A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 1

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 1	140,741	69,233	49.2%	71,508	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 1	11,217	30,186	46,227	34,508	15,030	3,573
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

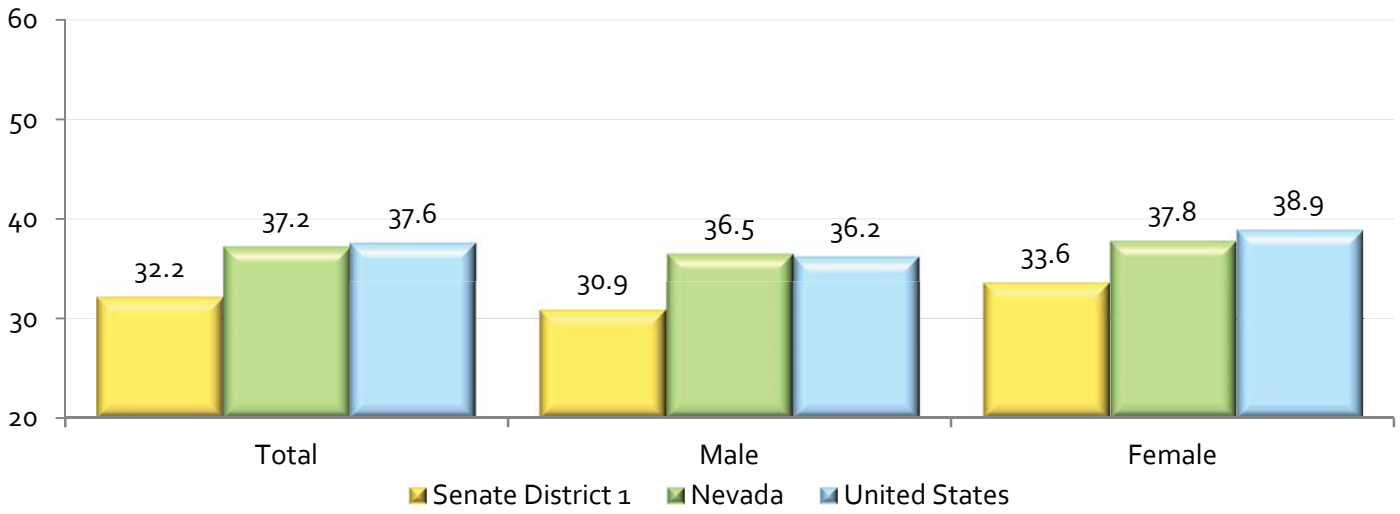
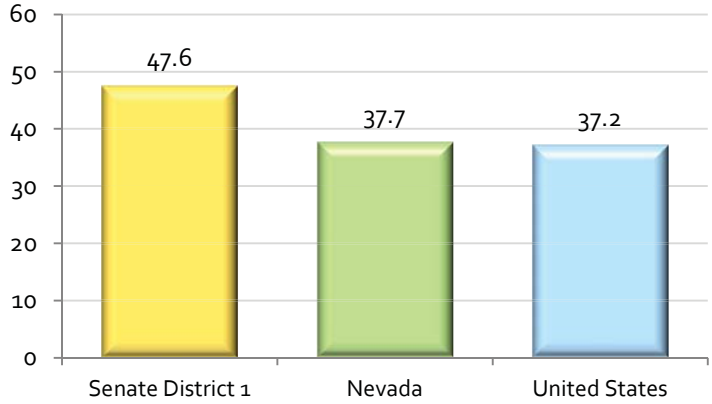
Population Characteristics
Nevada Senate District No. 1

Chart 2--Median Age (in years)*



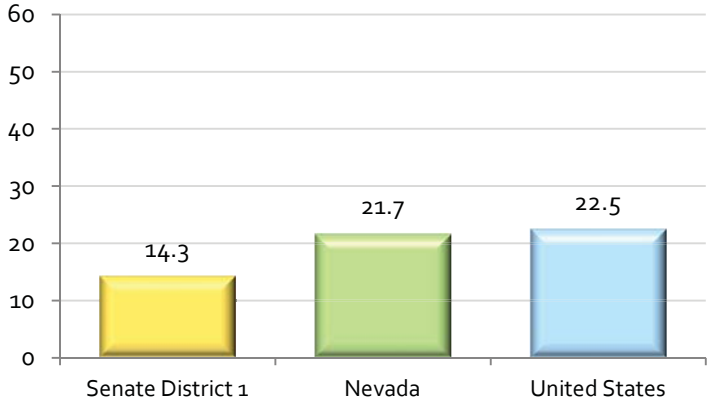
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 2

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 2	124,906	65,104	52.1%	59,802	47.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

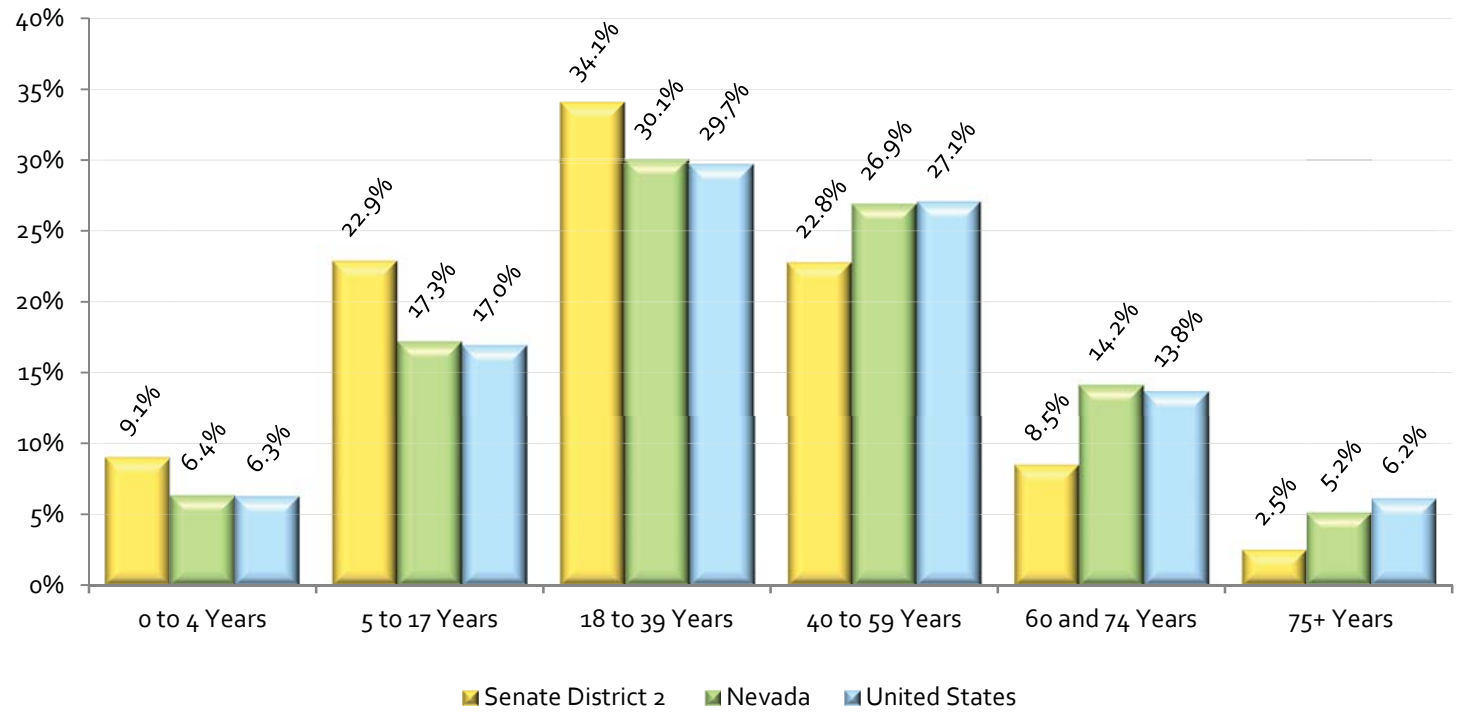
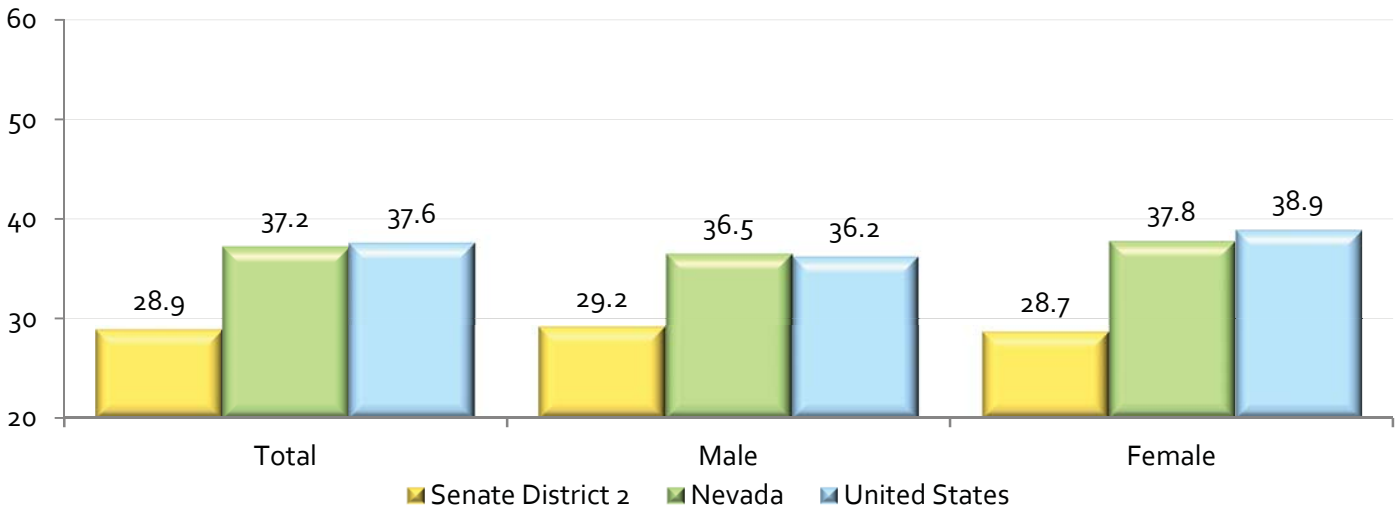
Chart 1--Population Distribution by Age



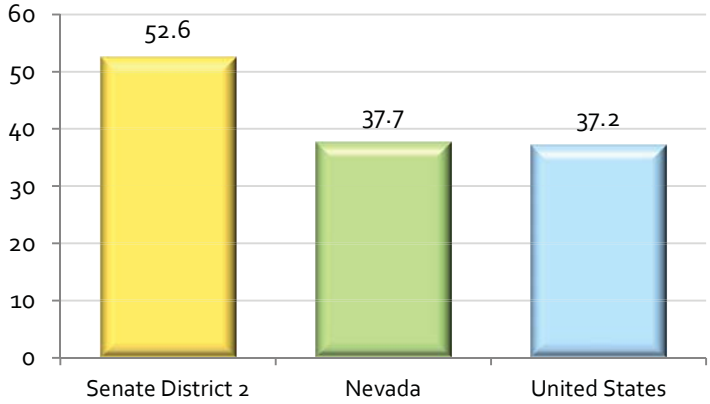
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



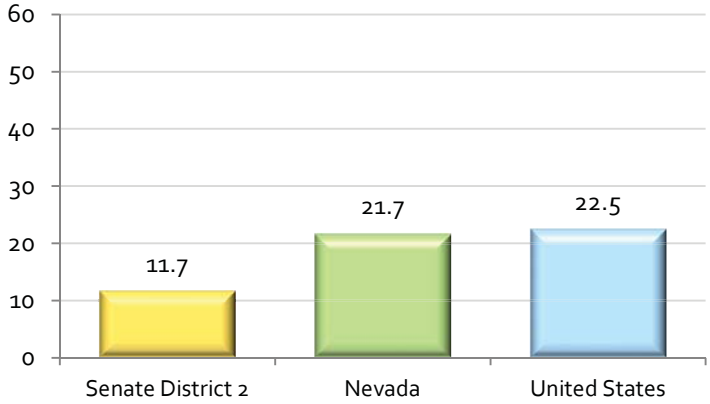
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 3

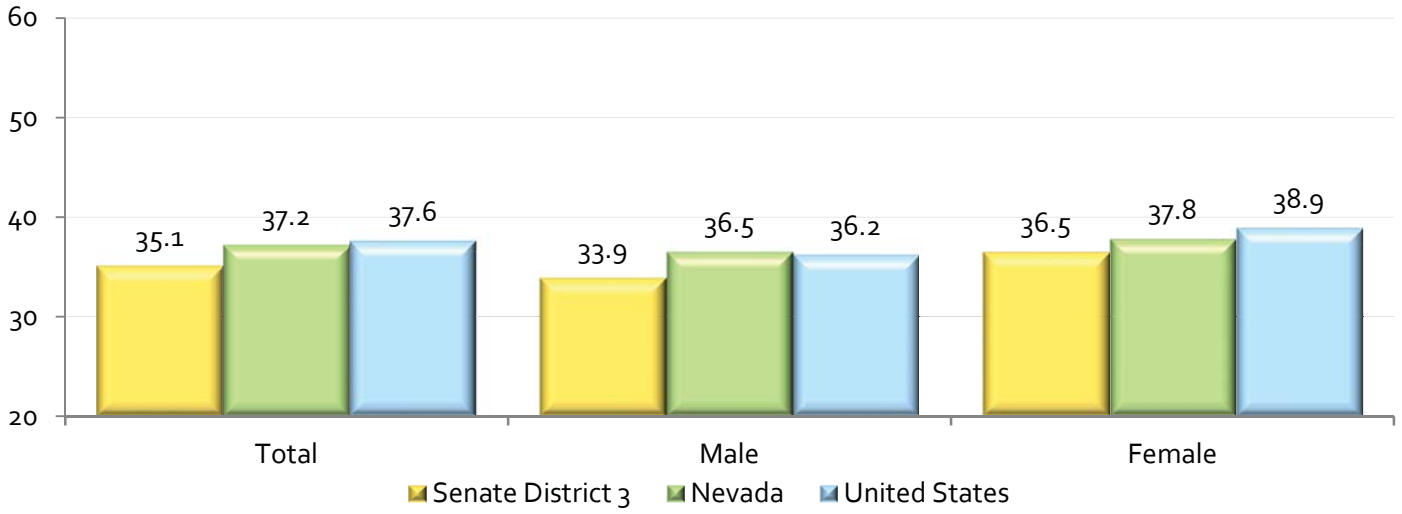
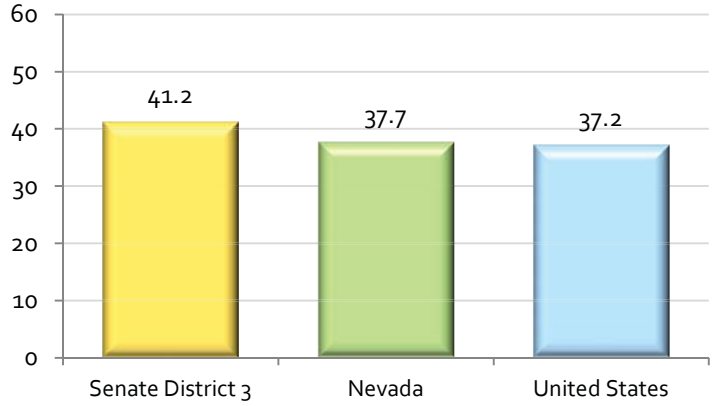
Chart 2--Median Age (in years)*



