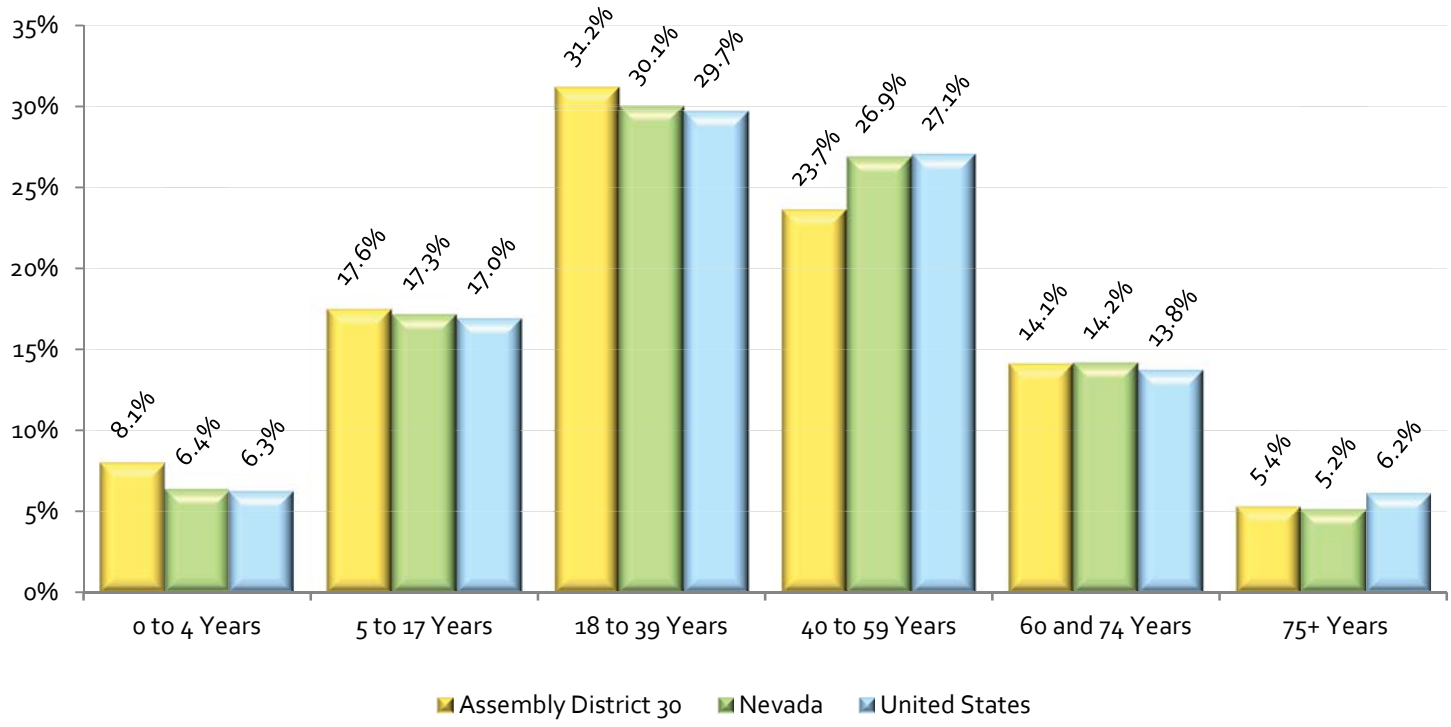

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 30	65,926	32,293	49.0%	33,633	51.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Chart 1--Population Distribution by Age

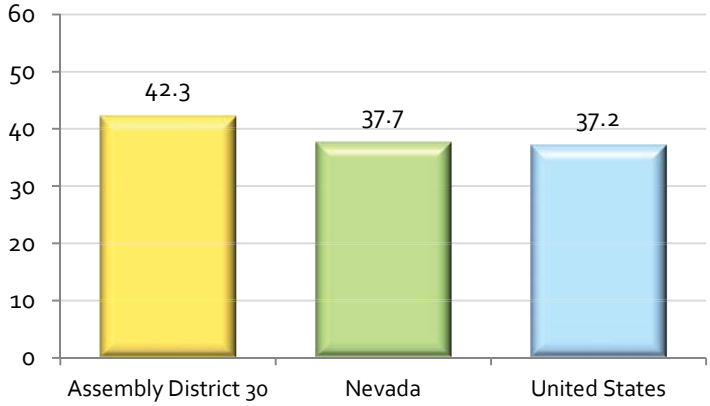

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

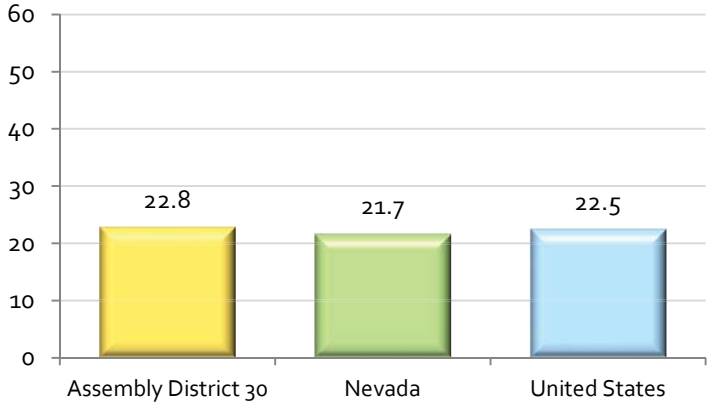

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

Table 11--Median Income*

	All Households	Family Households	Nonfamily Households**	Married-Couple Families
Assembly District 30	$40,958	$49,152	$28,769	$58,732
Nevada	$51,847	$60,916	$34,648	$72,123
United States	$53,889	$66,011	$32,298	$79,956

* The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 31

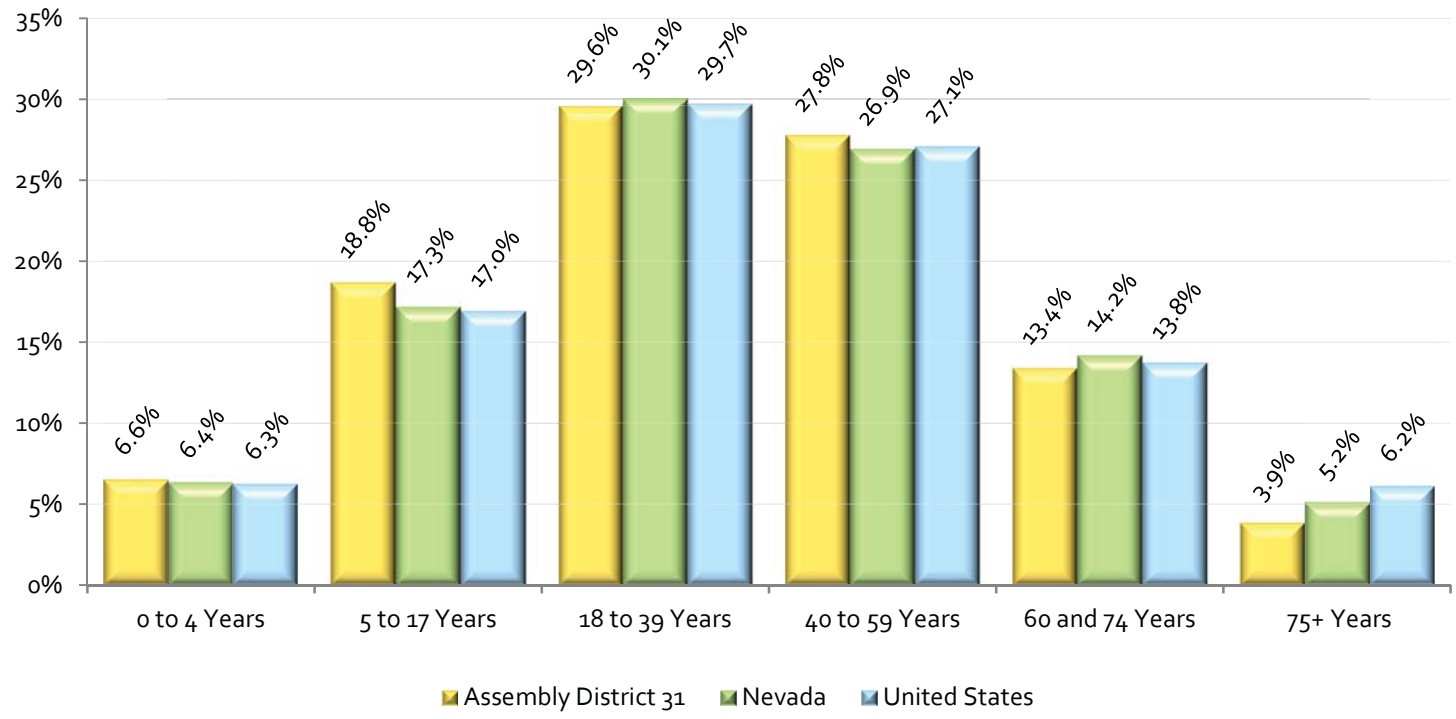

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 31	68,505	34,242	50.0%	34,263	50.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Chart 1--Population Distribution by Age

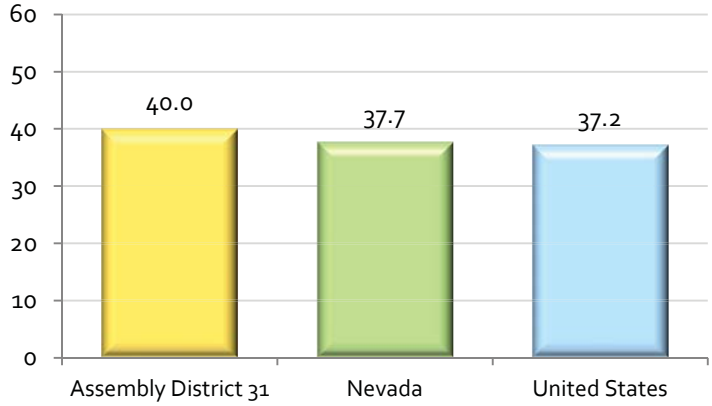

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

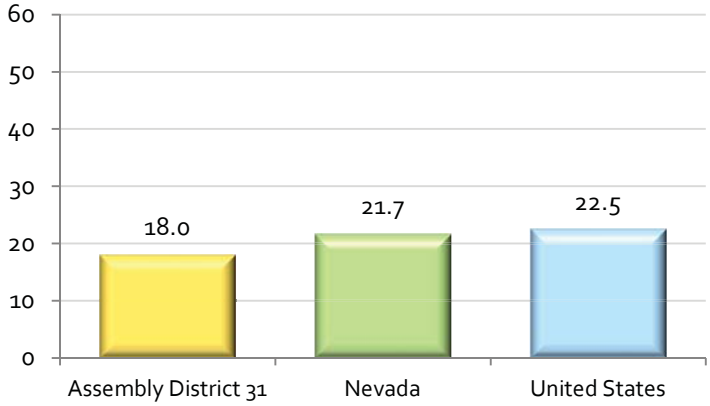

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

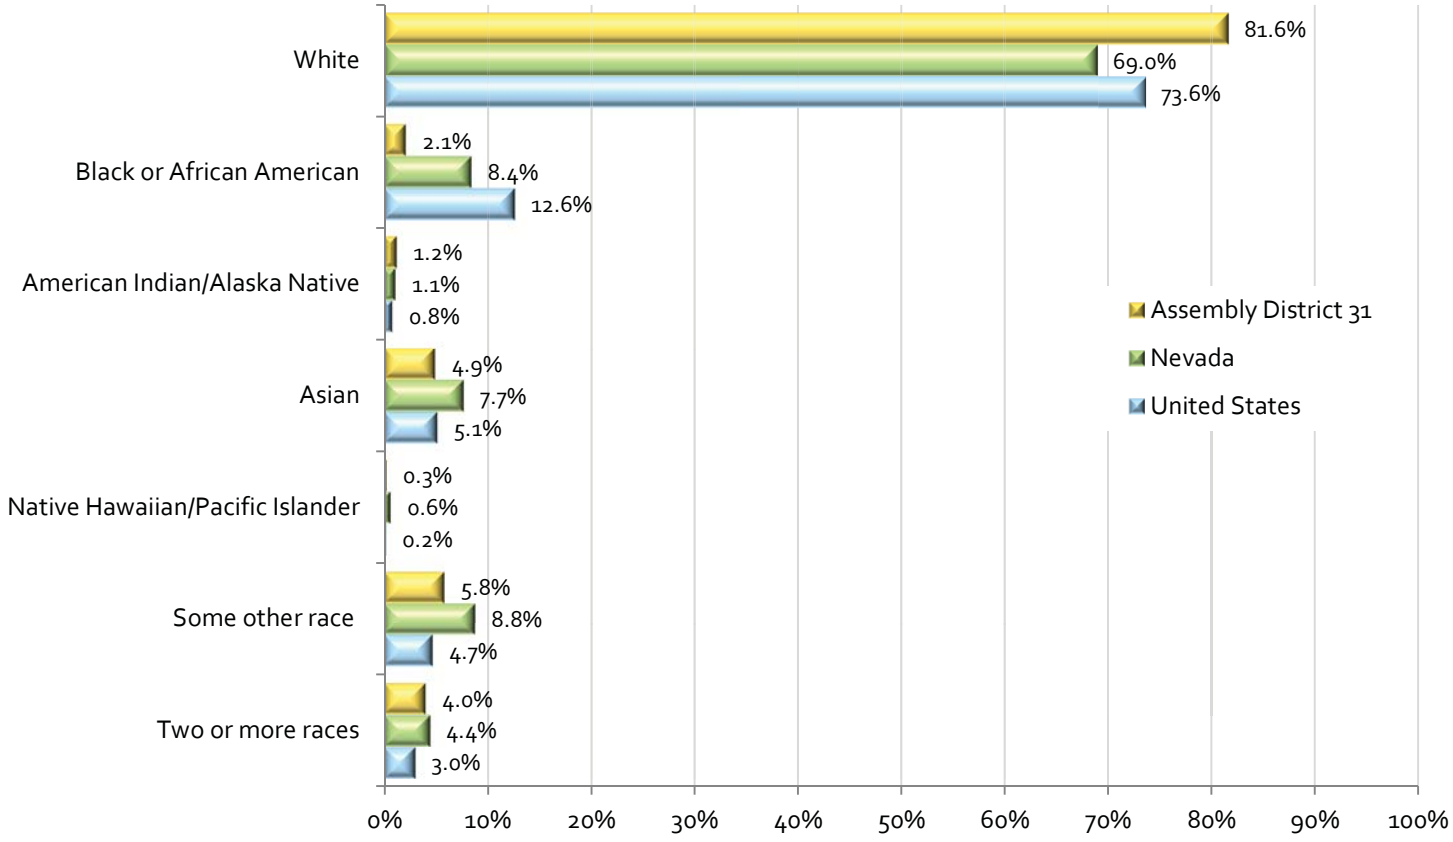

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 32

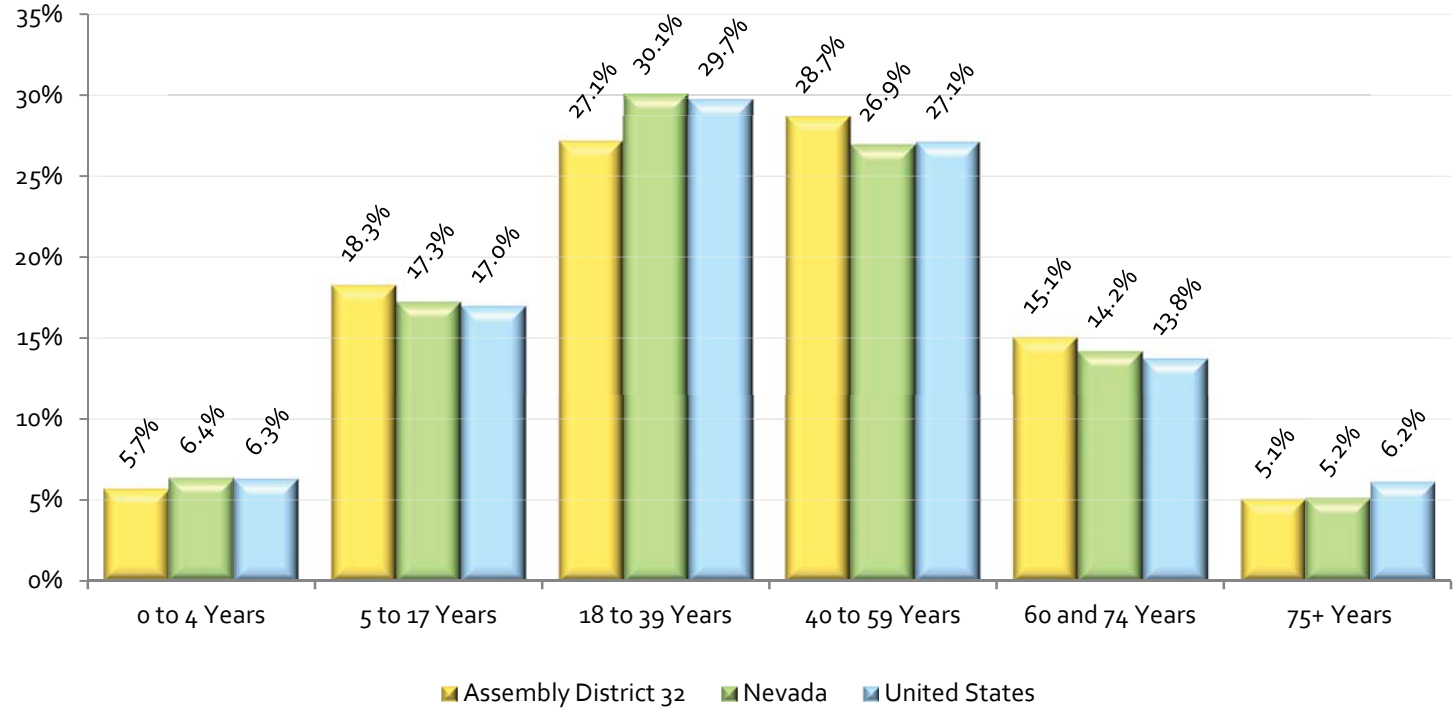

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 32	66,245	35,589	53.7%	30,656	46.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

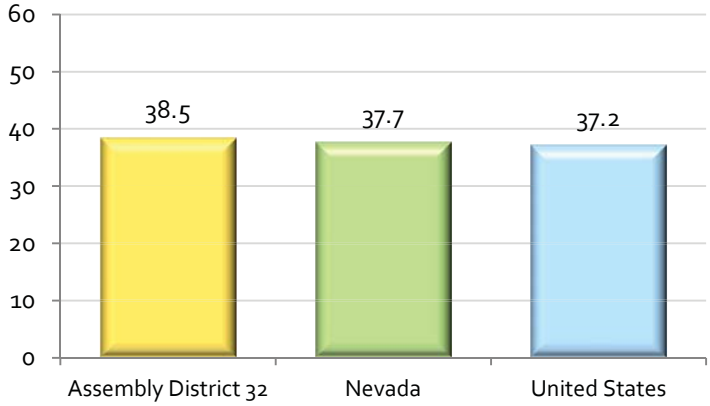

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

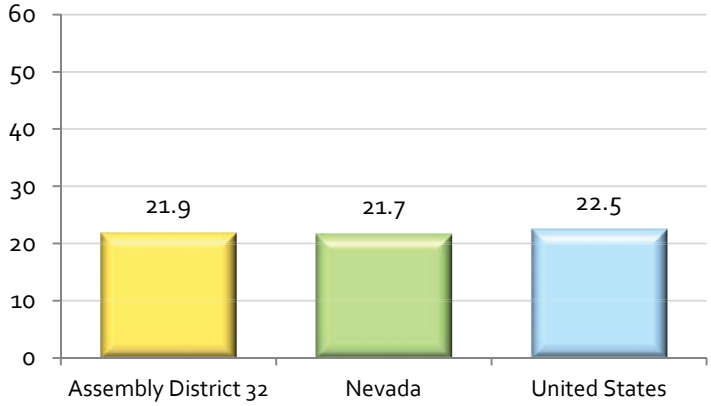

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 33

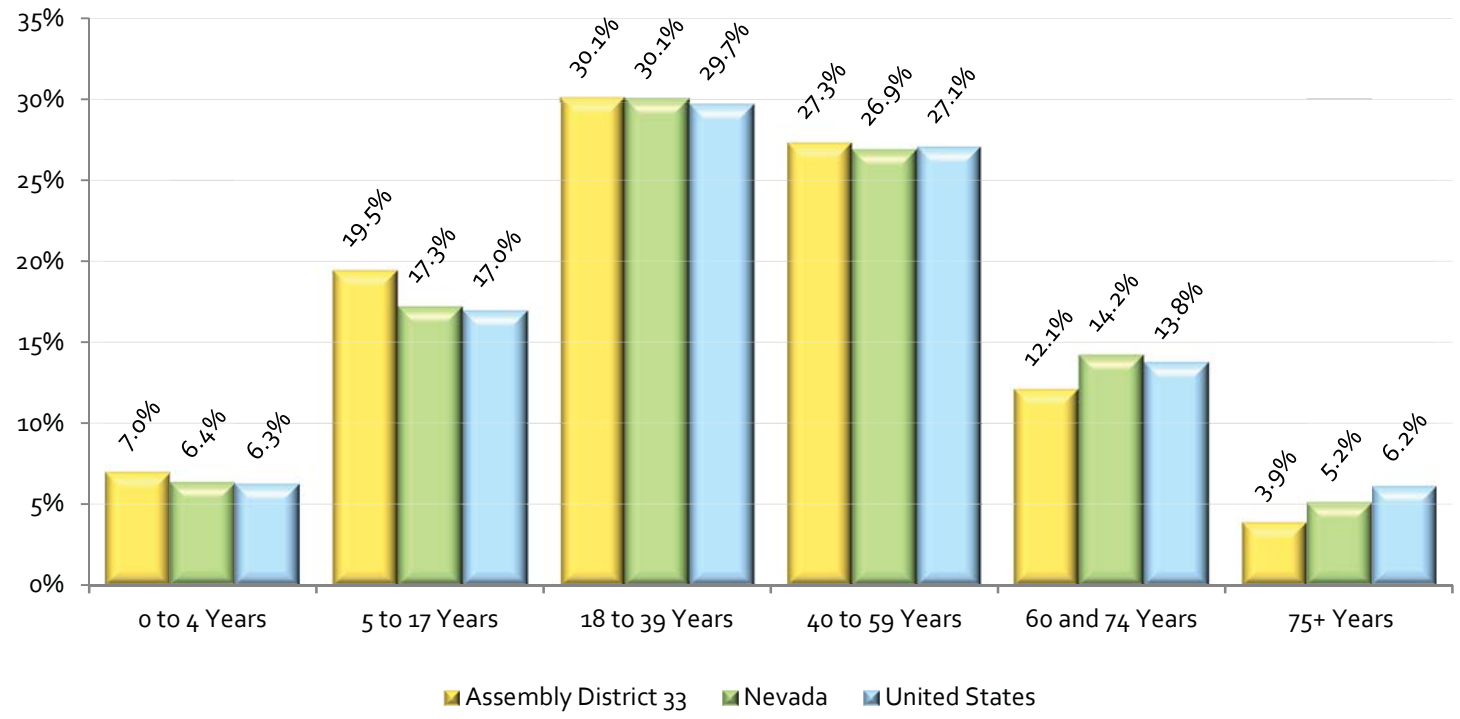

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 33	66,713	35,423	53.1%	31,290	46.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

