A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 1

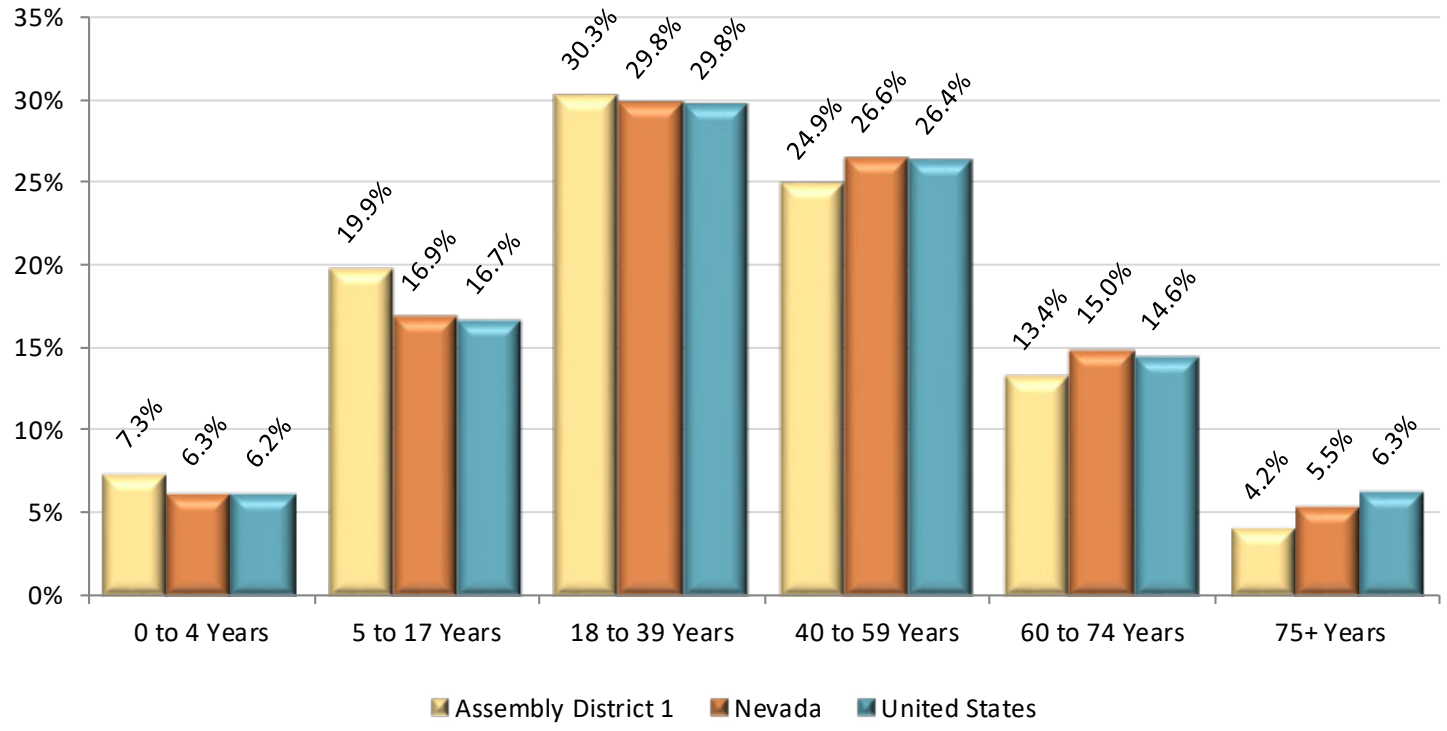
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 1	73,536	35,717	48.6%	37,819	51.4%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

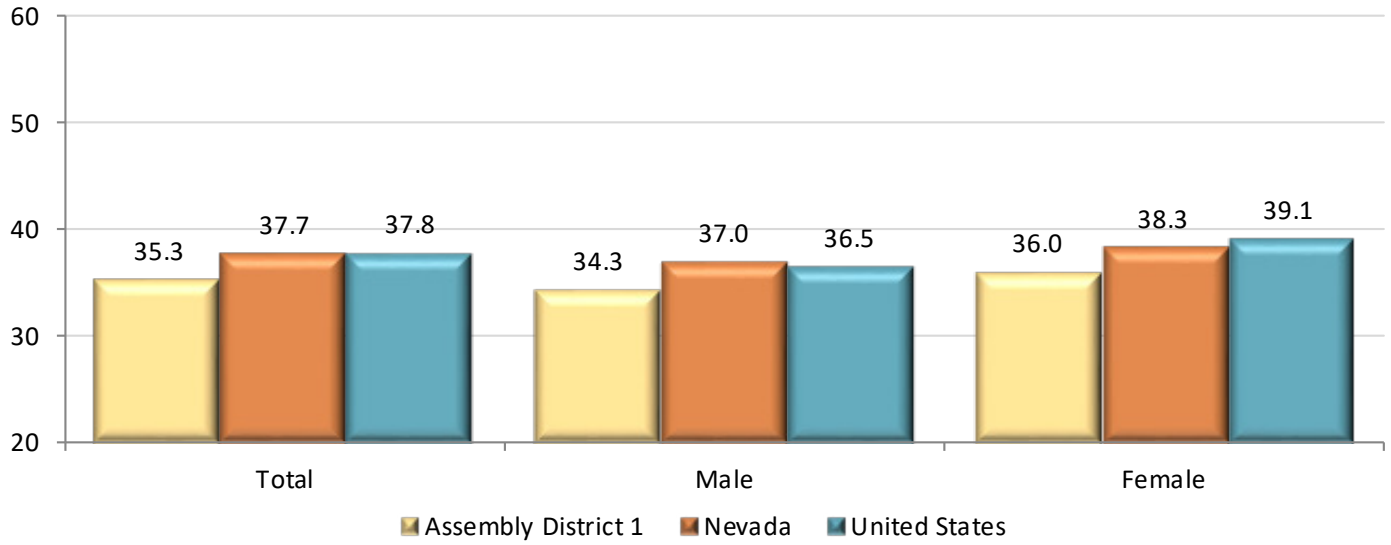
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 1	5,399	14,600	22,310	18,328	9,820	3,079
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



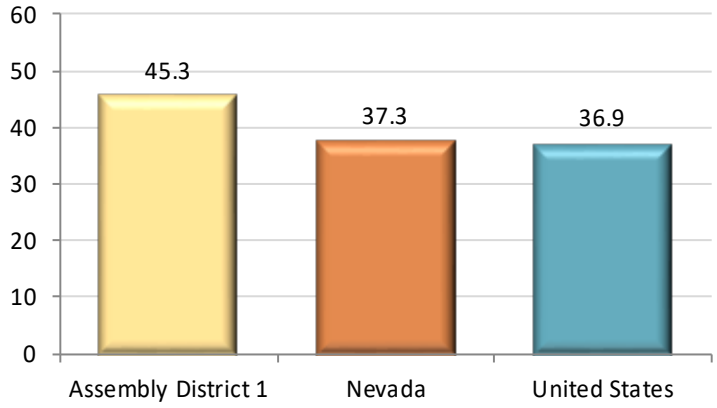
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



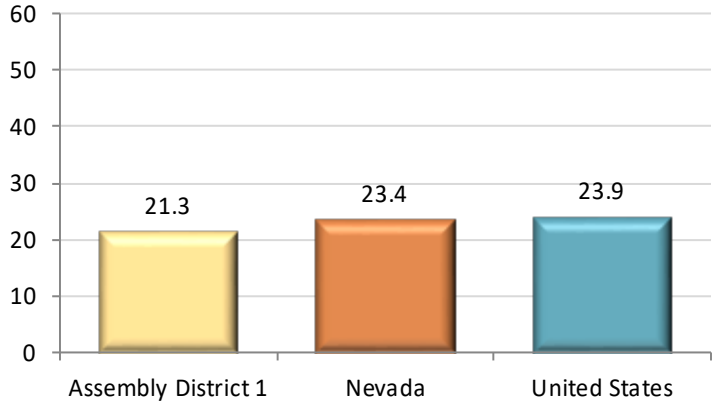
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

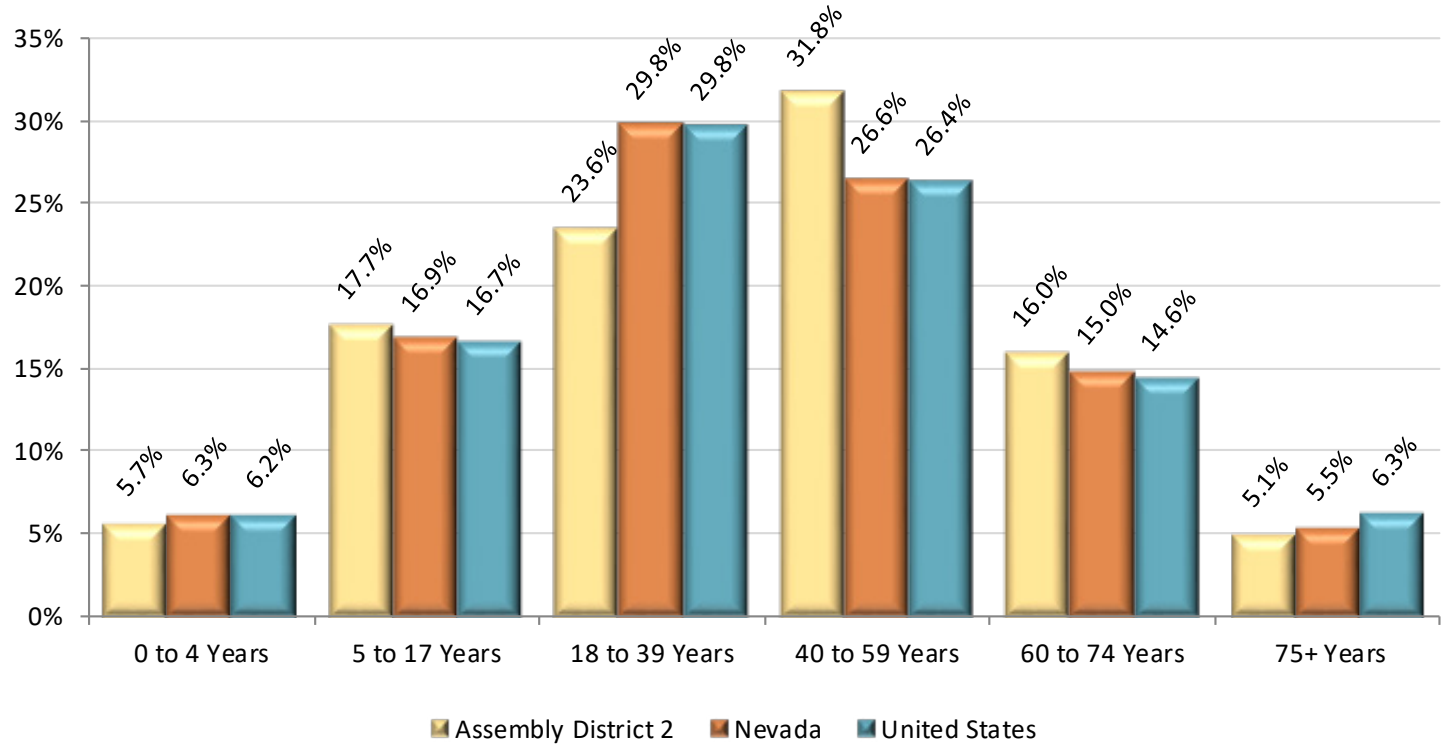
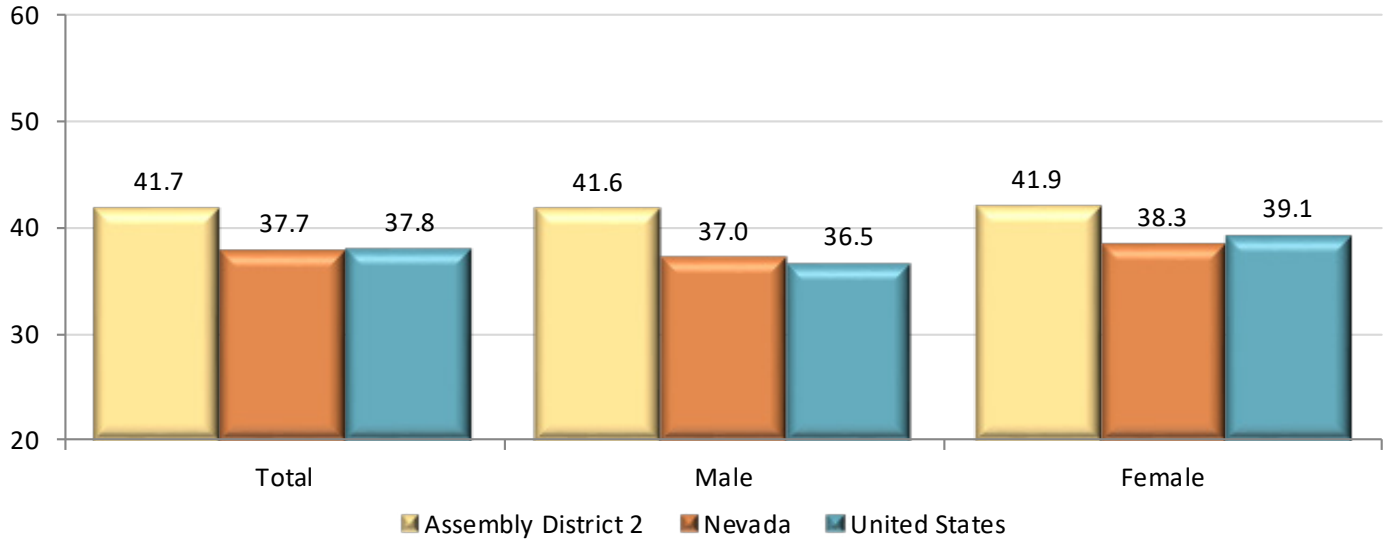
Chart 1—Population Distribution by Age



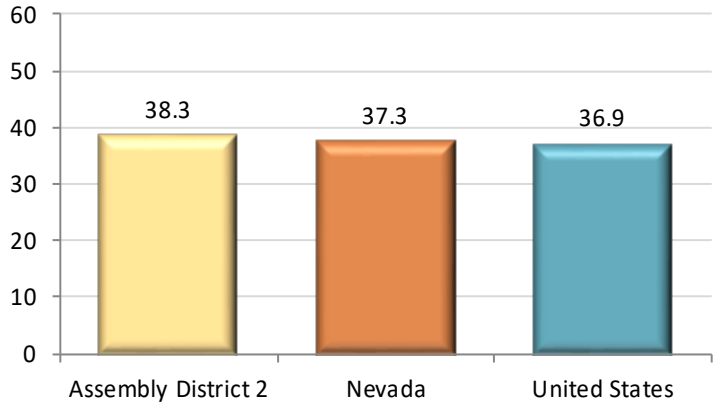
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



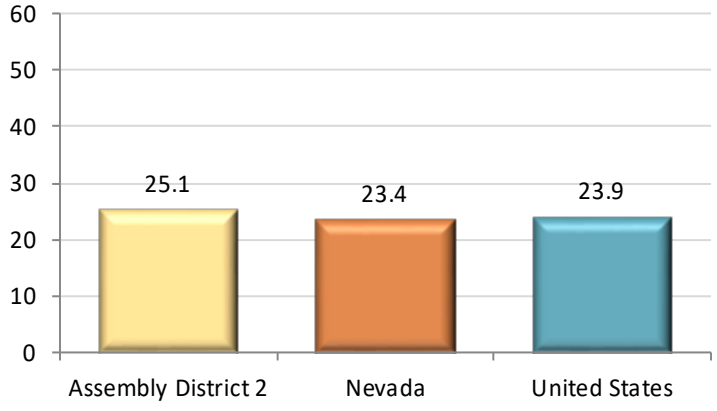
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