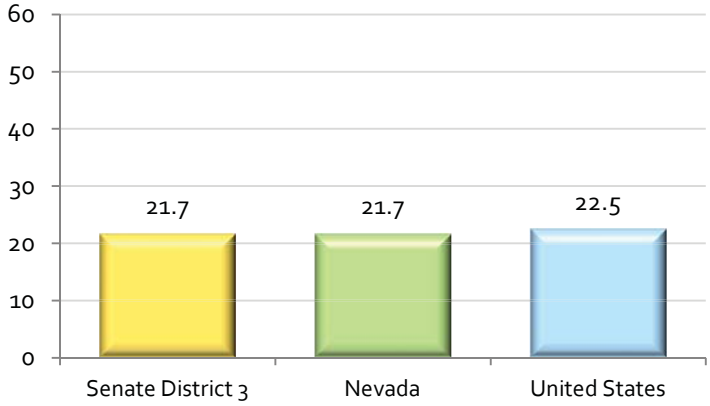
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 4

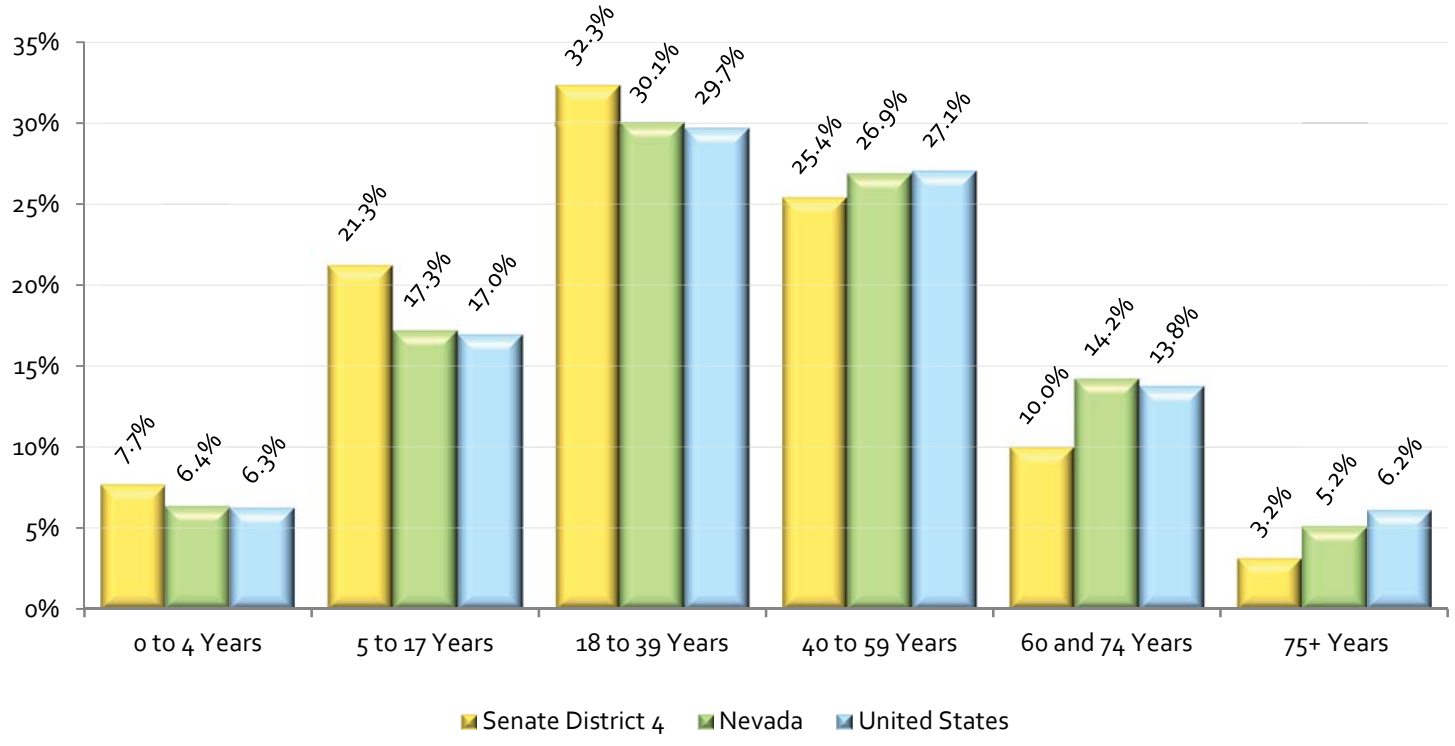
Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 4	126,951	63,722	50.2%	63,229	49.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

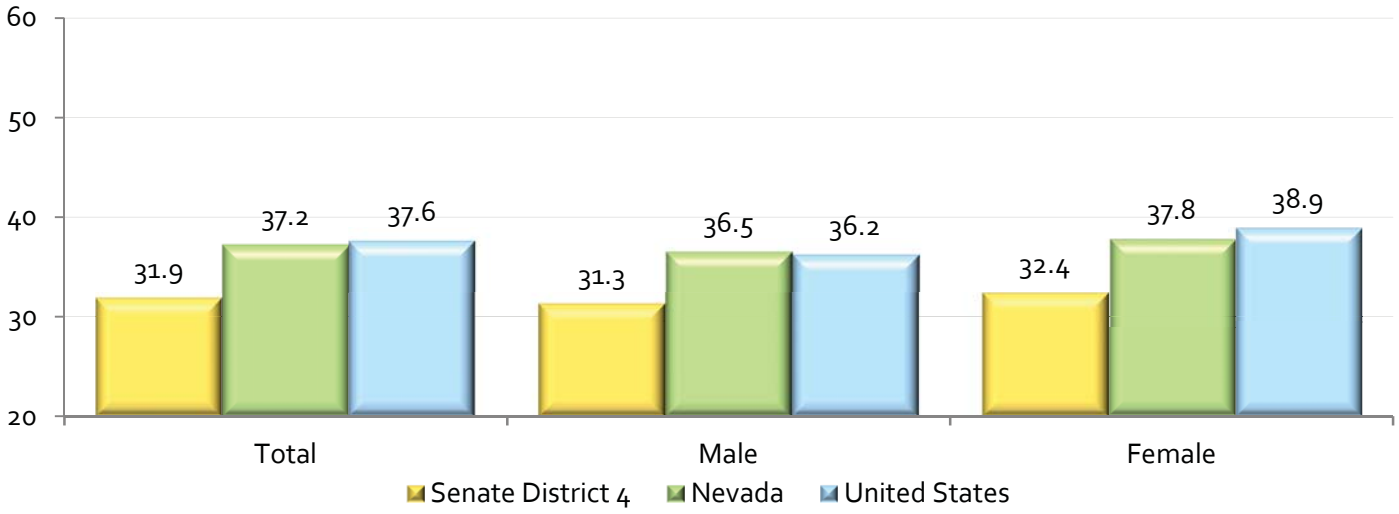
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 4	9,834	27,015	41,064	32,282	12,701	4,055
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age



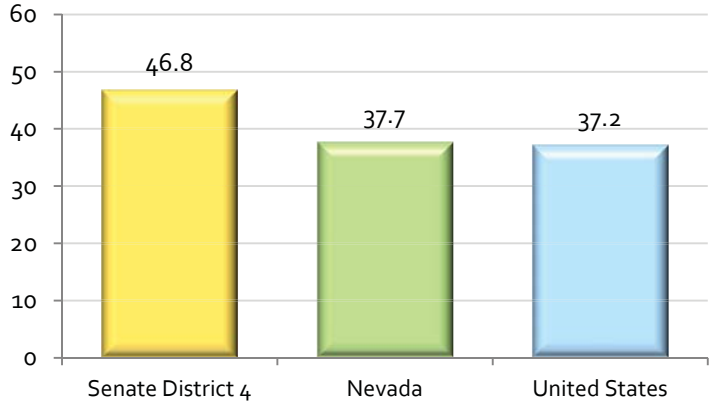
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



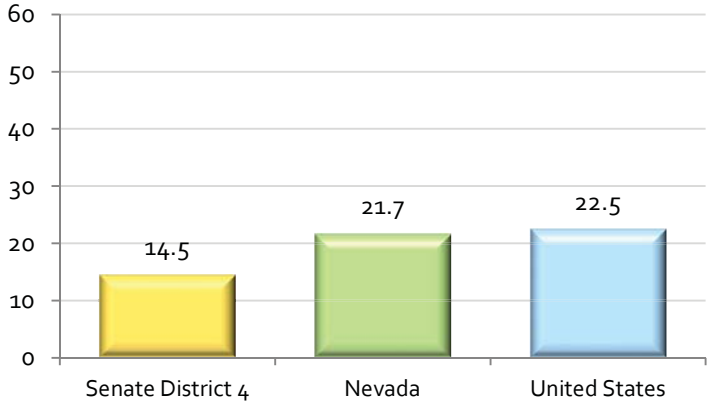
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 5

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 5	133,288	65,642	49.2%	67,646	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

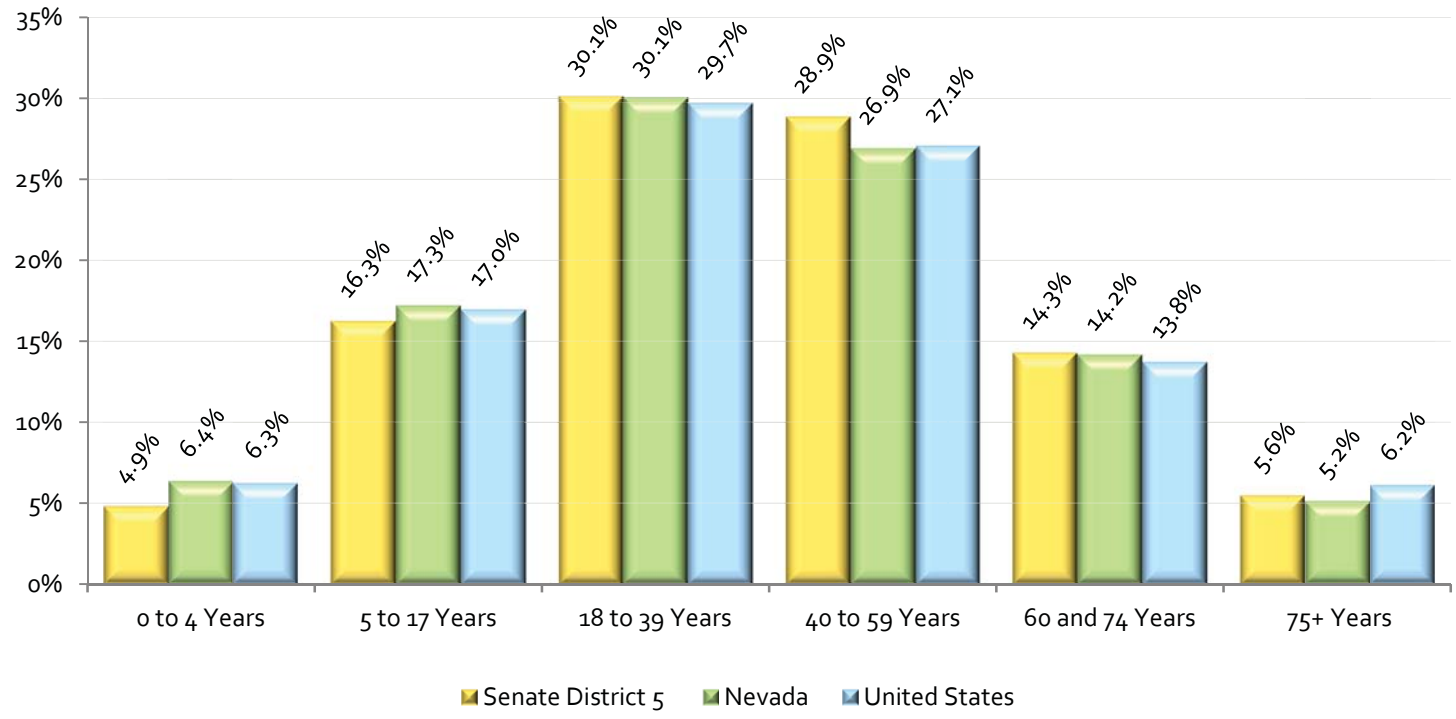
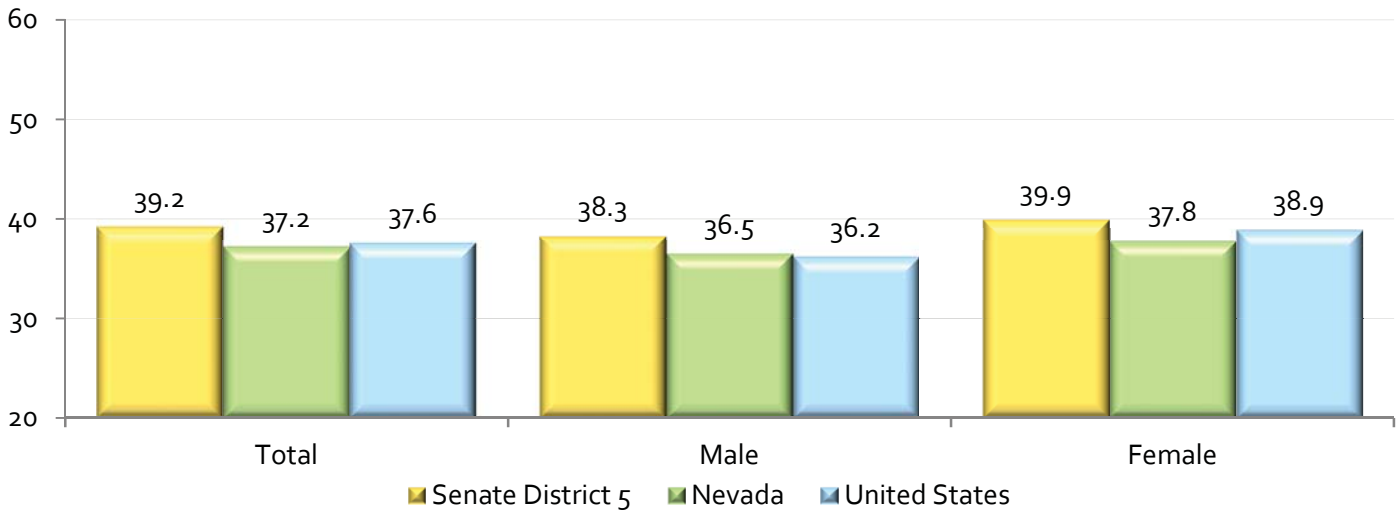
Chart 1--Population Distribution by Age