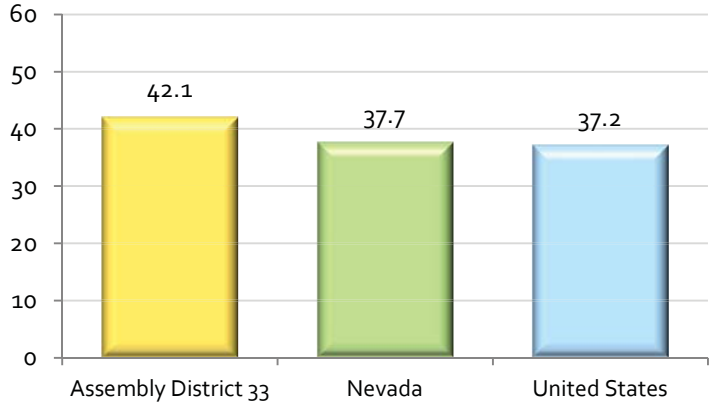

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

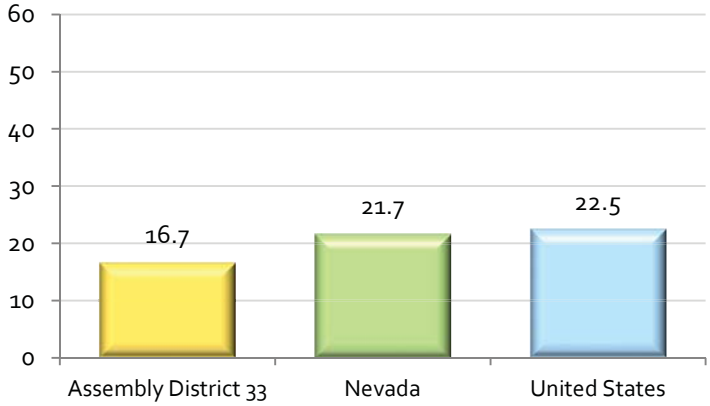

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 35

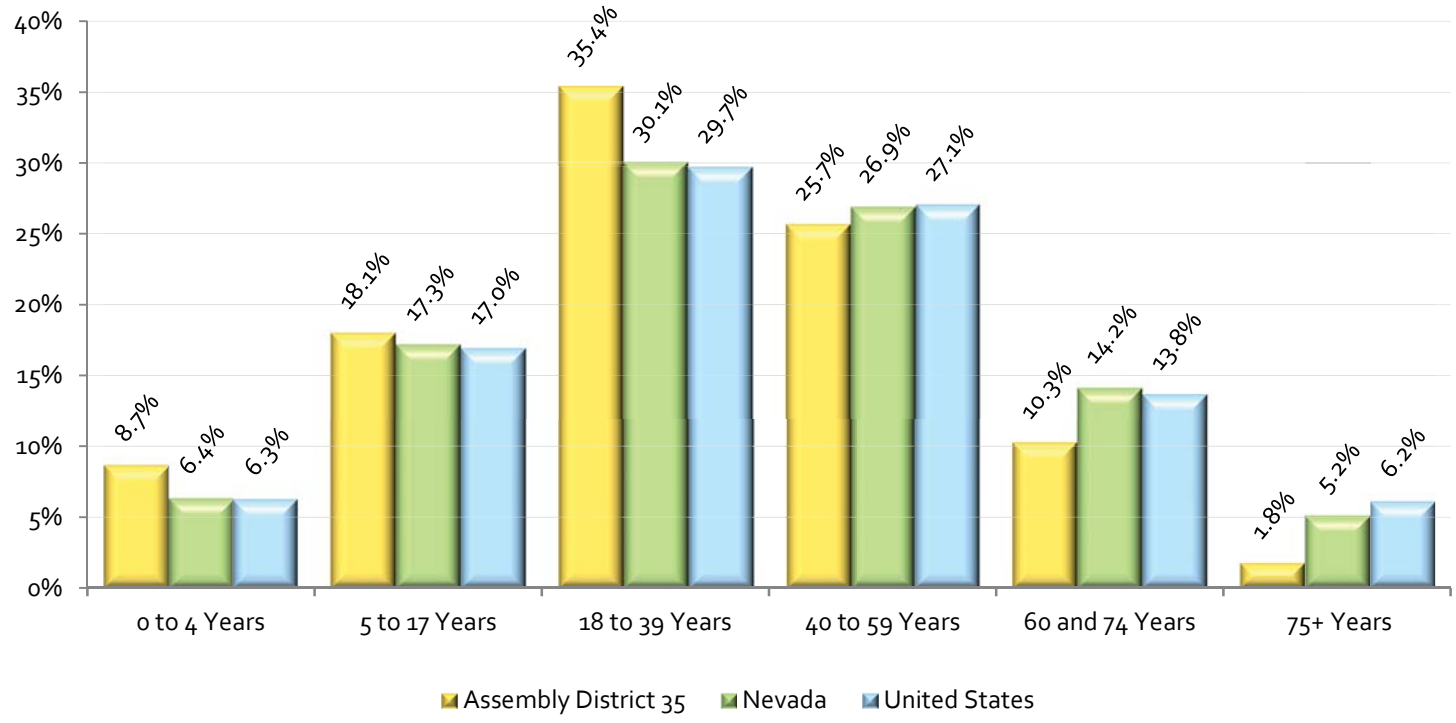

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 35	77,061	38,524	50.0%	38,537	50.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

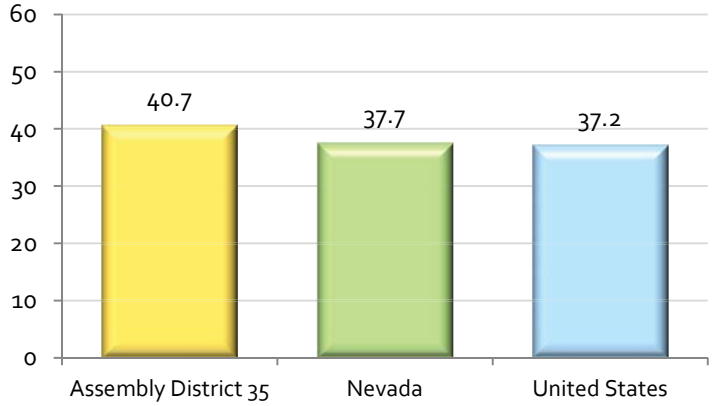

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

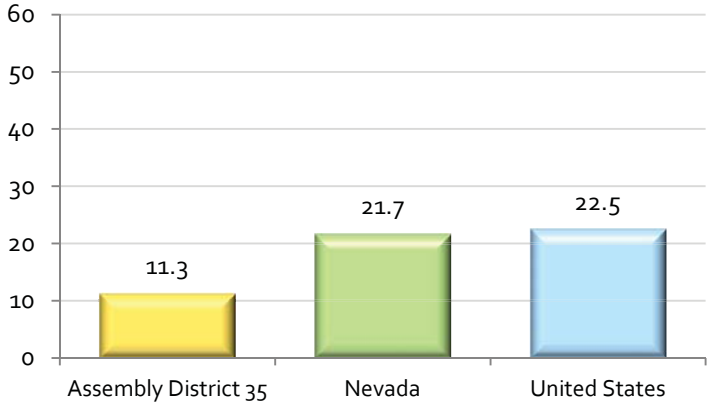

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 36

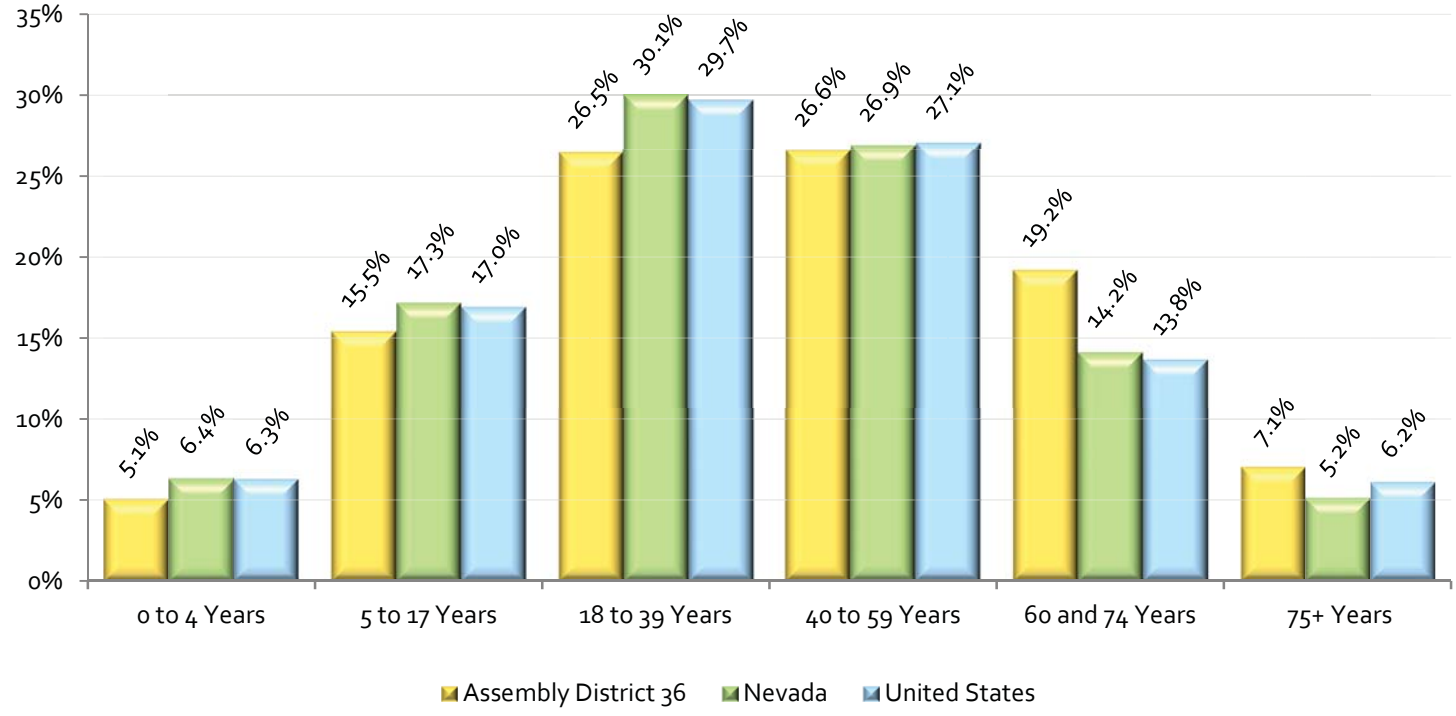

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

Chart 1--Population Distribution by Age

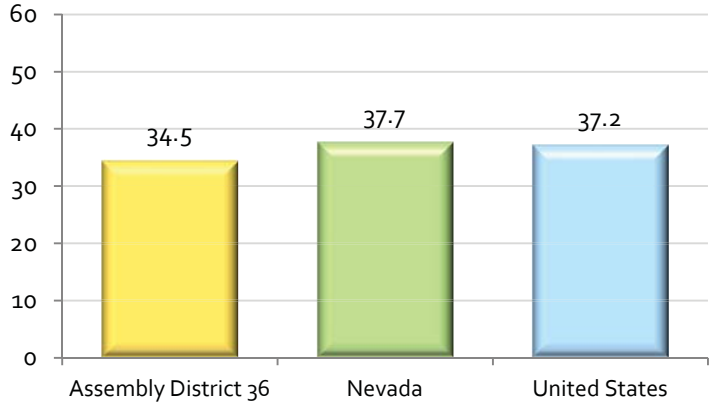

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

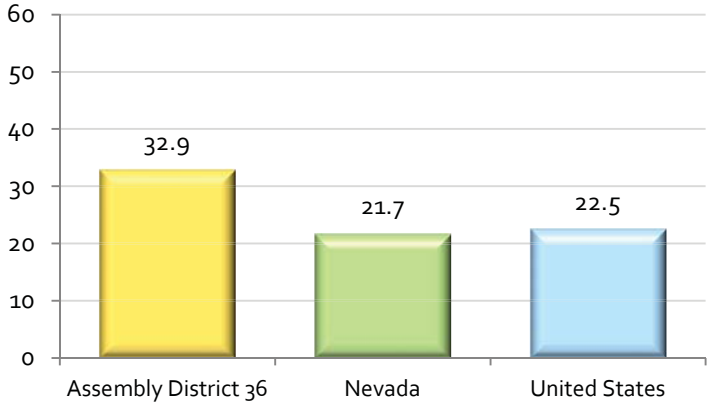

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 37

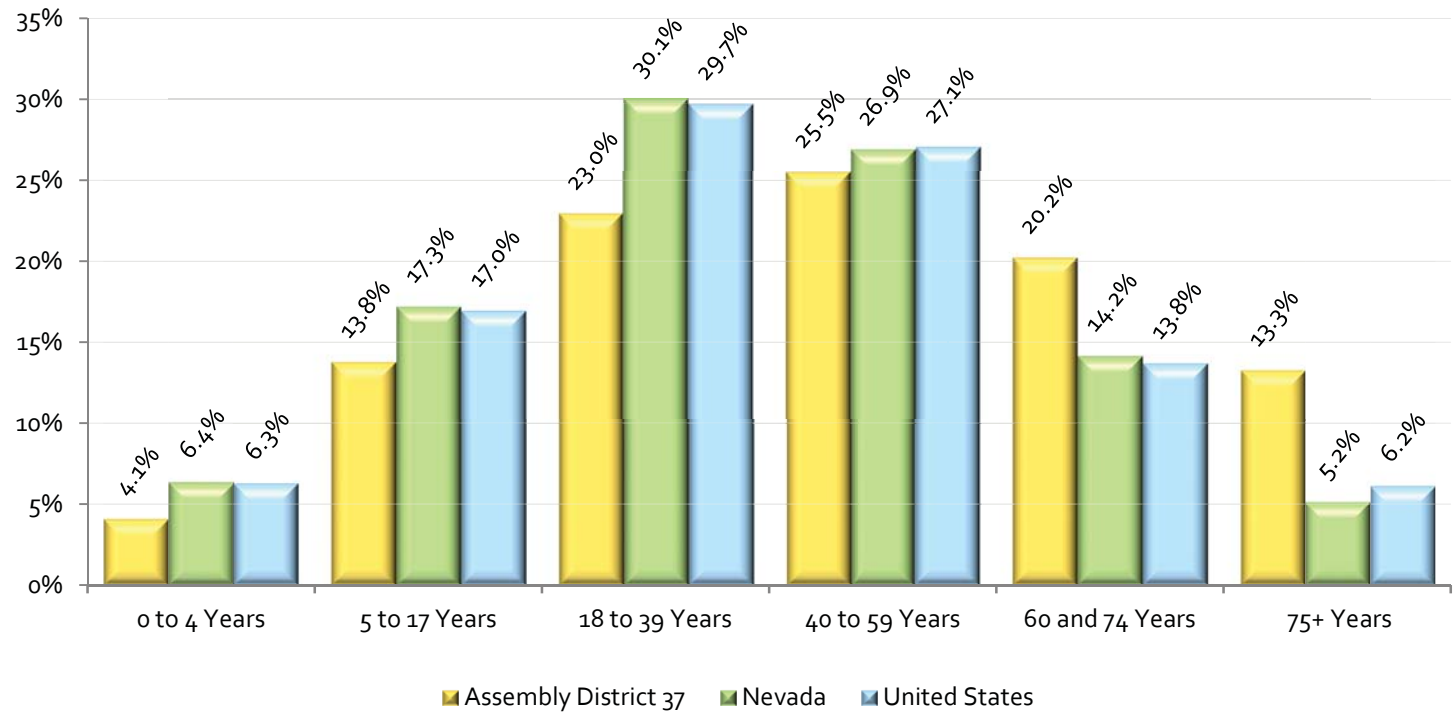

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 37	66,494	31,246	47.0%	35,248	53.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 37	2,750	9,194	15,267	16,977	13,454	8,852
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Population Characteristics
Nevada Assembly District No. 37

Chart 2--Median Age (in years)*

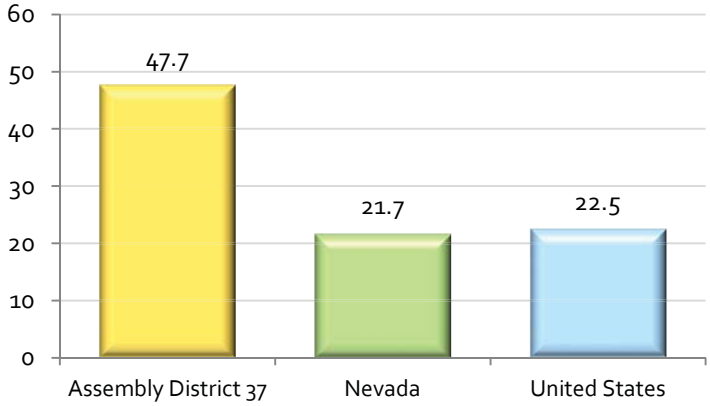

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 38

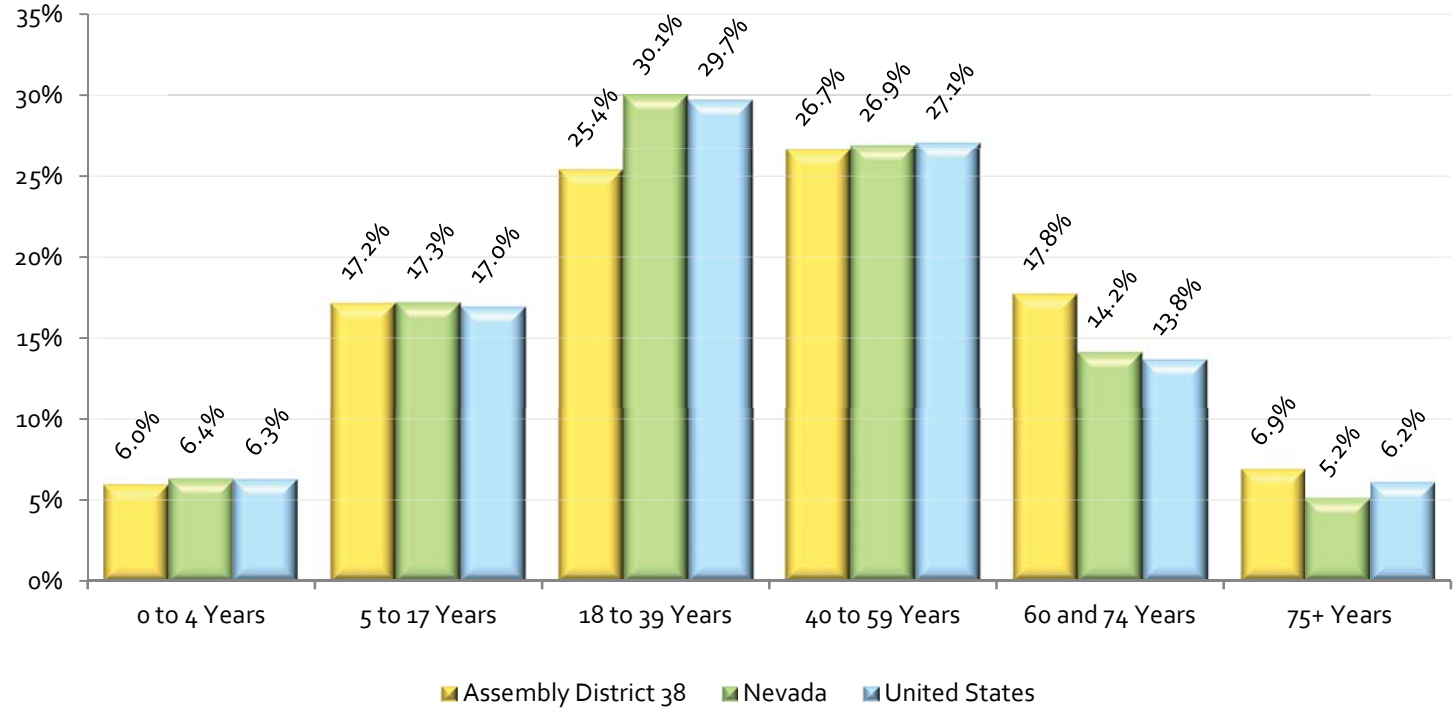

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 38	63,047	31,936	50.7%	31,111	49.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Chart 1--Population Distribution by Age