*The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

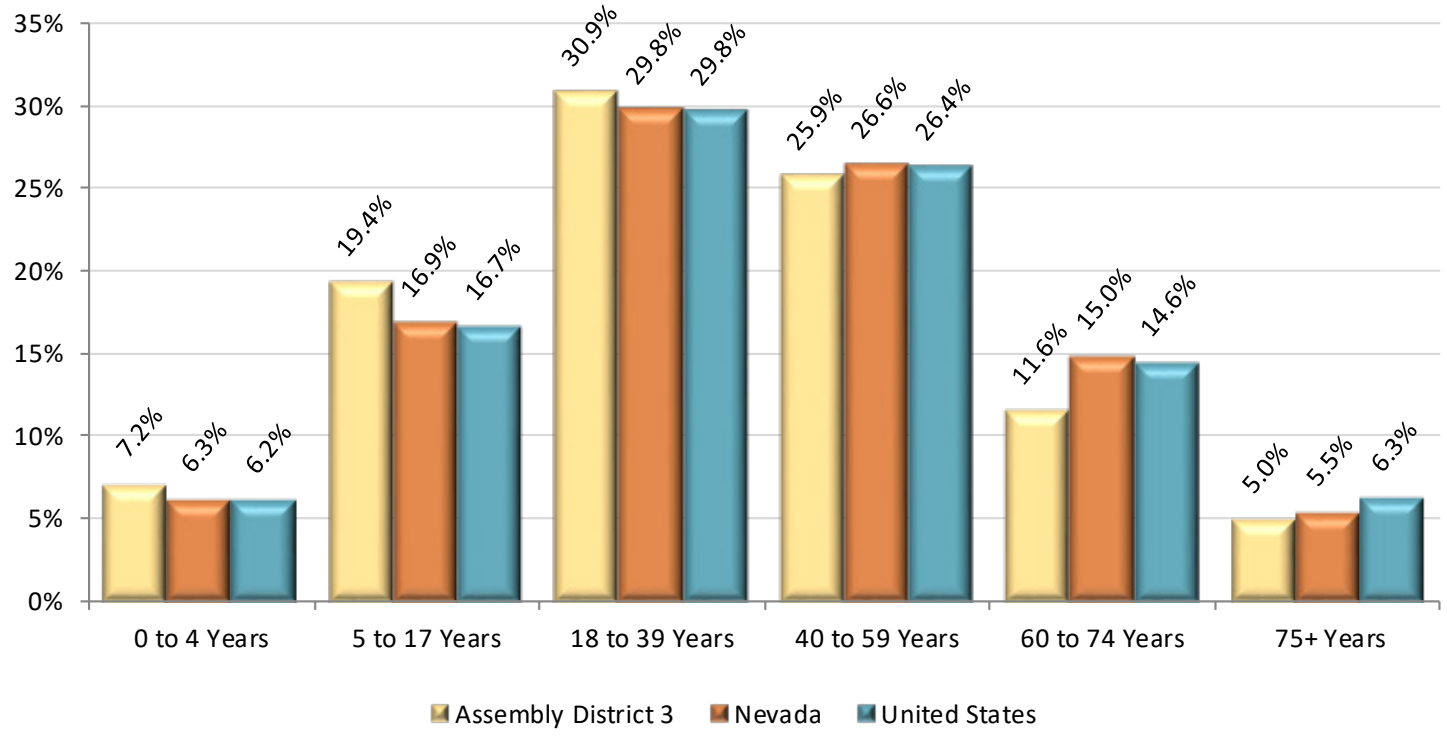
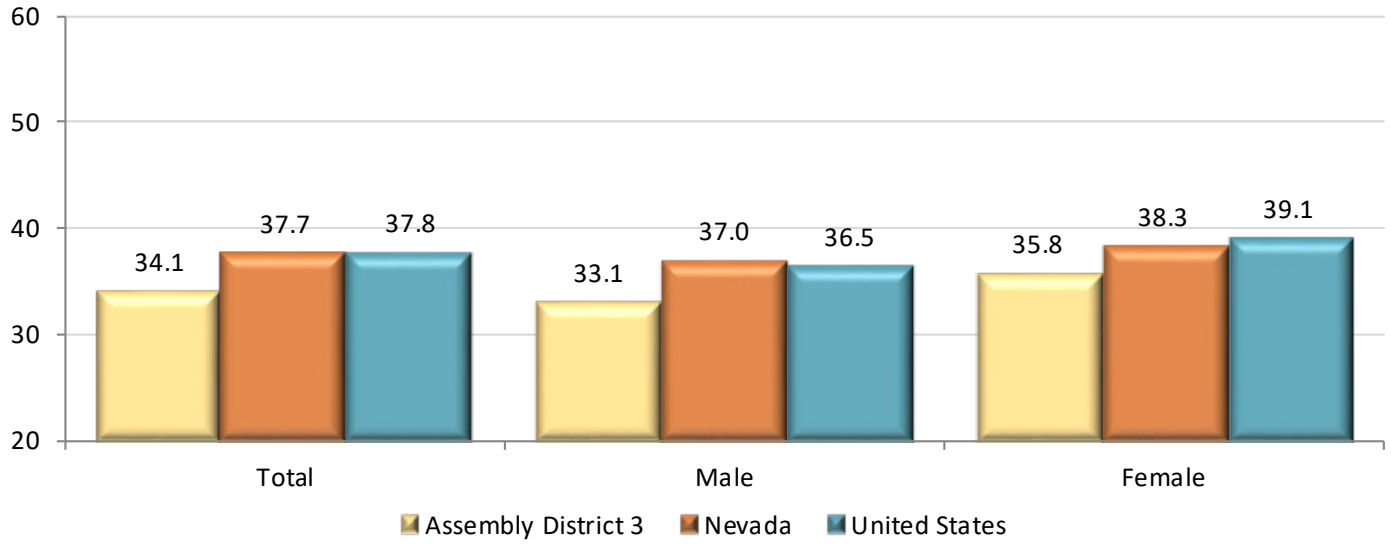
Chart 1—Population Distribution by Age



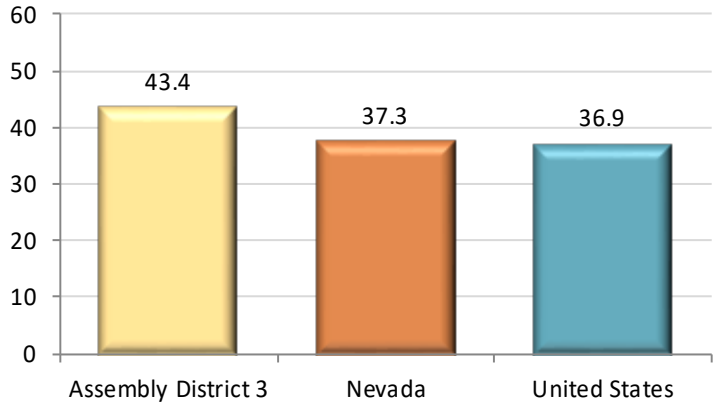
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



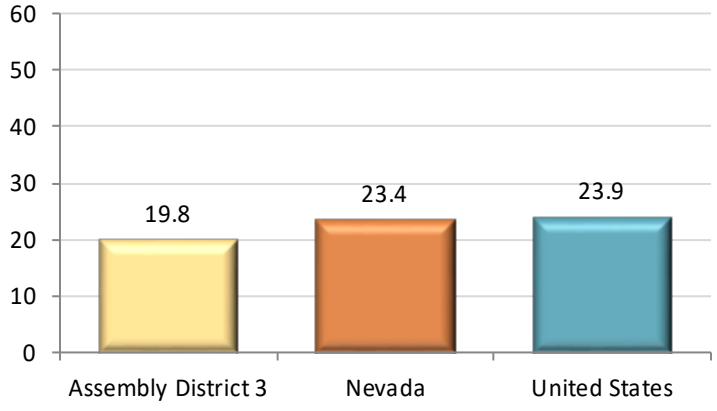
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

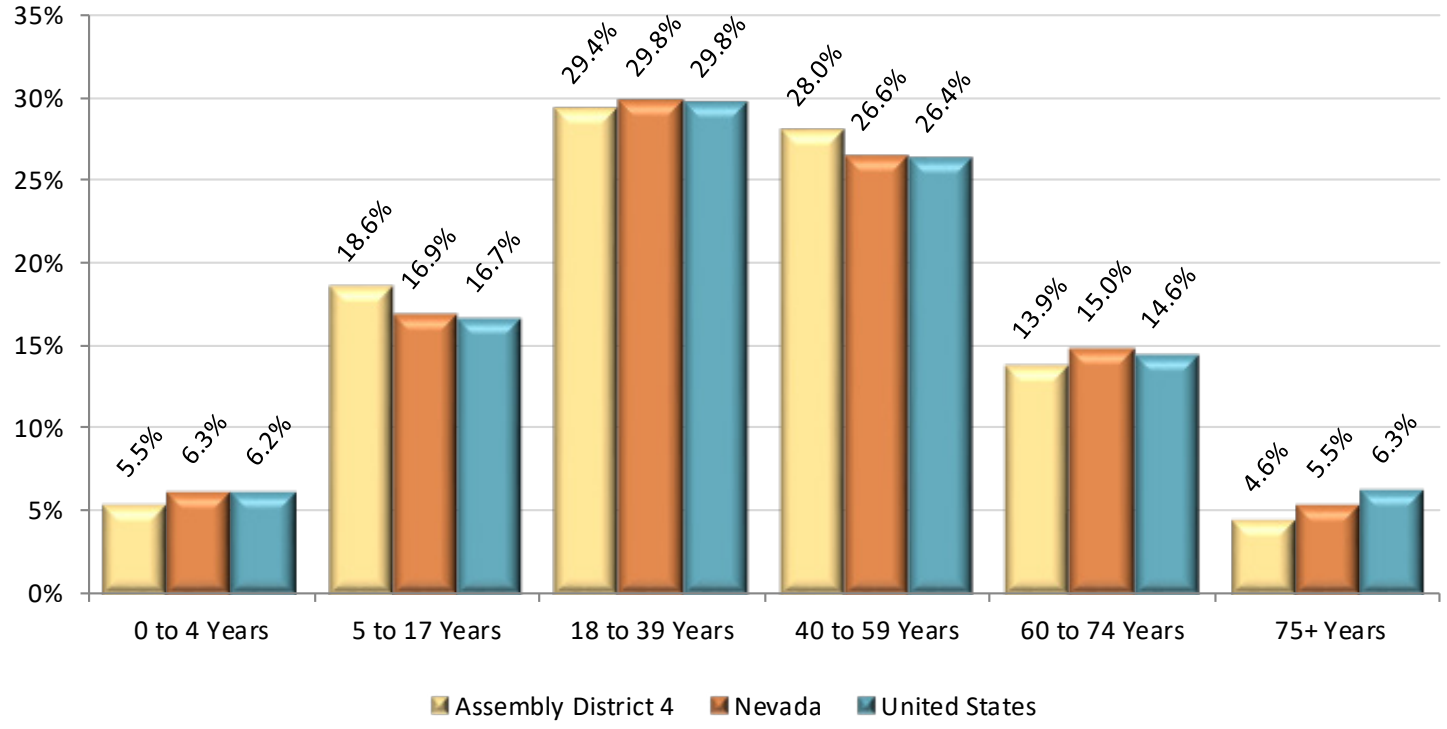
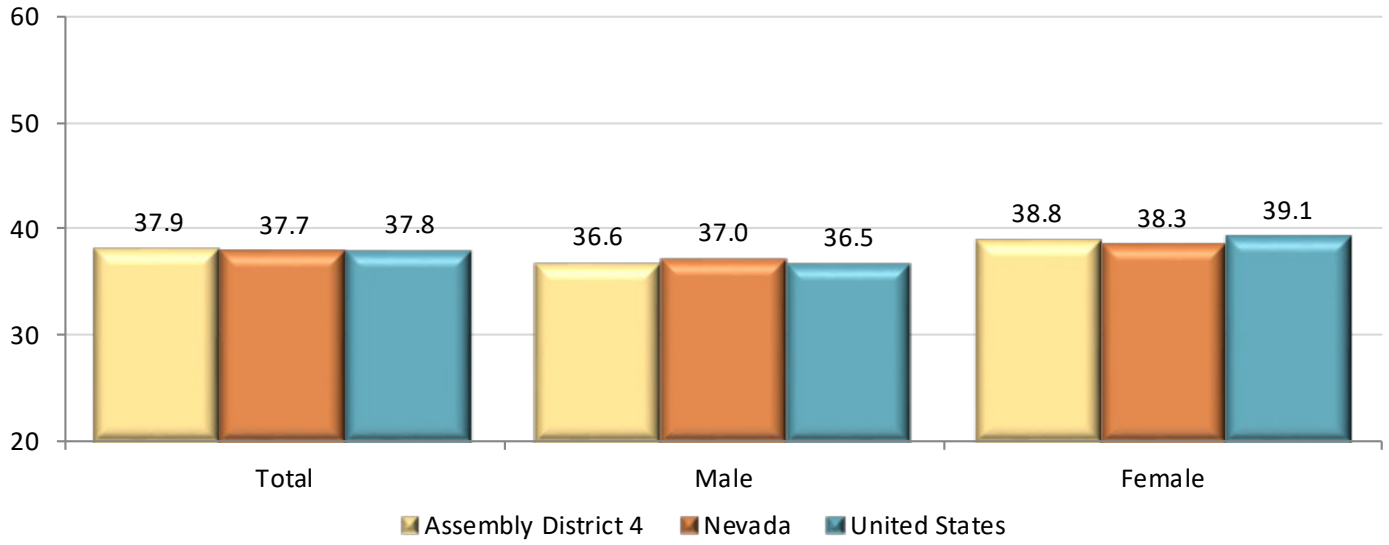
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



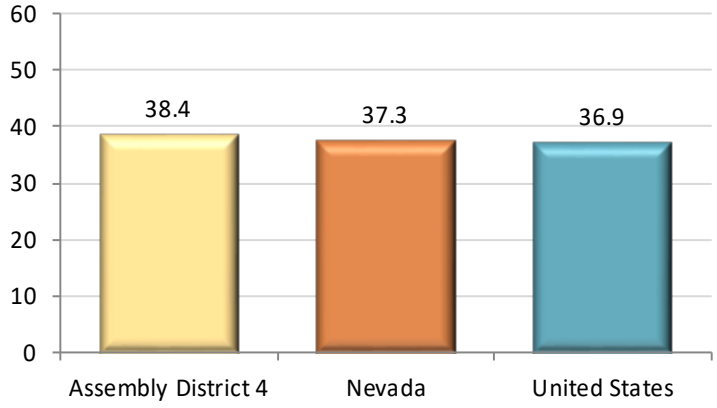
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



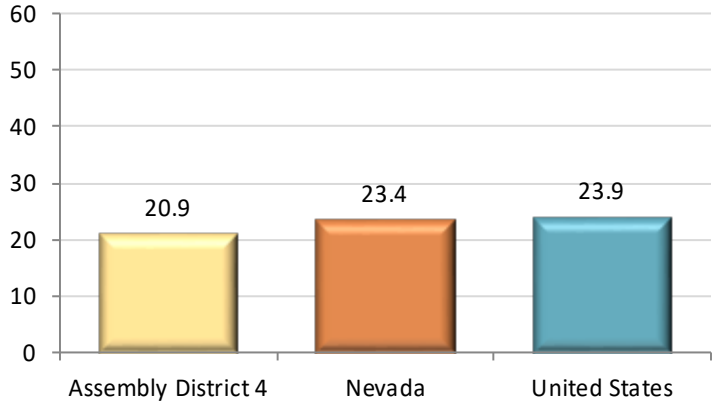
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

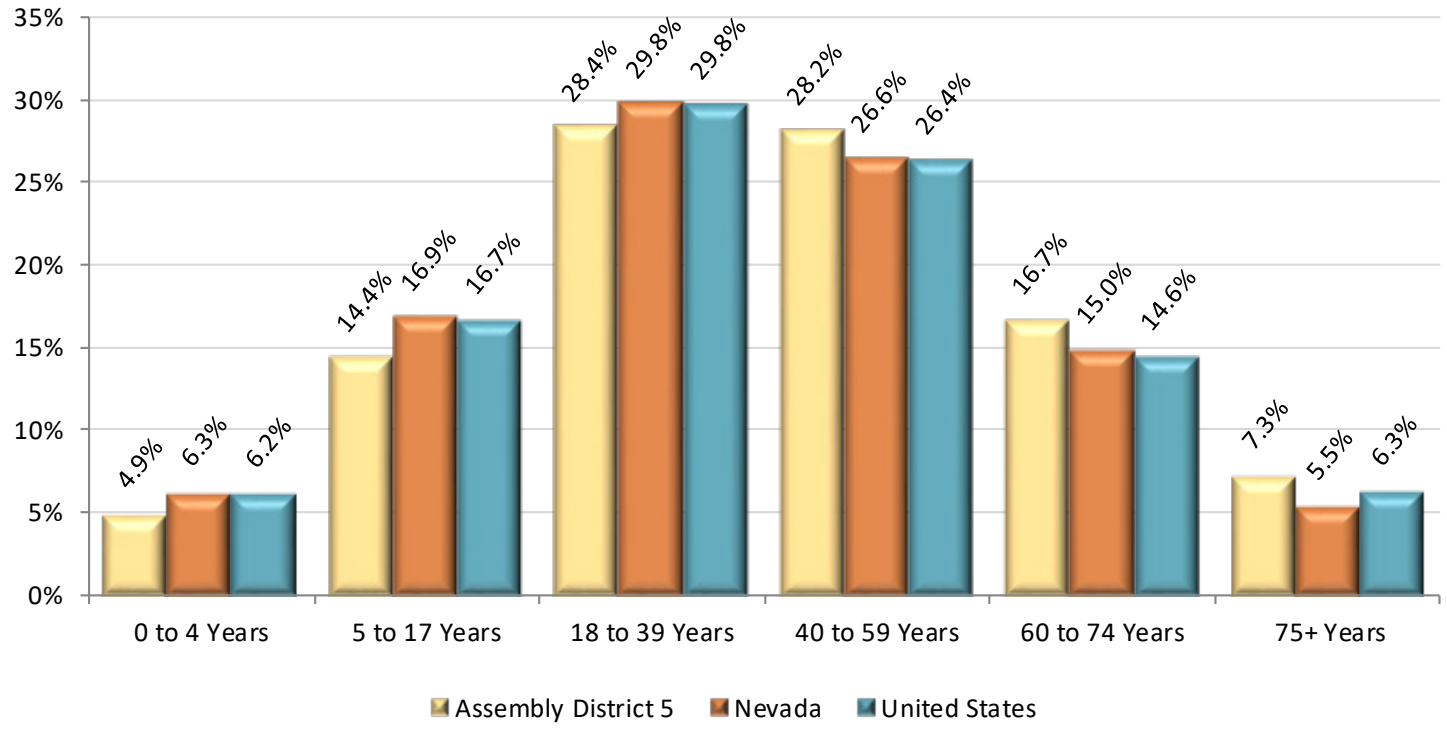
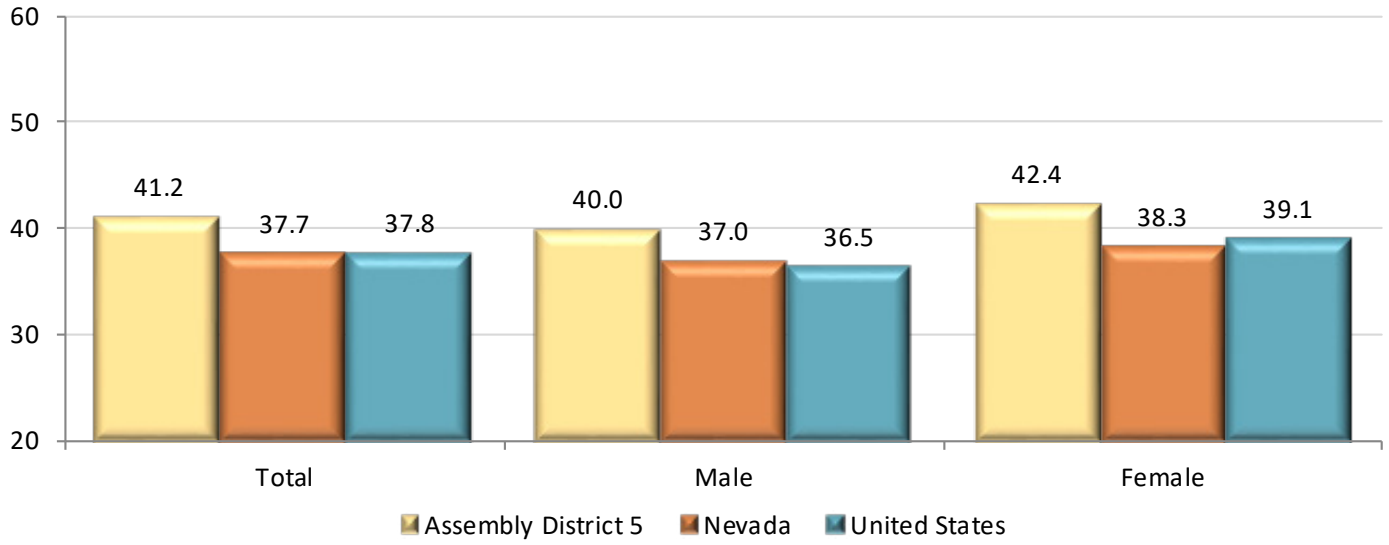
Chart 1—Population Distribution by Age