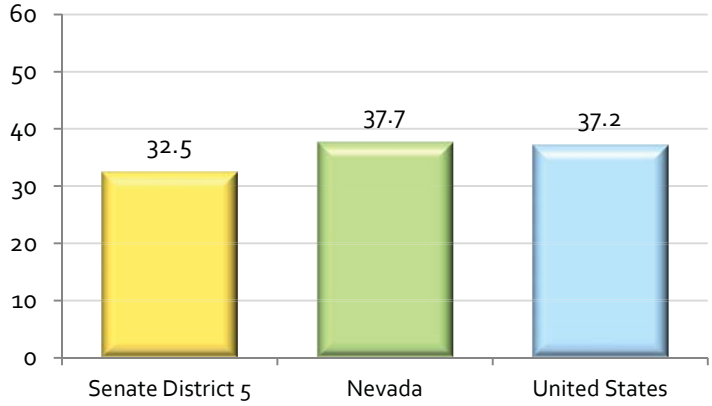
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



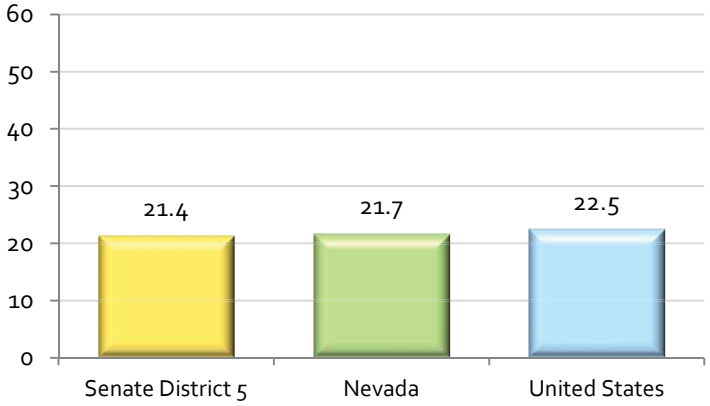
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 6

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 6	133,968	64,449	48.1%	69,519	51.9%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

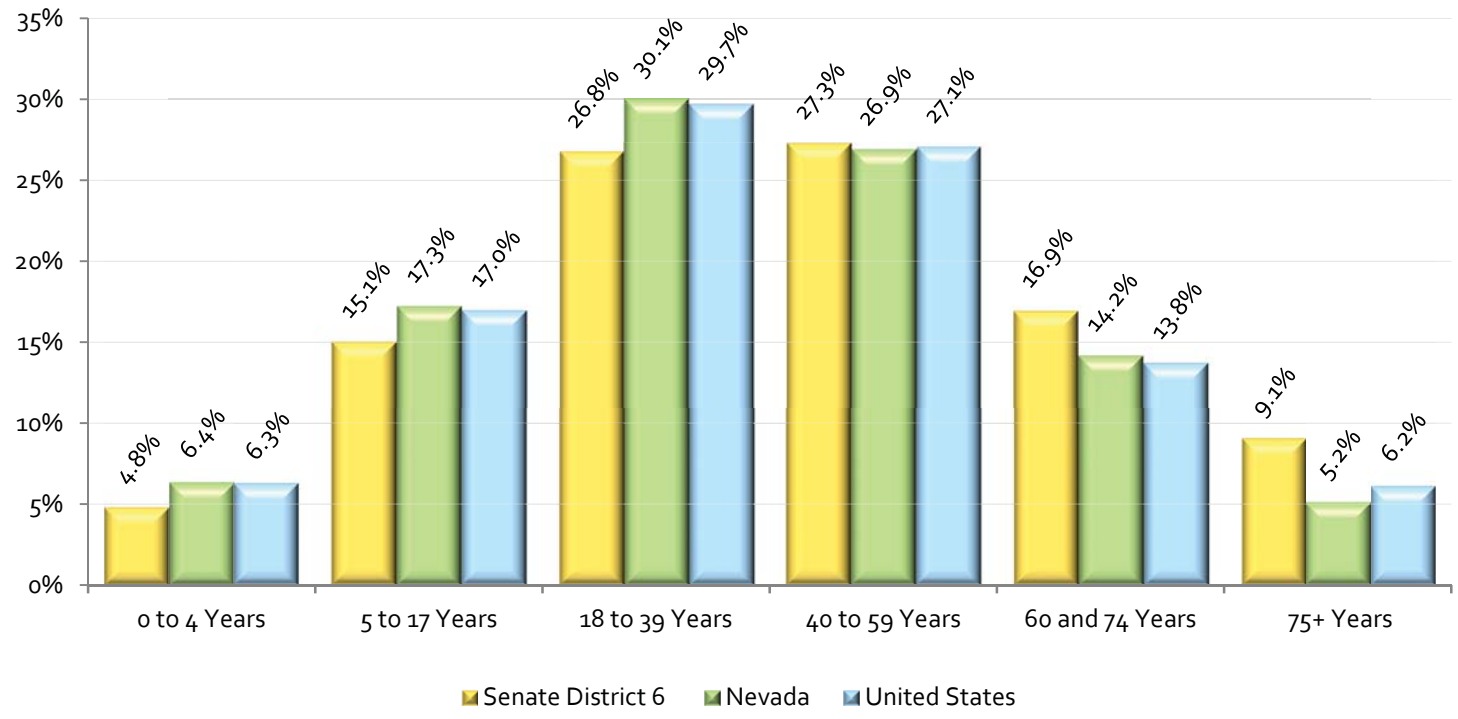
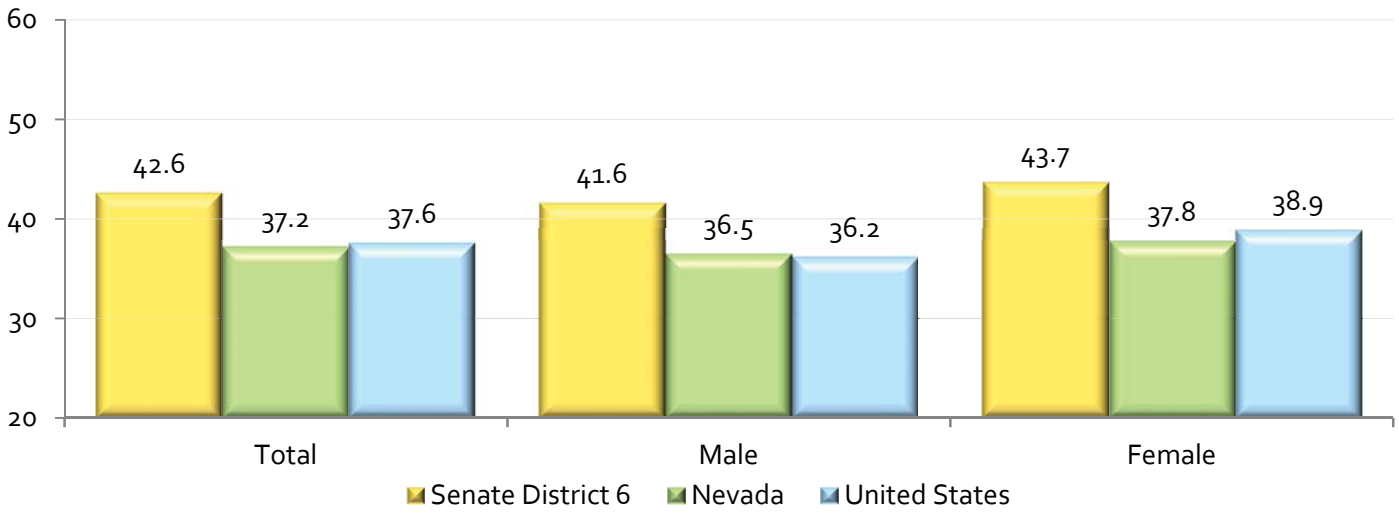
Chart 1--Population Distribution by Age



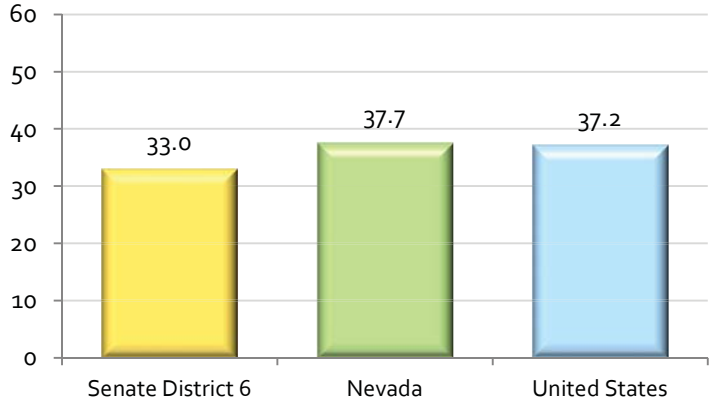
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



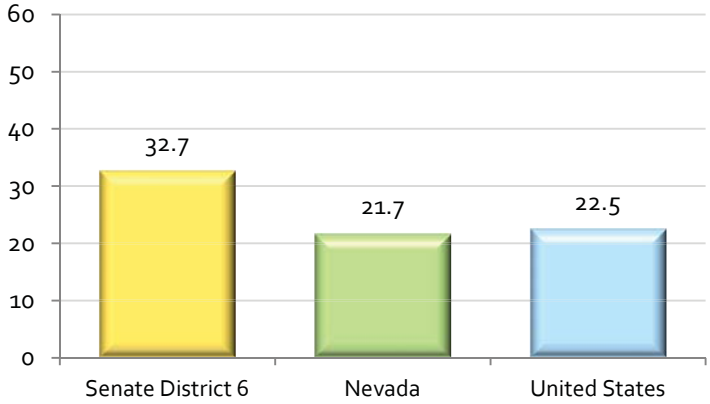
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 7

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 7	130,179	64,650	49.7%	65,529	50.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

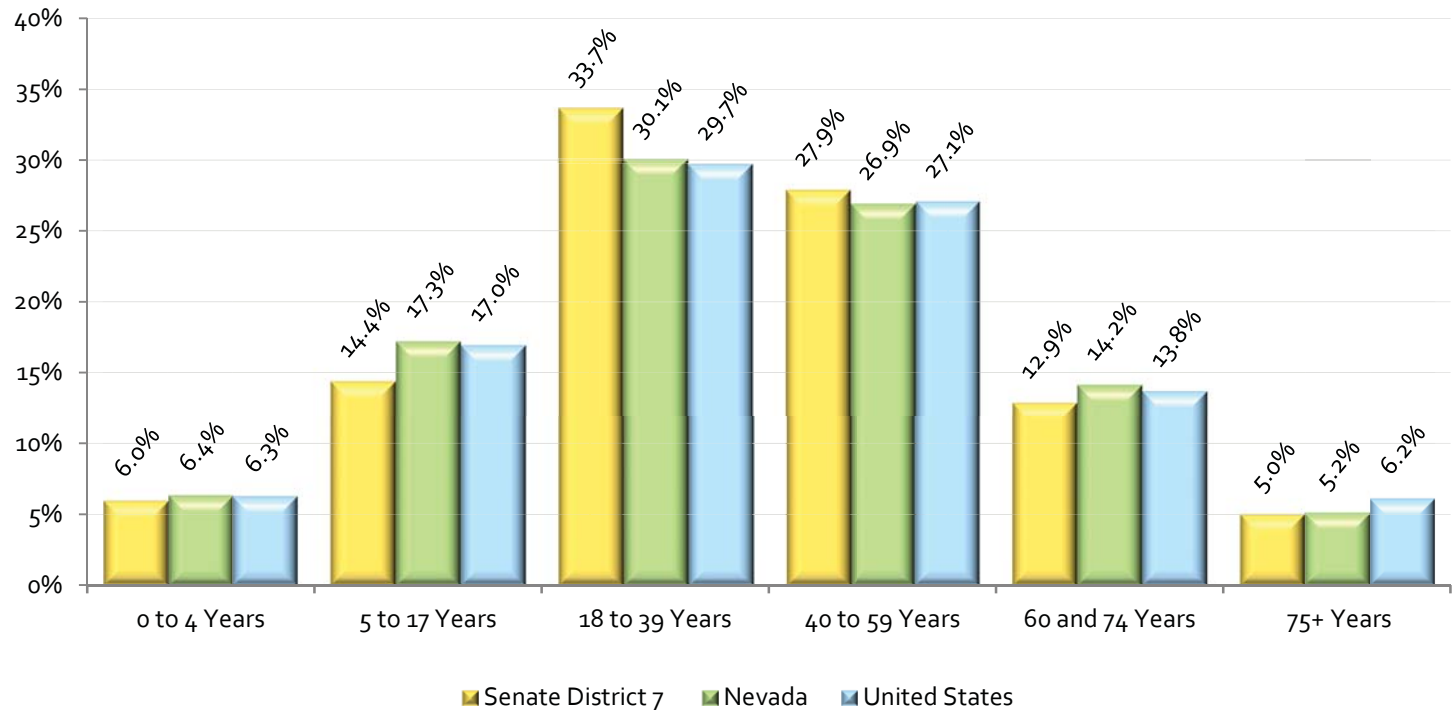
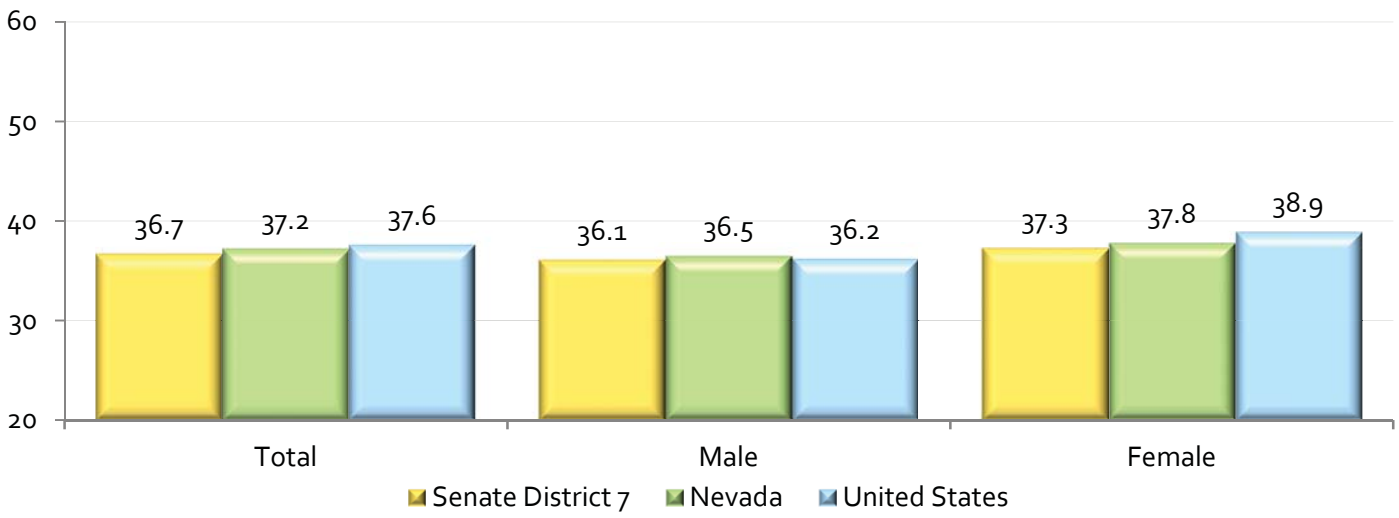
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age