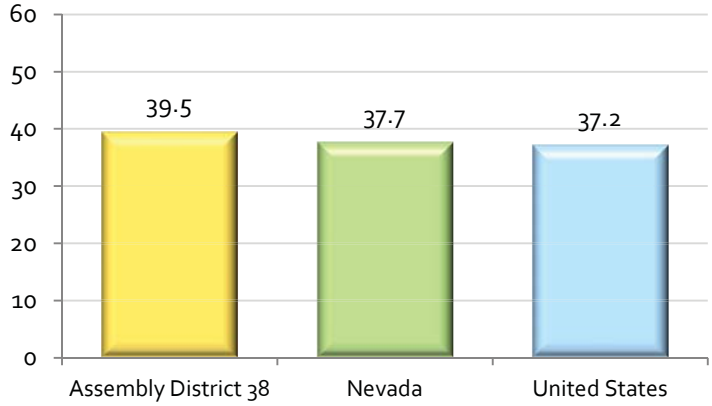

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

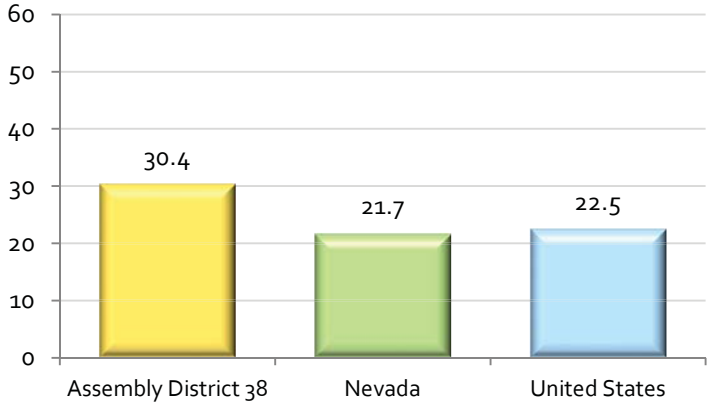

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 39

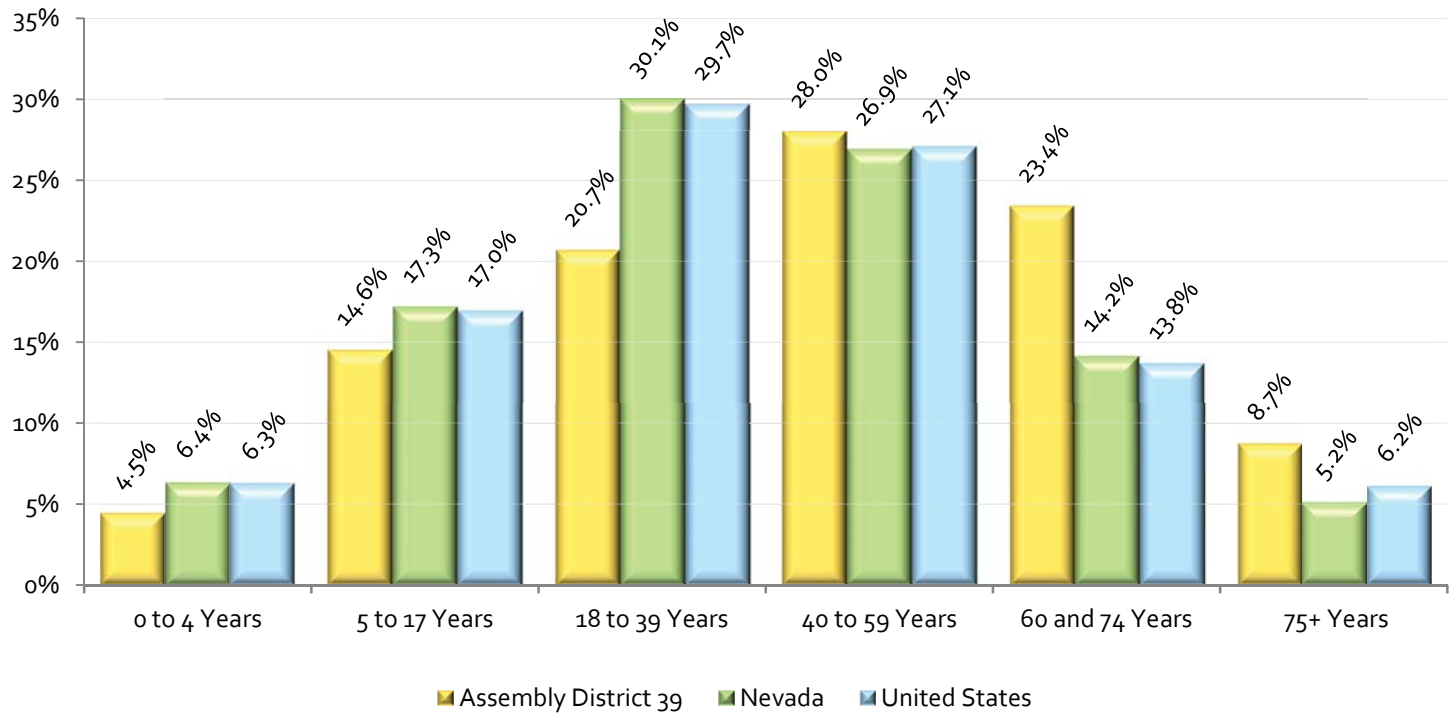

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 39	64,050	32,070	50.1%	31,980	49.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

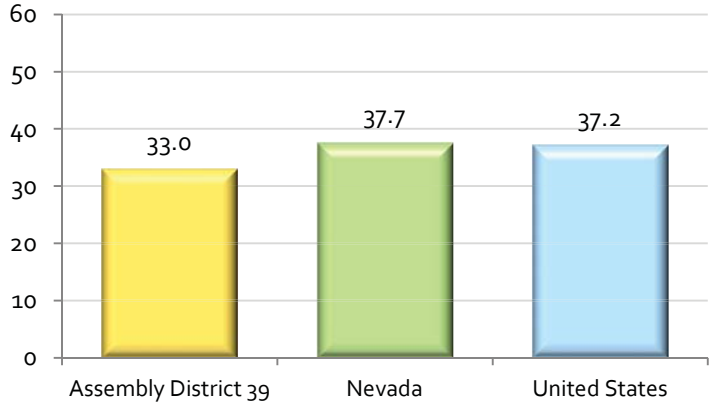

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

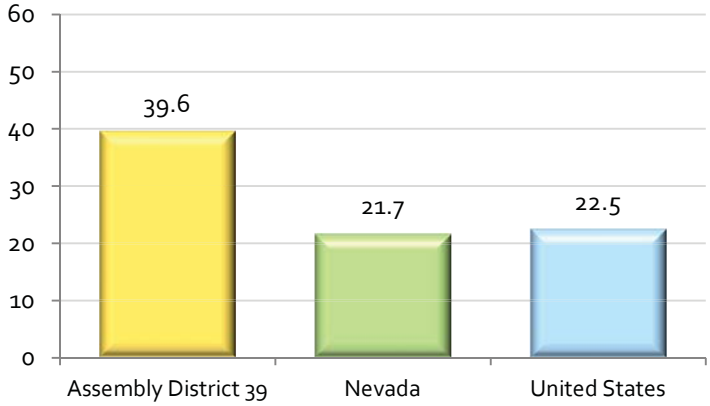

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 40

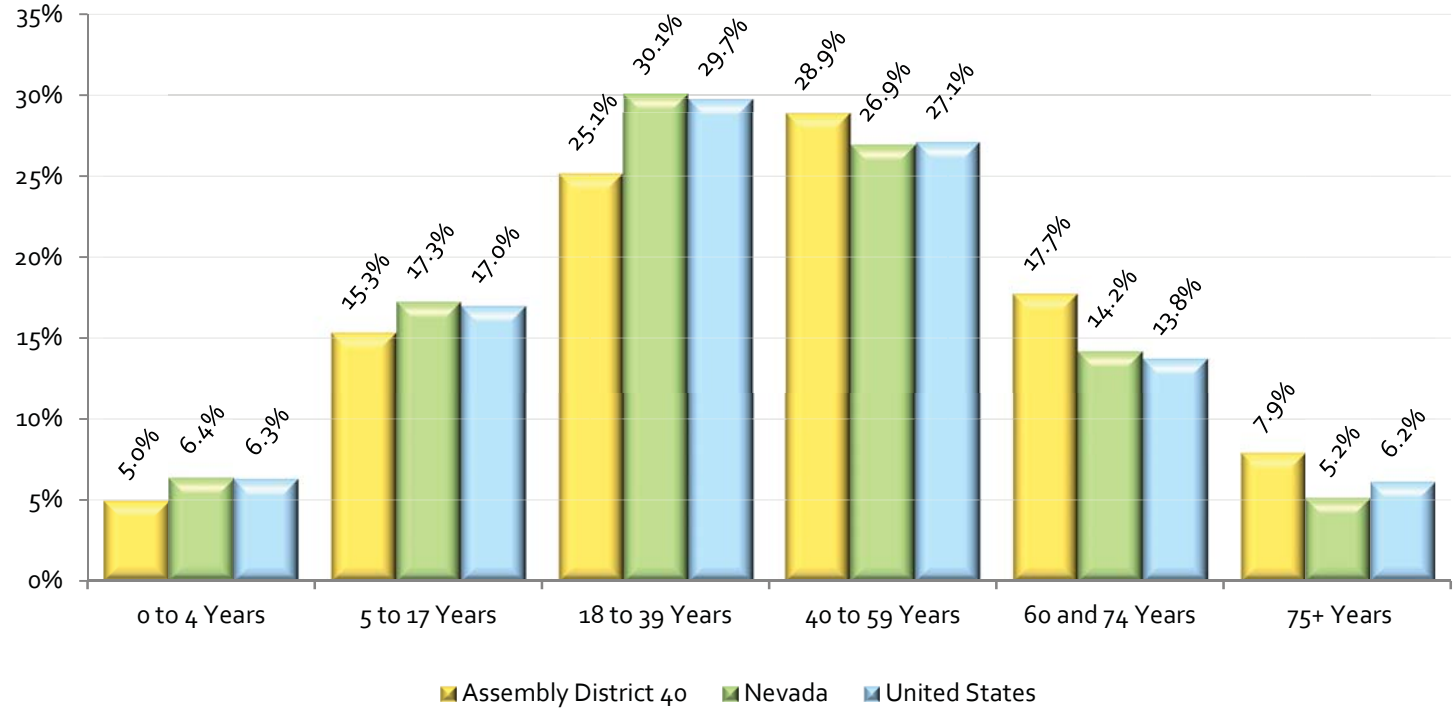

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 40	64,450	33,113	51.4%	31,337	48.6%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 40	3,223	9,890	16,199	18,605	11,435	5,098
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

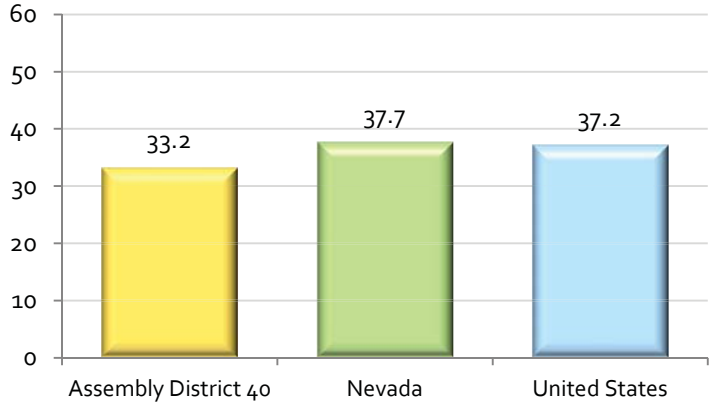

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

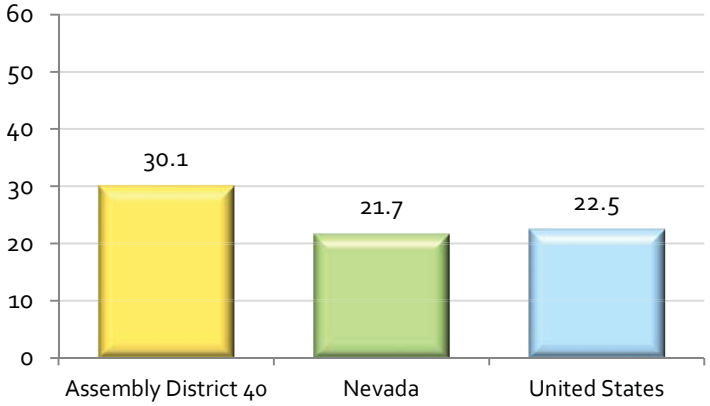

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 41

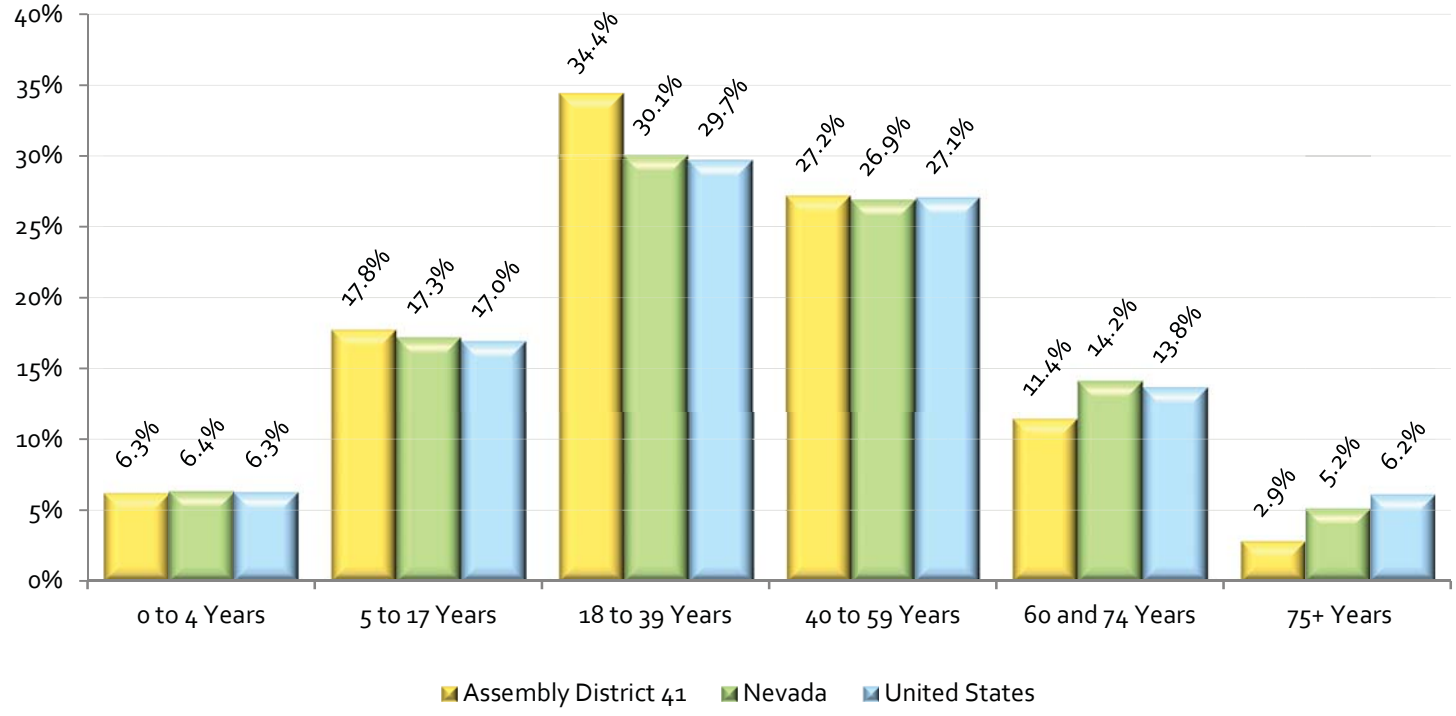

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 41	71,378	34,946	49.0%	36,432	51.0%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Chart 1--Population Distribution by Age

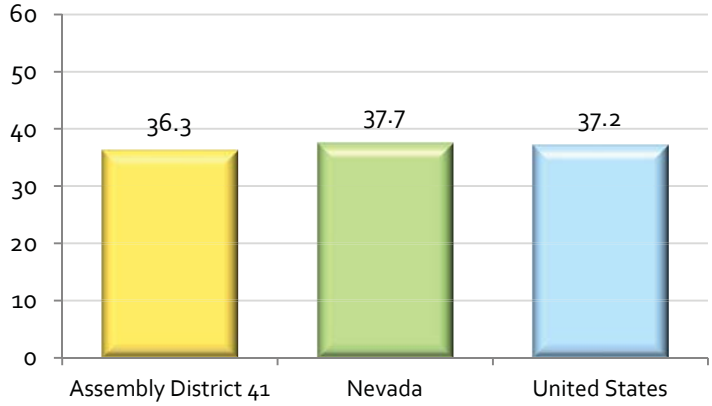

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

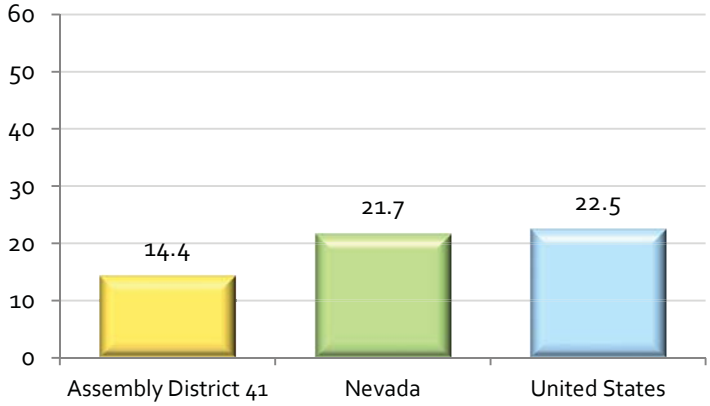

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

Table 11--Median Income*

	All Households	Family Households	Nonfamily Households**	Married-Couple Families
Assembly District 41	$60,349	$69,862	$41,523	$83,086
Nevada	$51,847	$60,916	$34,648	$72,123
United States	$53,889	$66,011	$32,298	$79,956

* The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Assembly District No. 42

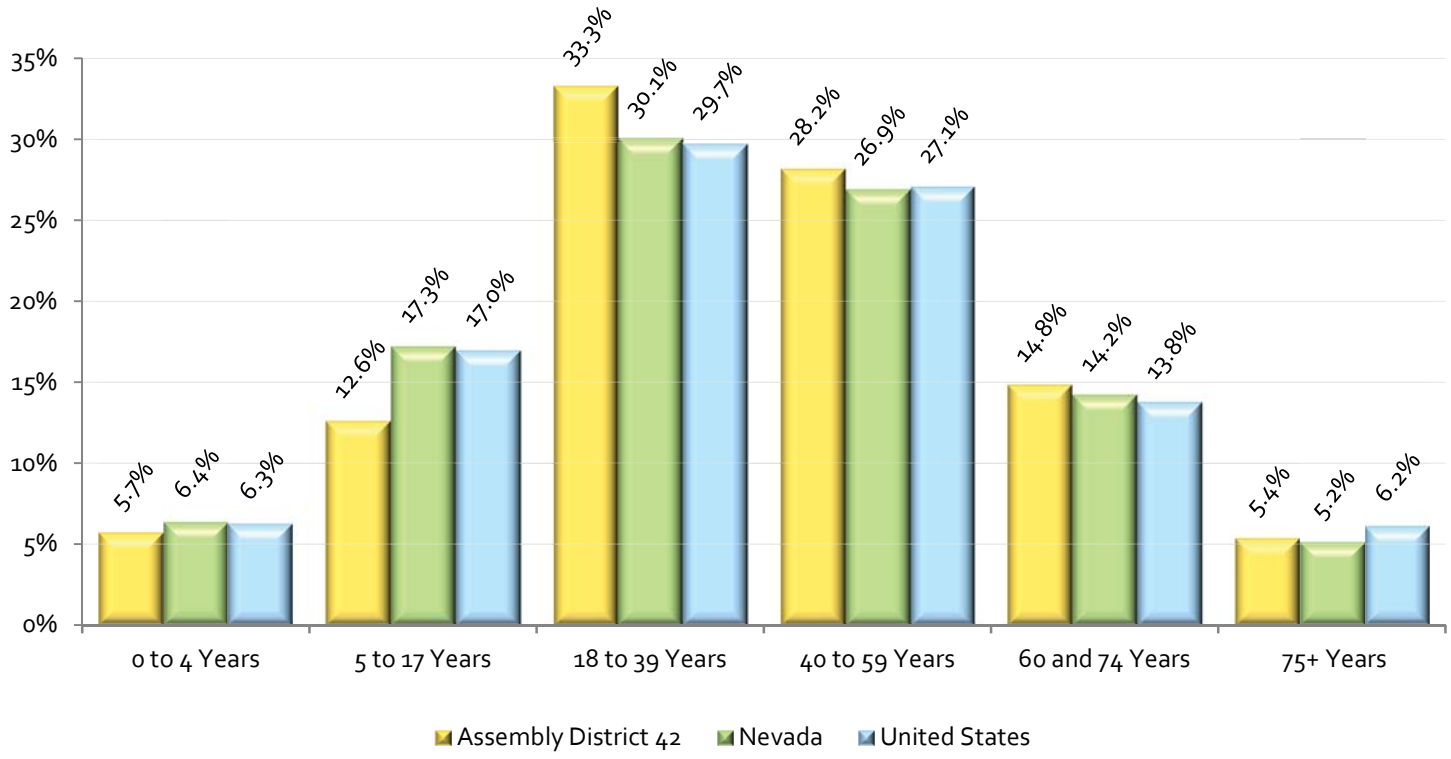

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 42	65,257	33,862	51.9%	31,395	48.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