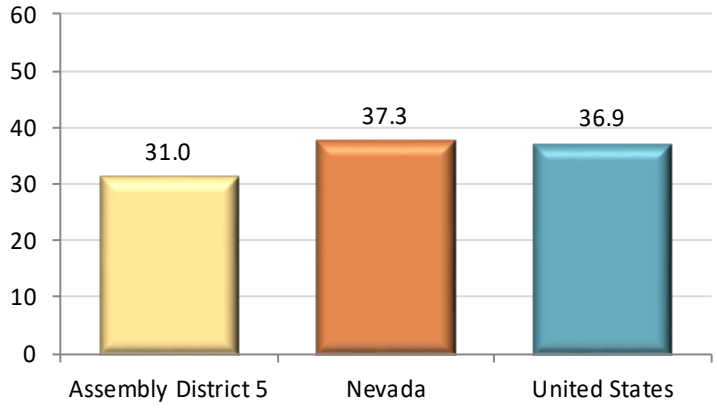
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



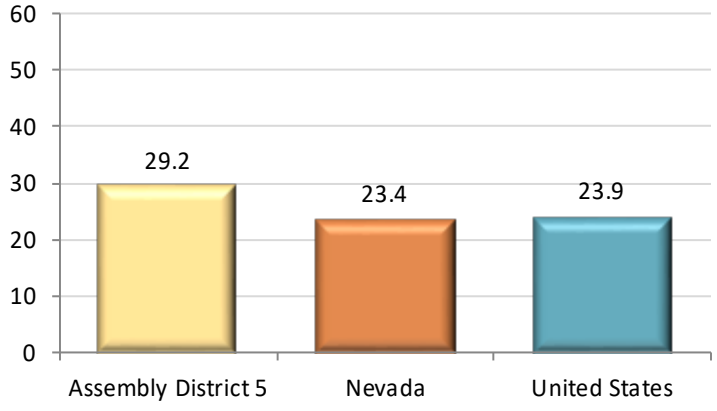
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

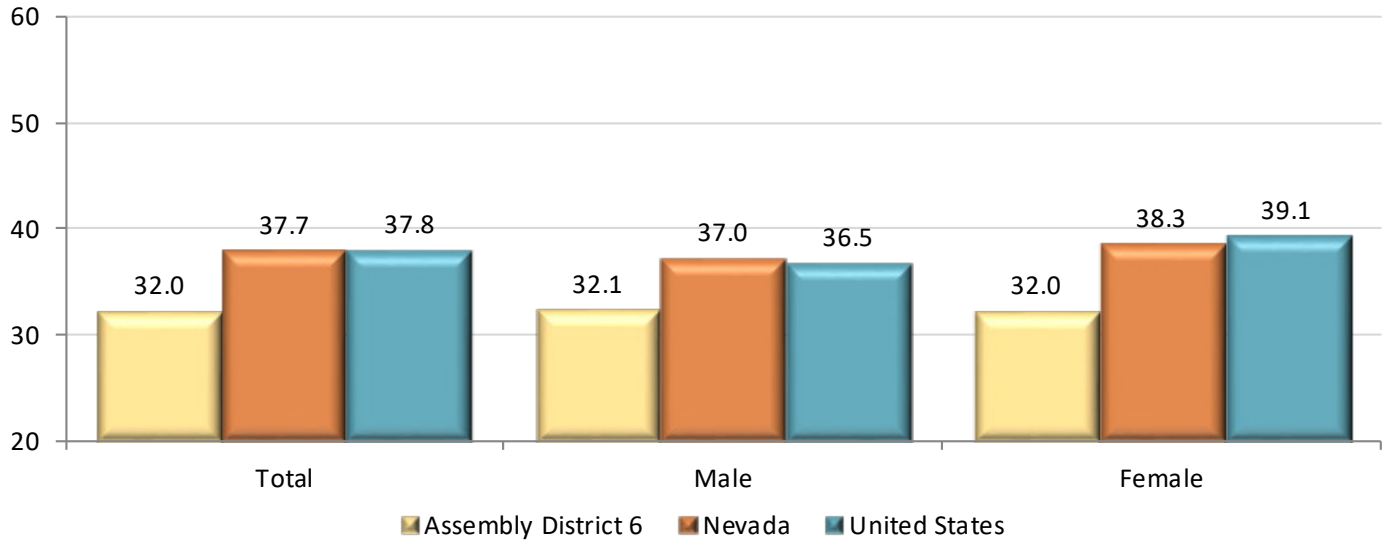
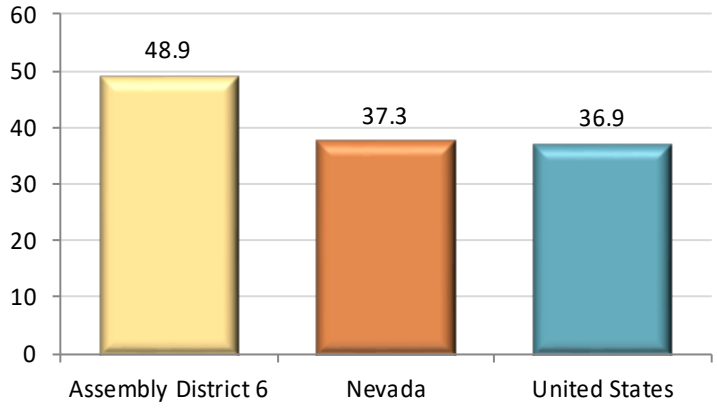
Chart 2—Median Age (in years)*



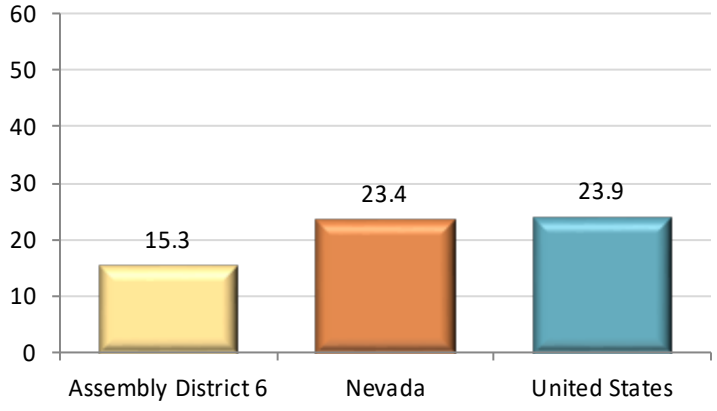
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

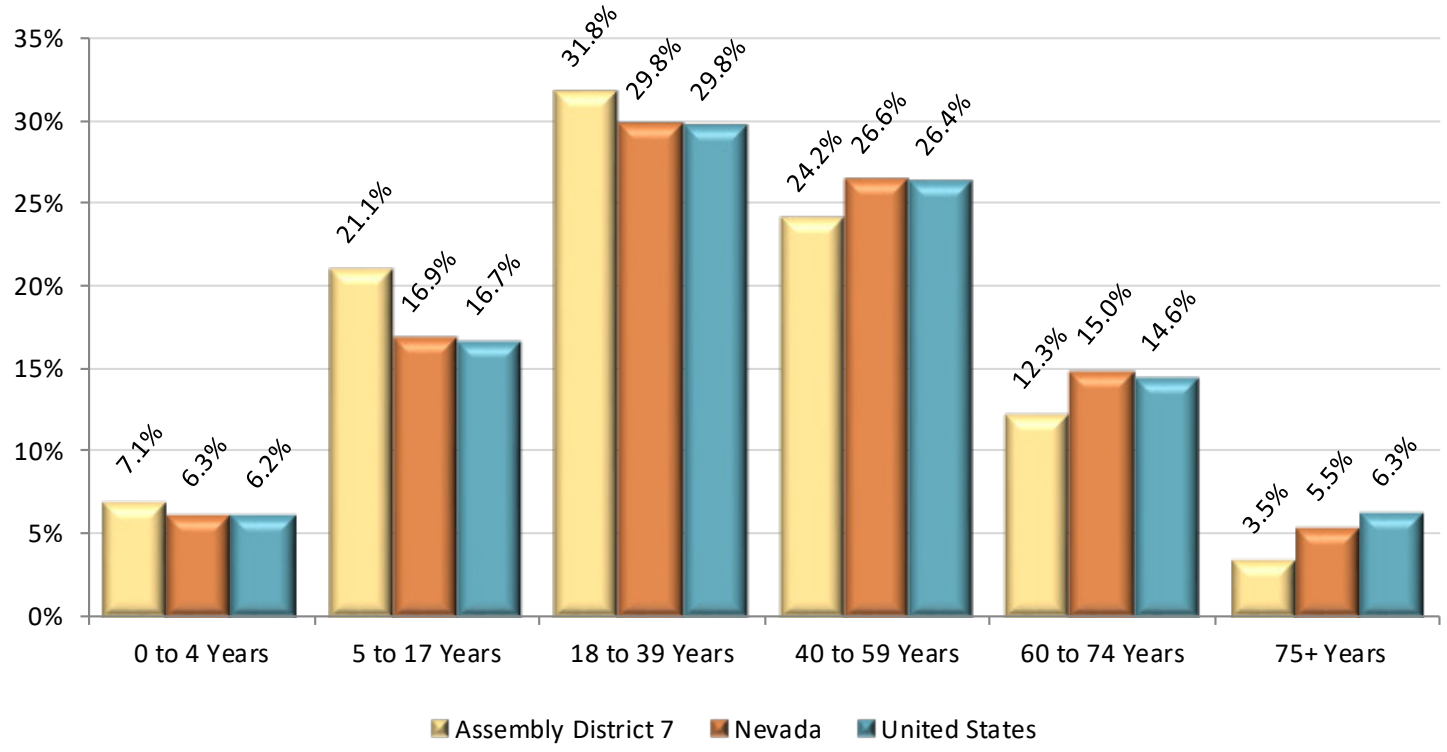
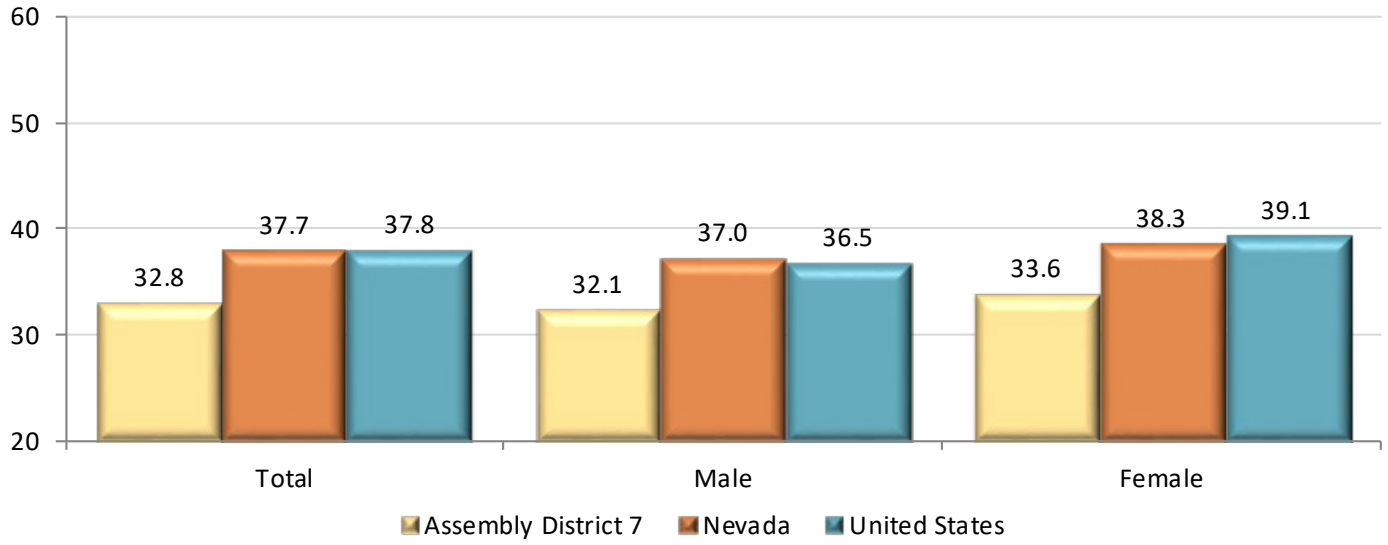
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



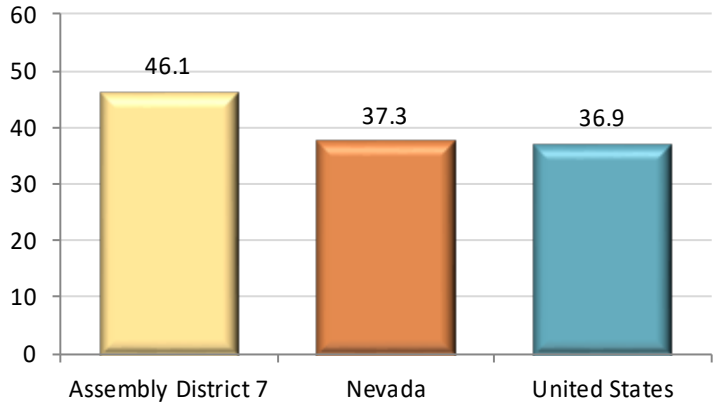
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



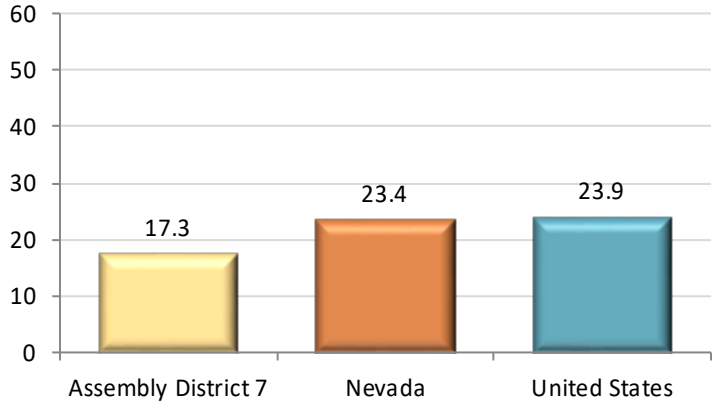
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

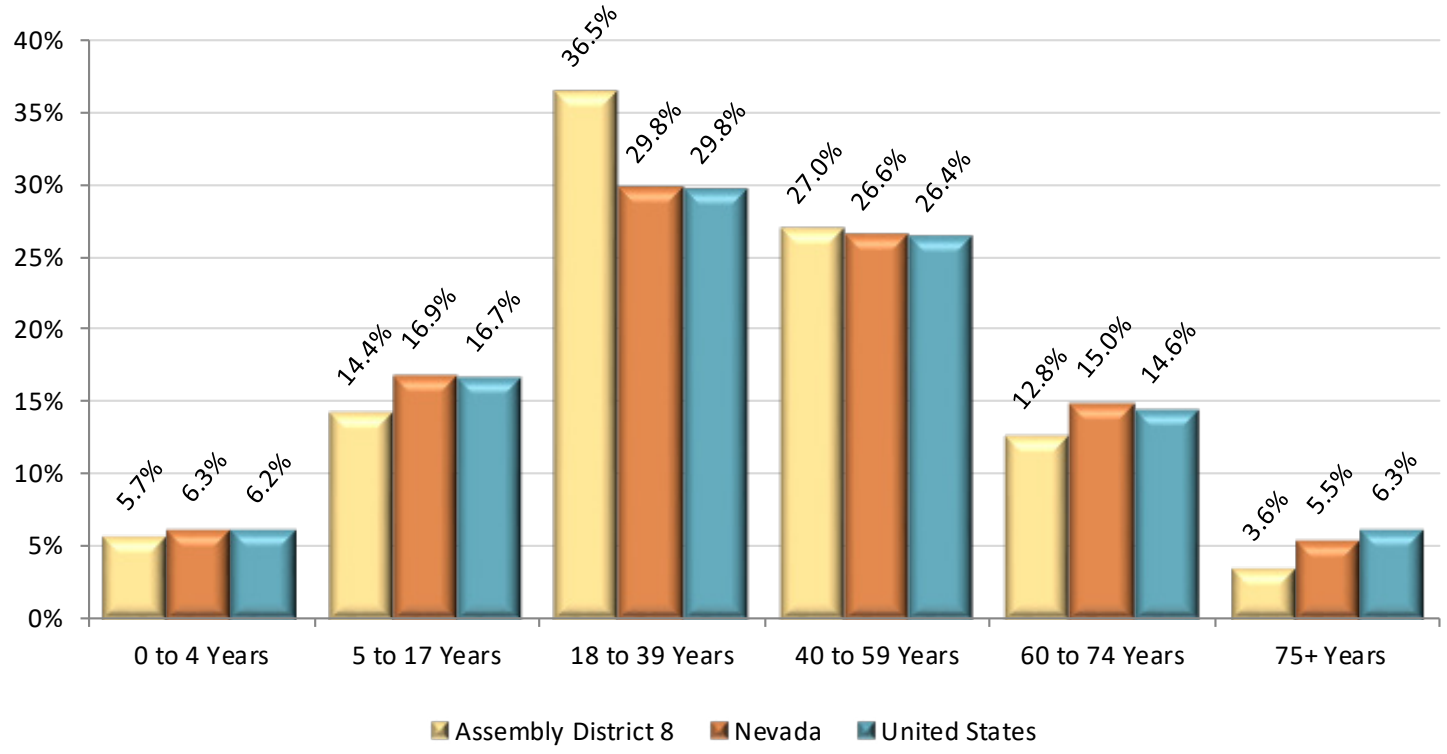
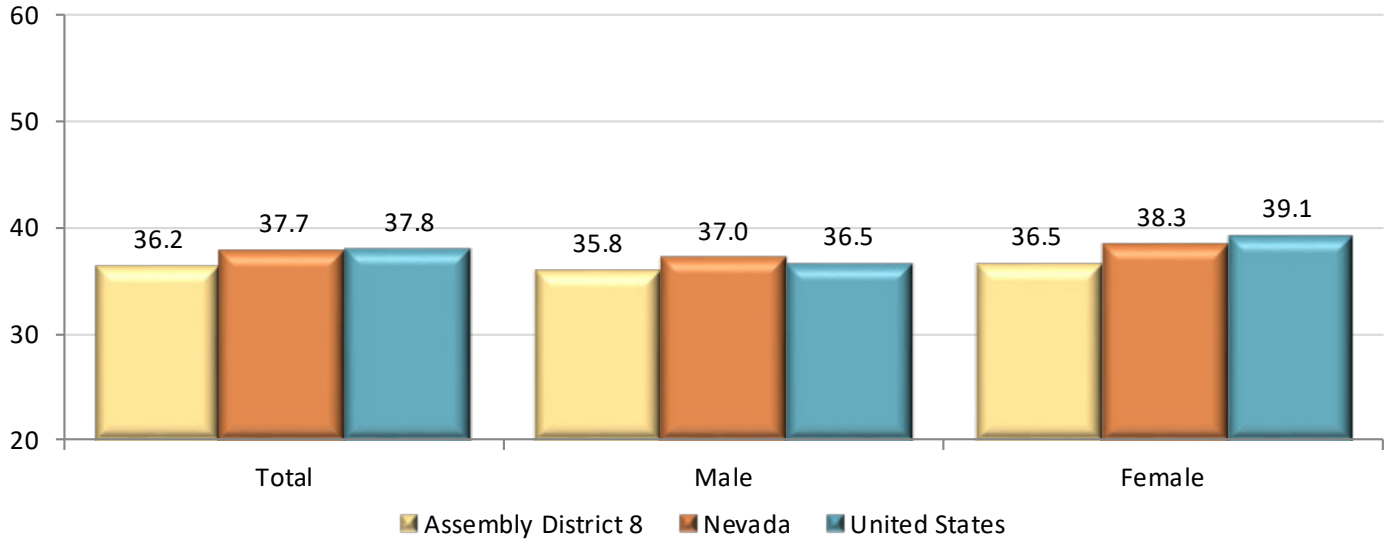
Chart 1—Population Distribution by Age