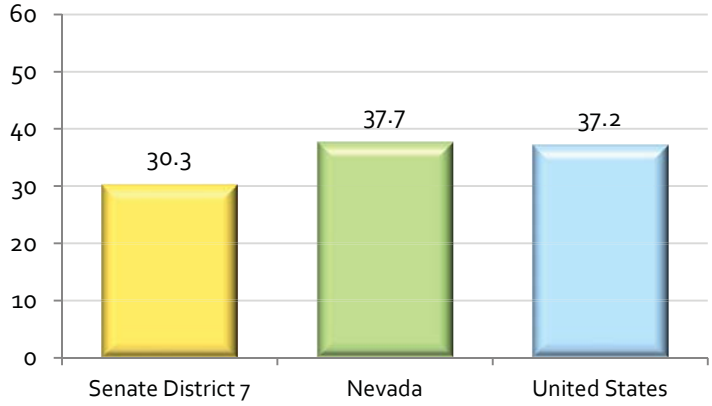
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



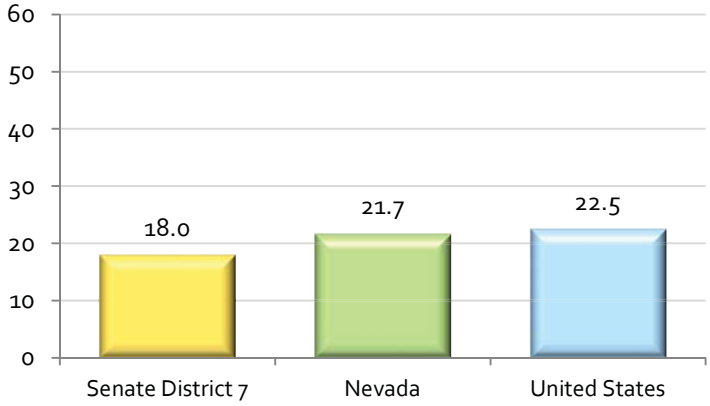
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 8

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 8	129,947	63,964	49.2%	65,983	50.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

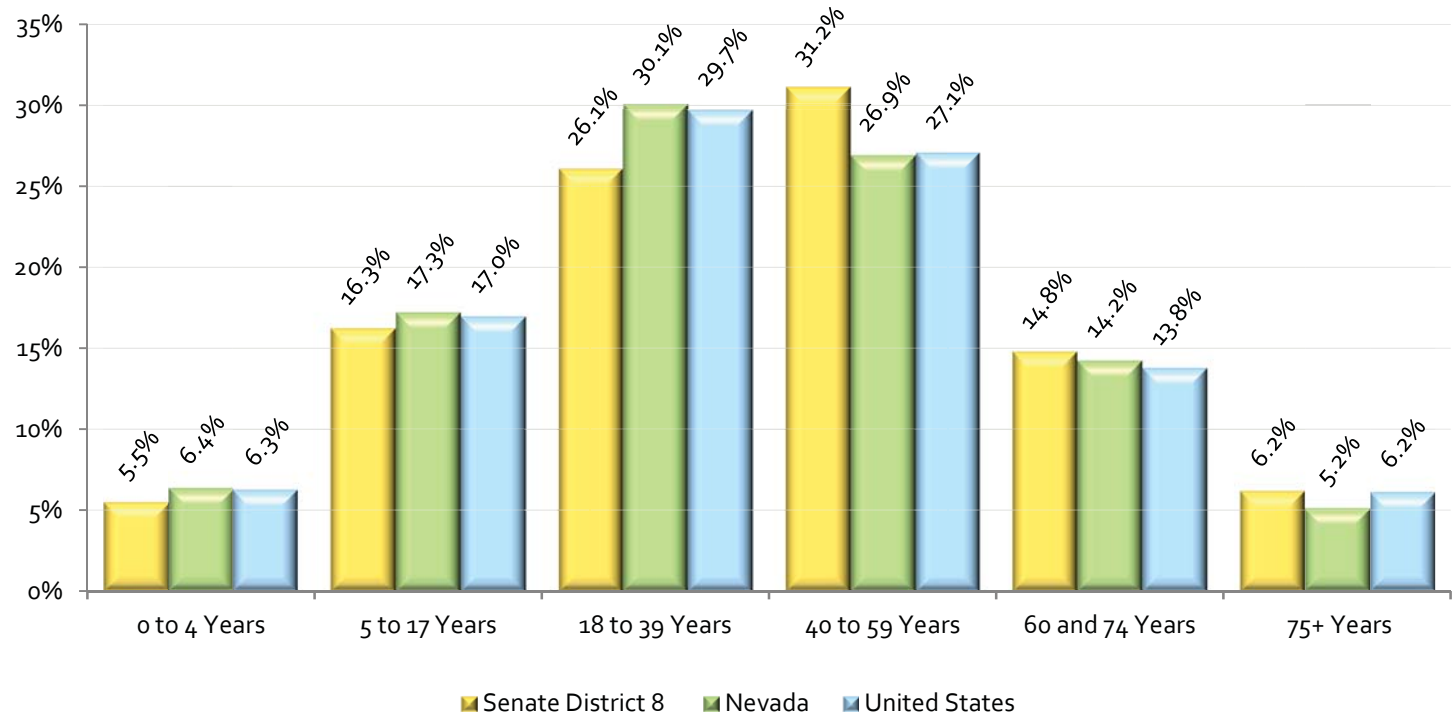
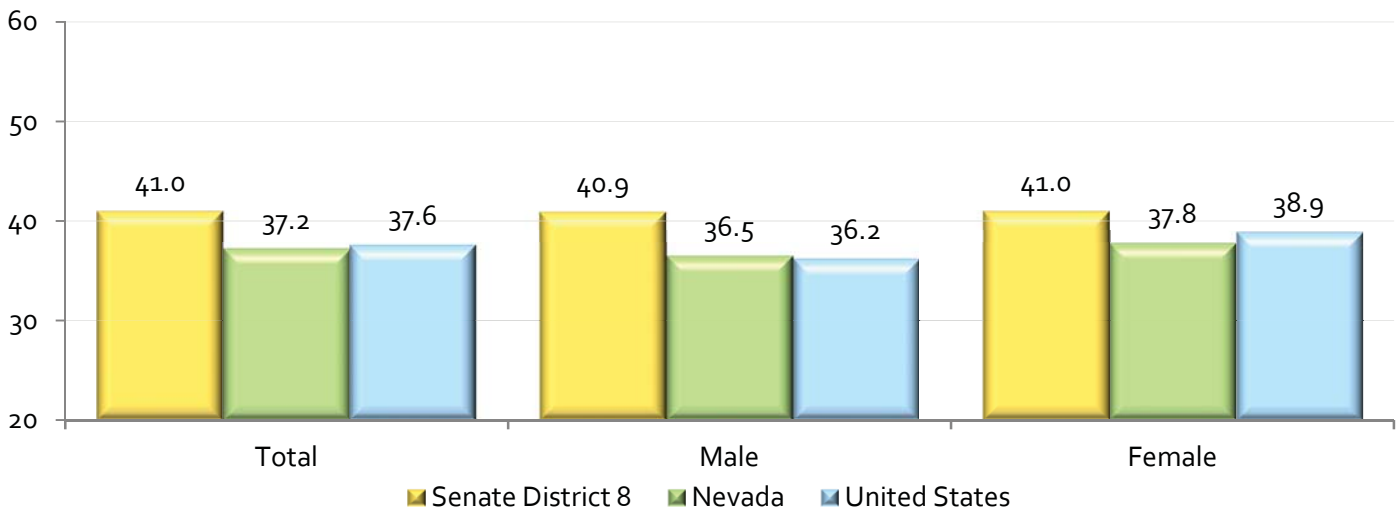
Chart 1--Population Distribution by Age



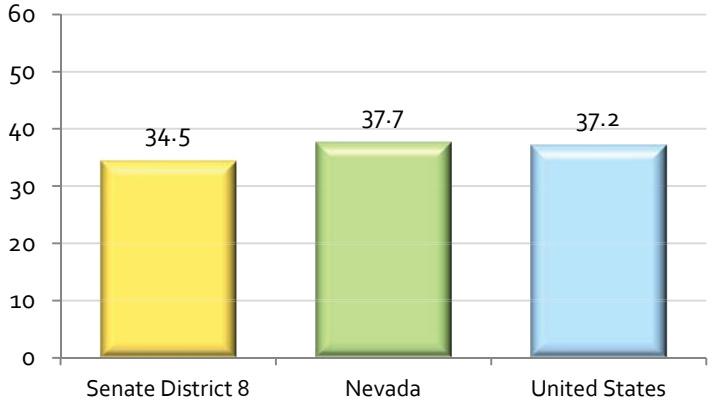
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



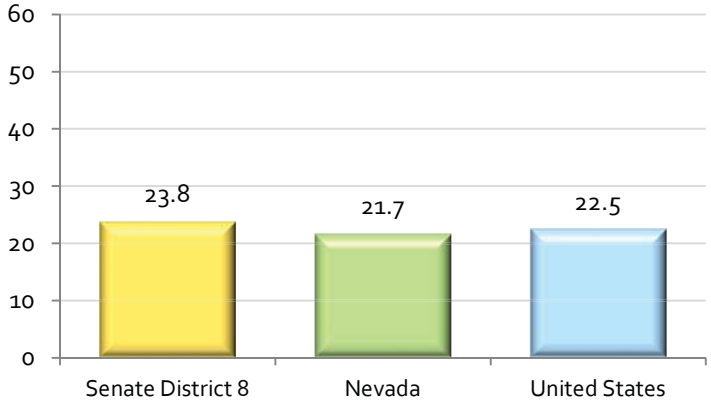
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 10

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 10	126,235	67,235	53.3%	59,000	46.7%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

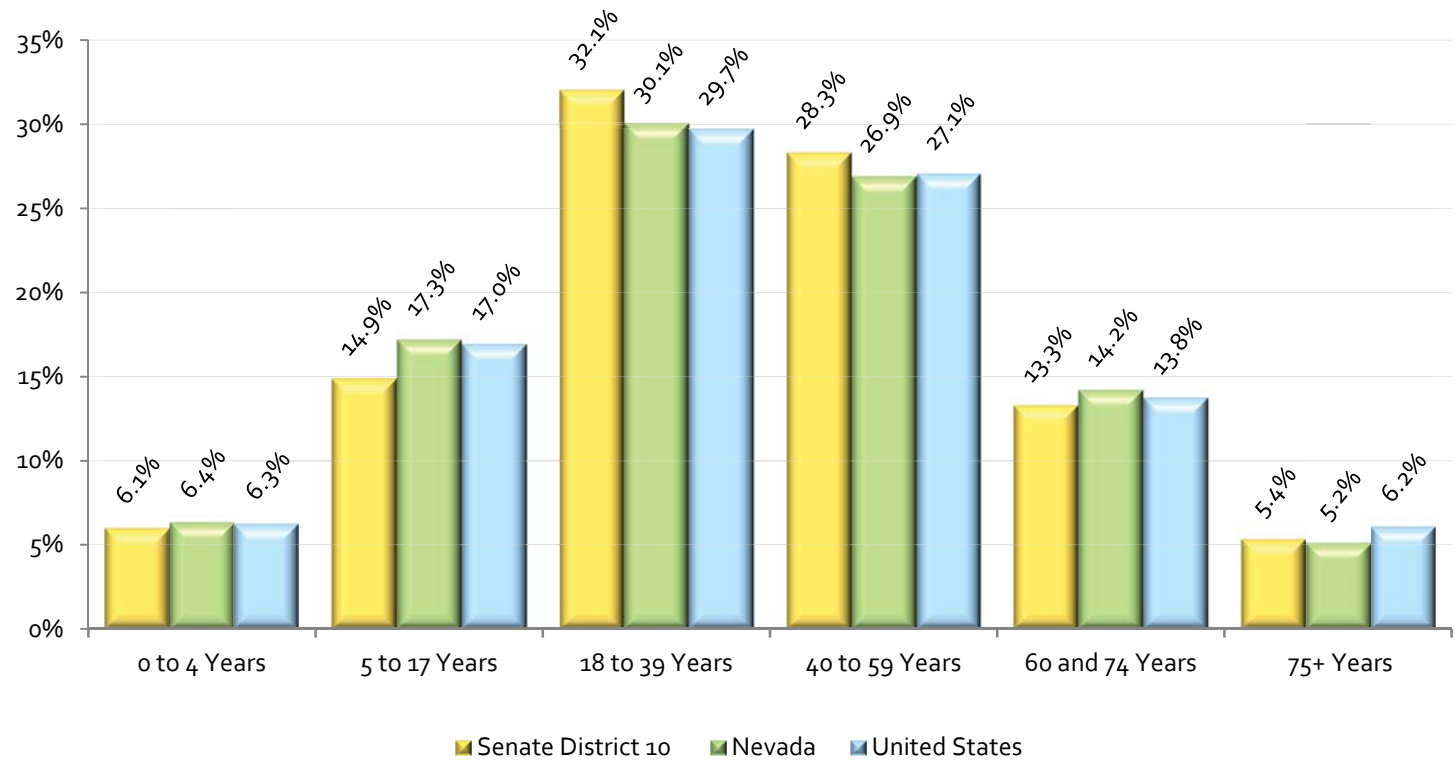
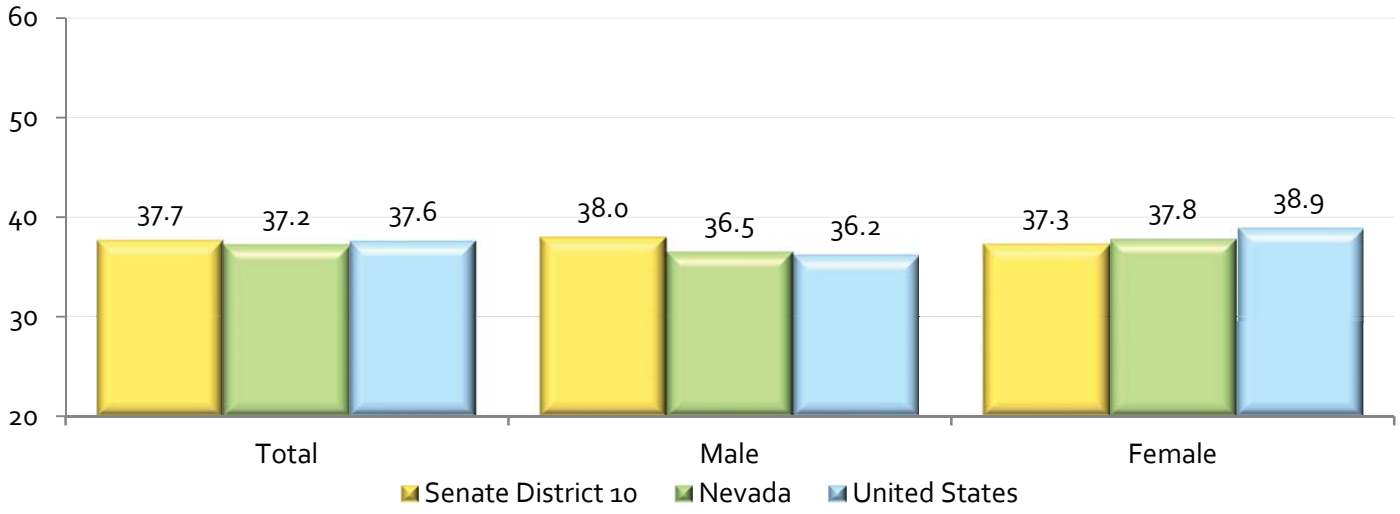
Chart 1--Population Distribution by Age