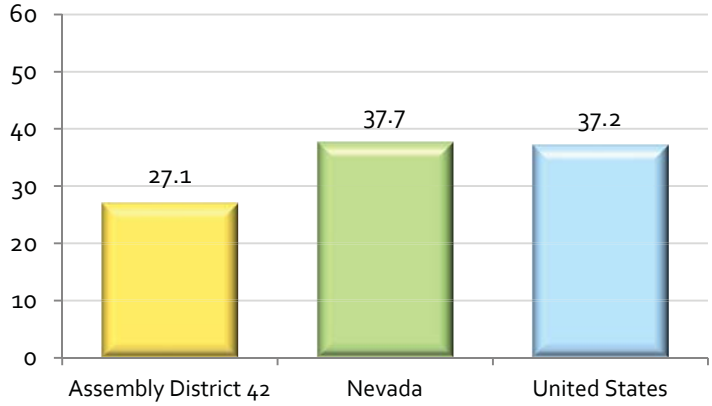

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

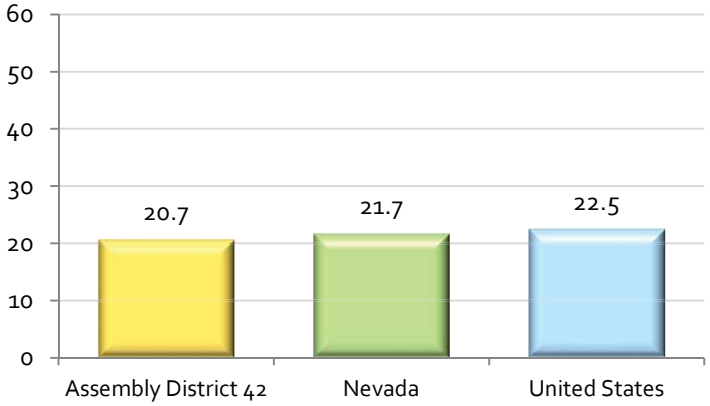

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 1

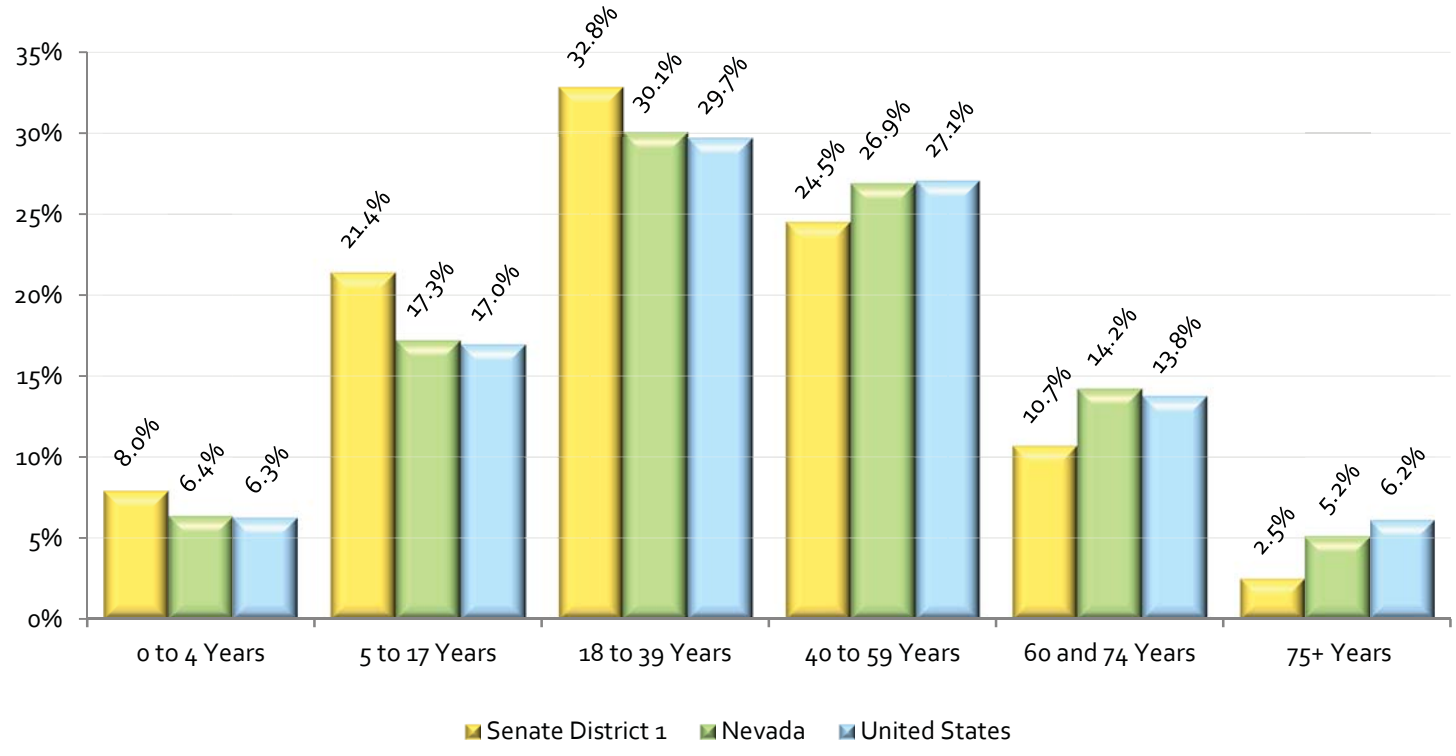

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 1	140,741	69,233	49.2%	71,508	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Population Characteristics
Nevada Senate District No. 1

Chart 2--Median Age (in years)*

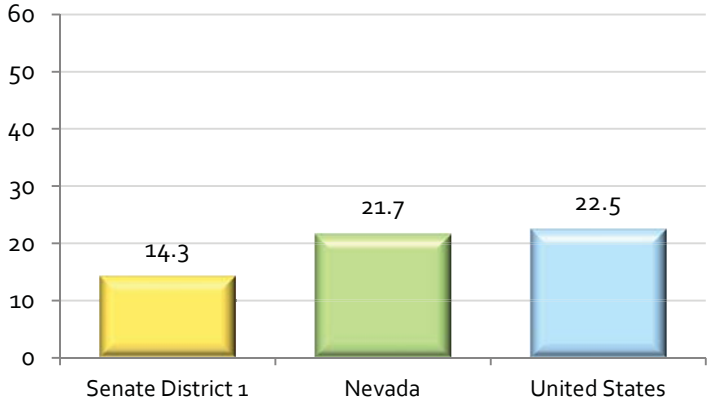

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 2

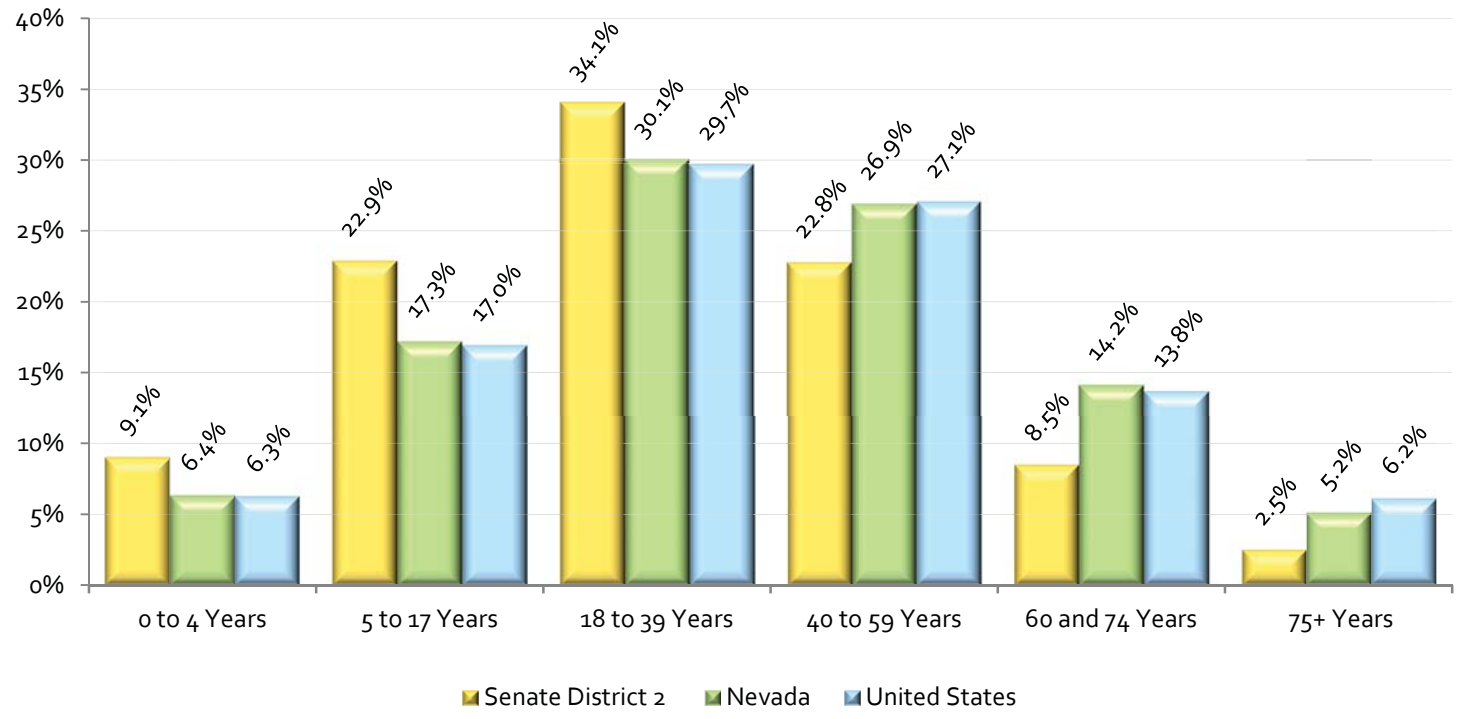

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 2	124,906	65,104	52.1%	59,802	47.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Chart 1--Population Distribution by Age

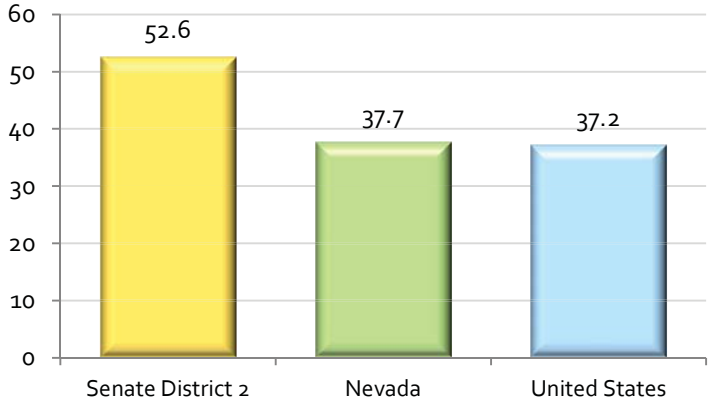

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

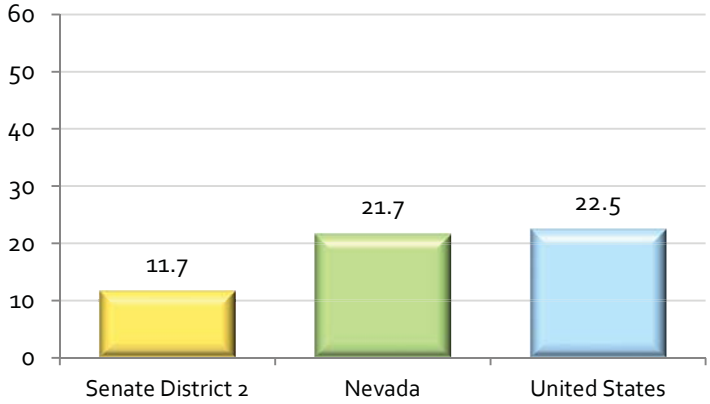

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 3

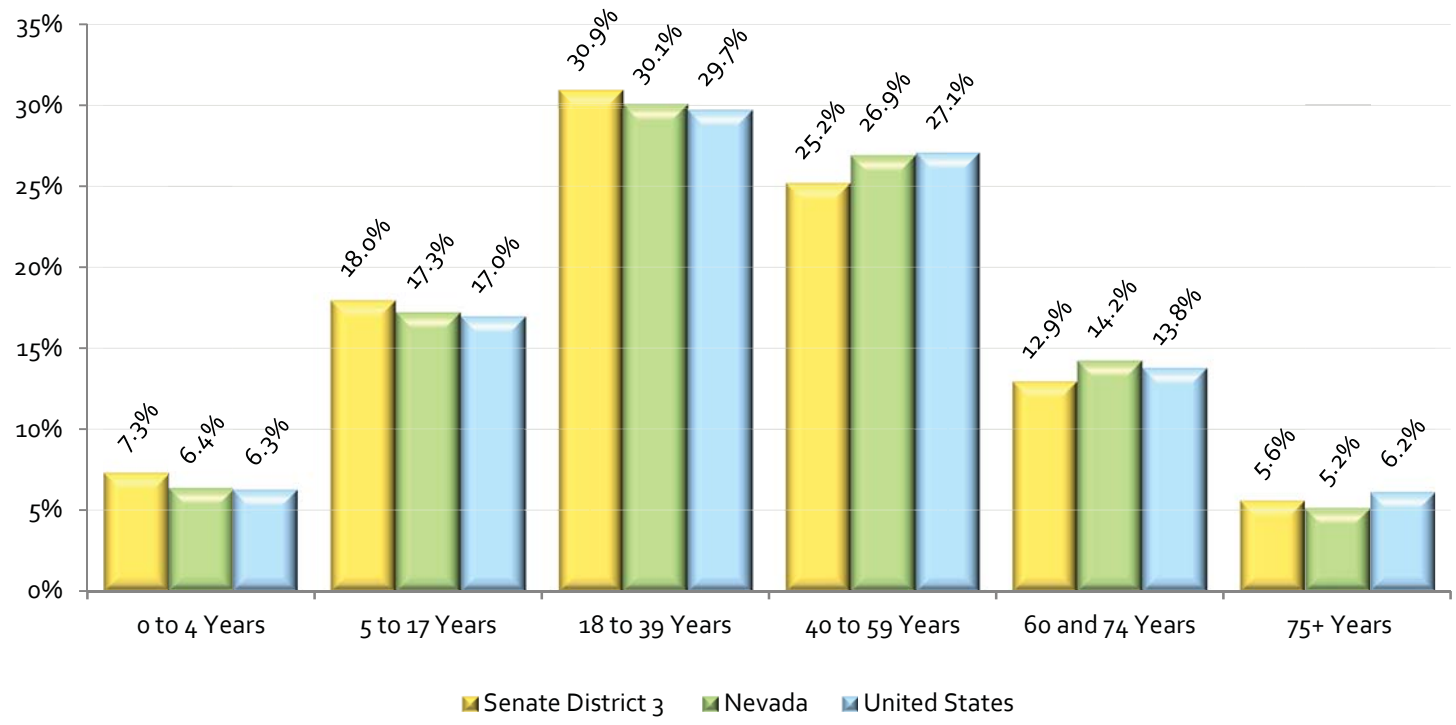

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 3	132,988	68,247	51.3%	64,741	48.7%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 3	9,762	23,911	41,129	33,521	17,193	7,472
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Population Characteristics
Nevada Senate District No. 3

Chart 2--Median Age (in years)*

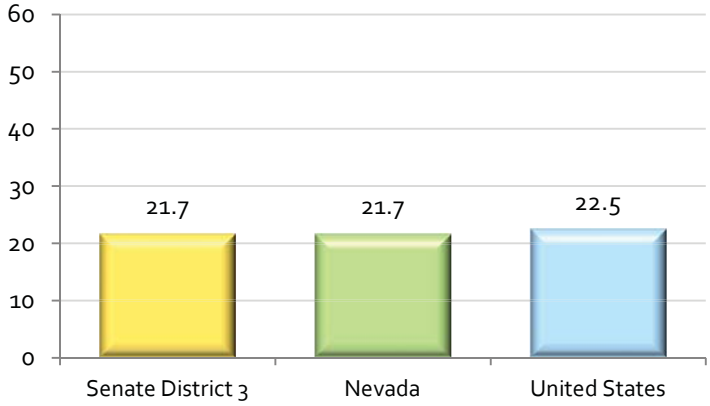

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 4

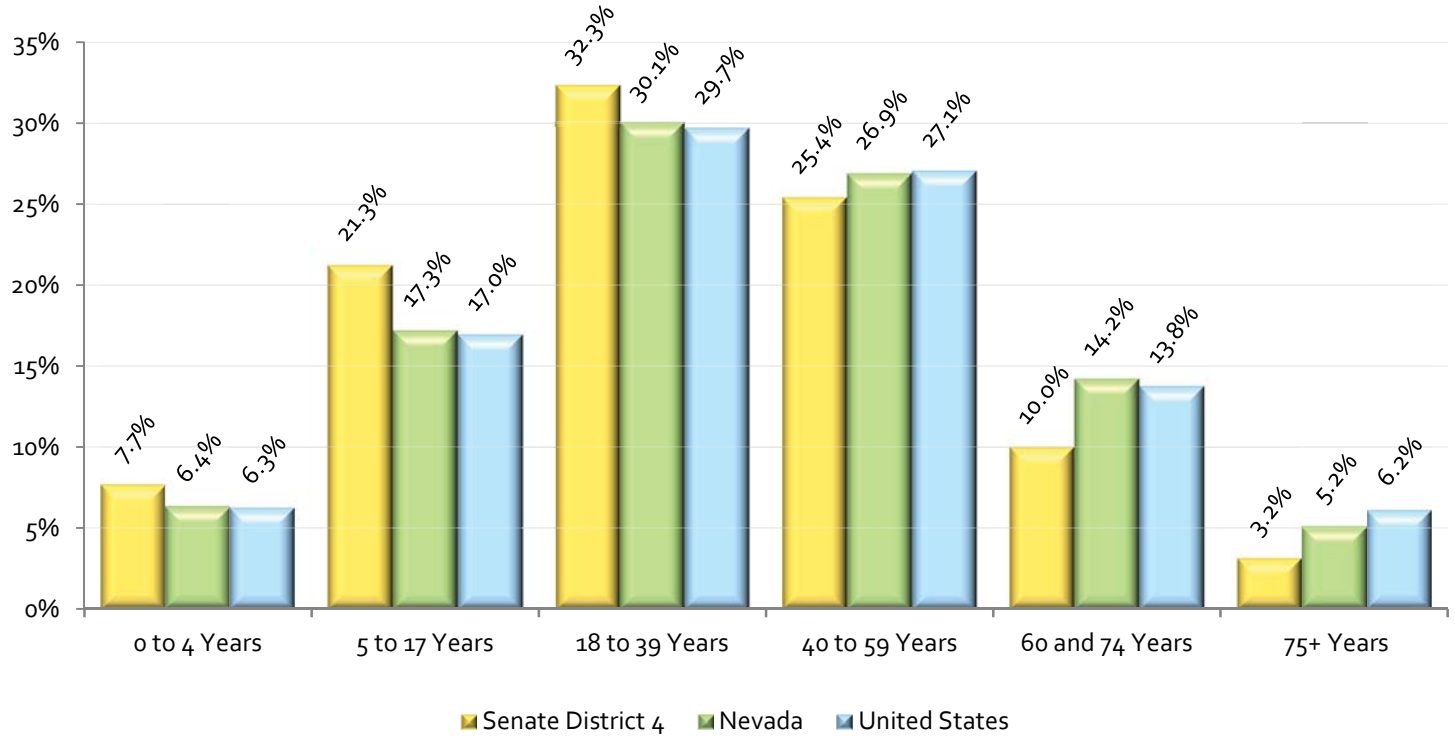

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 4	126,951	63,722	50.2%	63,229	49.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