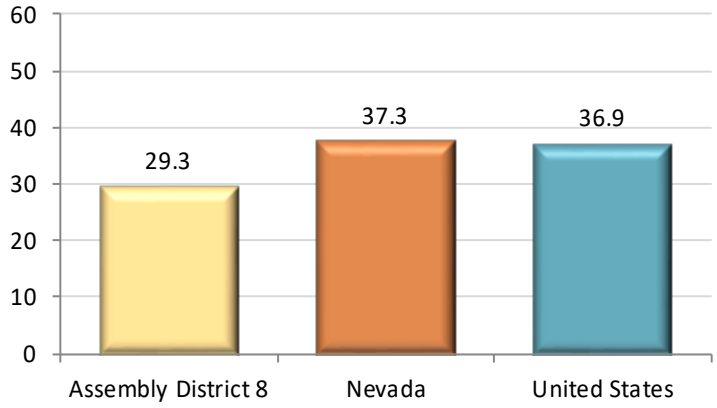
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



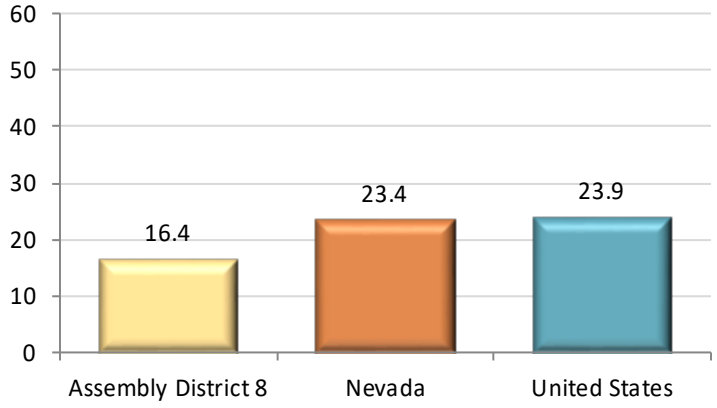
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 9

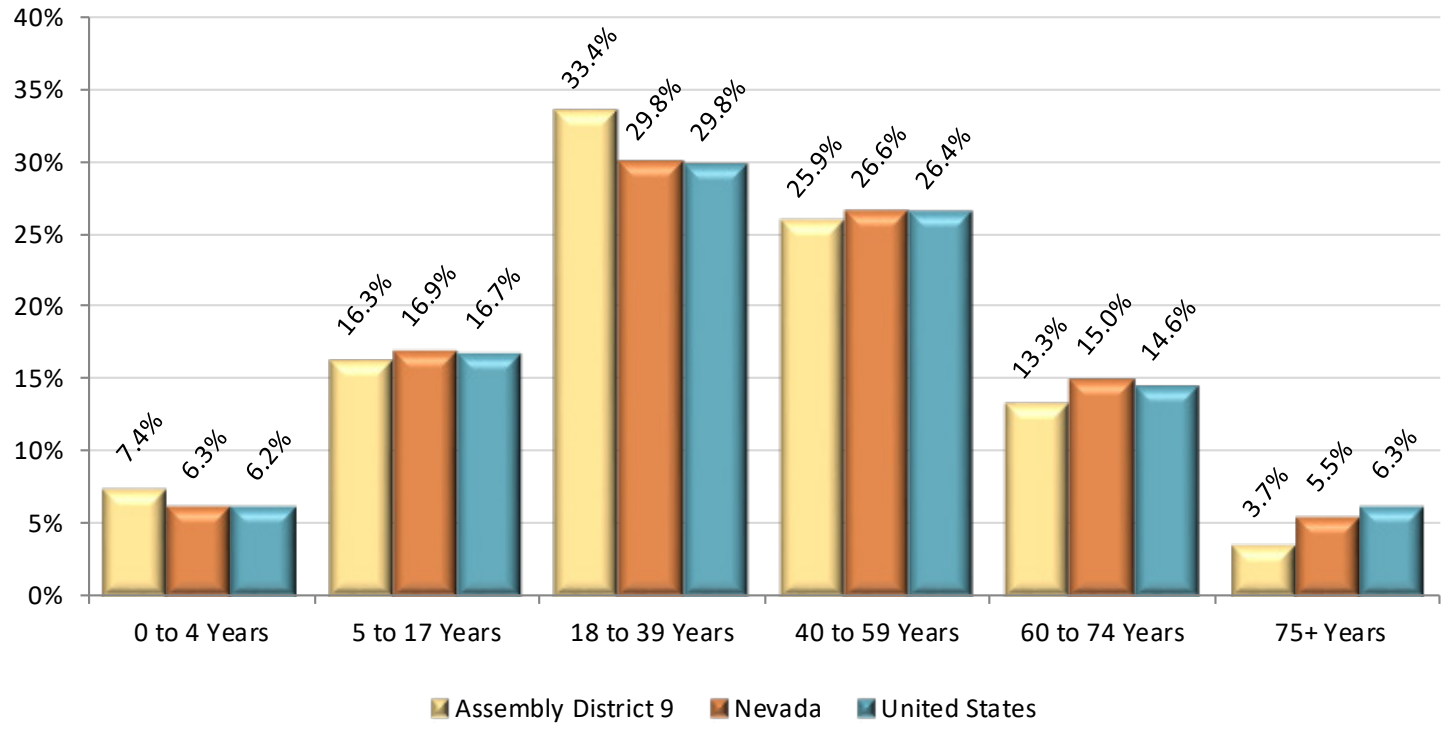
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 9	77,059	37,764	49.0%	39,295	51.0%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

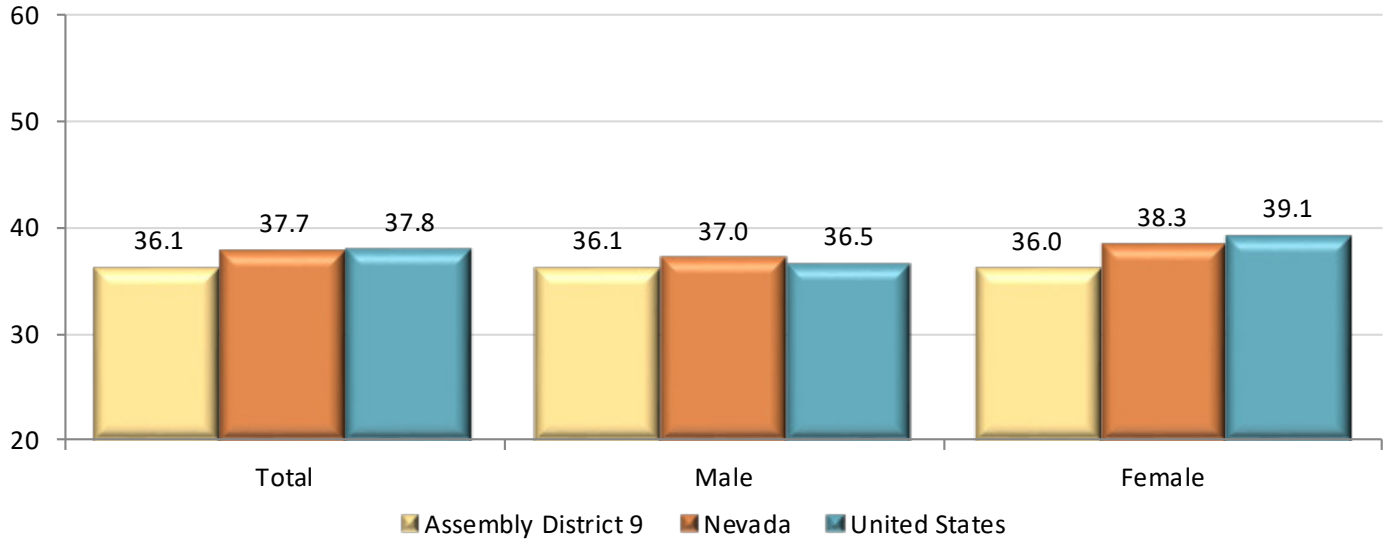
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 9	5,740	12,573	25,732	19,936	10,260	2,818
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



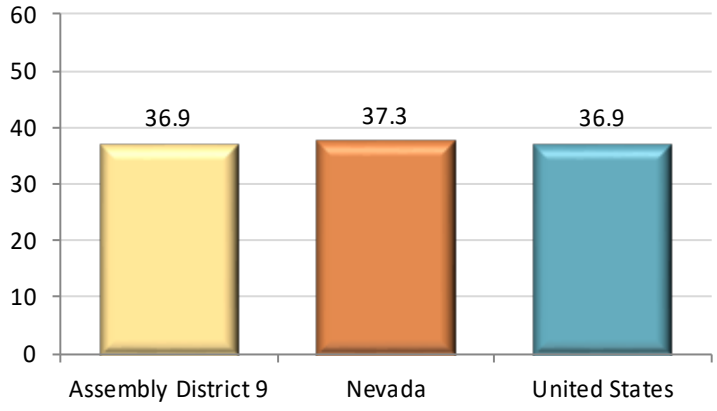
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



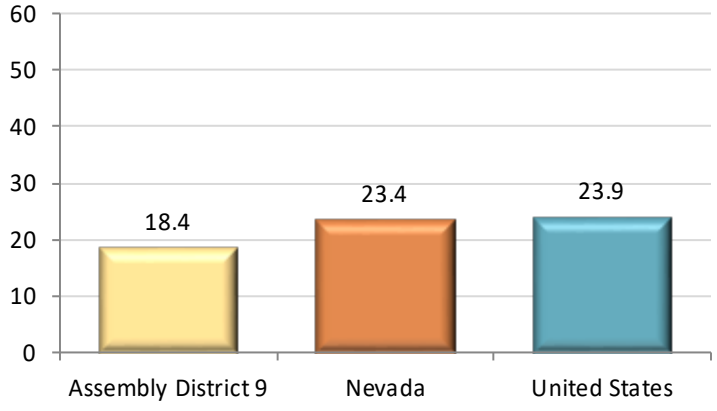
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

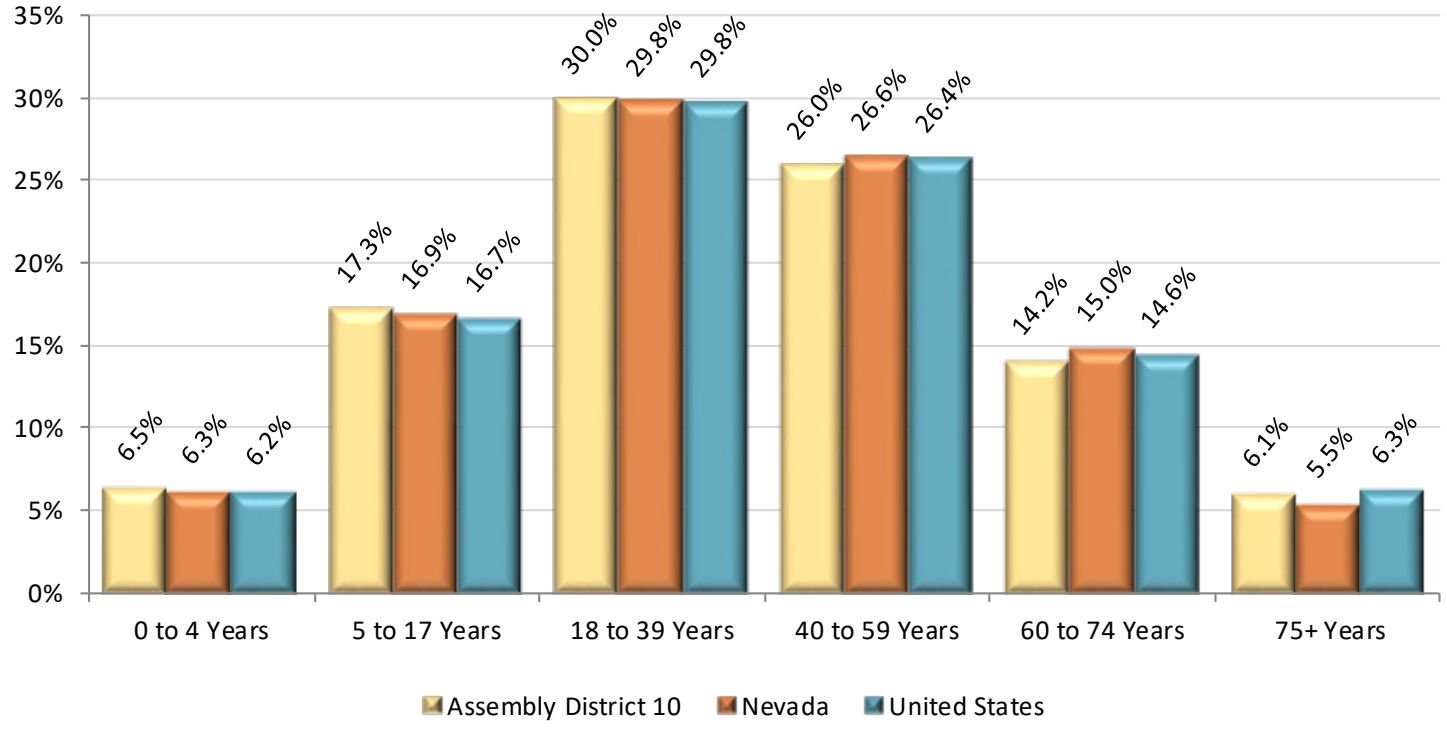
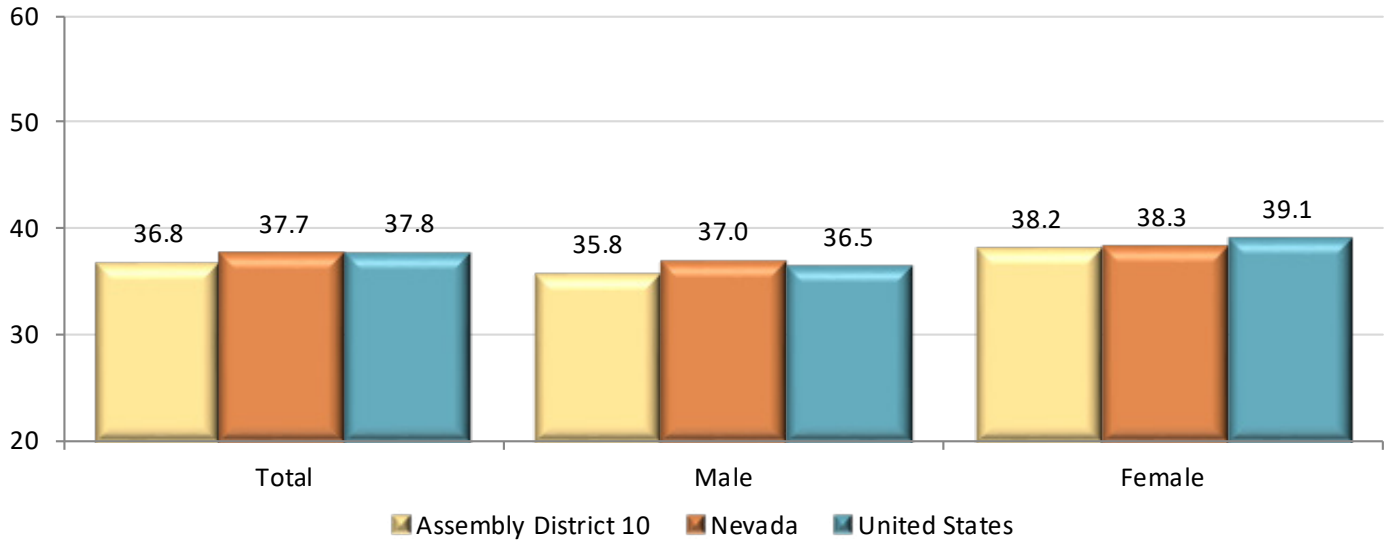
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