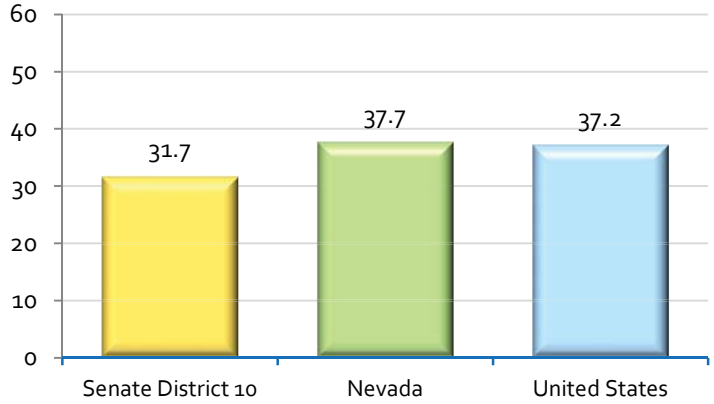
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



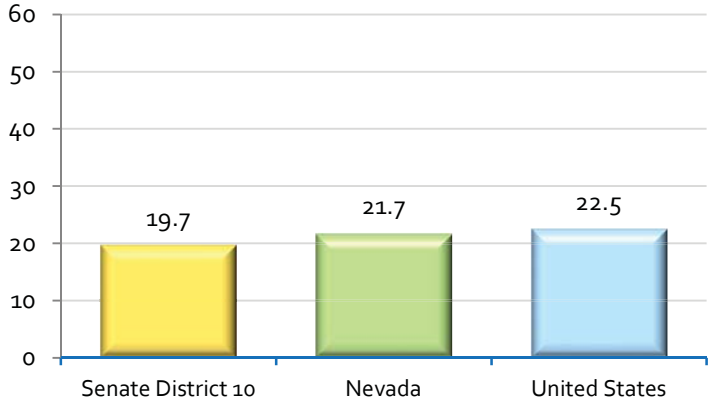
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 11

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

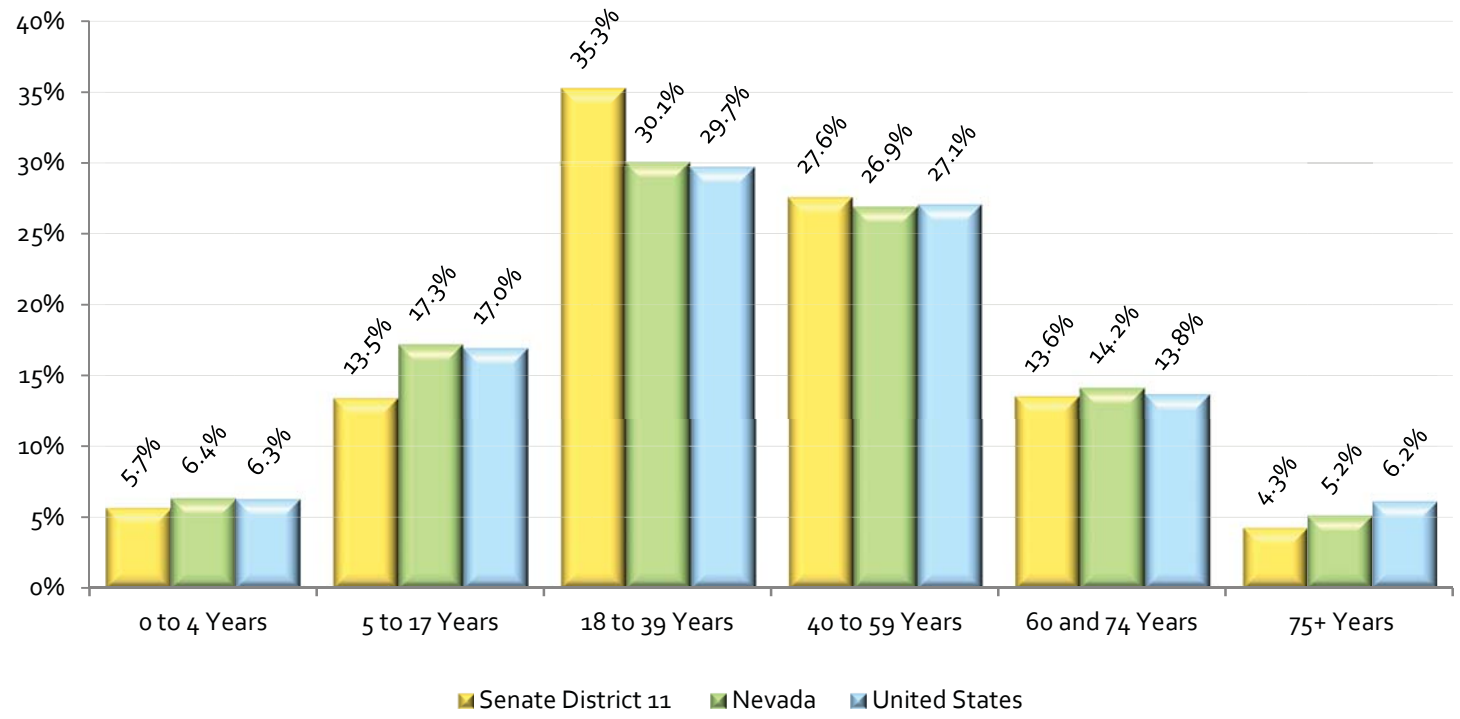
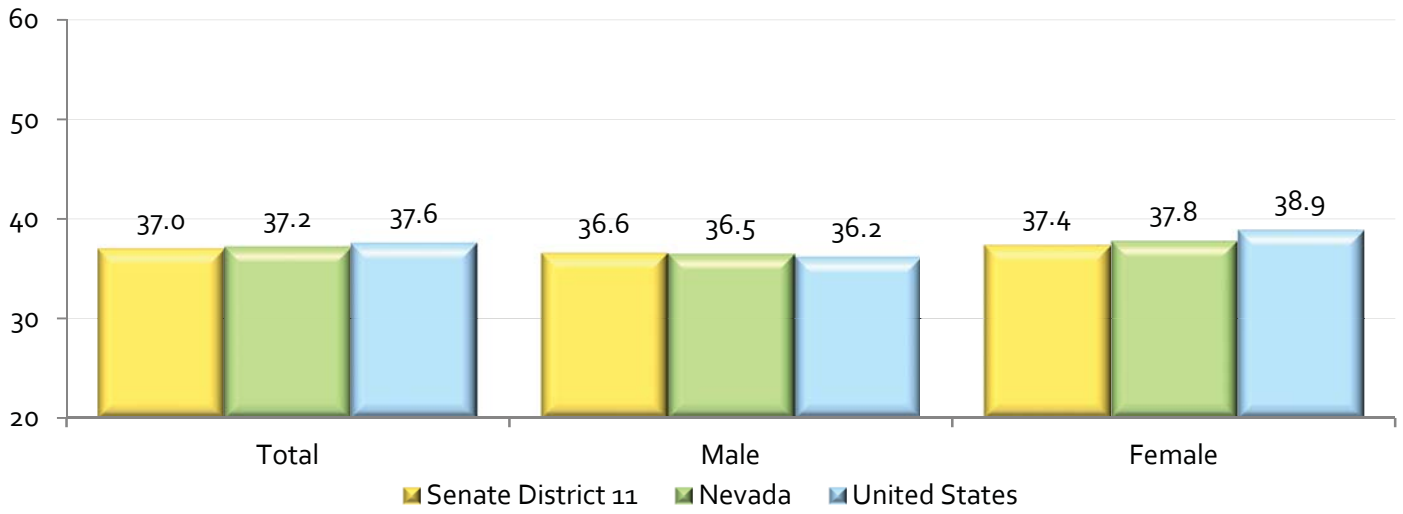
Chart 1--Population Distribution by Age



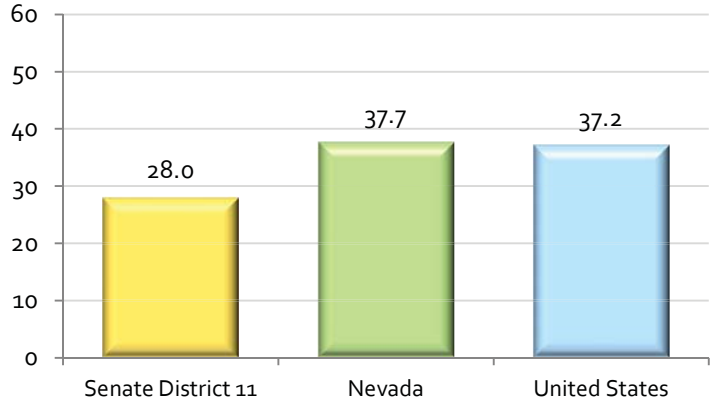
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



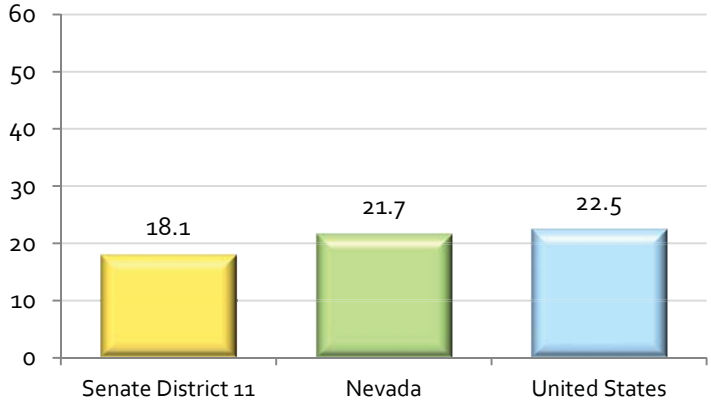
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 12

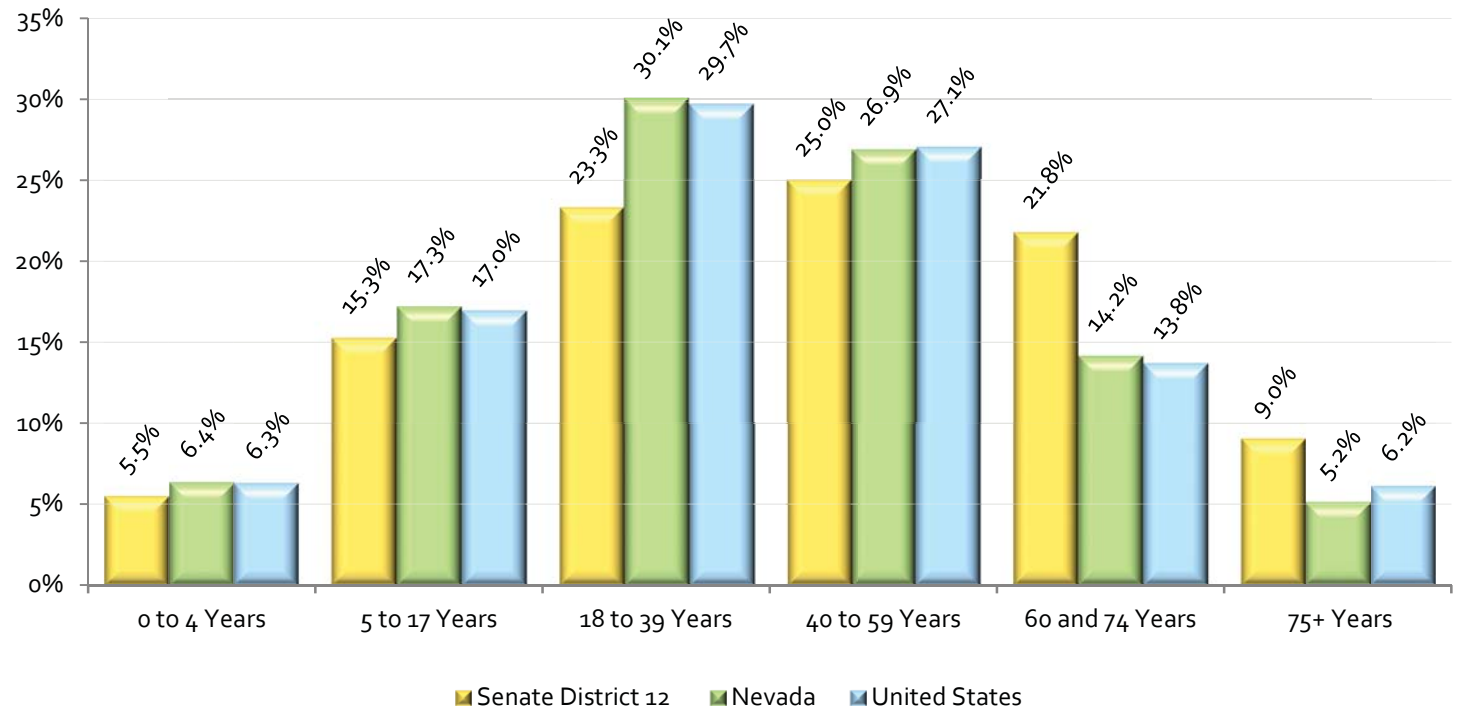
Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 12	137,775	68,682	49.9%	69,093	50.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