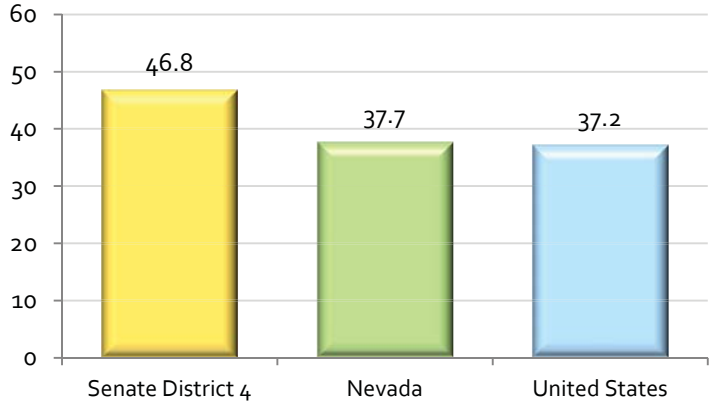

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

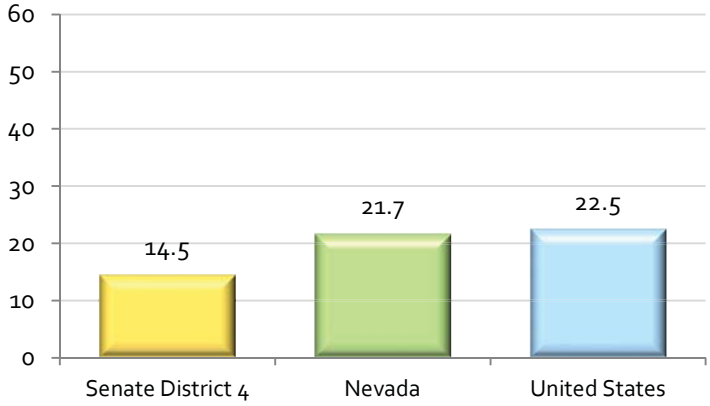

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 5

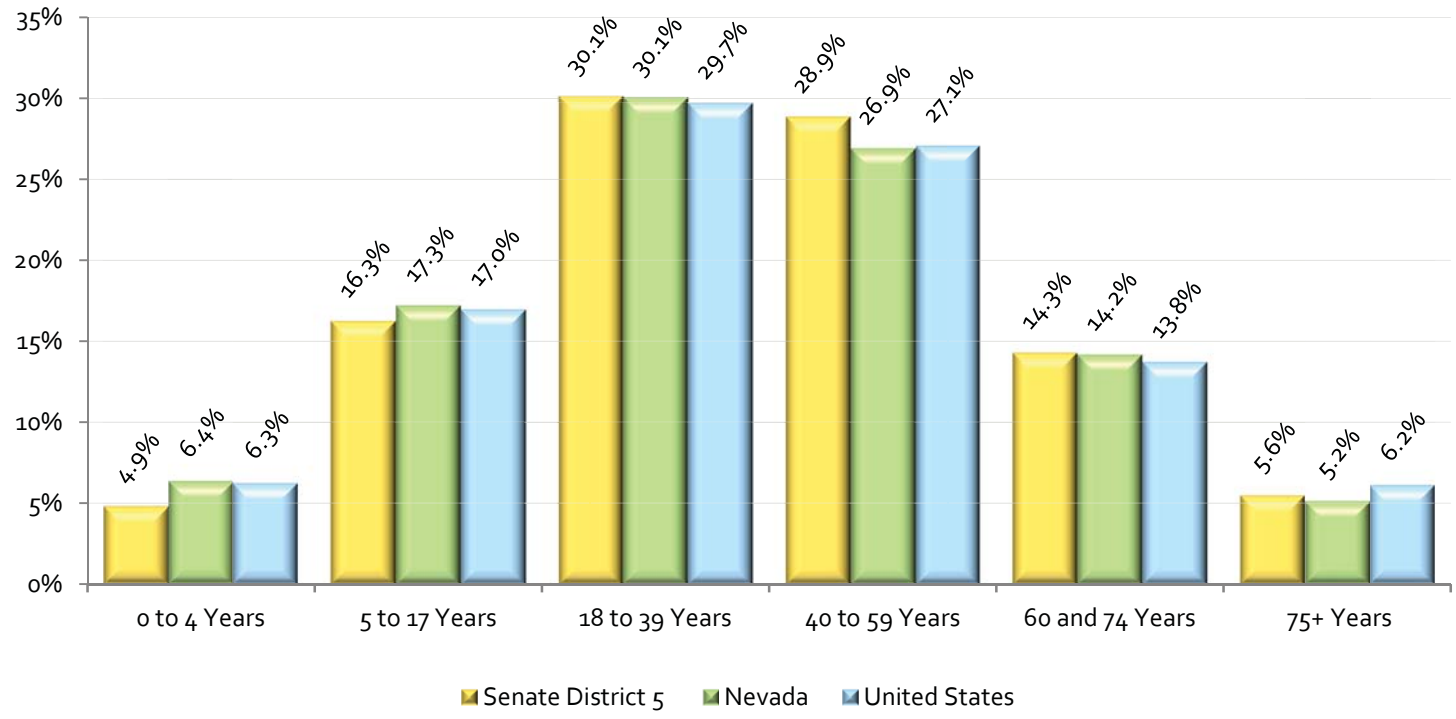

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 5	133,288	65,642	49.2%	67,646	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

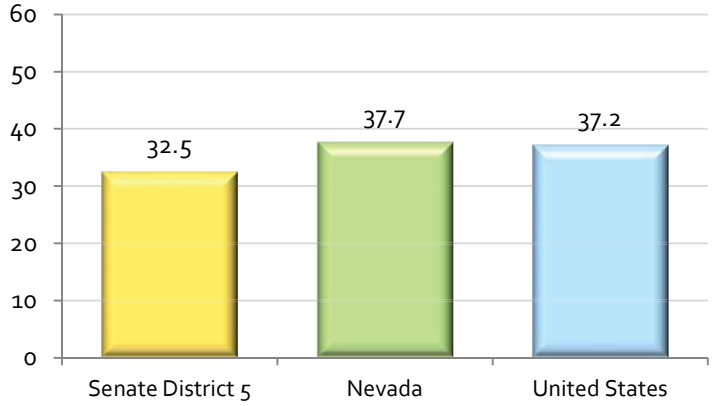

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

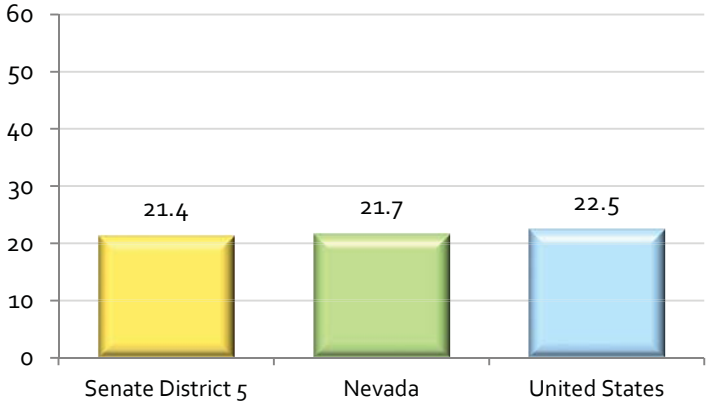

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 6

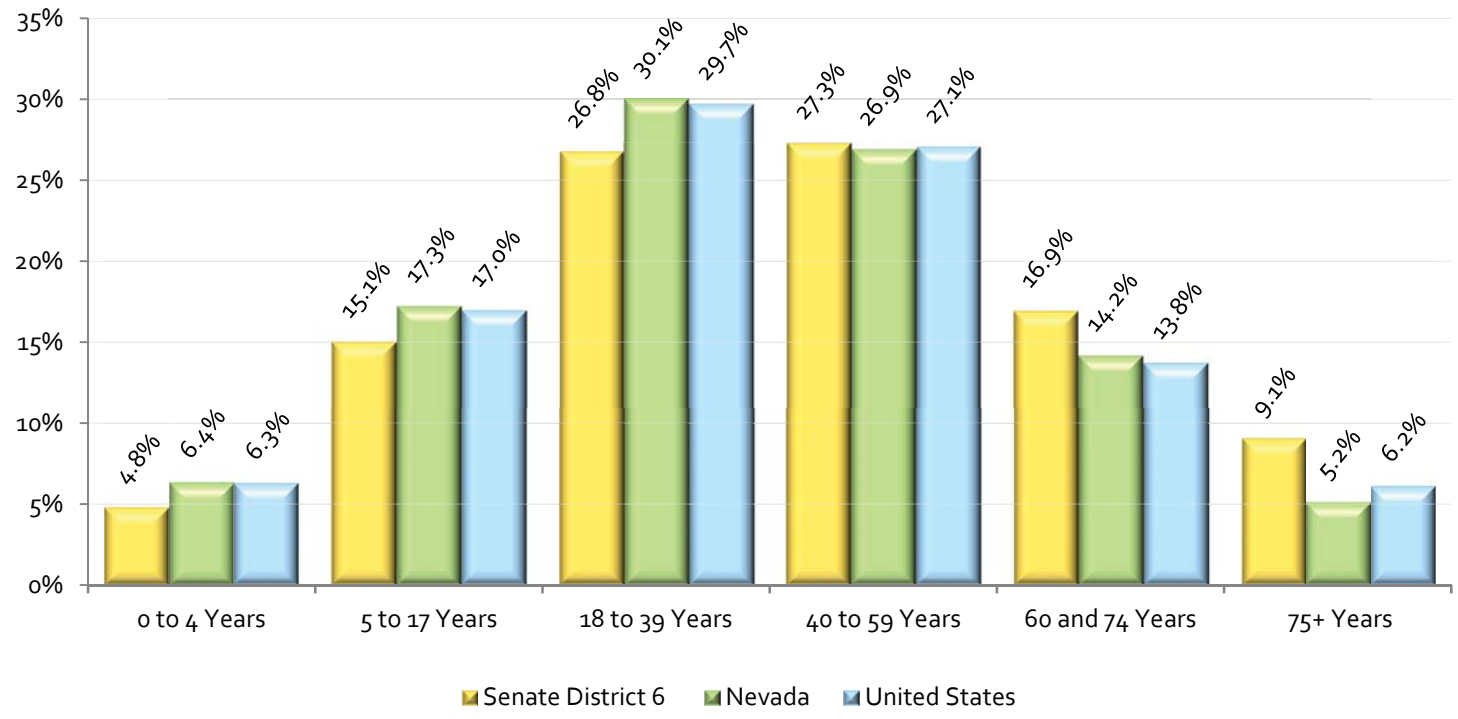

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 6	133,968	64,449	48.1%	69,519	51.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 6	6,494	20,177	35,874	36,589	22,704	12,130
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

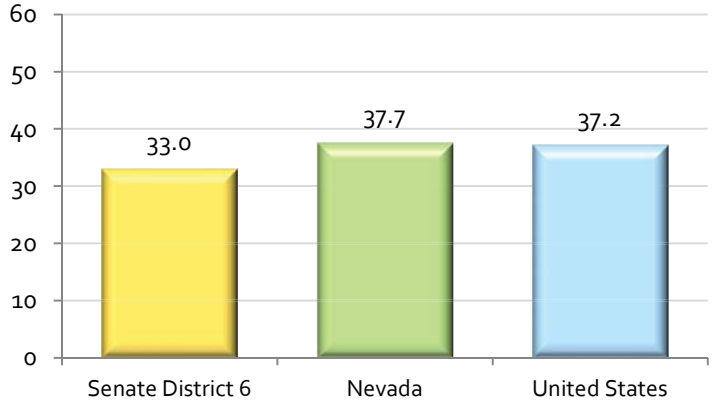

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

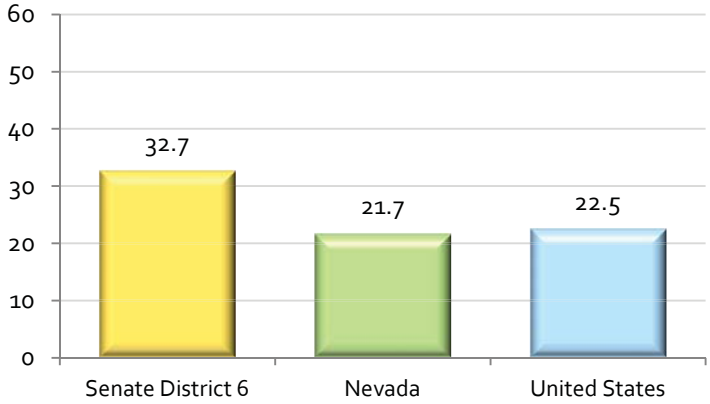

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 7

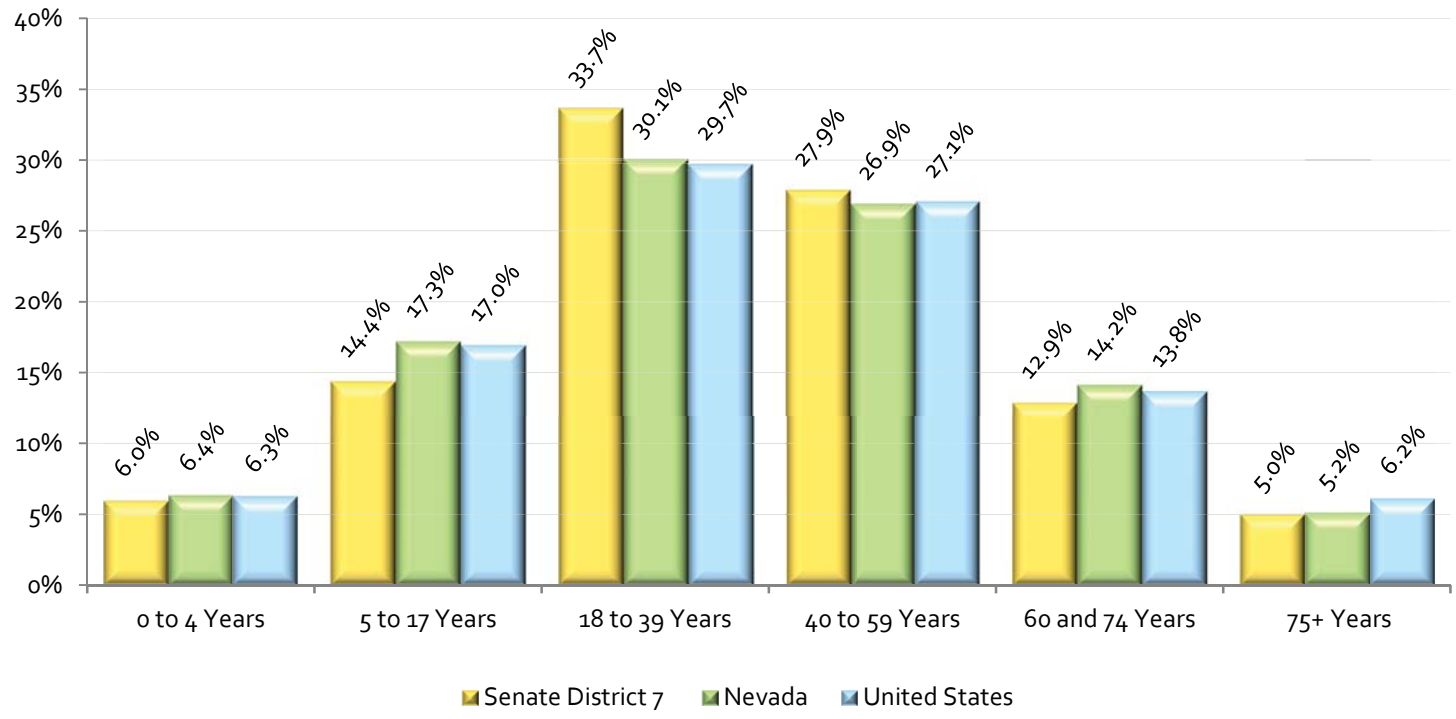

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 7	130,179	64,650	49.7%	65,529	50.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Chart 1--Population Distribution by Age

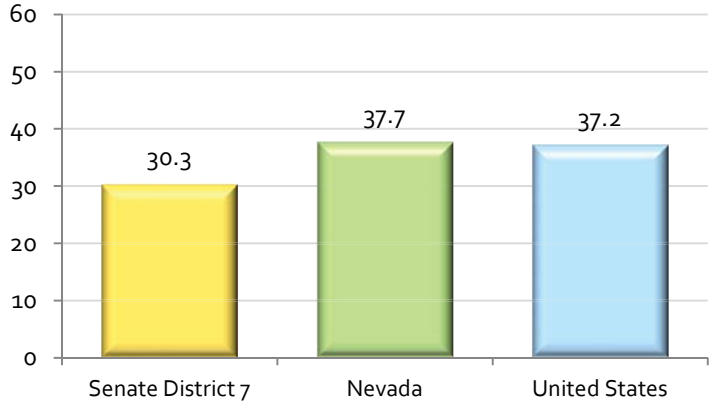

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

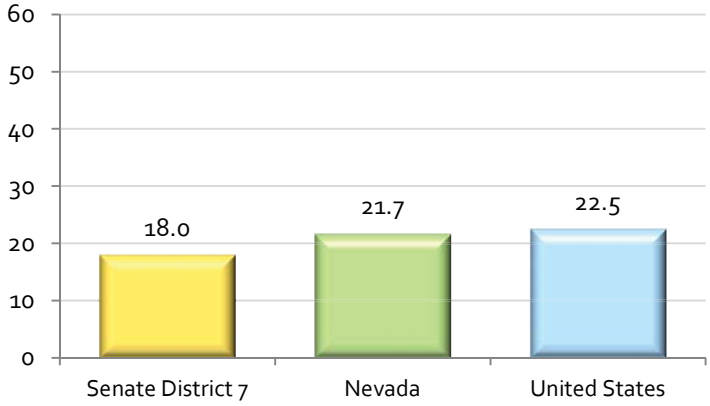

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

* The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 8

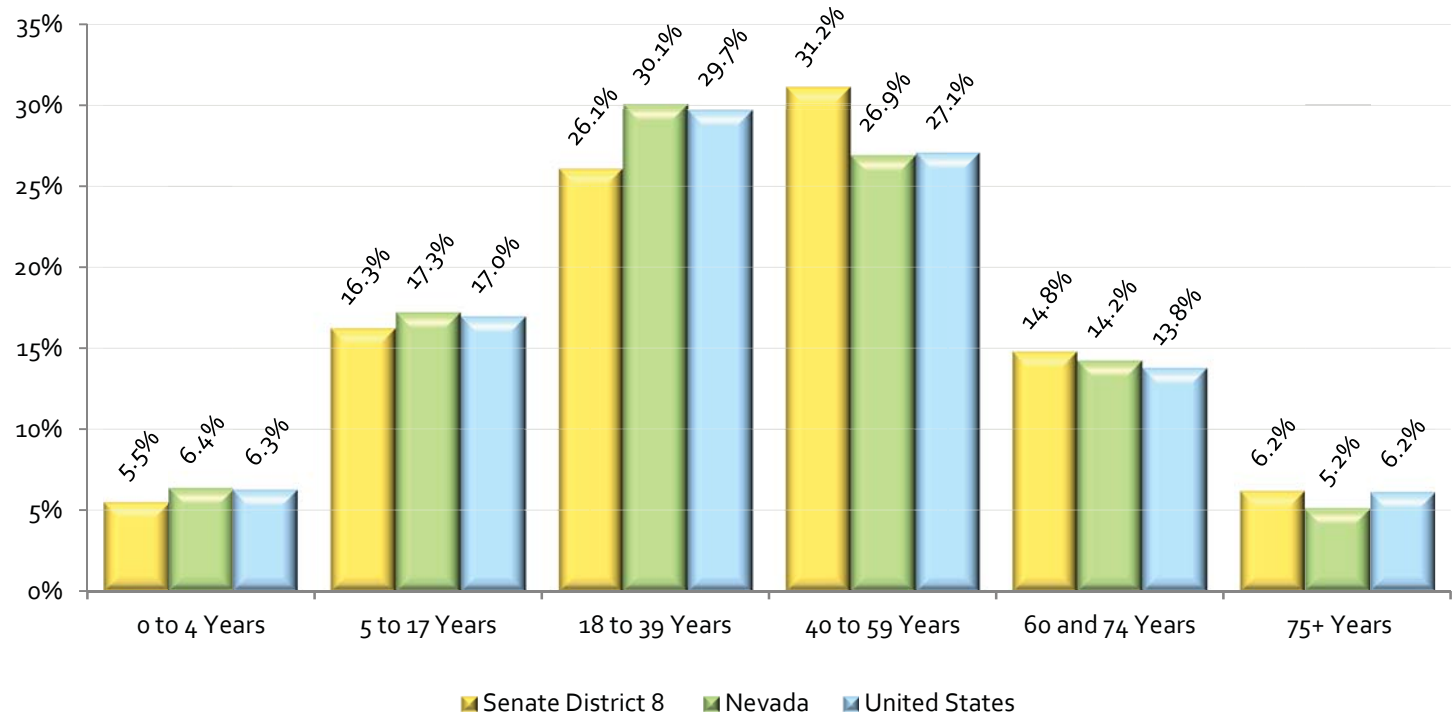

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 8	129,947	63,964	49.2%	65,983	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