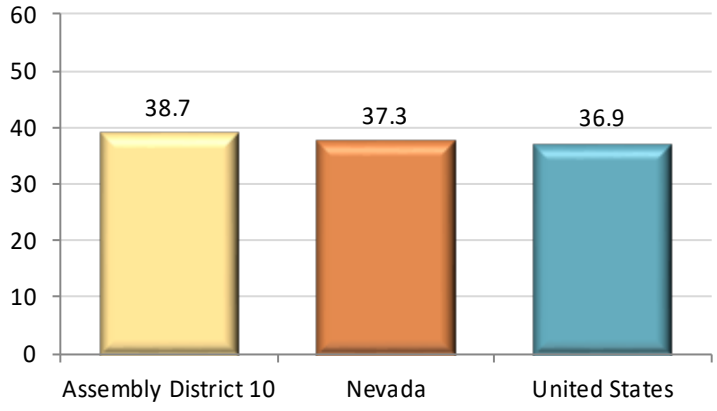
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



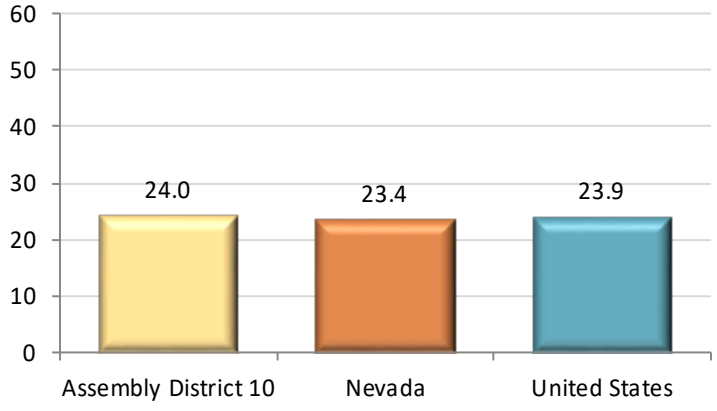
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

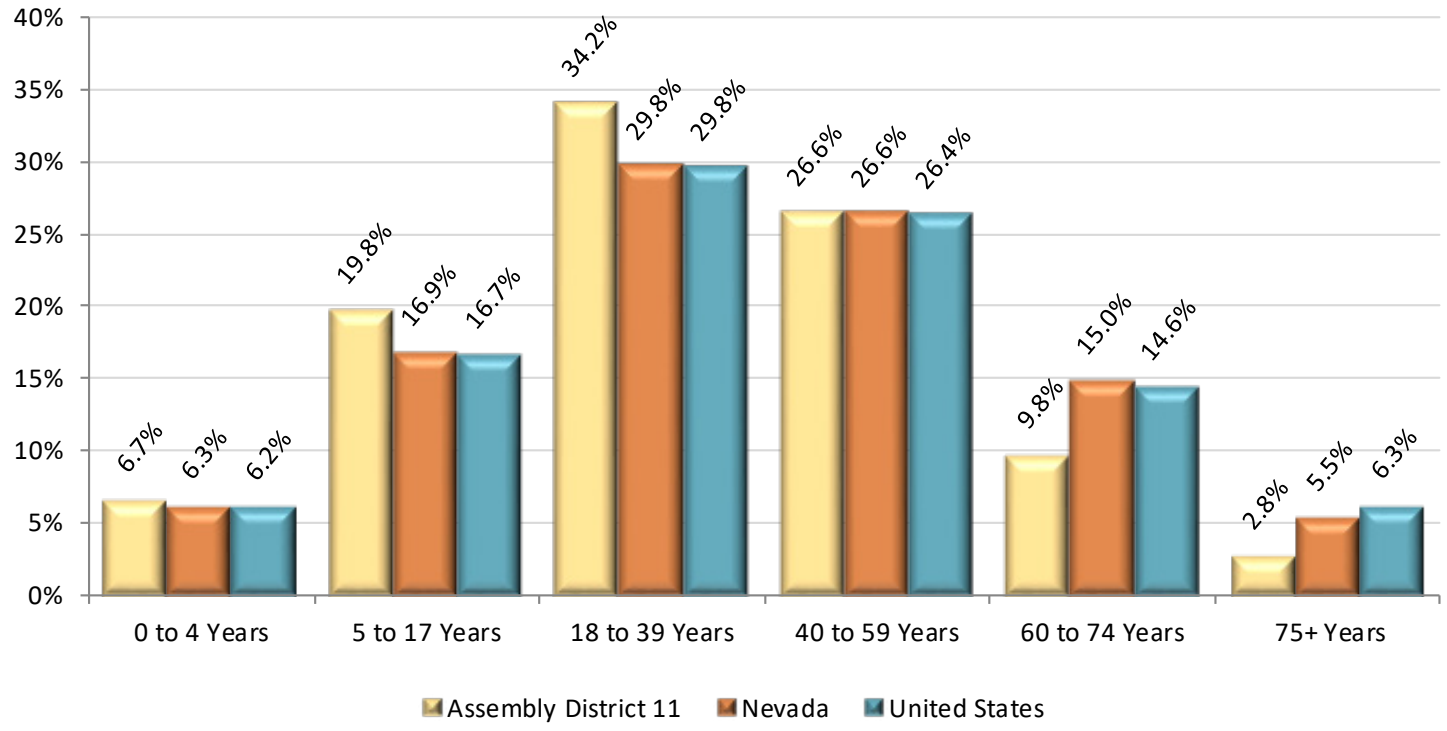
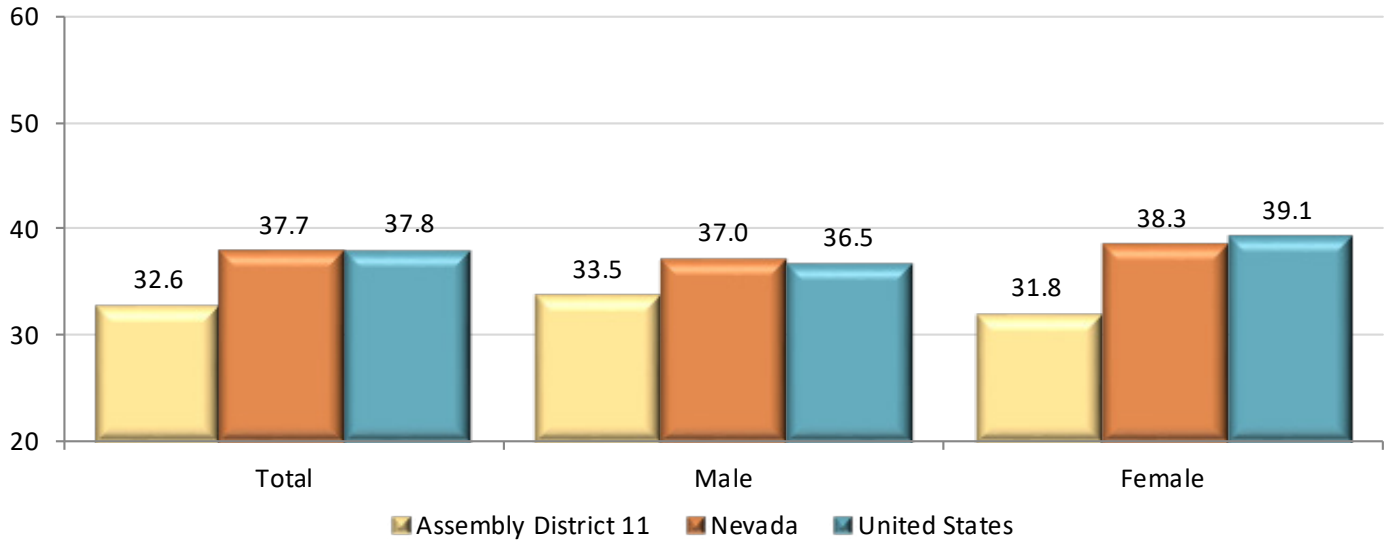
Chart 1—Population Distribution by Age



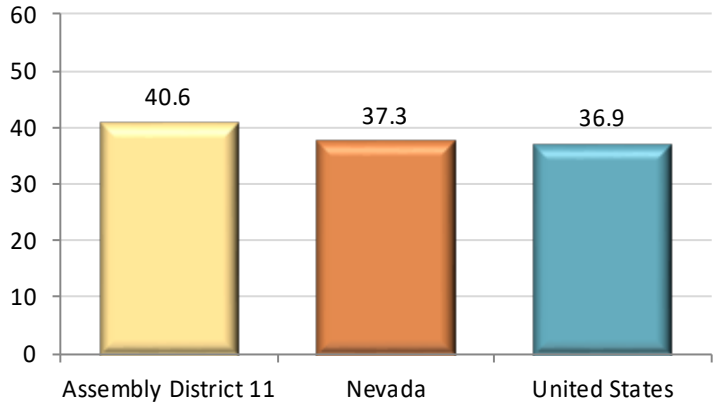
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



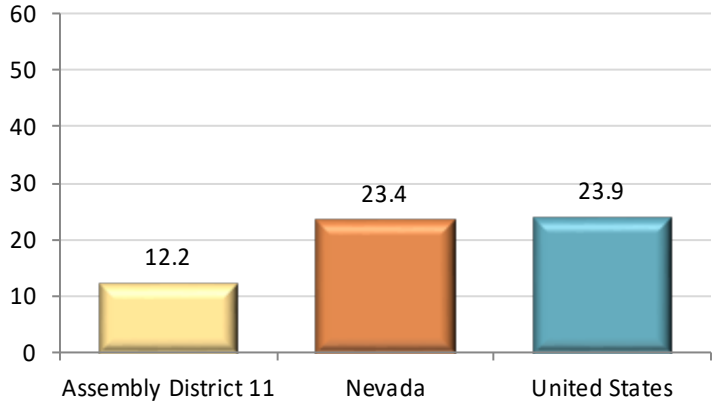
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

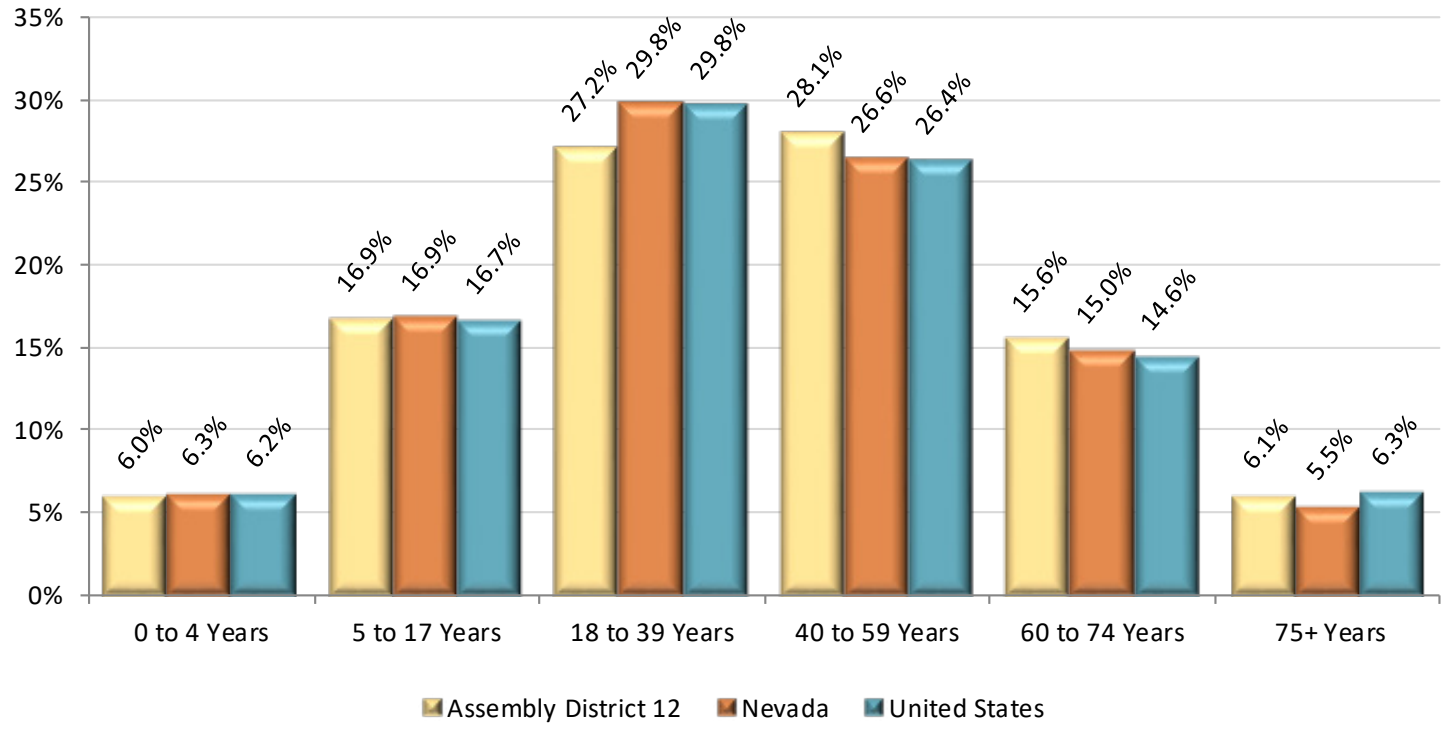
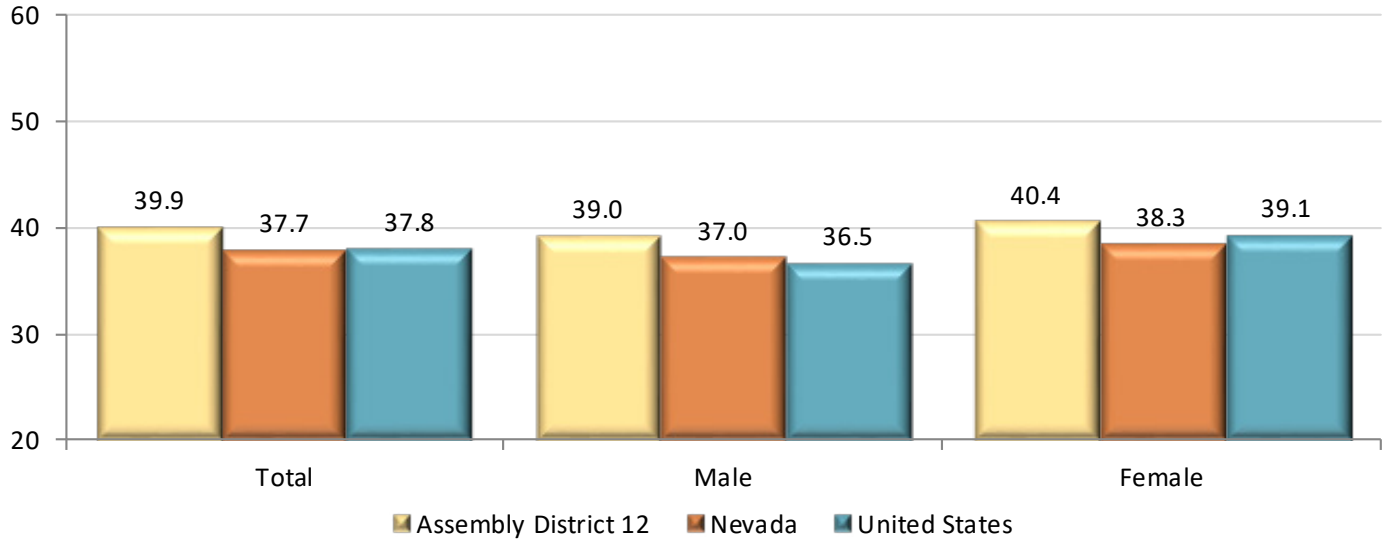
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



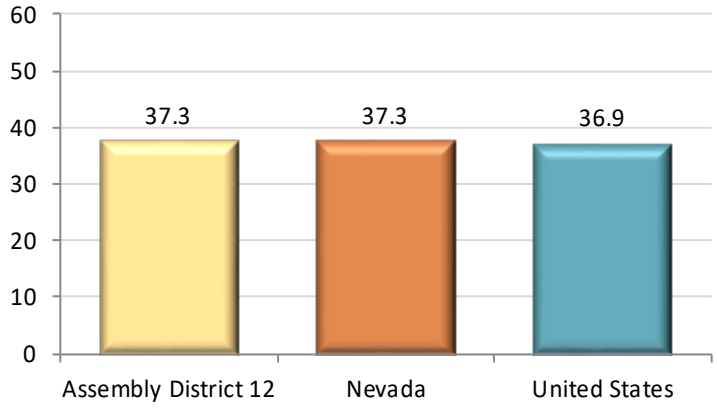
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



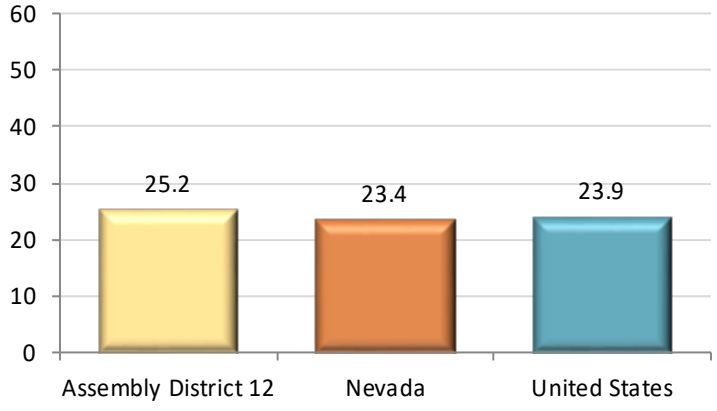
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