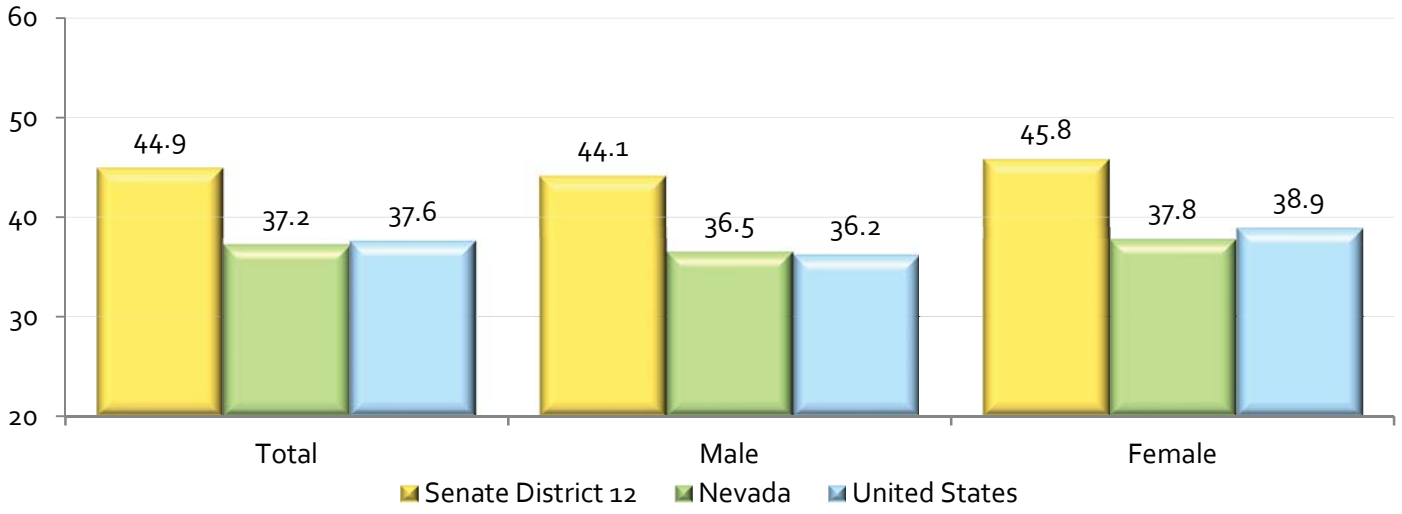
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 12	7,637	21,108	32,127	34,461	30,005	12,437
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age



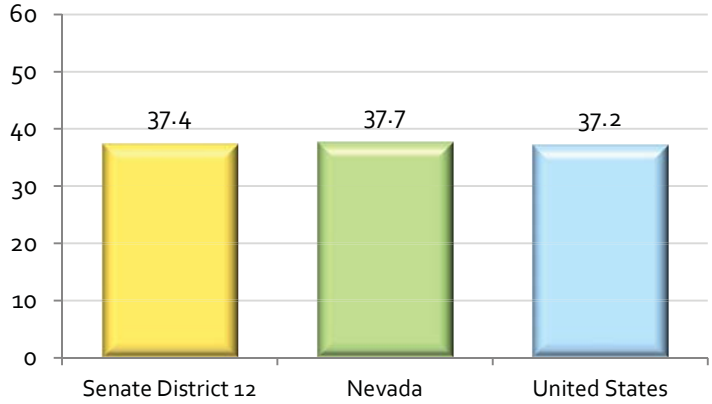
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



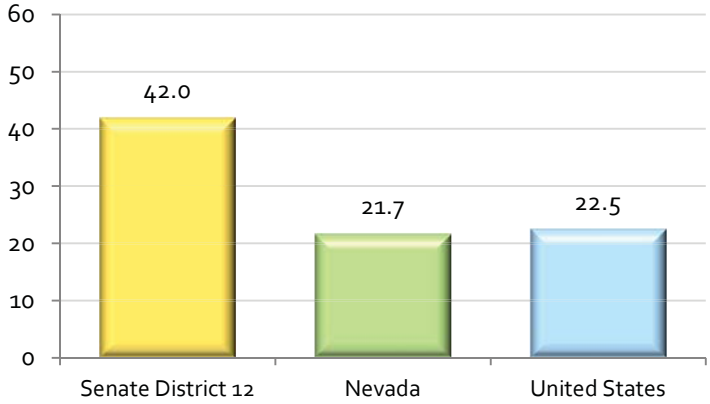
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 13

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 13	127,748	64,172	50.2%	63,576	49.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 14

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 14	134,750	69,831	51.8%	64,919	48.2%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

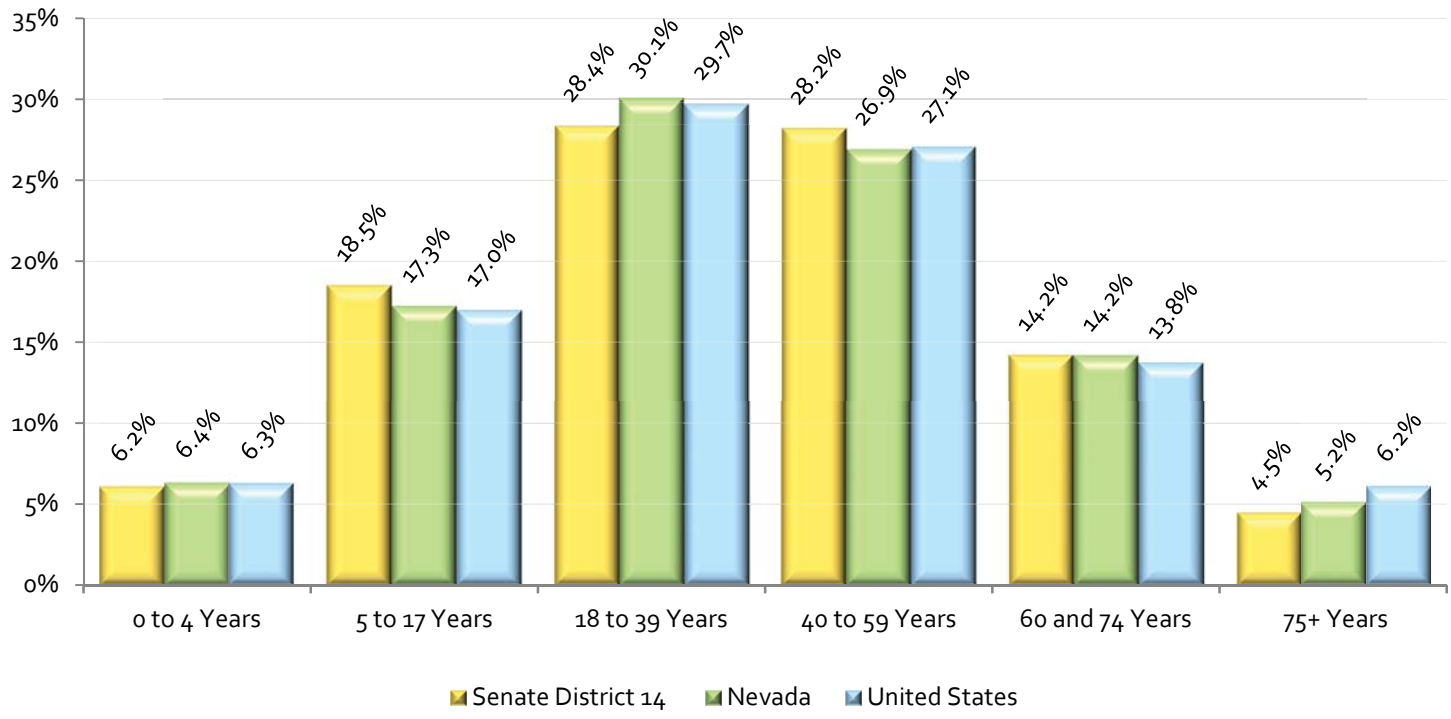
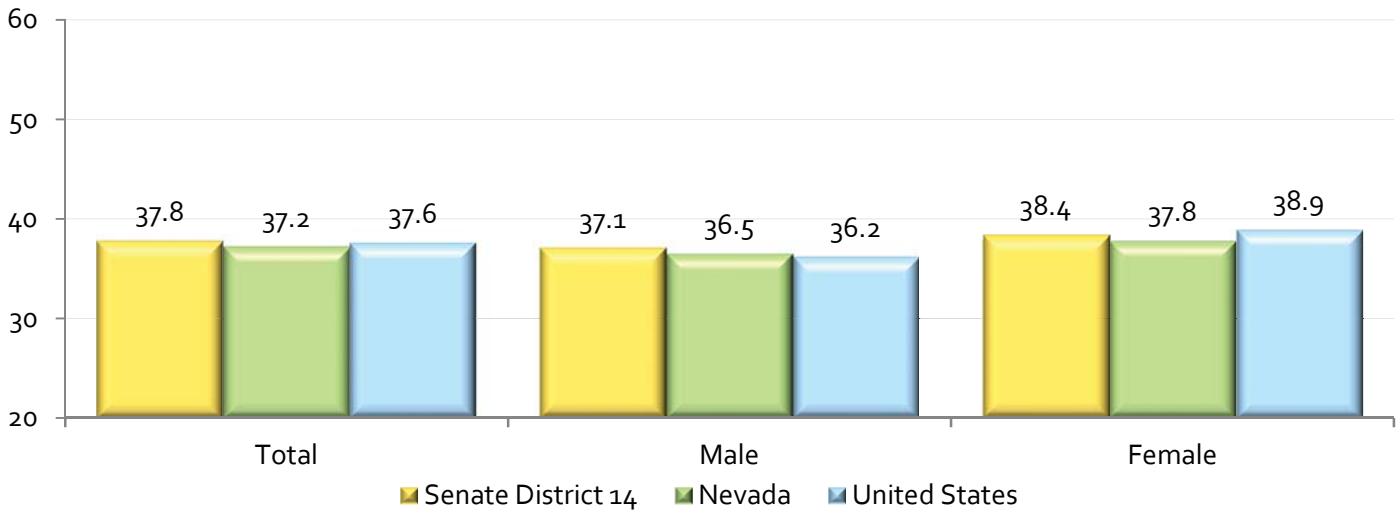
Chart 1--Population Distribution by Age



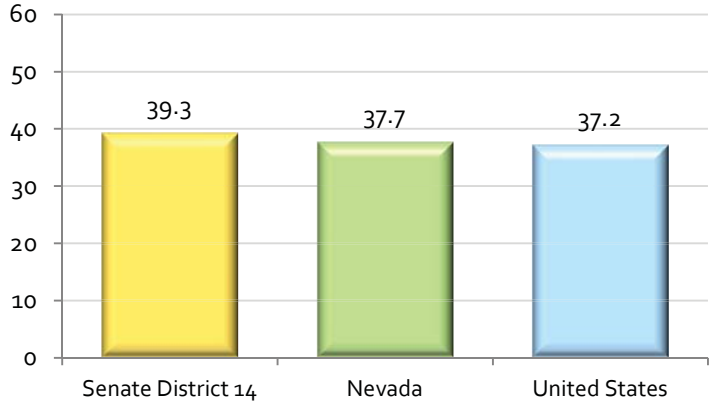
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



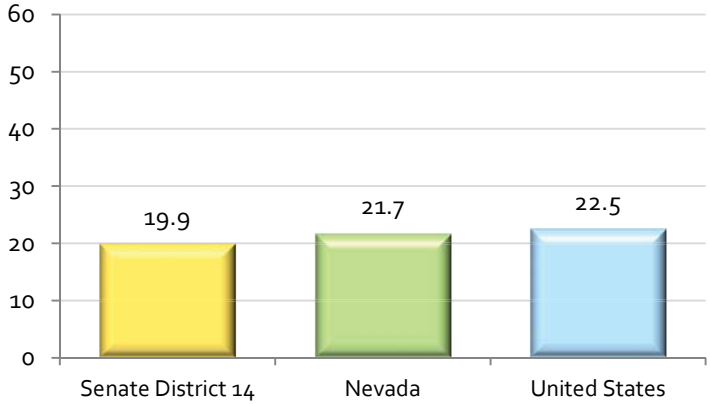
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 15

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 15	133,302	66,280	49.7%	67,022	50.3%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 15	7,157	21,983	39,840	36,132	20,833	7,357

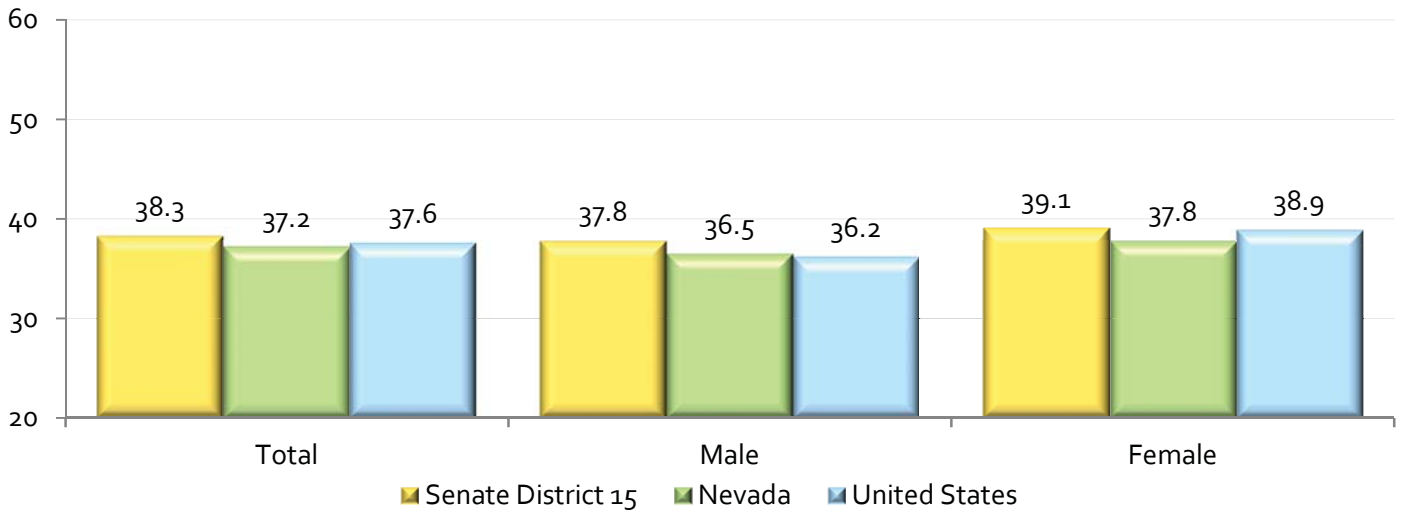
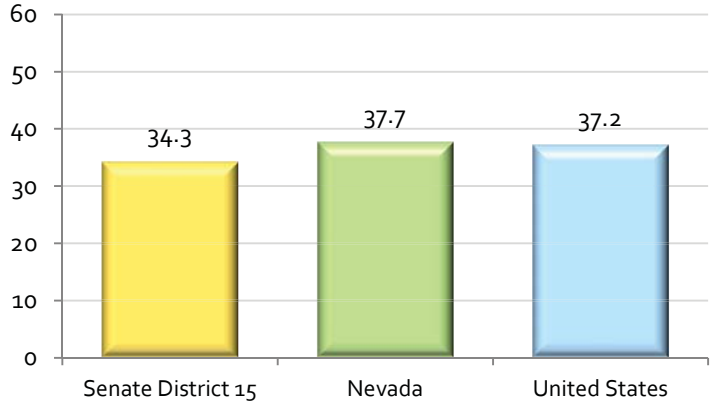
Population Characteristics
Nevada Senate District No. 15