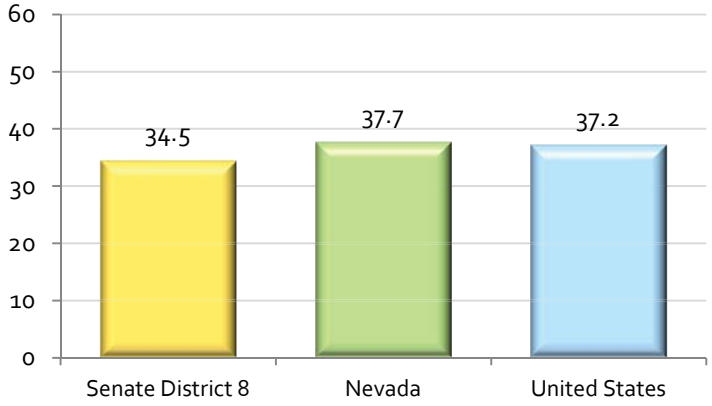

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

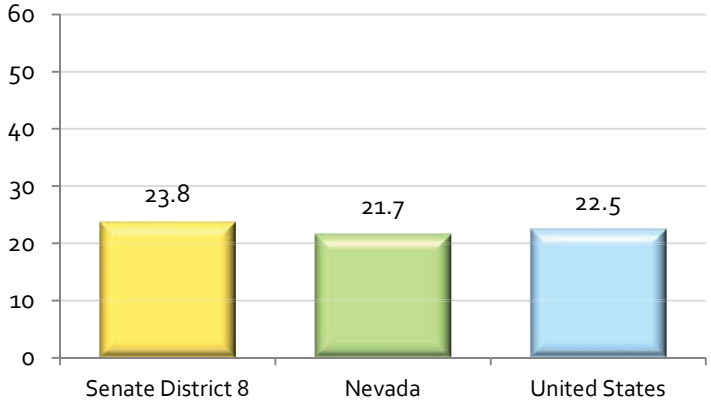

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 9

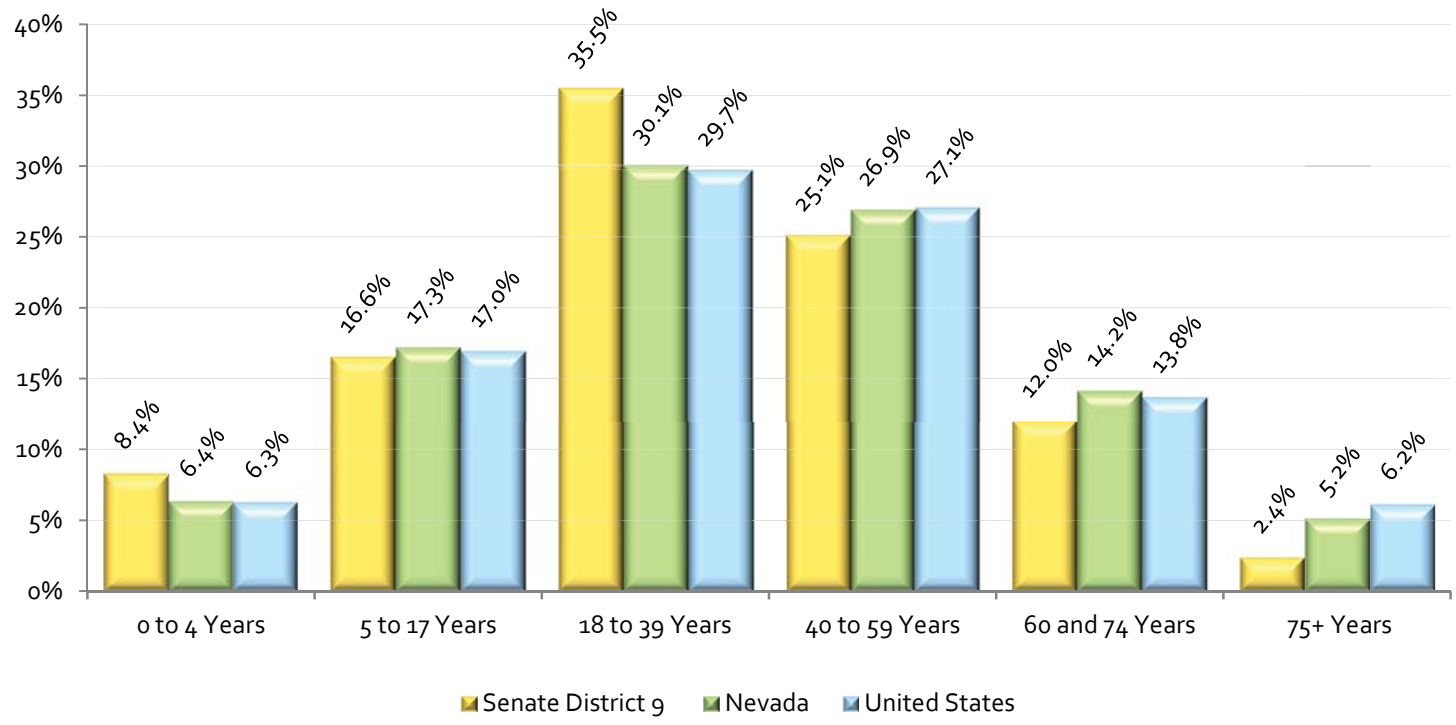

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 9	148,881	73,622	49.5%	75,259	50.5%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Population Characteristics
Nevada Senate District No. 9

Chart 2--Median Age (in years)*

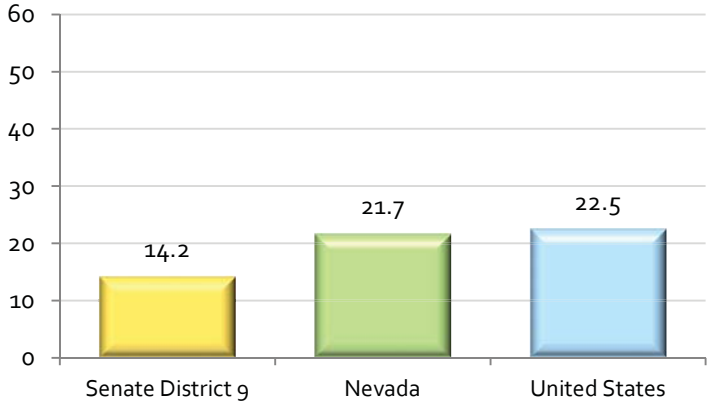

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 10

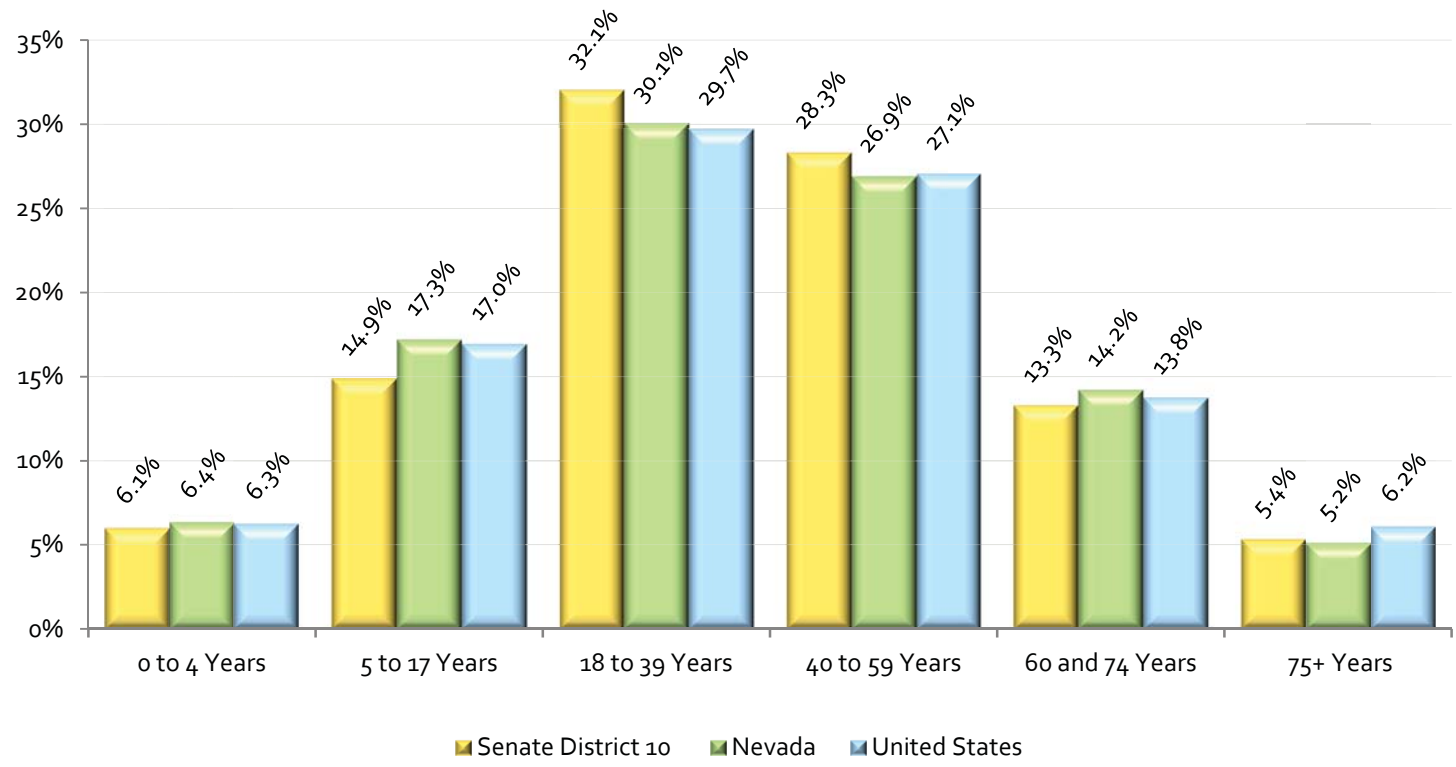

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 10	126,235	67,235	53.3%	59,000	46.7%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

Chart 1--Population Distribution by Age

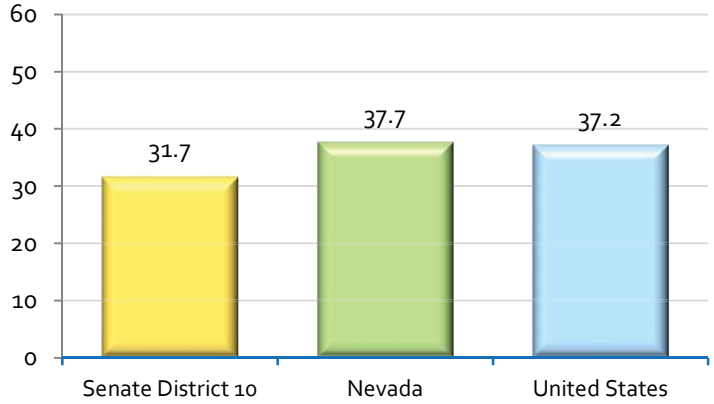

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

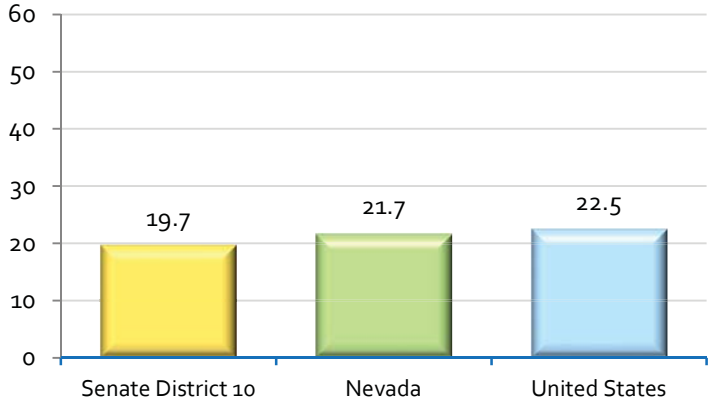

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 11

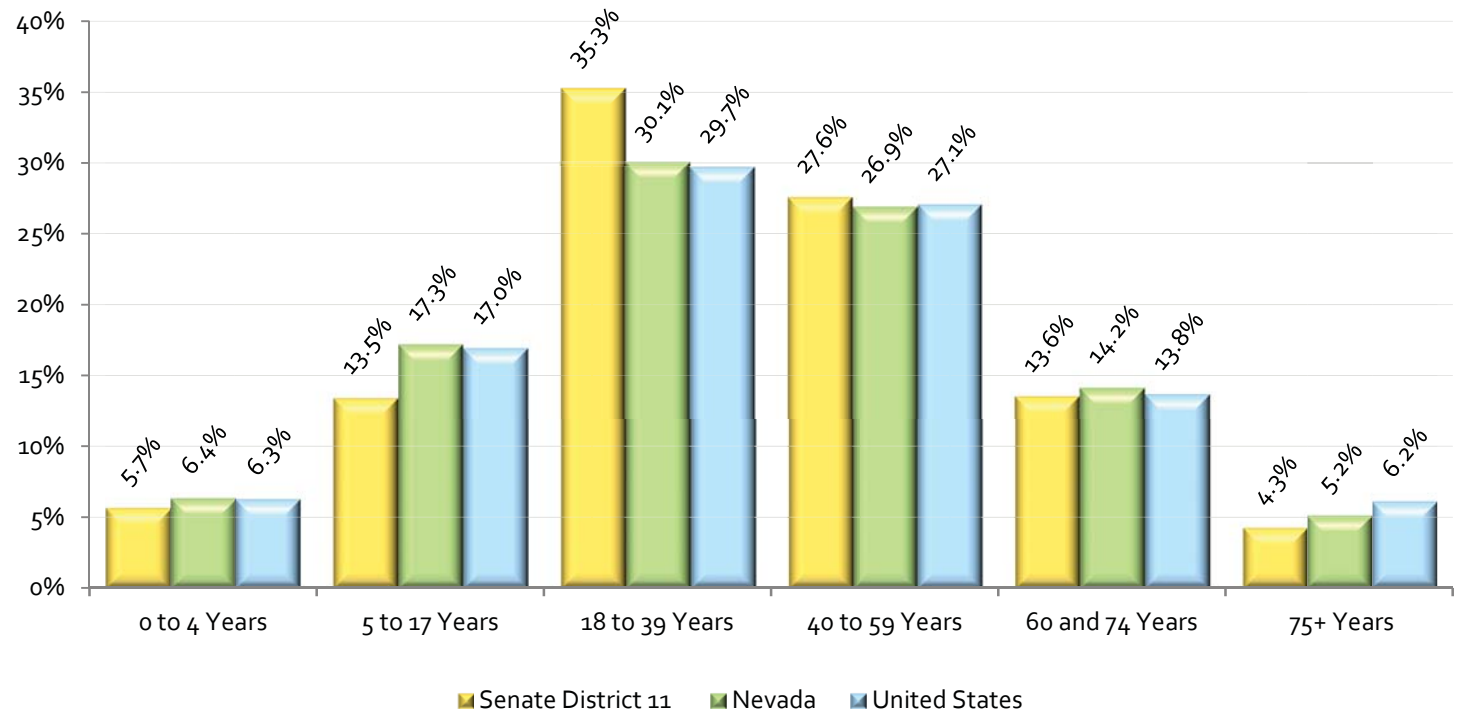

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 12

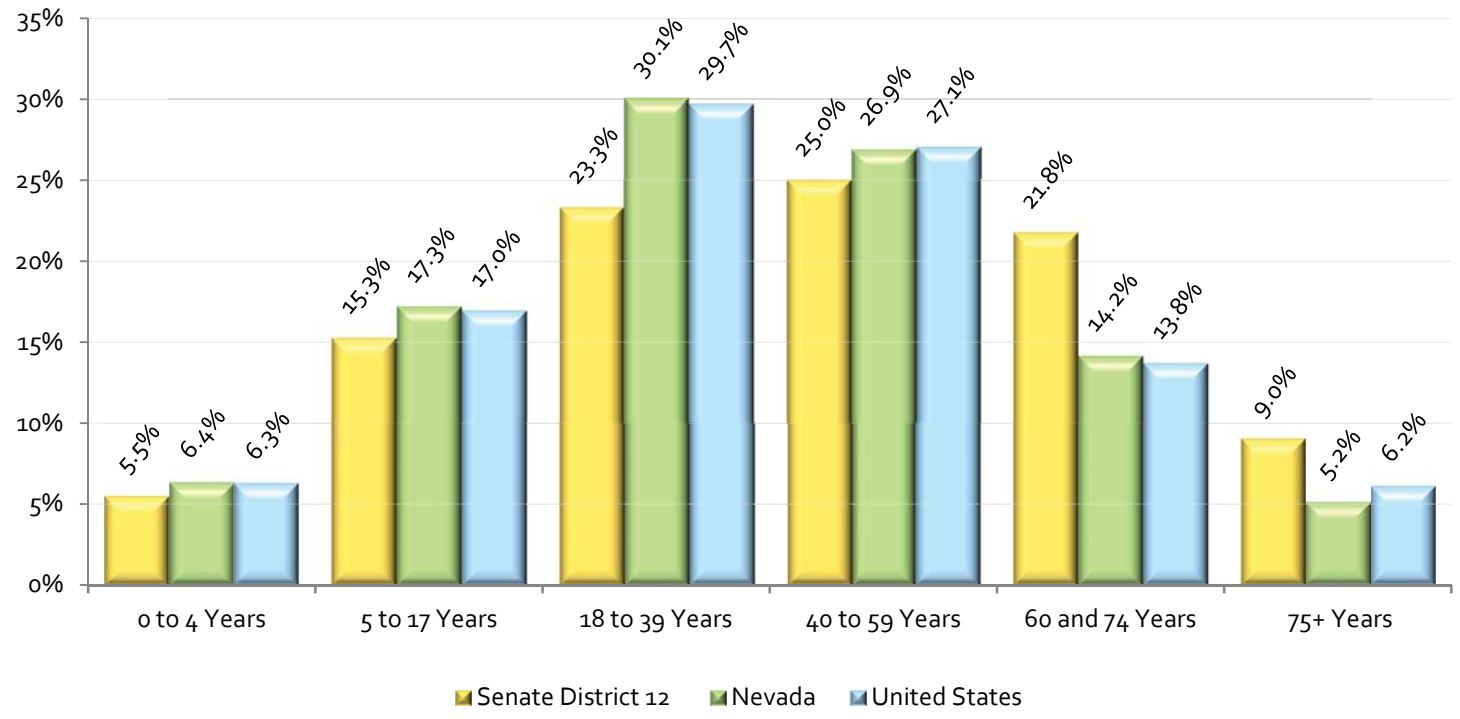

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 12	137,775	68,682	49.9%	69,093	50.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 13