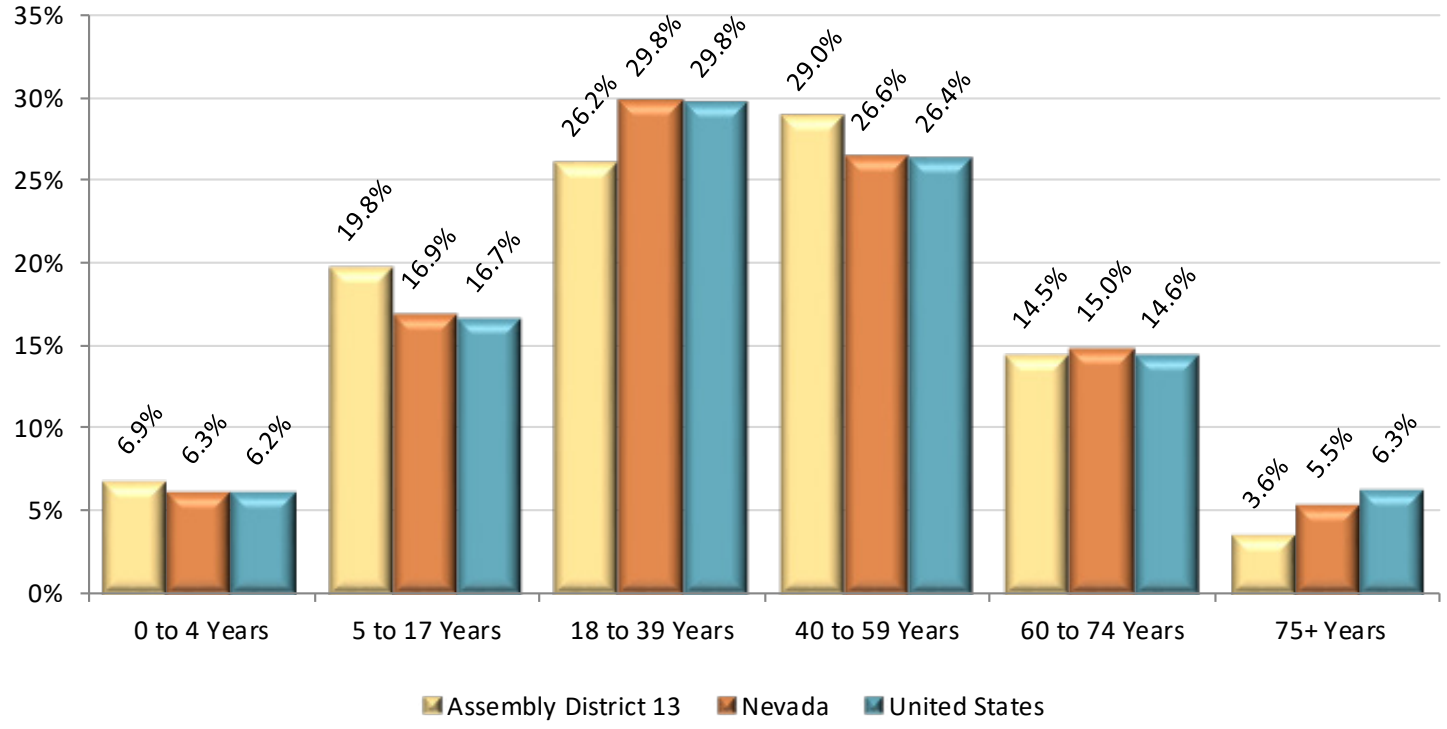
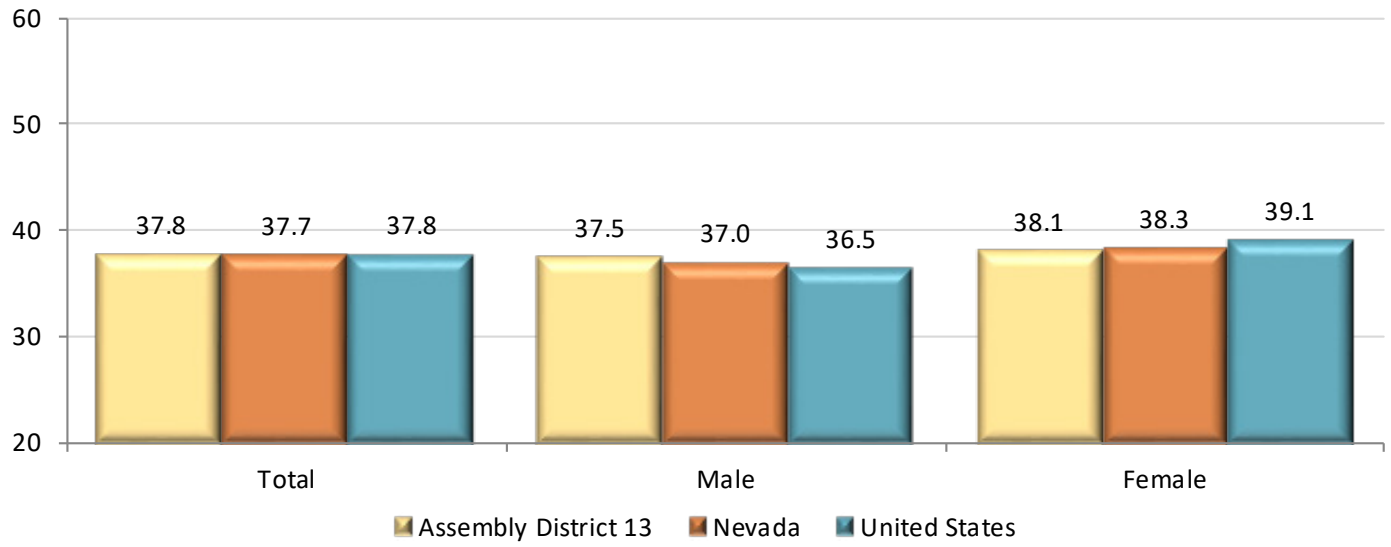
Chart 1—Population Distribution by Age



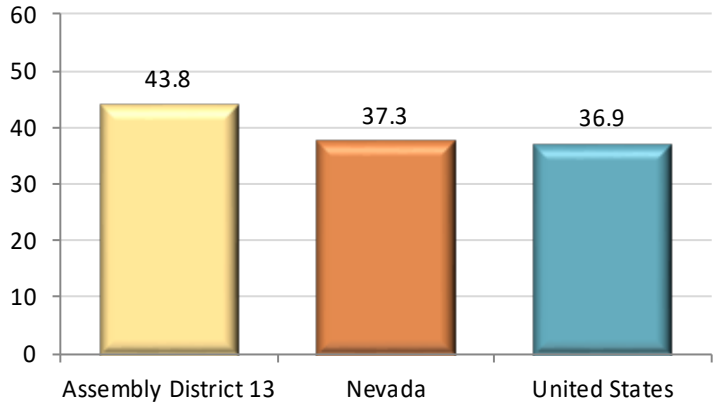
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



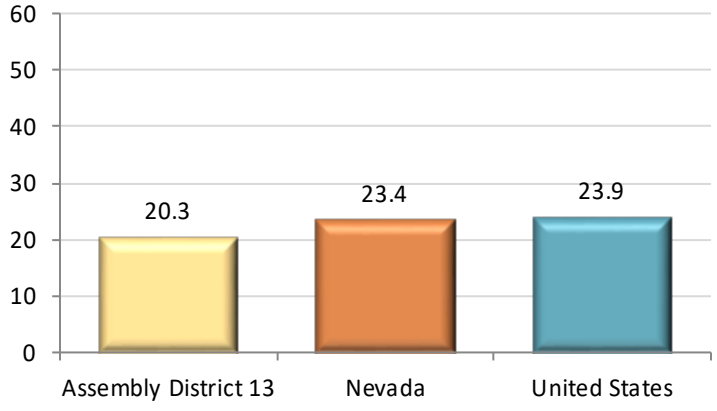
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

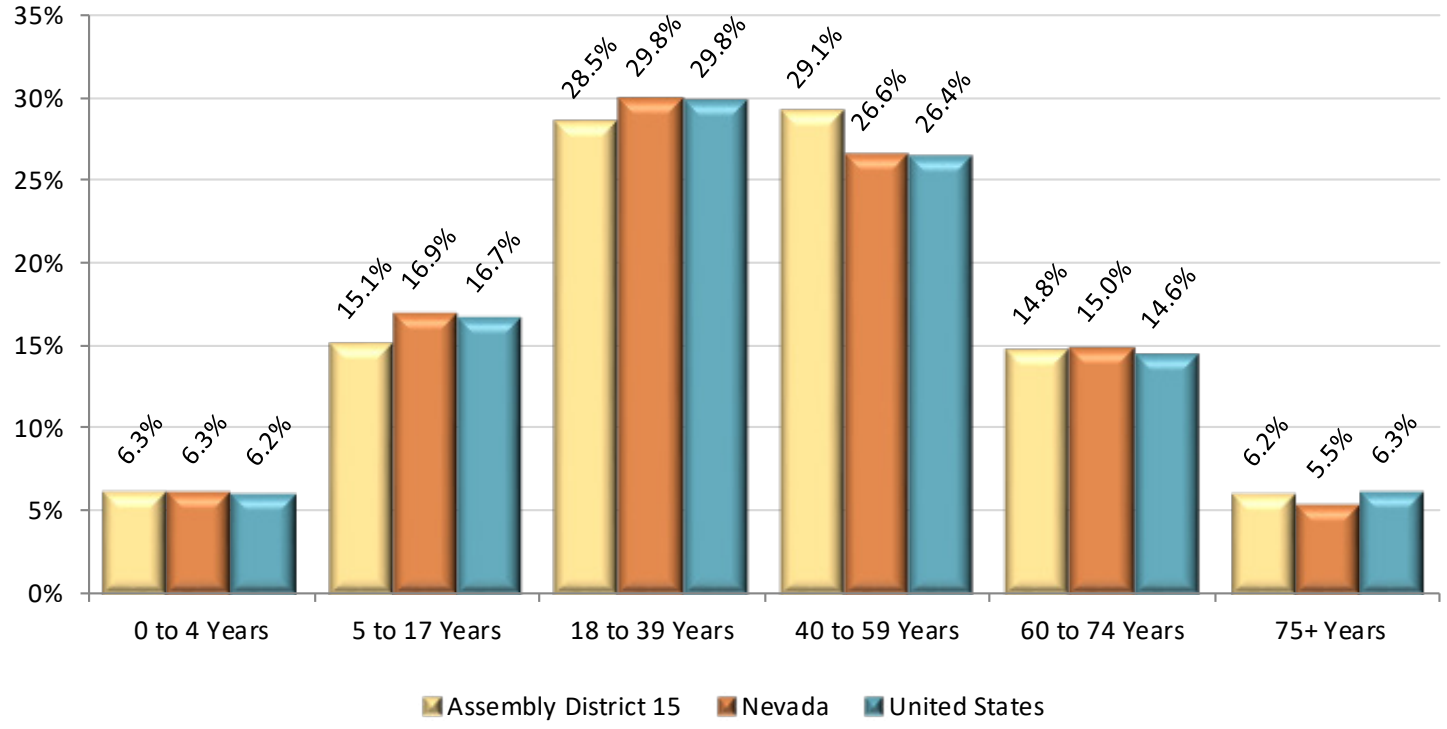
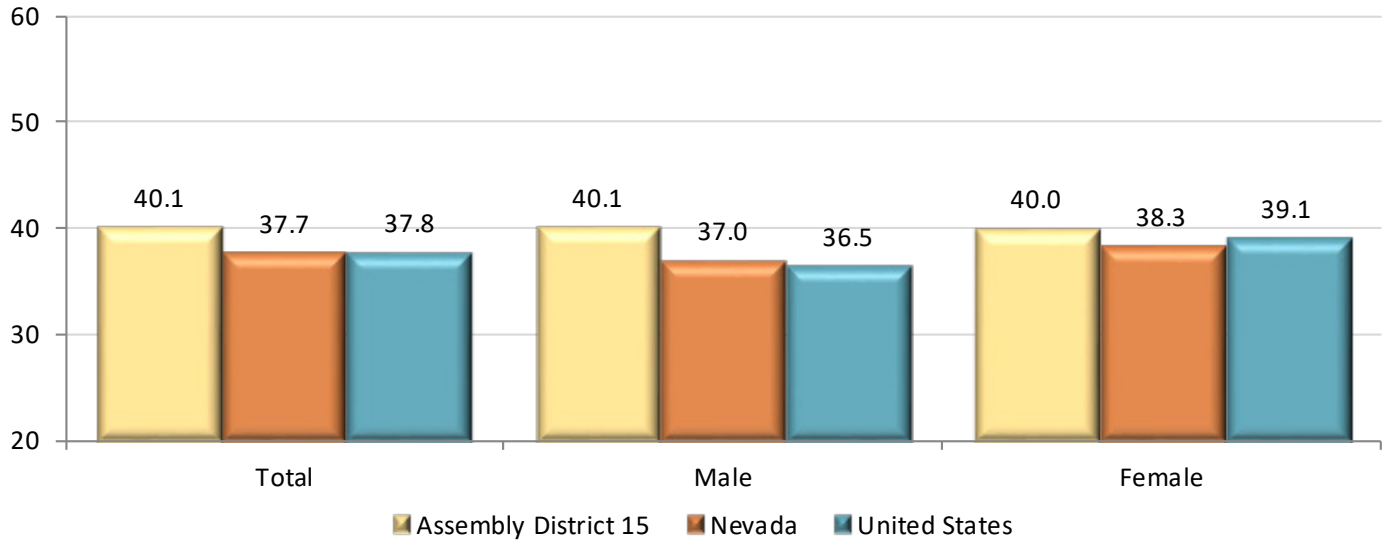
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



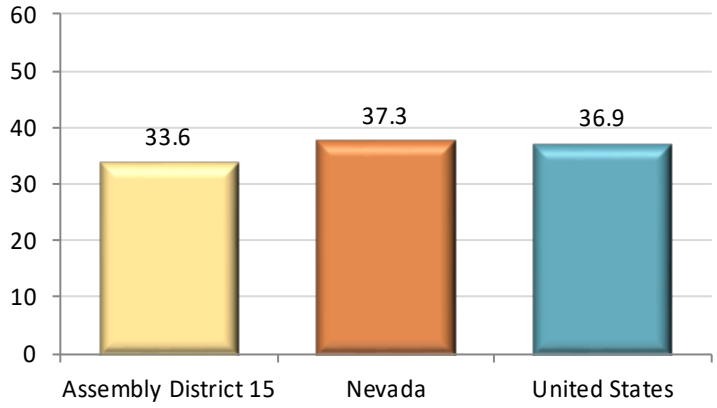
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



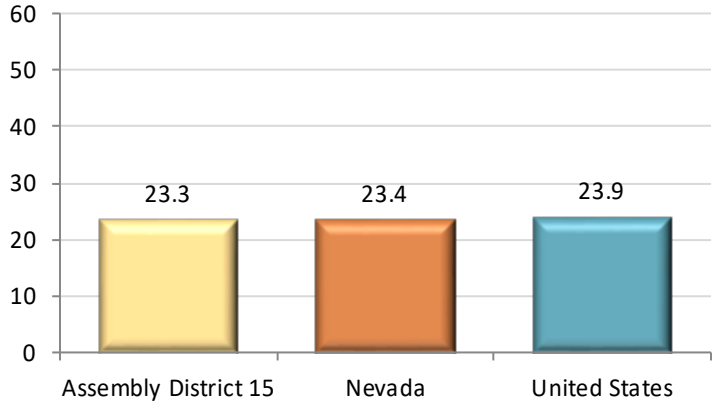
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