Chart 2--Median Age (in years)*



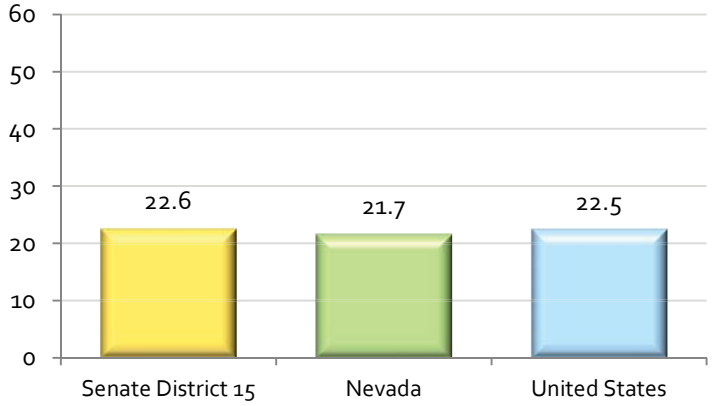
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 16

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females

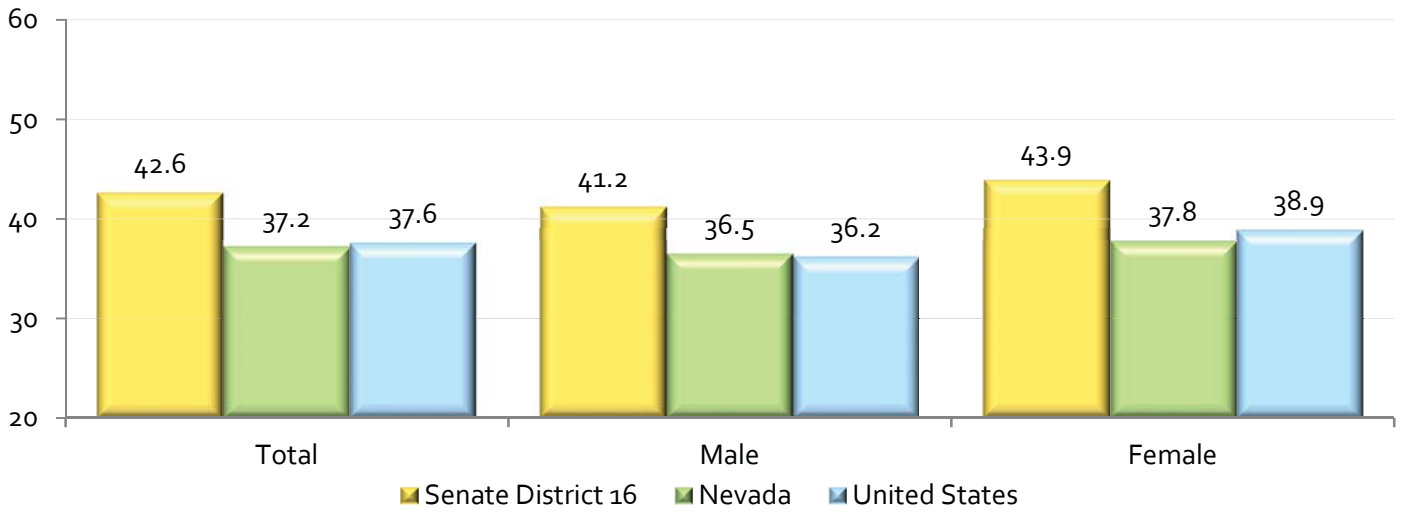
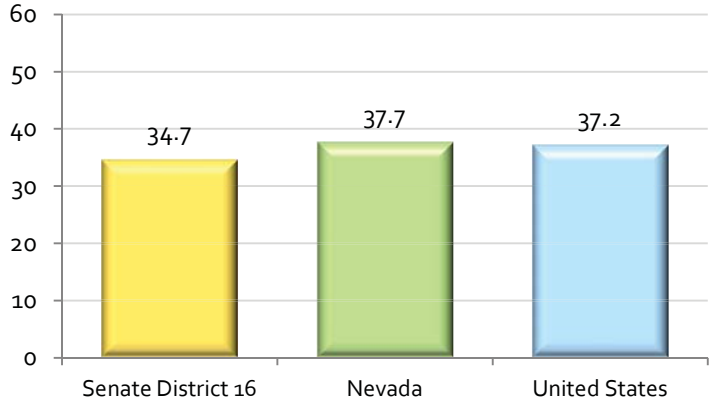
Population Characteristics
Nevada Senate District No. 16

Chart 2--Median Age (in years)*



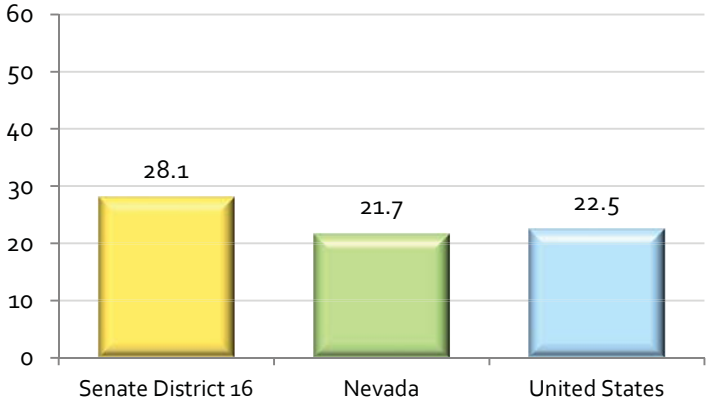
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 17

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 17	127,097	64,006	50.4%	63,091	49.6%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 18

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 18	139,542	68,226	48.9%	71,316	51.1%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 19

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 19	134,427	71,886	53.5%	62,541	46.5%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%

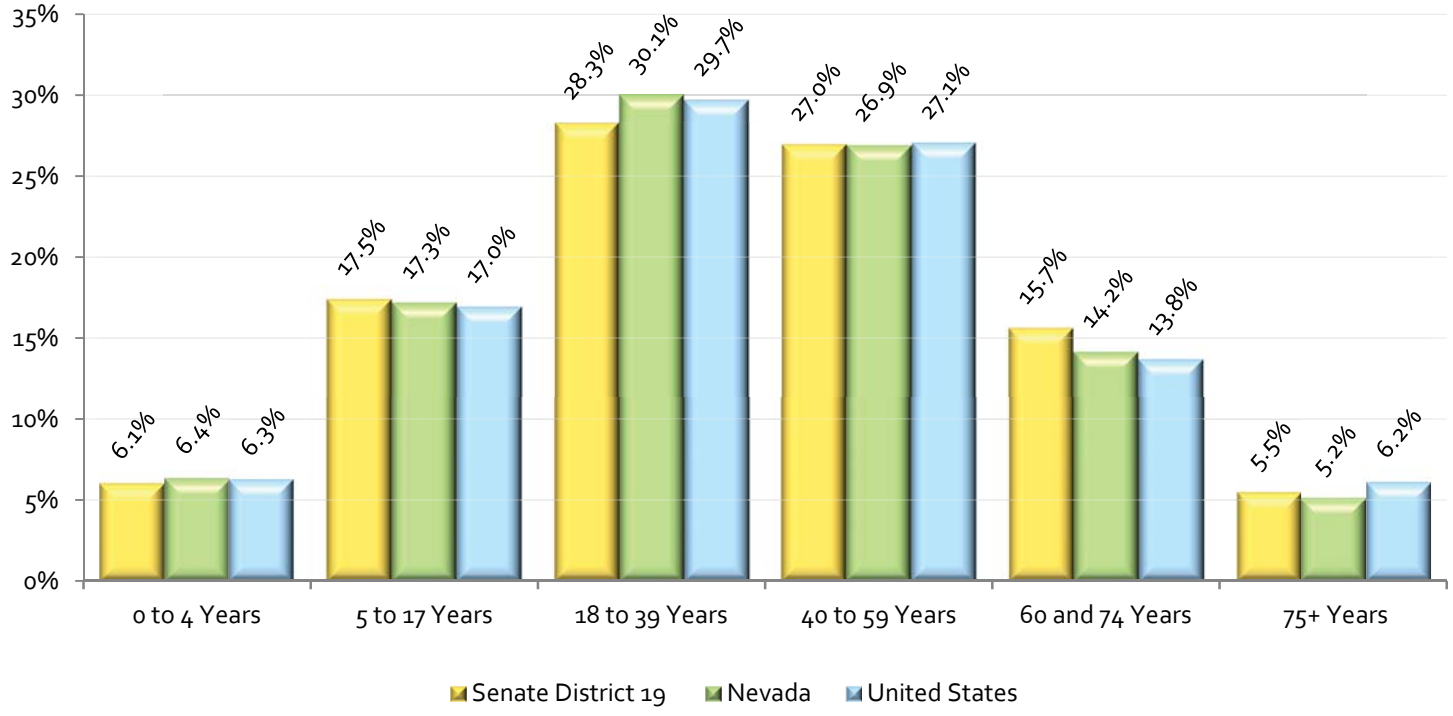
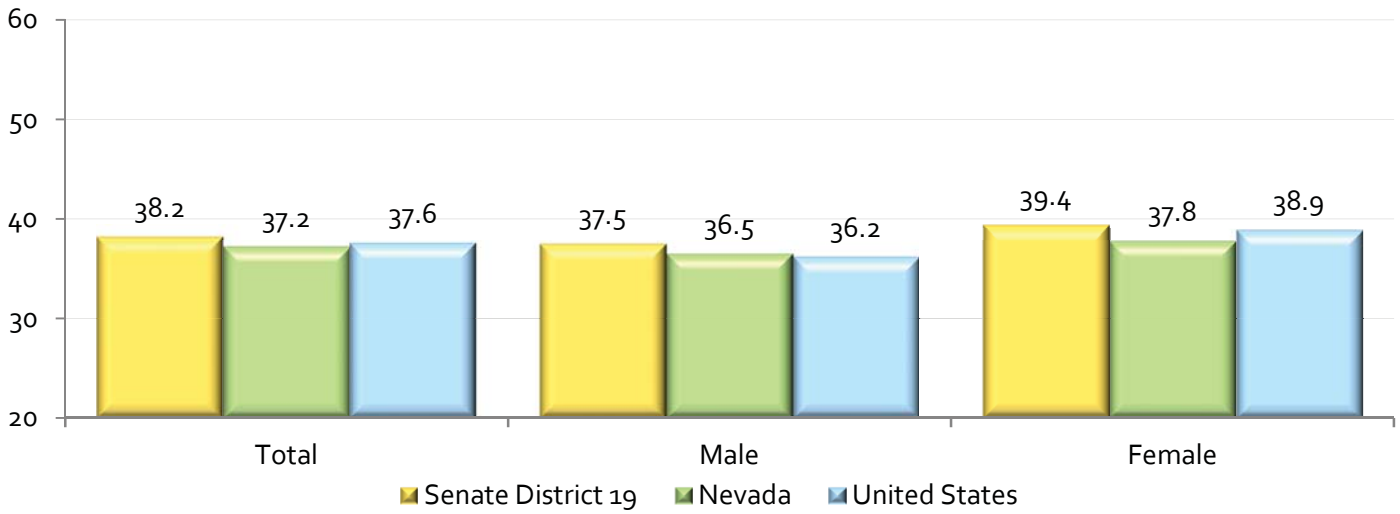
Chart 1--Population Distribution by Age



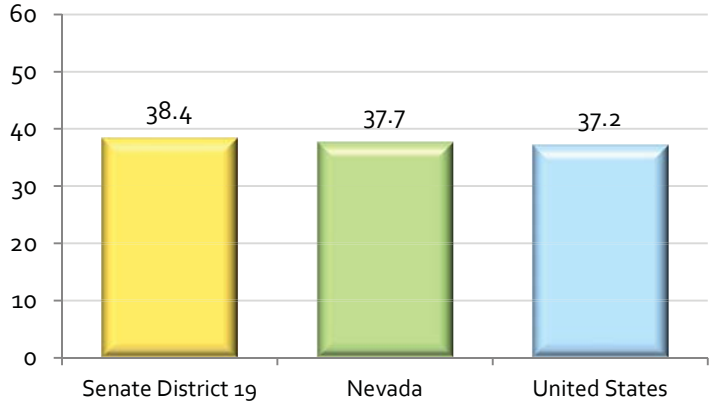
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



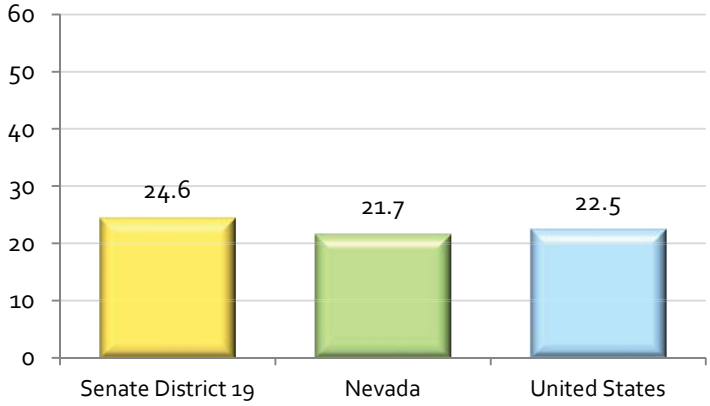
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 20