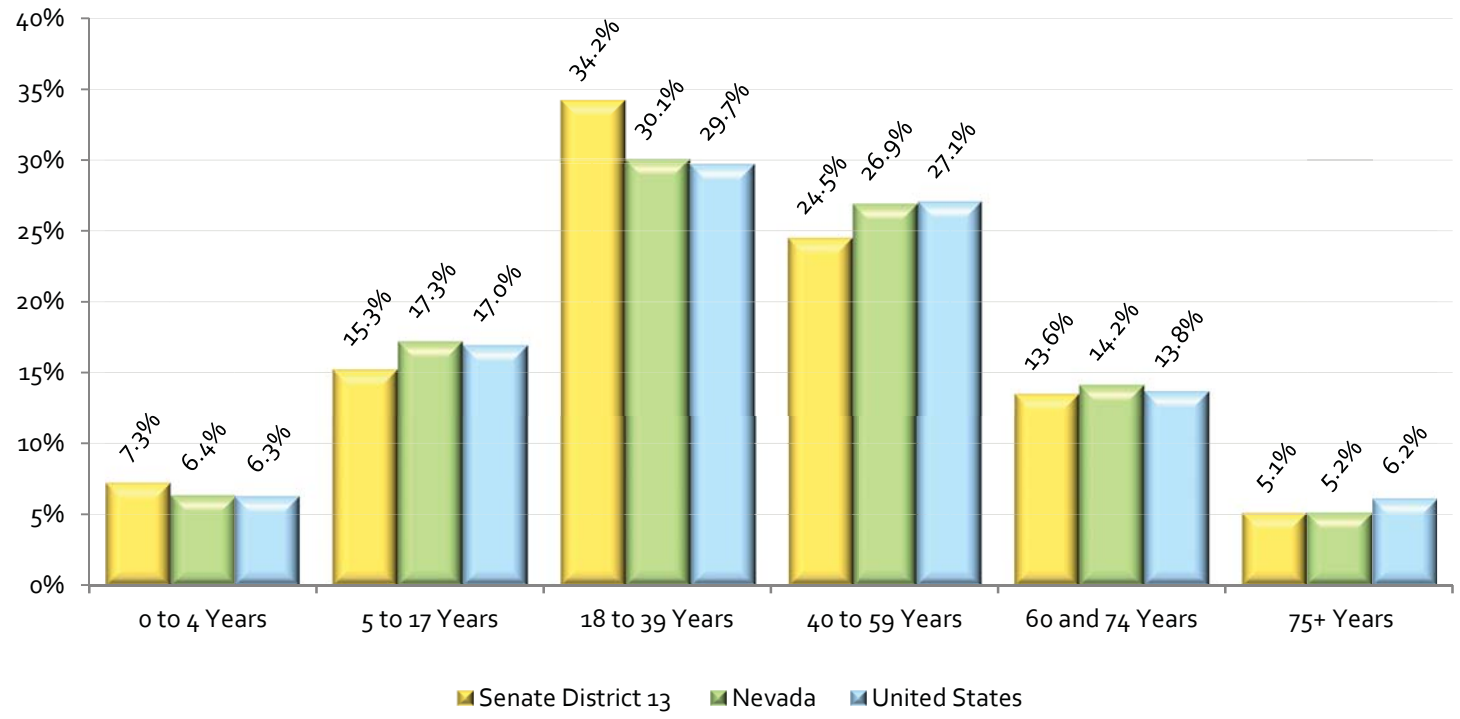

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

Chart 1--Population Distribution by Age

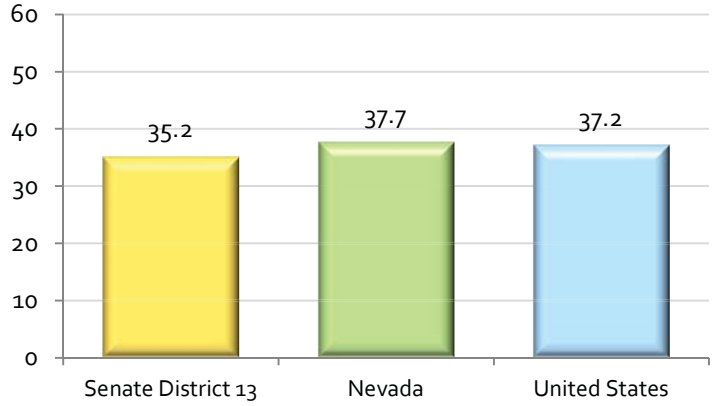

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

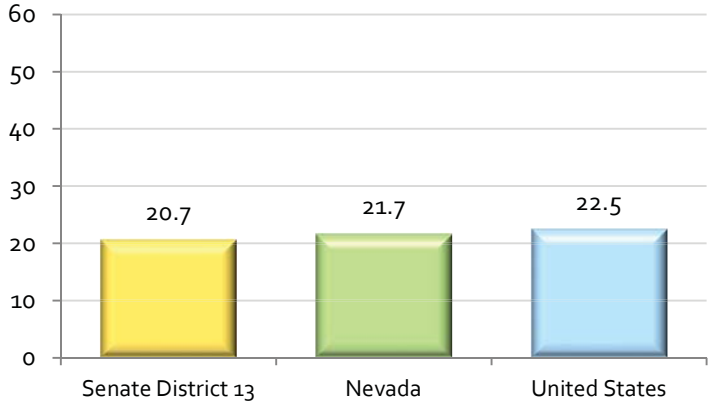

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 14

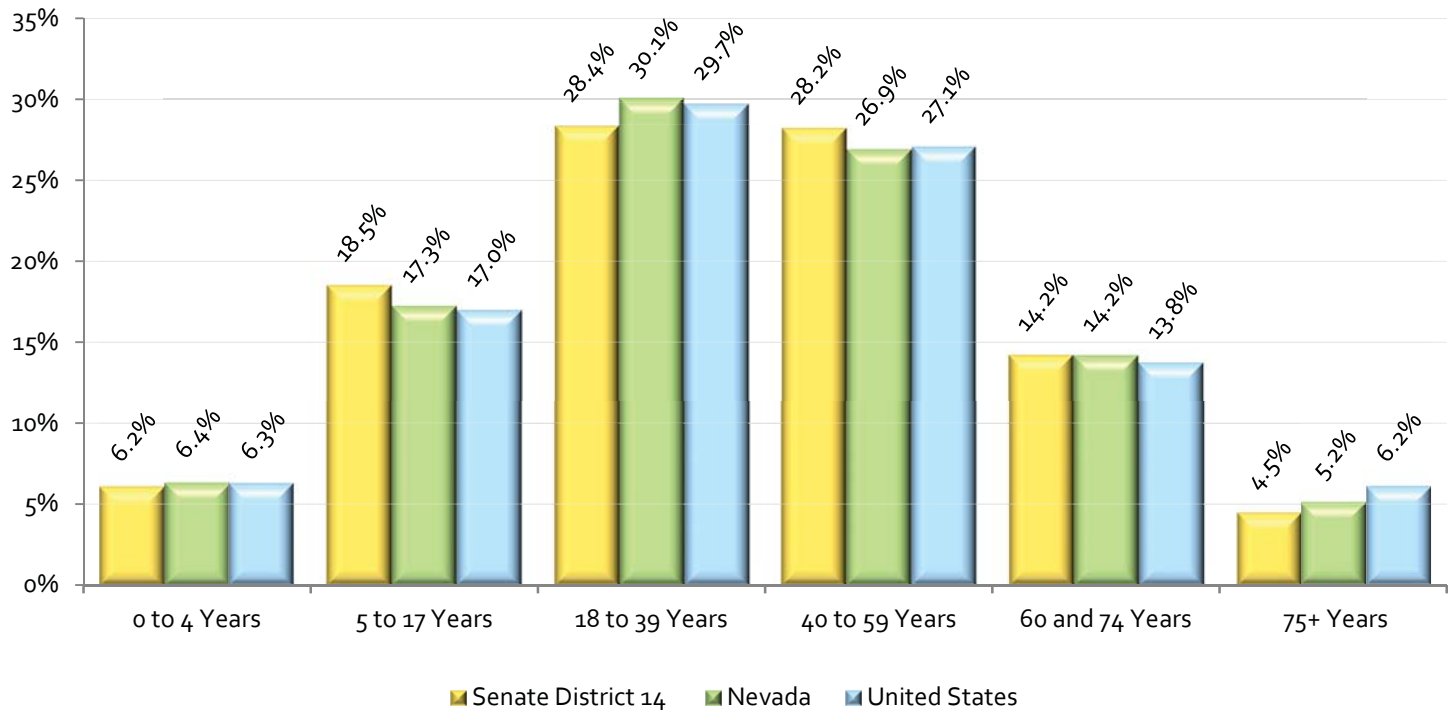

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 14	134,750	69,831	51.8%	64,919	48.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 14	8,305	24,966	38,226	38,021	19,179	6,053
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

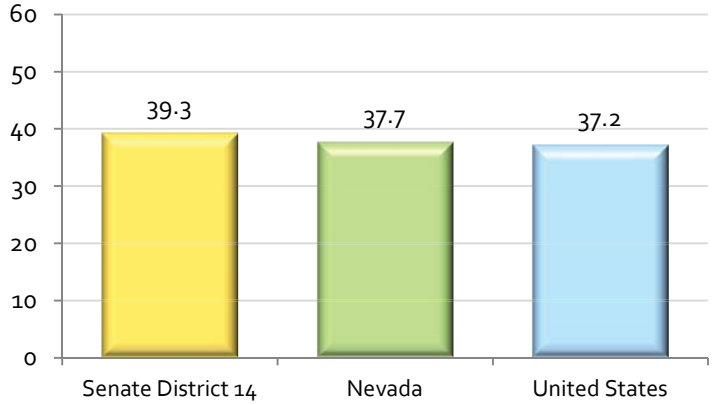

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

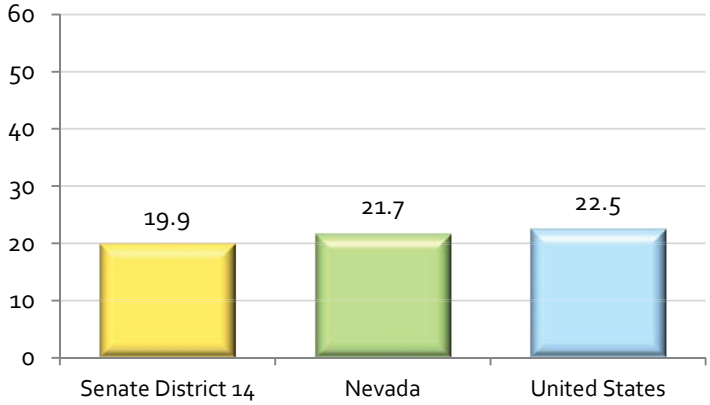

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 15

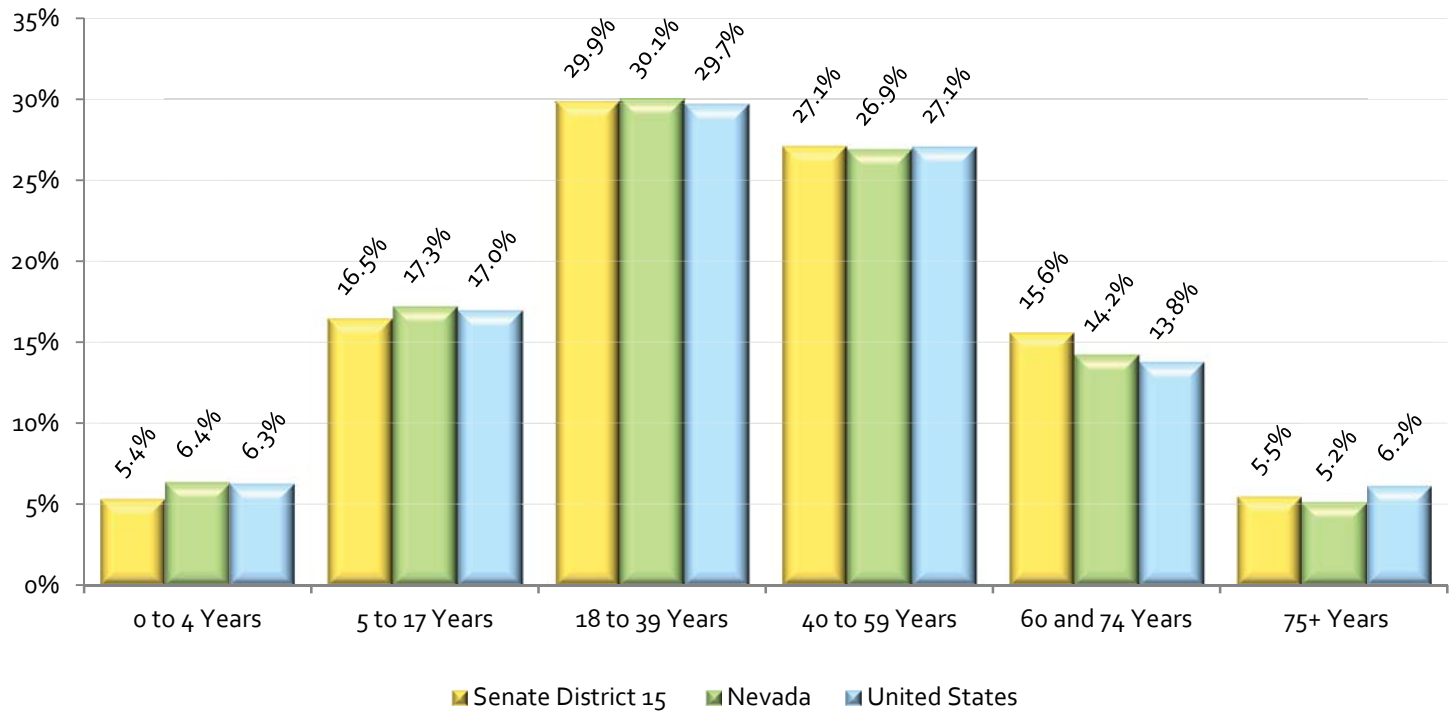

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 15	133,302	66,280	49.7%	67,022	50.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Population Characteristics
Nevada Senate District No. 15

Chart 2--Median Age (in years)*

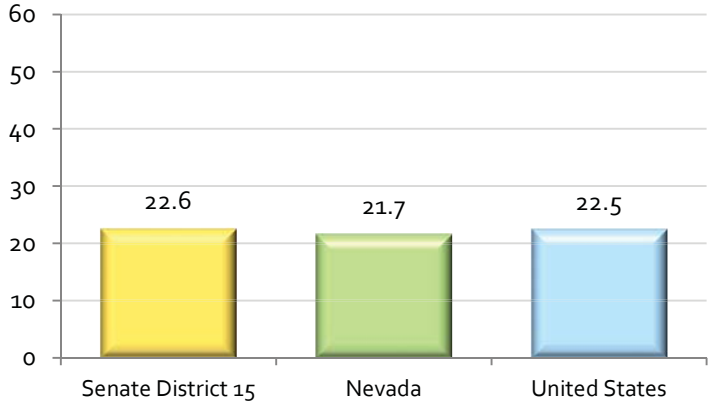

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 16

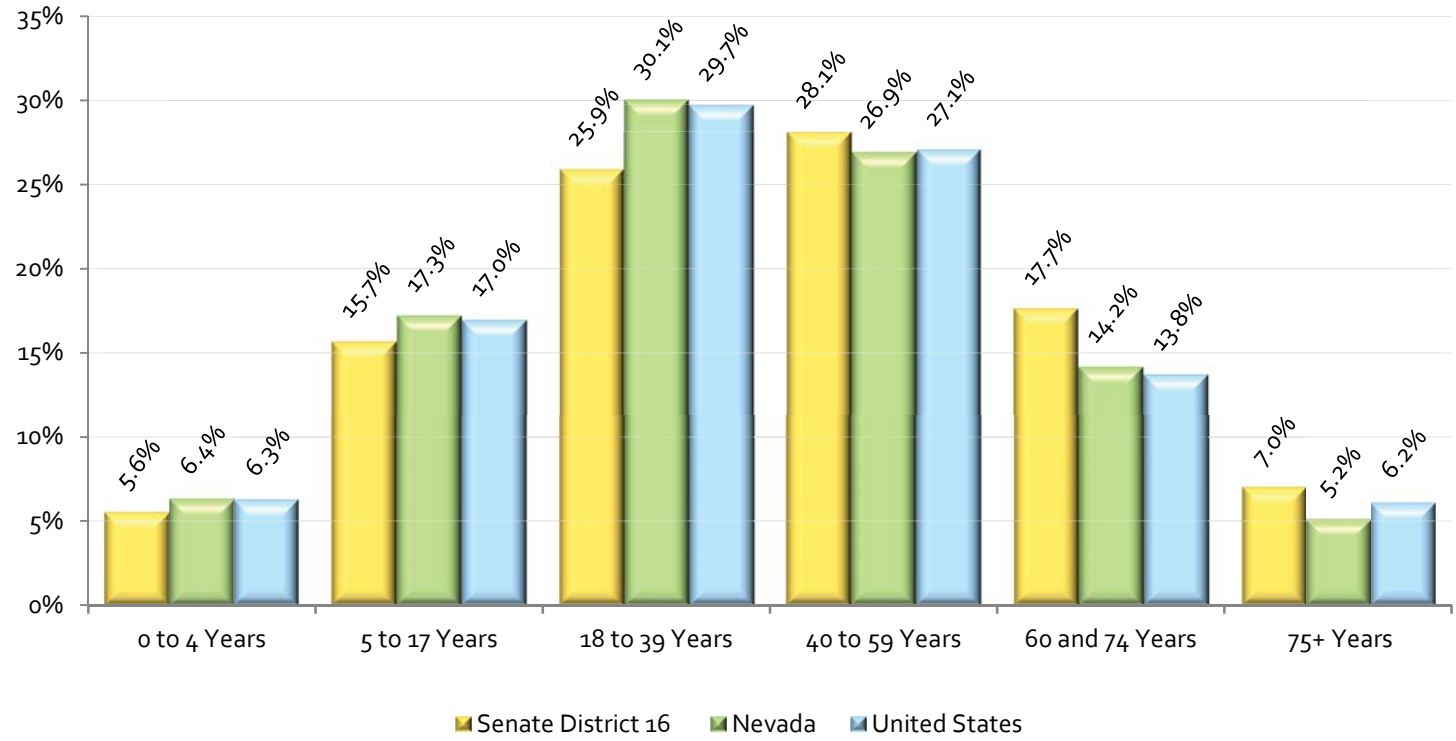

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

Population Characteristics
Nevada Senate District No. 16

Chart 2--Median Age (in years)*

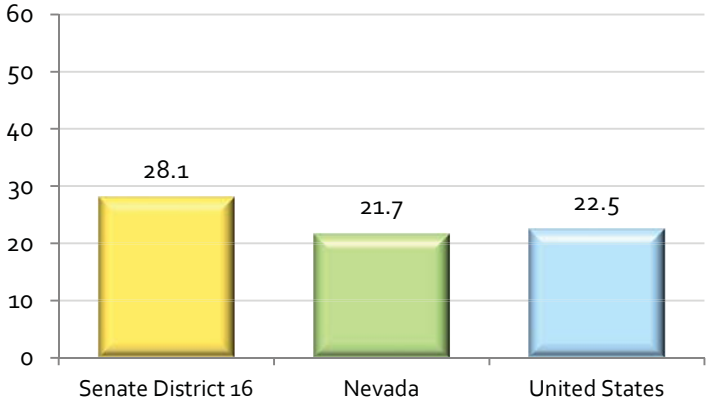

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 17

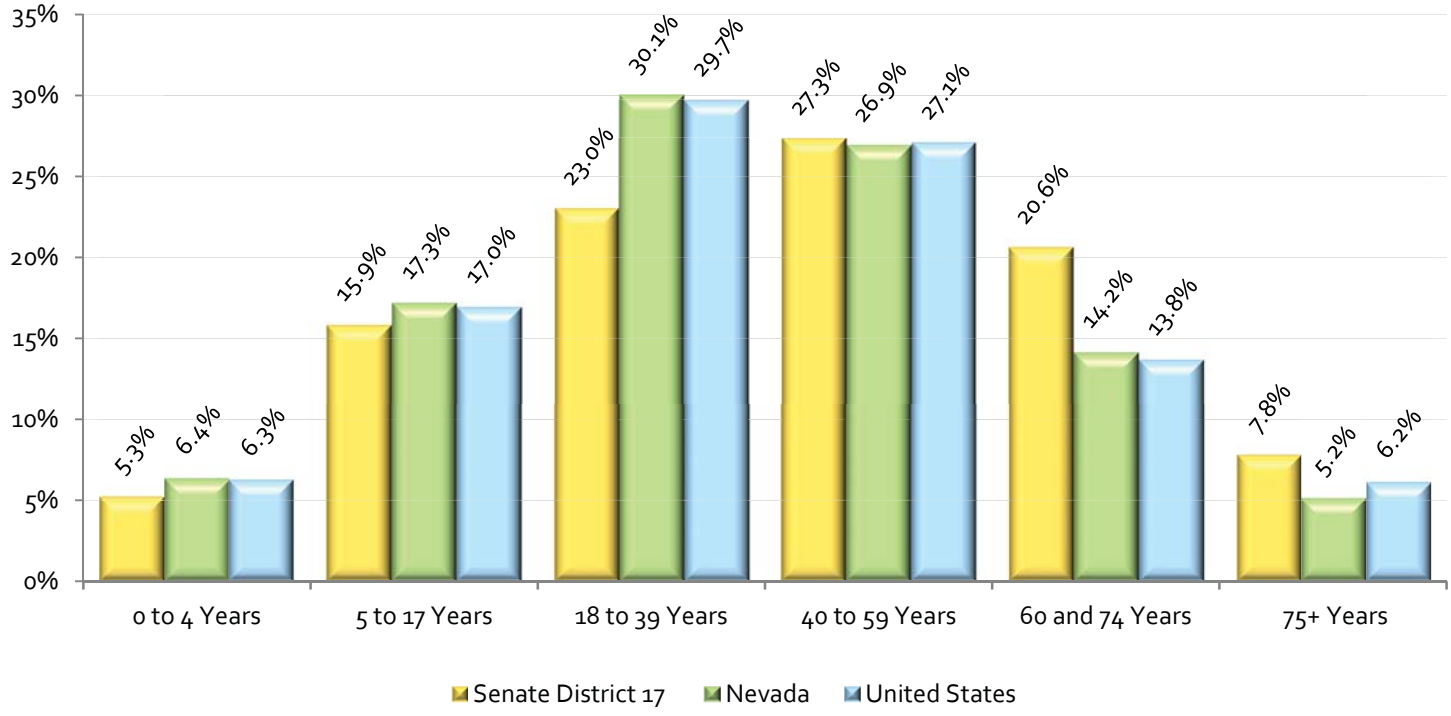

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 17	127,097	64,006	50.4%	63,091	49.6%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 17	6,712	20,193	29,260	34,751	26,211	9,970
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