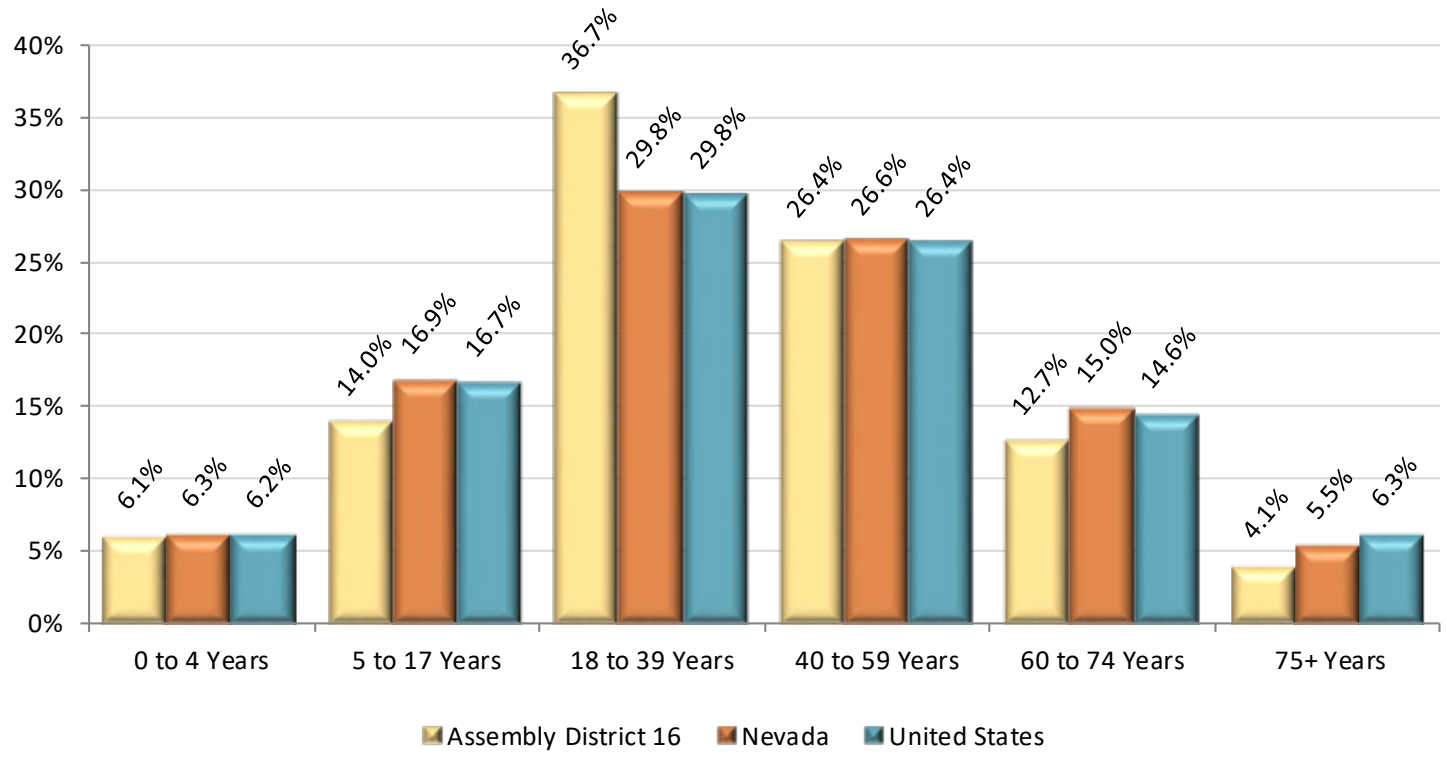
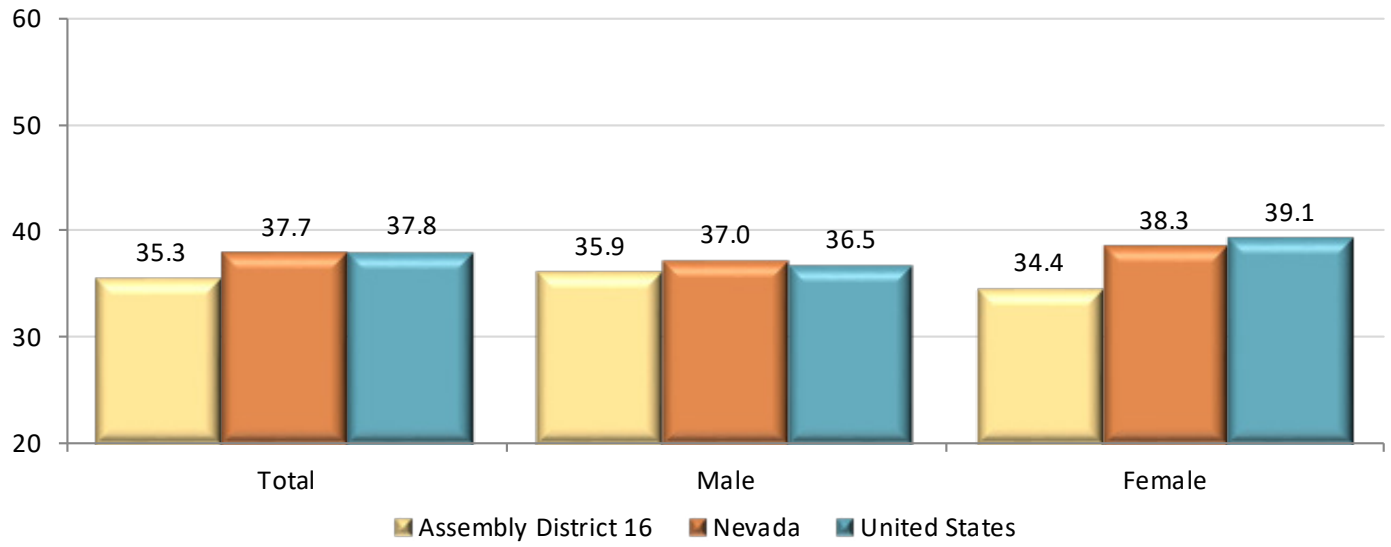
Chart 1—Population Distribution by Age



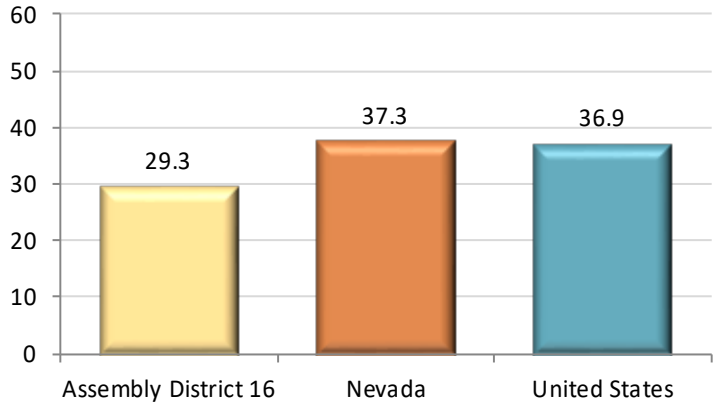
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



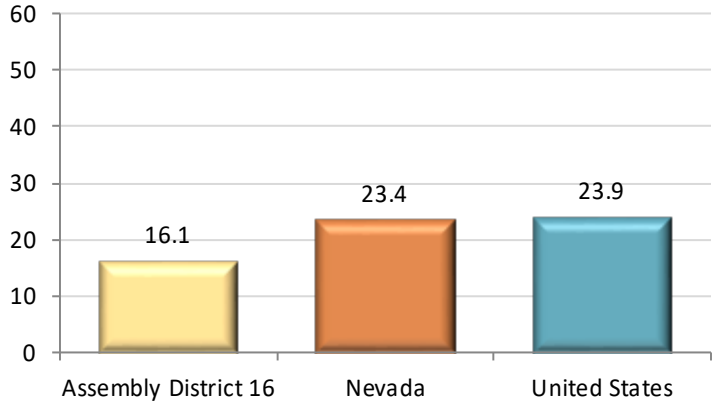
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 17

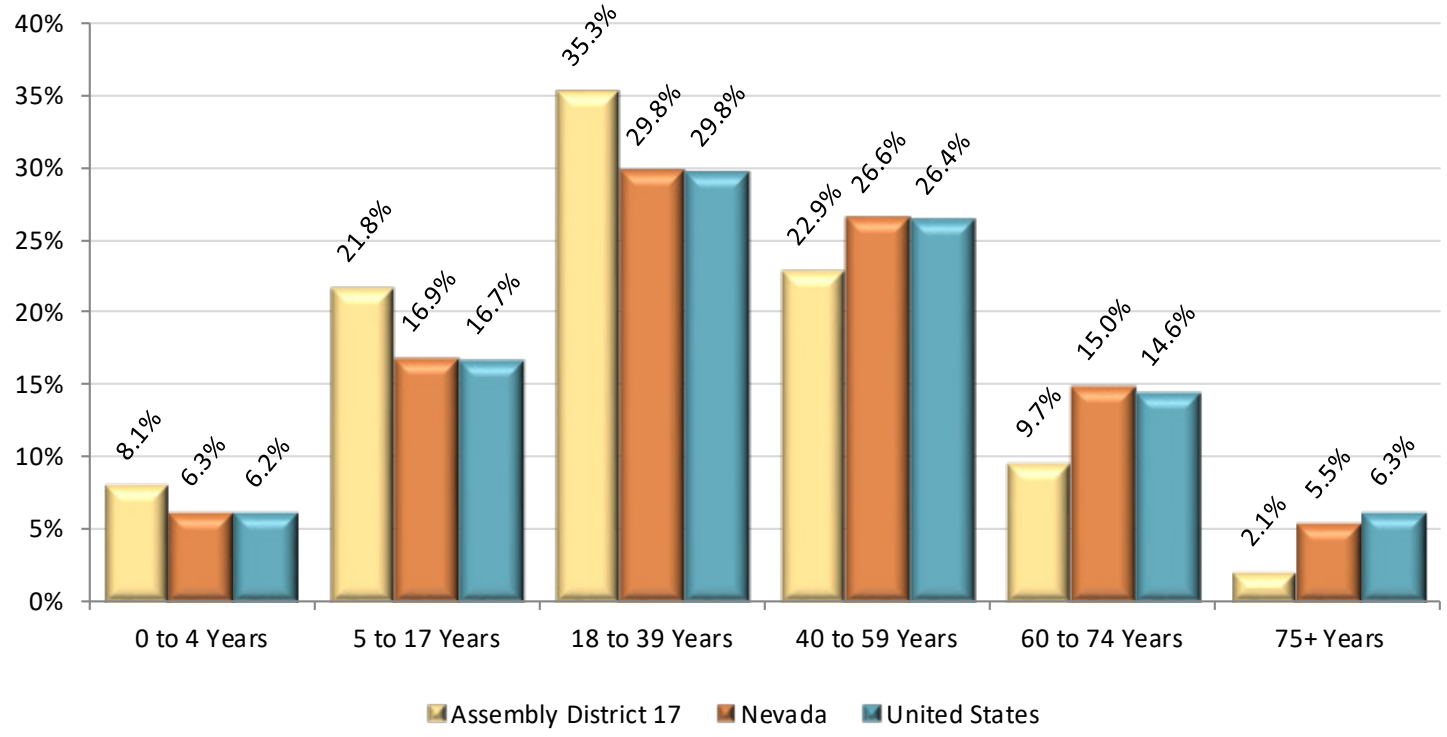
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 17	75,219	37,313	49.6%	37,906	50.4%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

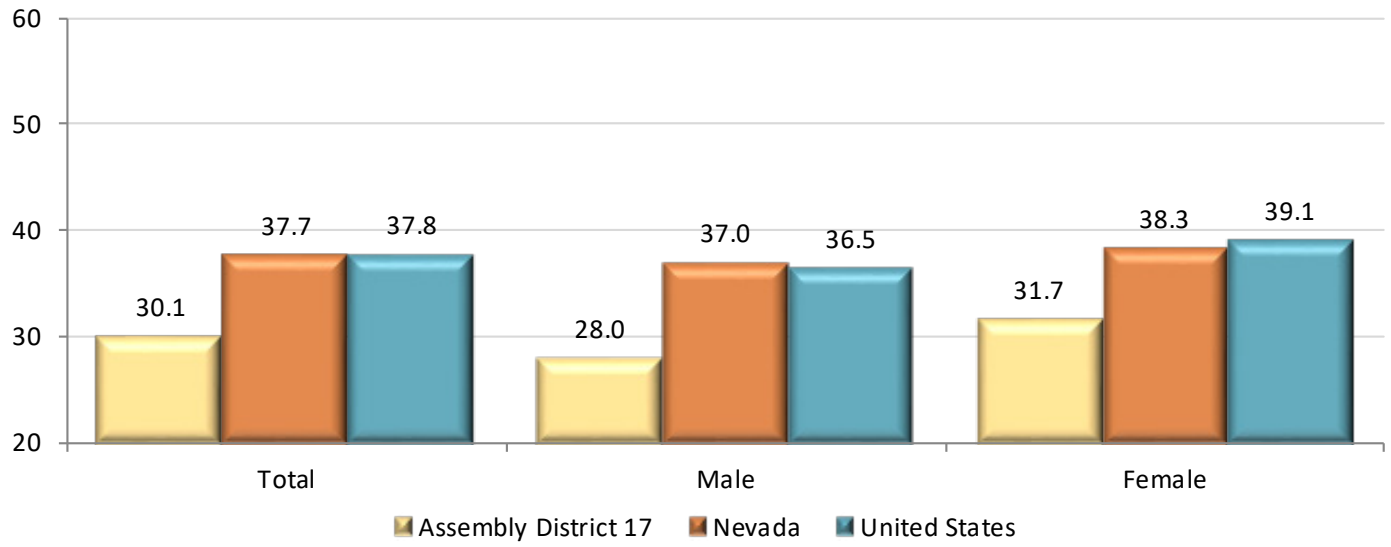
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 17	6,093	16,388	26,582	17,250	7,291	1,615
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



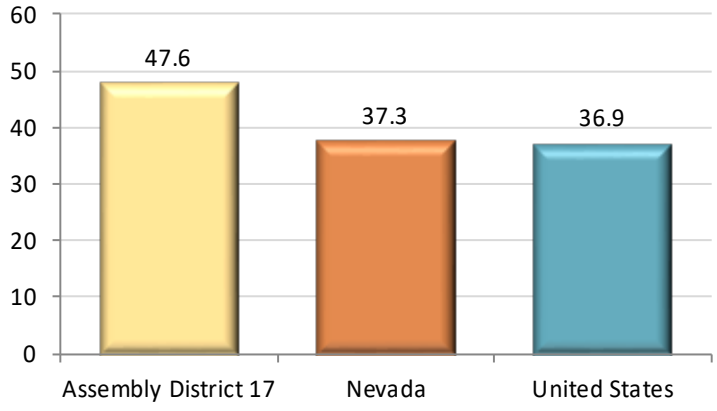
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



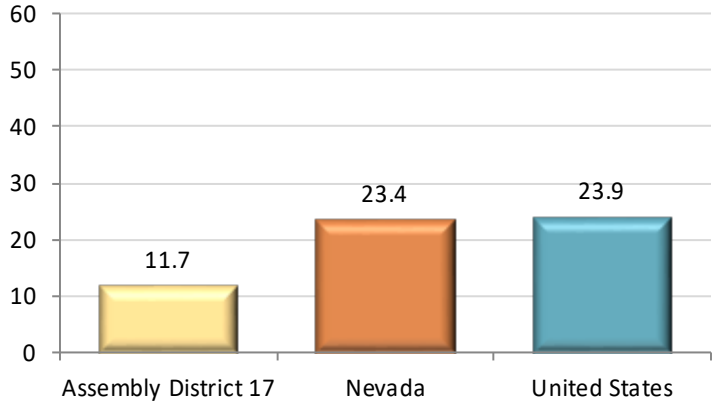
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

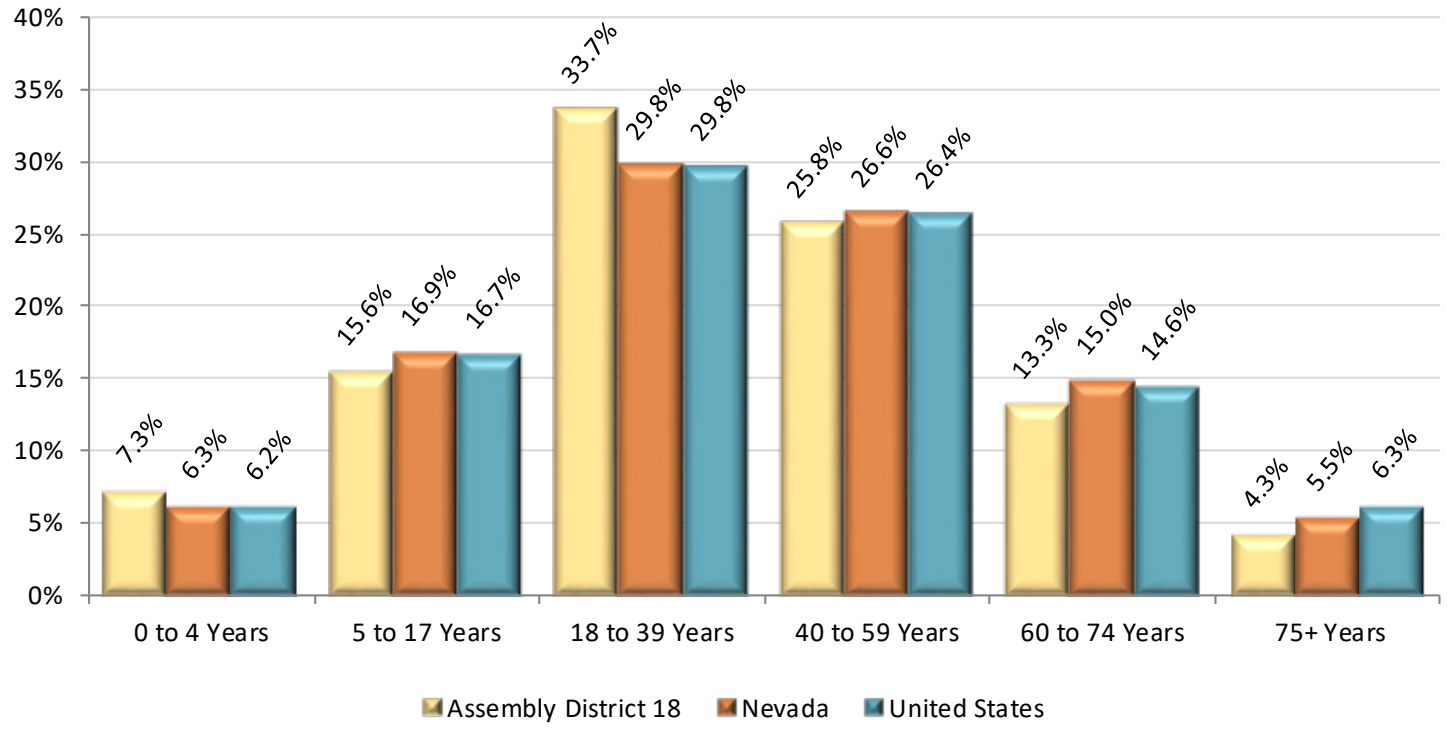
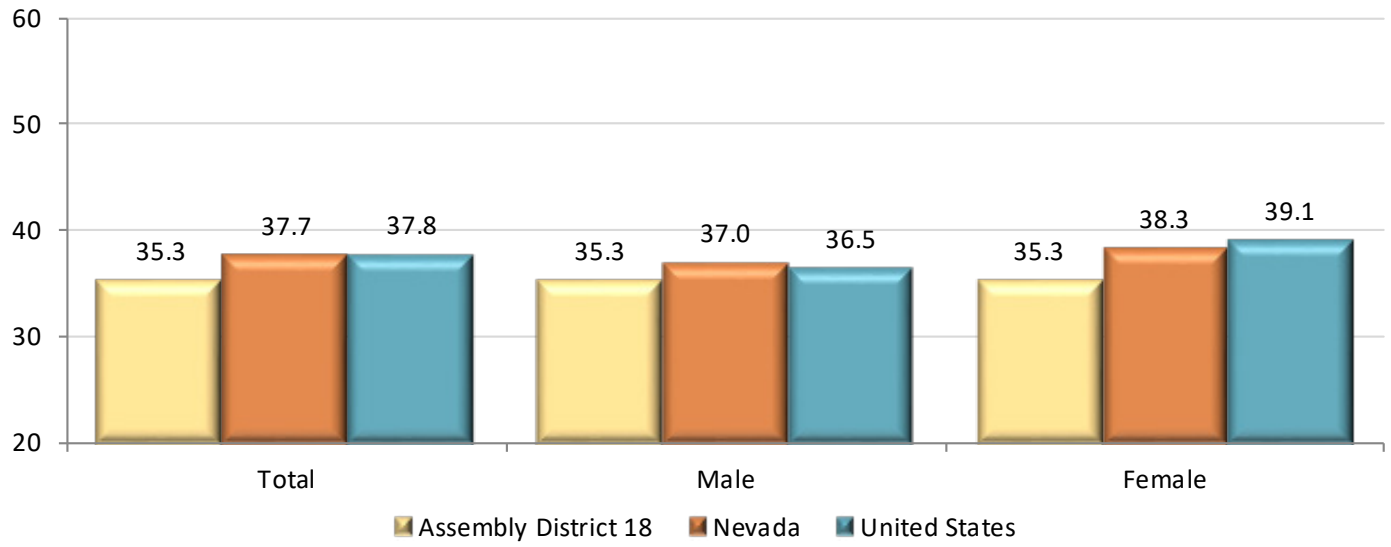
Chart 1—Population Distribution by Age