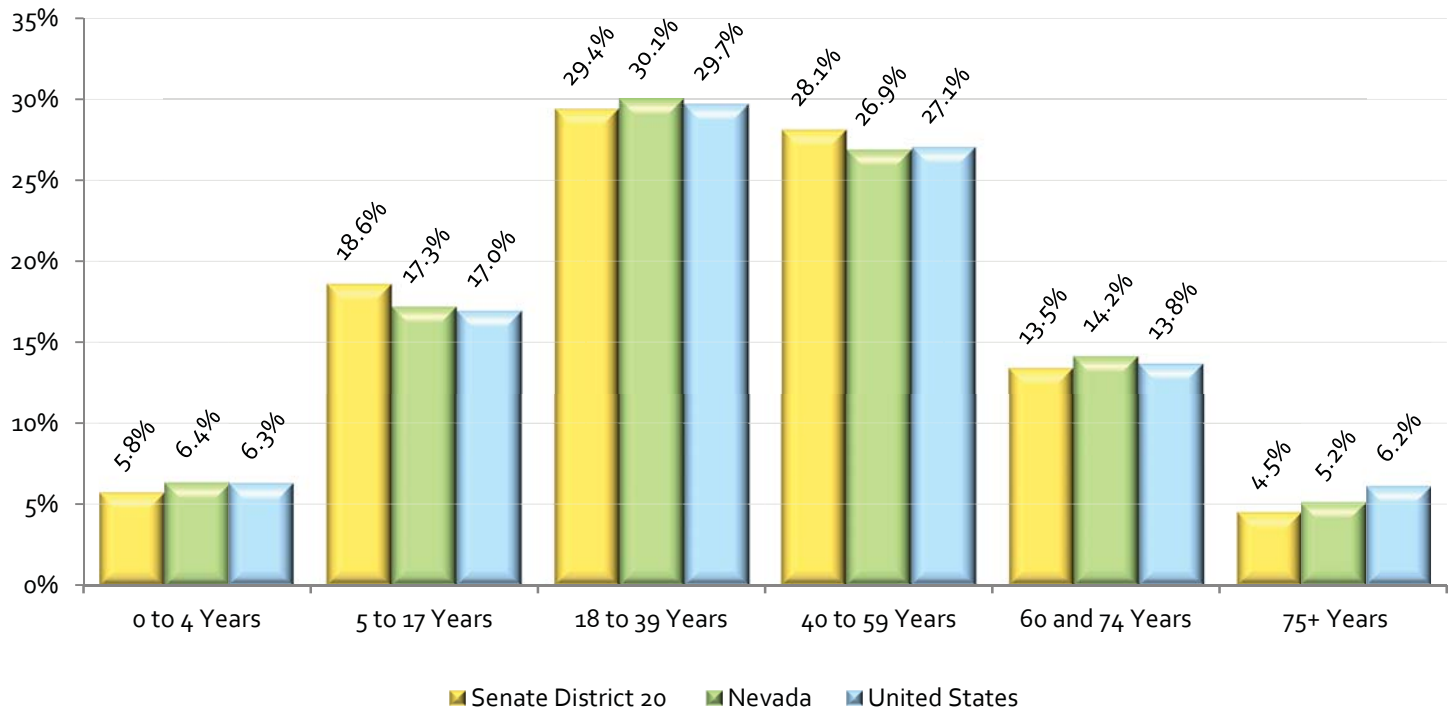
Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 20	139,611	67,317	48.2%	72,294	51.8%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

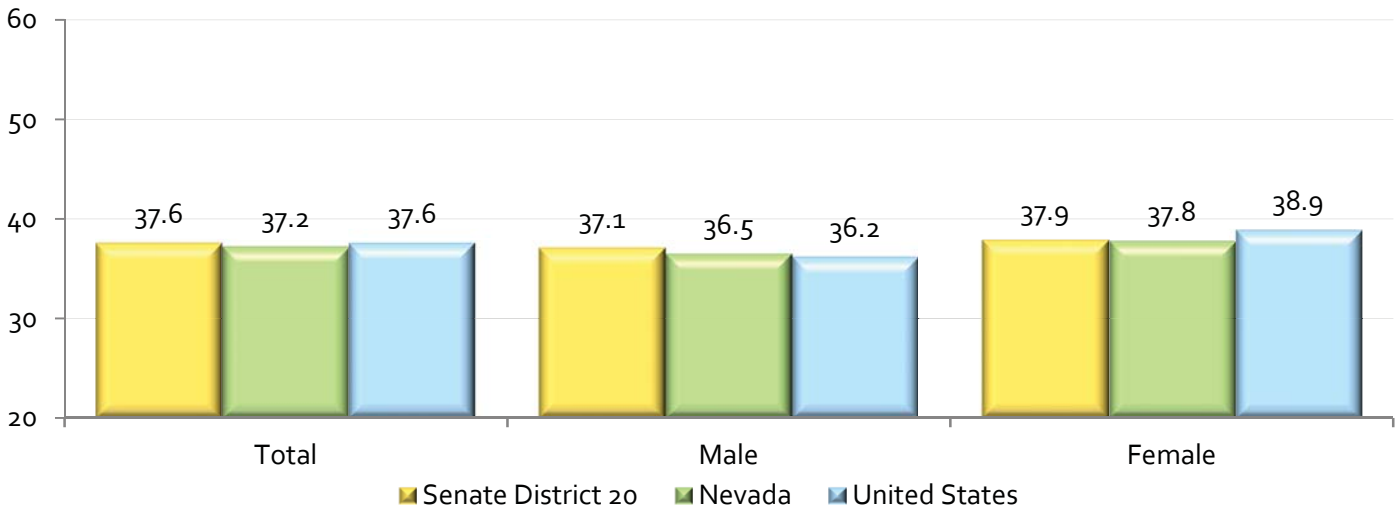
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 20	8,073	26,036	41,083	39,281	18,802	6,336
Nevada	178,808	482,772	841,062	753,431	397,776	144,787
United States	19,912,018	53,771,807	94,106,105	85,693,933	43,550,848	19,480,310

Chart 1--Population Distribution by Age



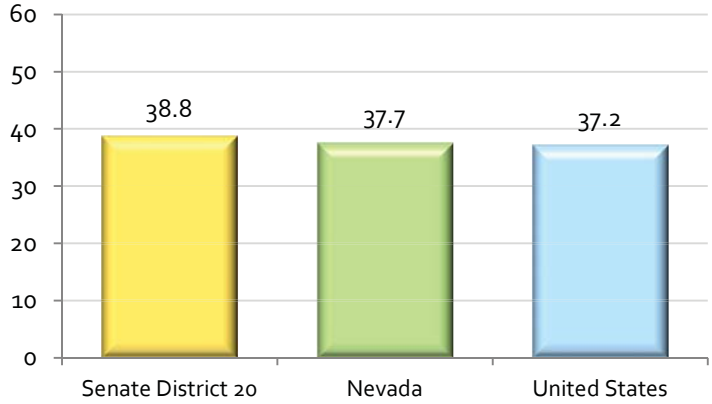
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



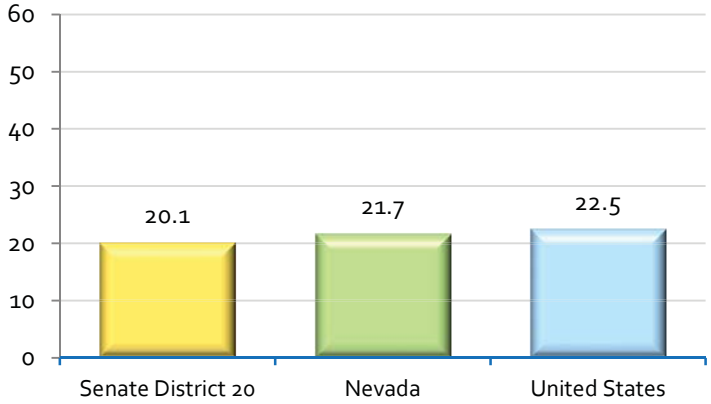
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 28, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2011-2015 5-Year American Community Survey* (ACS), which became available on December 8, 2016. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Population Characteristics
Nevada Senate District No. 21

Table 1--Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 21	129,244	63,734	49.3%	65,510	50.7%
Nevada	2,798,636	1,407,735	50.3%	1,390,901	49.7%
United States	316,515,021	155,734,280	49.2%	160,780,741	50.8%

Table 2--Population by Years of Age

	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+

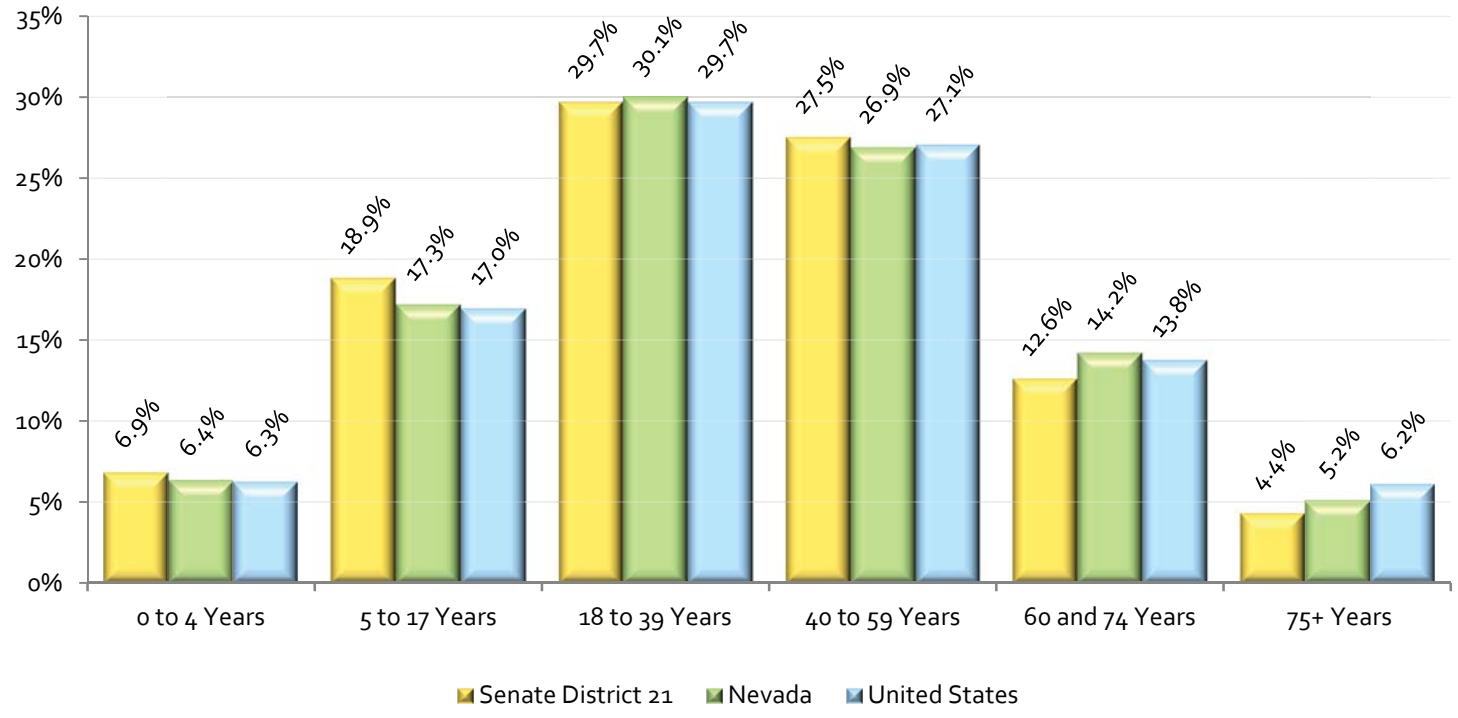
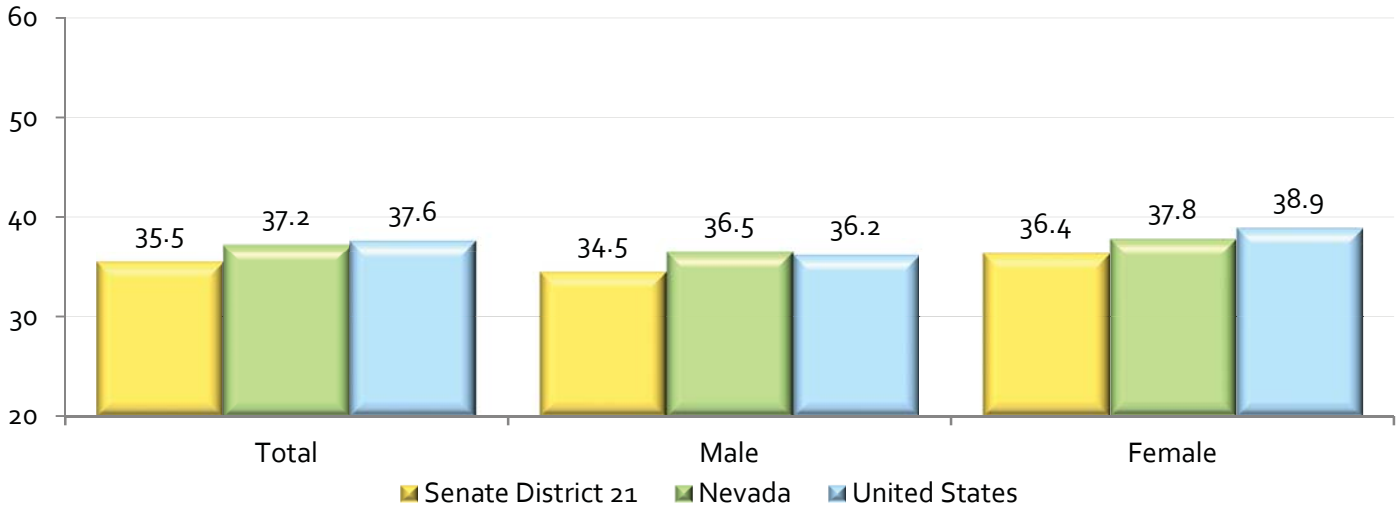
Chart 1--Population Distribution by Age



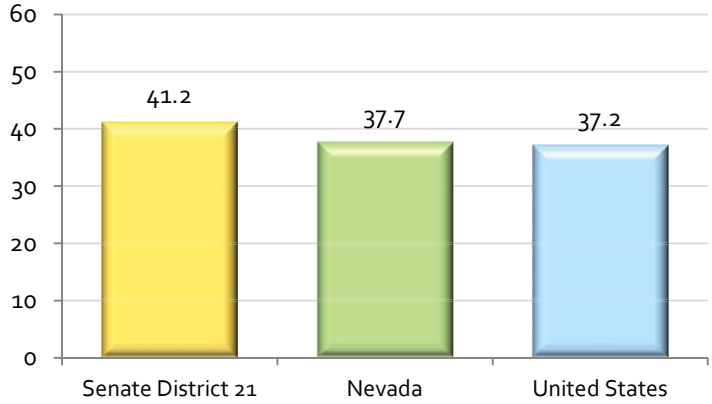
Source: U.S. Census Bureau, *2011-2015 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2--Median Age (in years)*



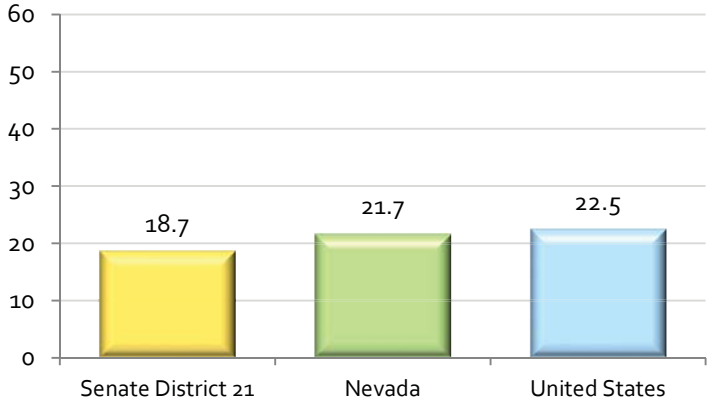
* The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3--Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17) in a population divided by the total adult working age population (18-64) times 100.

Chart 4--Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+) in a population divided by the total adult working age population (18-64) times 100.