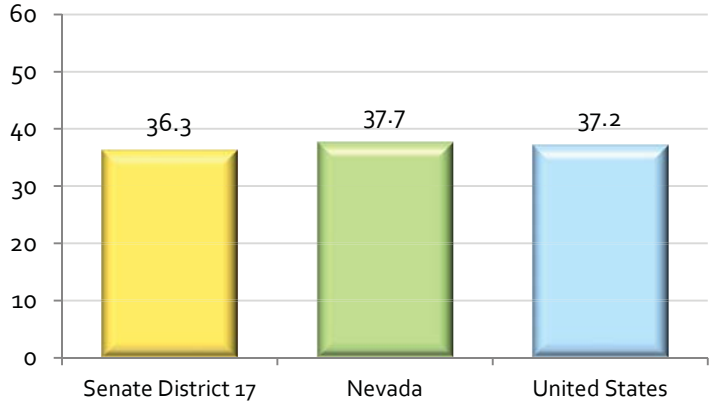

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

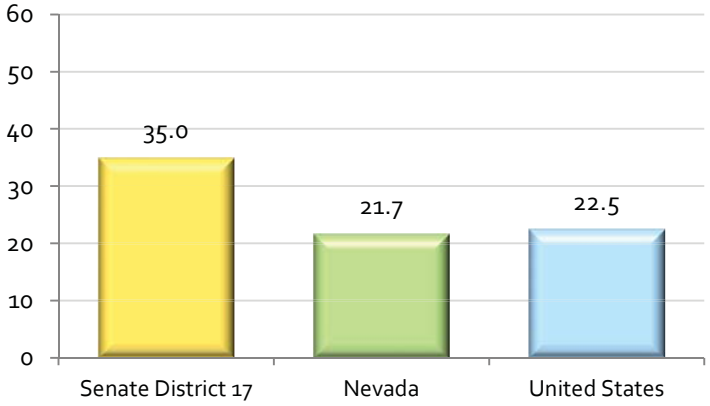

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 18

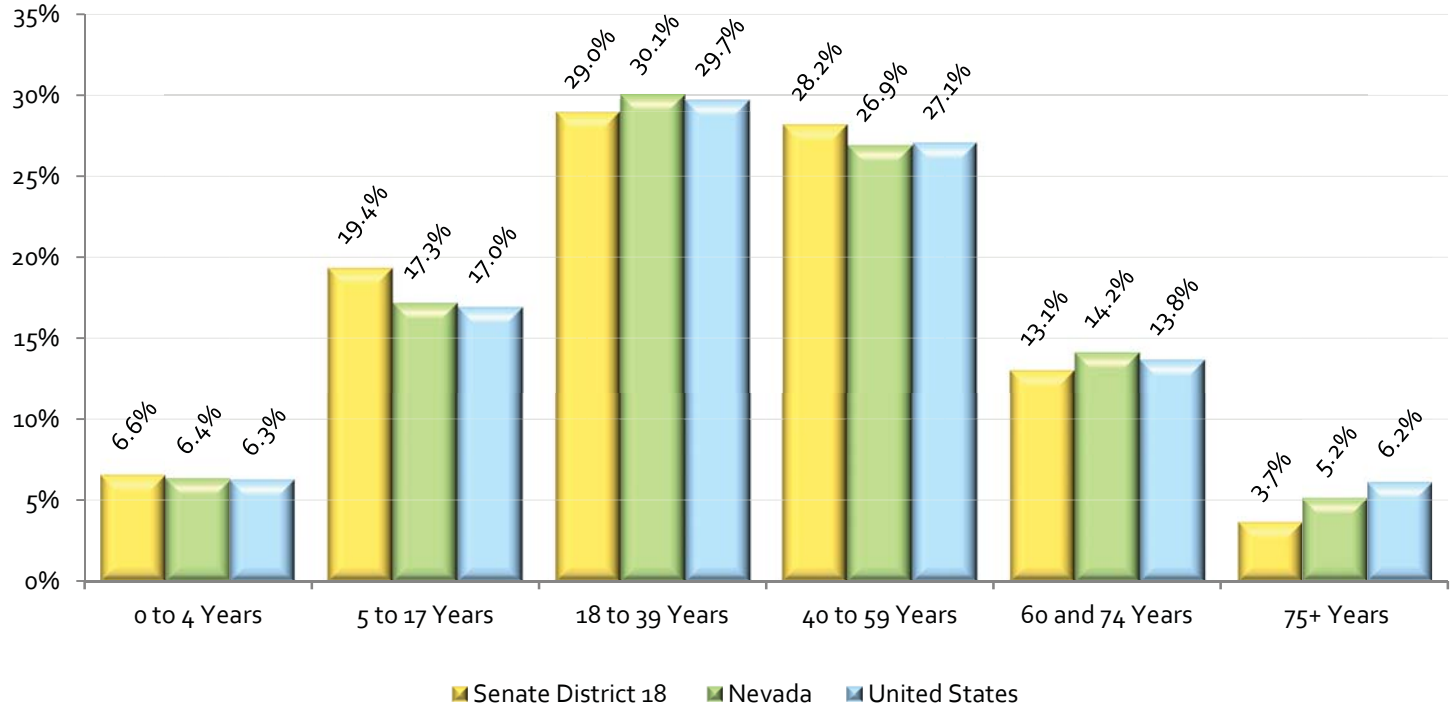

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 18	139,542	68,226	48.9%	71,316	51.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Chart 1--Population Distribution by Age

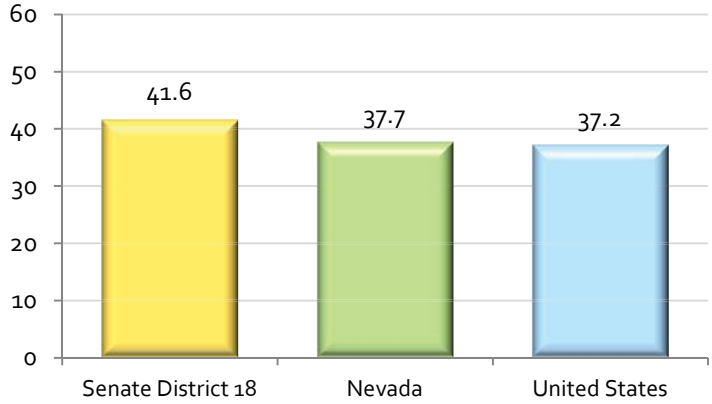

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

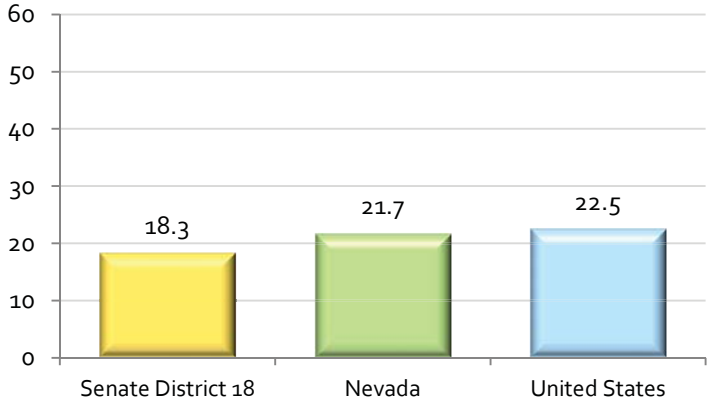

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 19

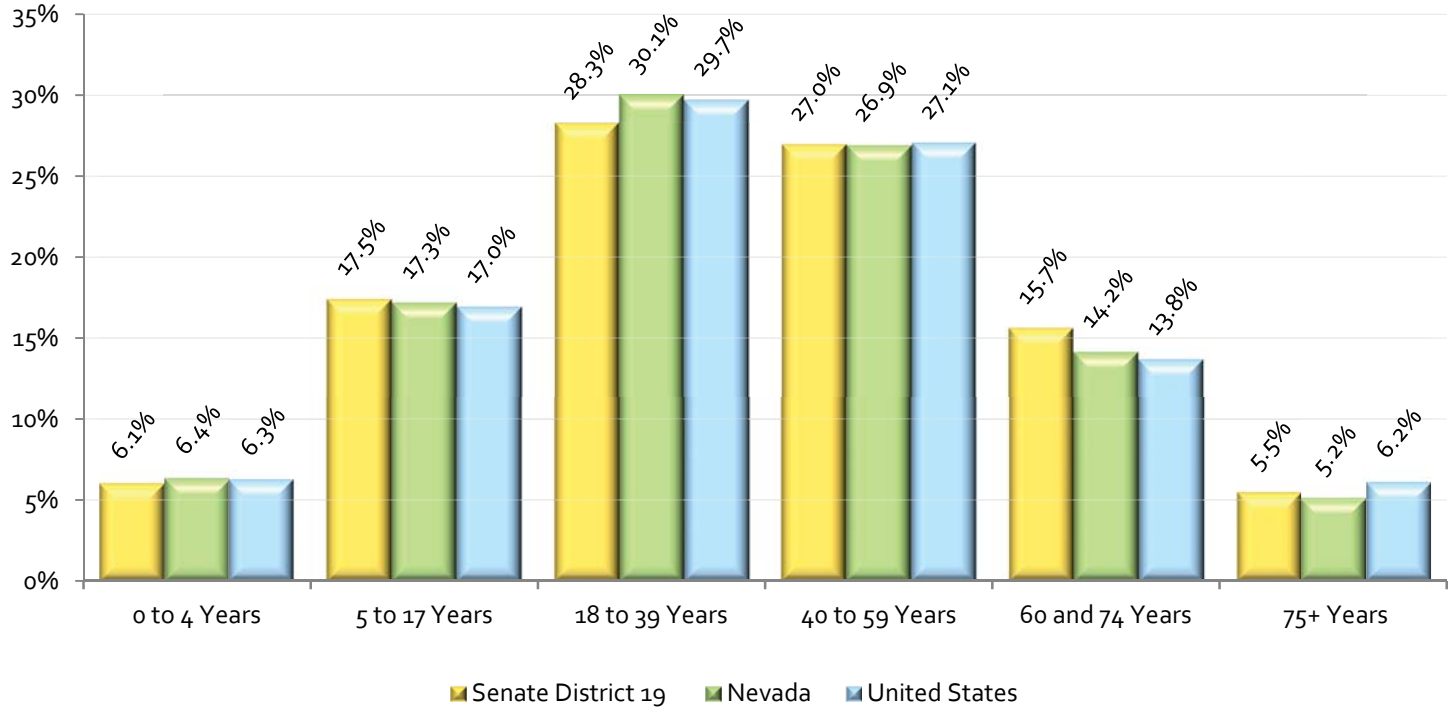

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 19	134,427	71,886	53.5%	62,541	46.5%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Chart 1--Population Distribution by Age

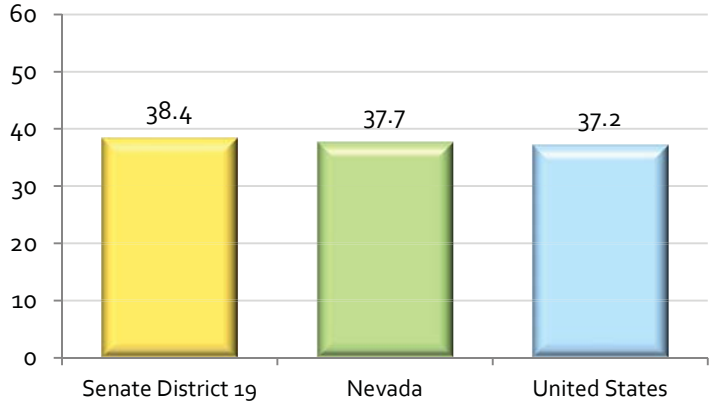

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

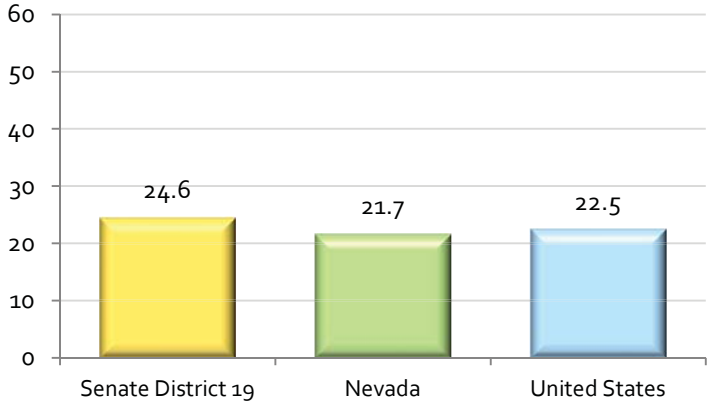

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 20

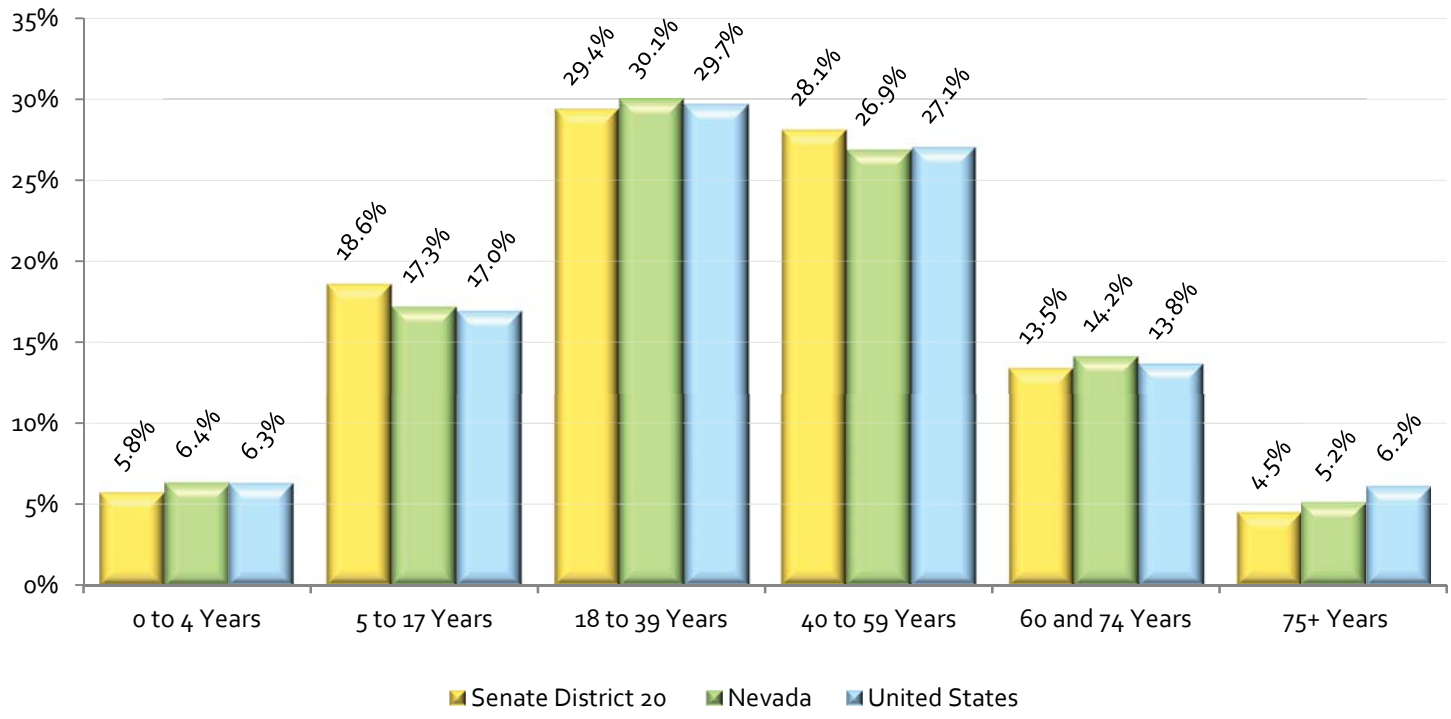

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 20	139,611	67,317	48.2%	72,294	51.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age

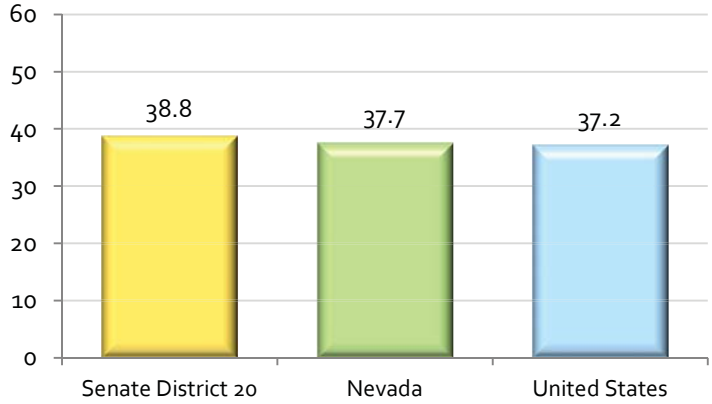

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

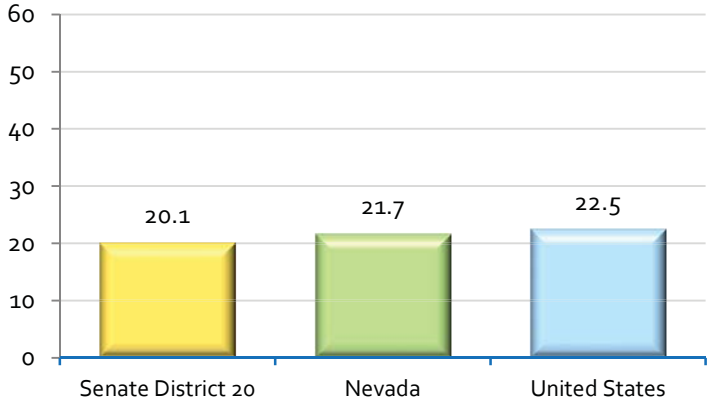

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 21

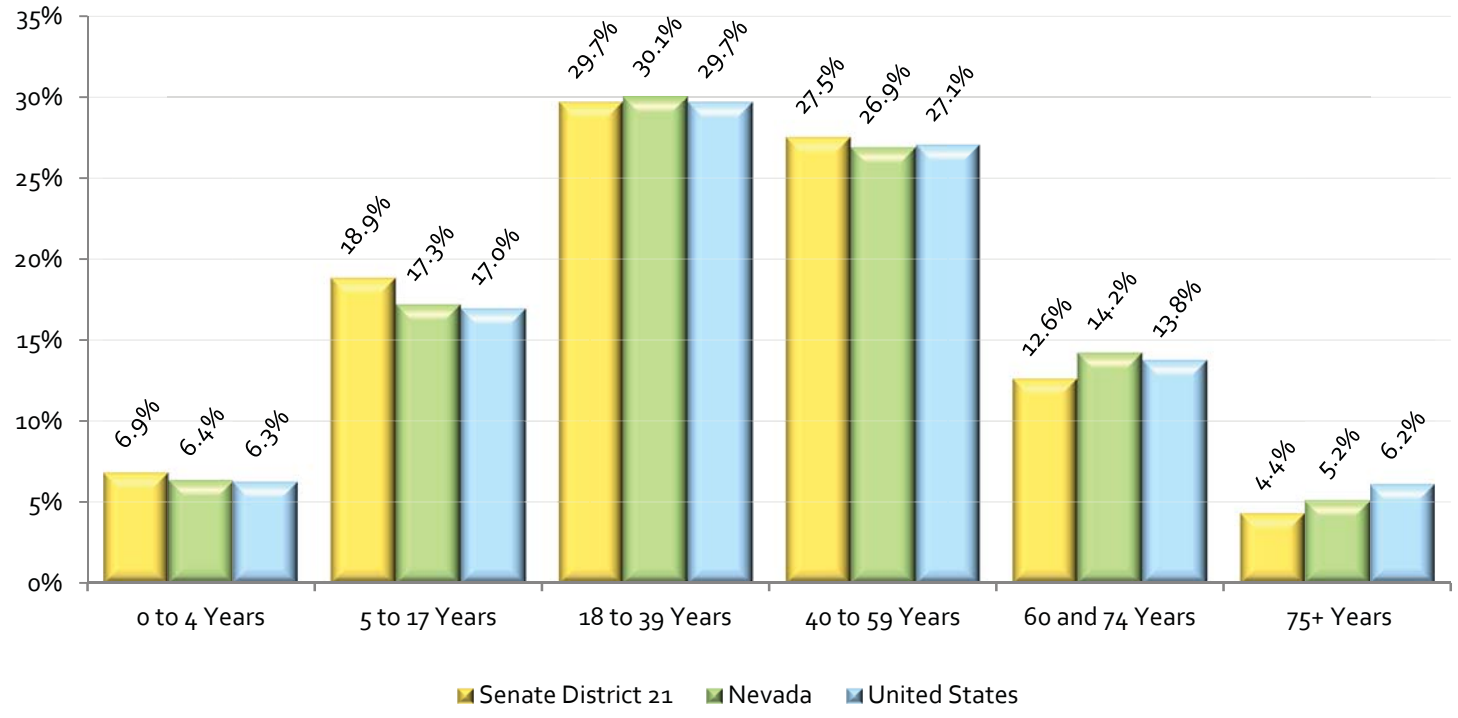

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 21	129,244	63,734	49.3%	65,510	50.7%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

Chart 1--Population Distribution by Age

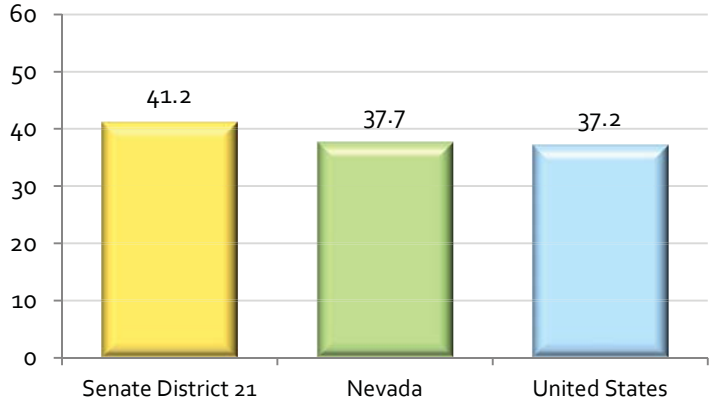

Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*

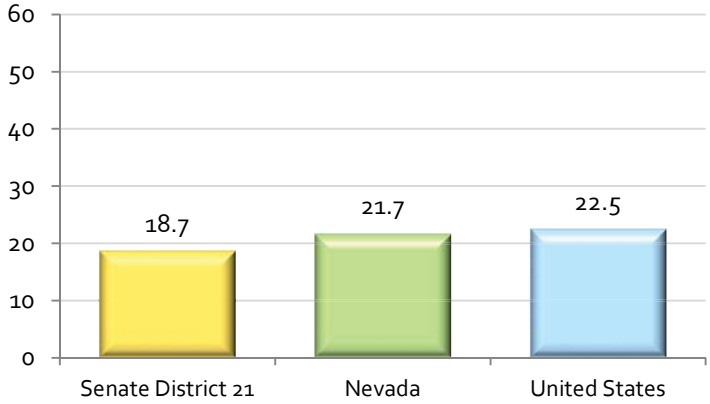

* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*

*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*

*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.