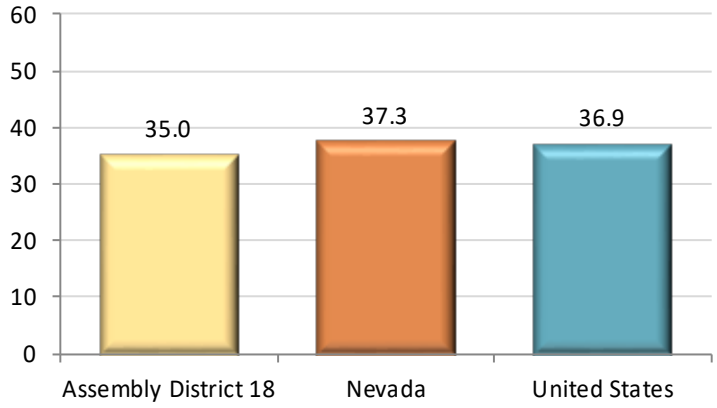
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



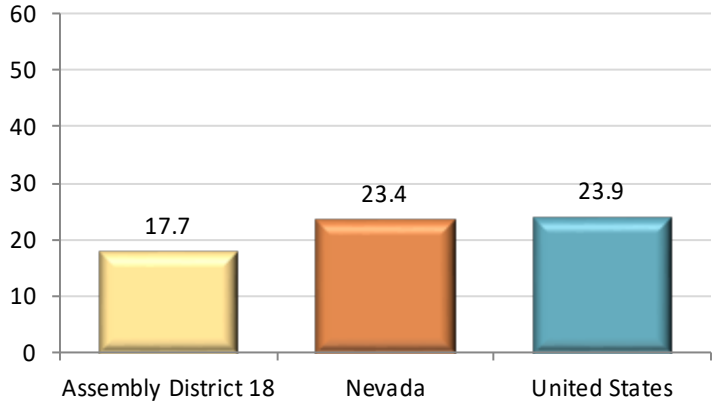
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

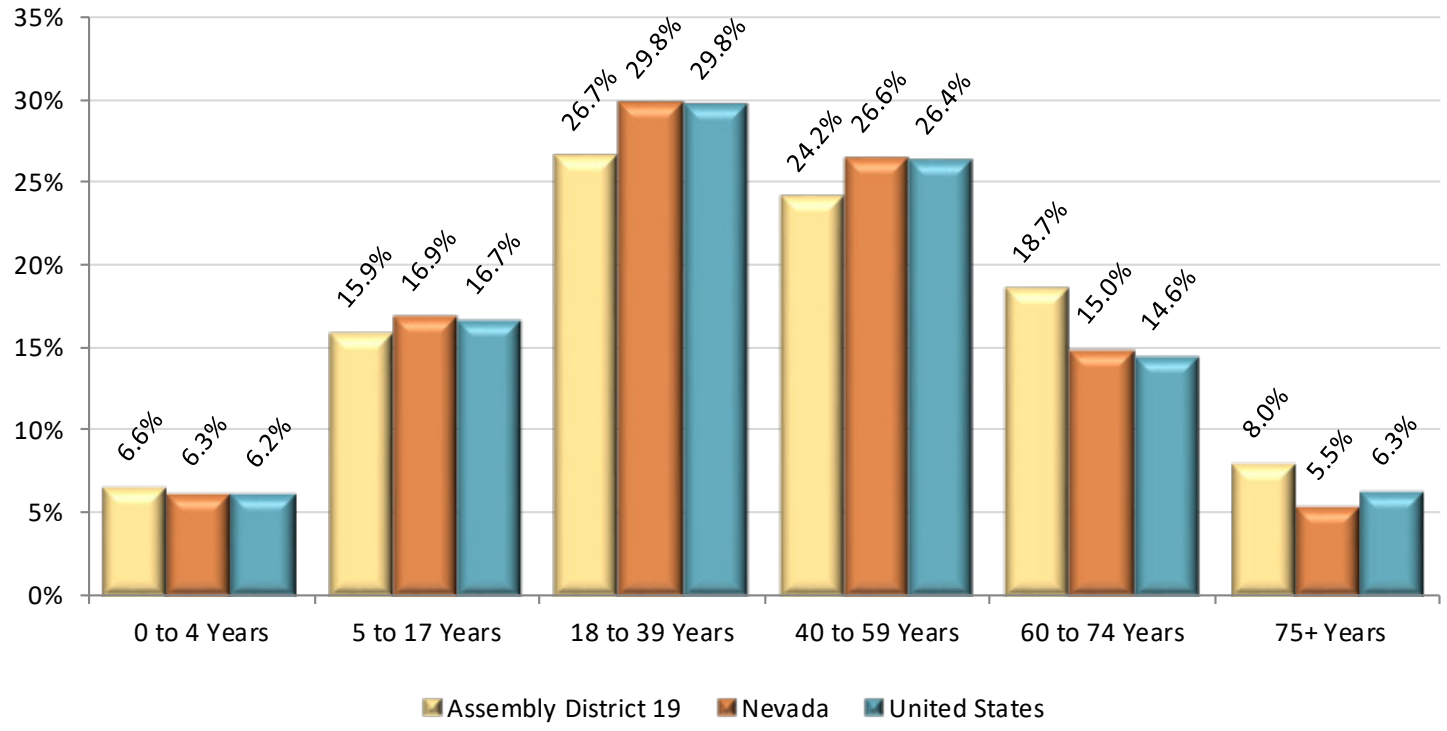
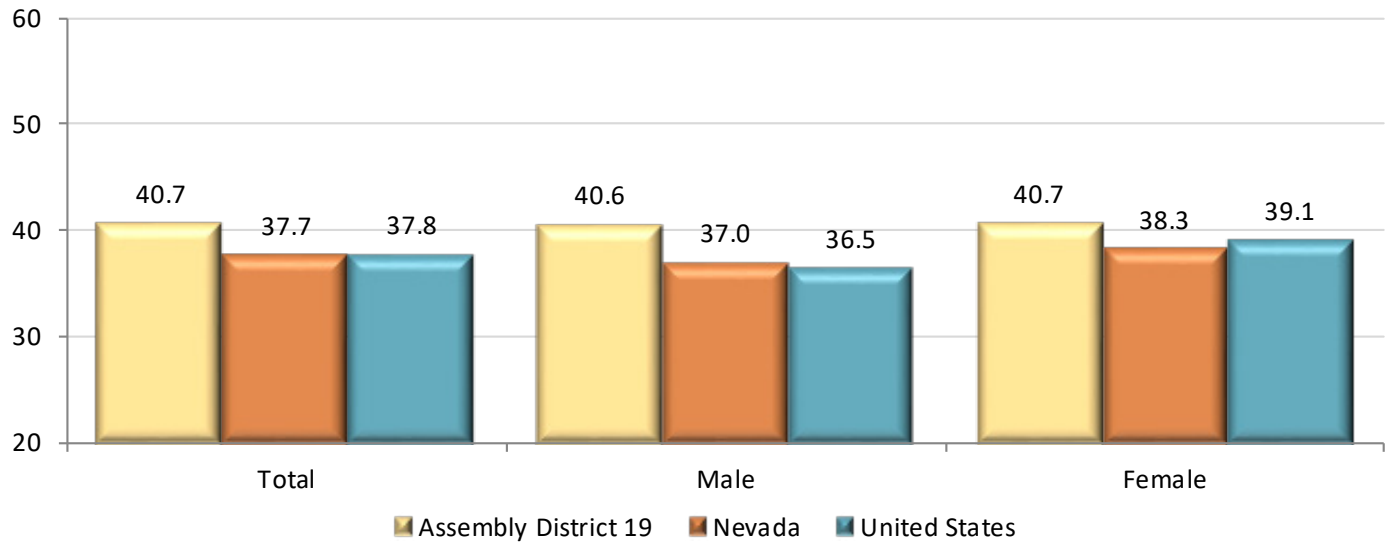
Chart 1—Population Distribution by Age



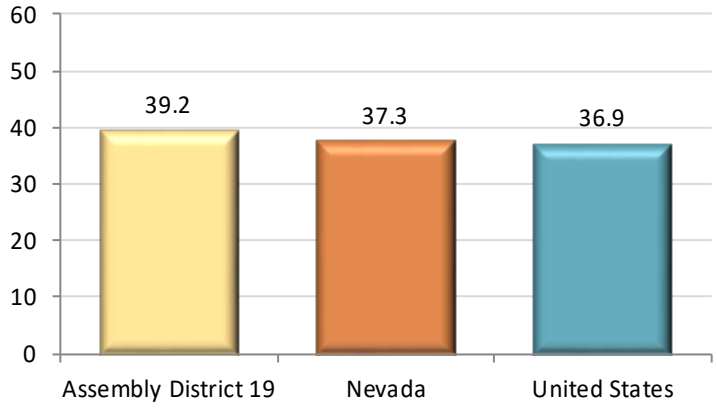
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



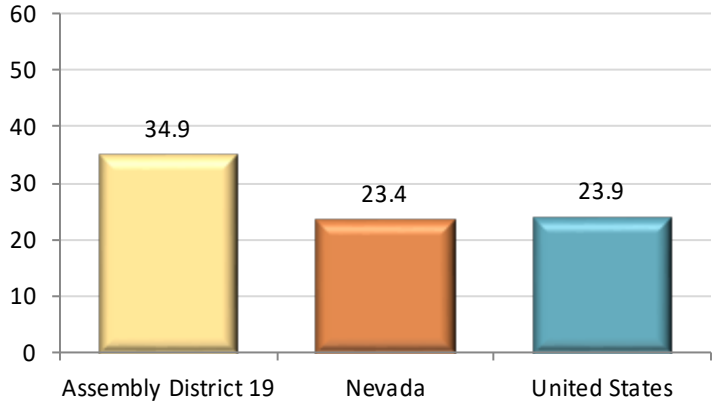
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

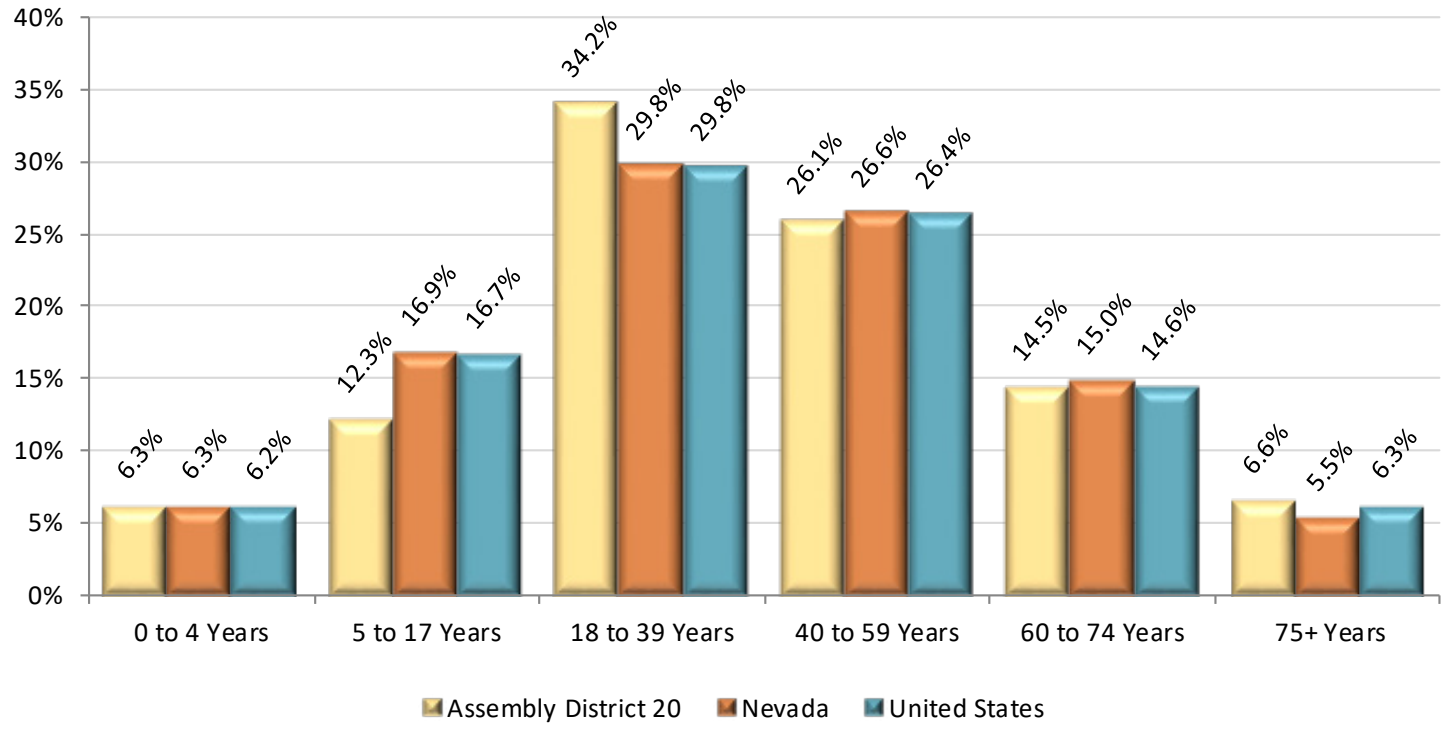
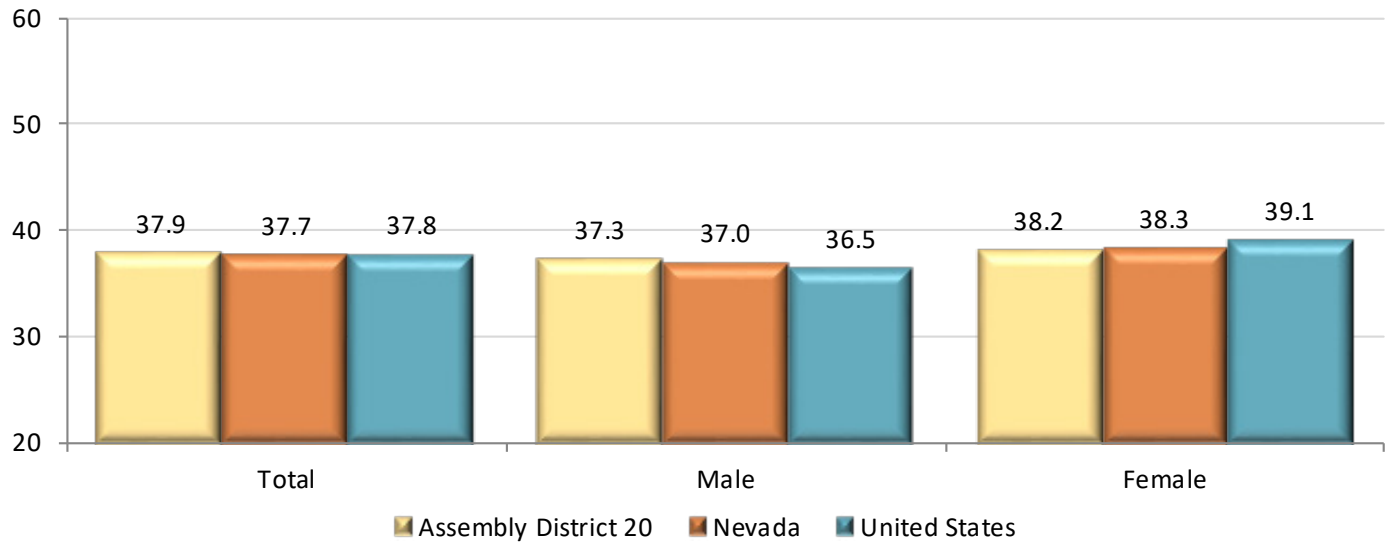
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



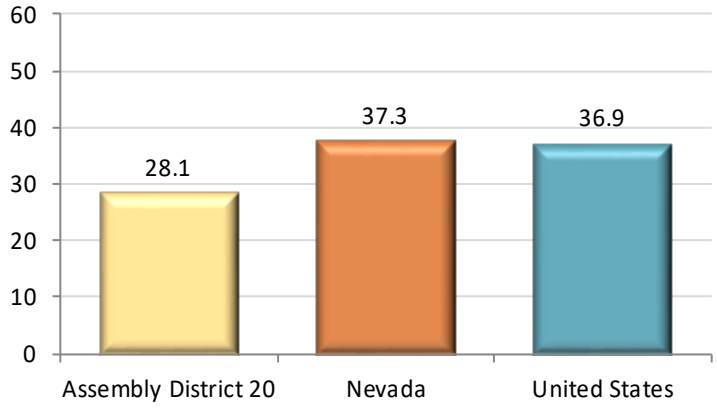
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



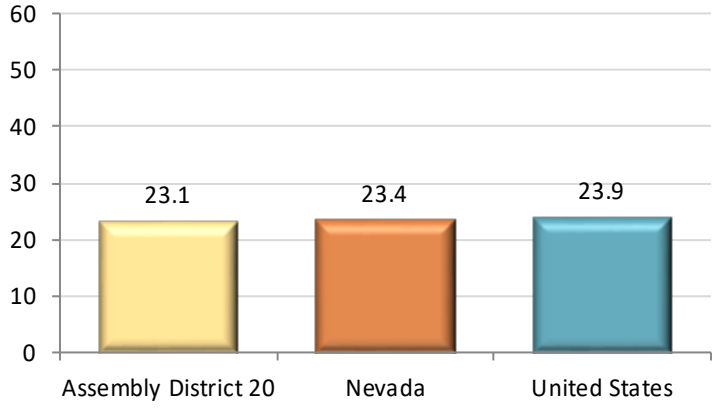
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

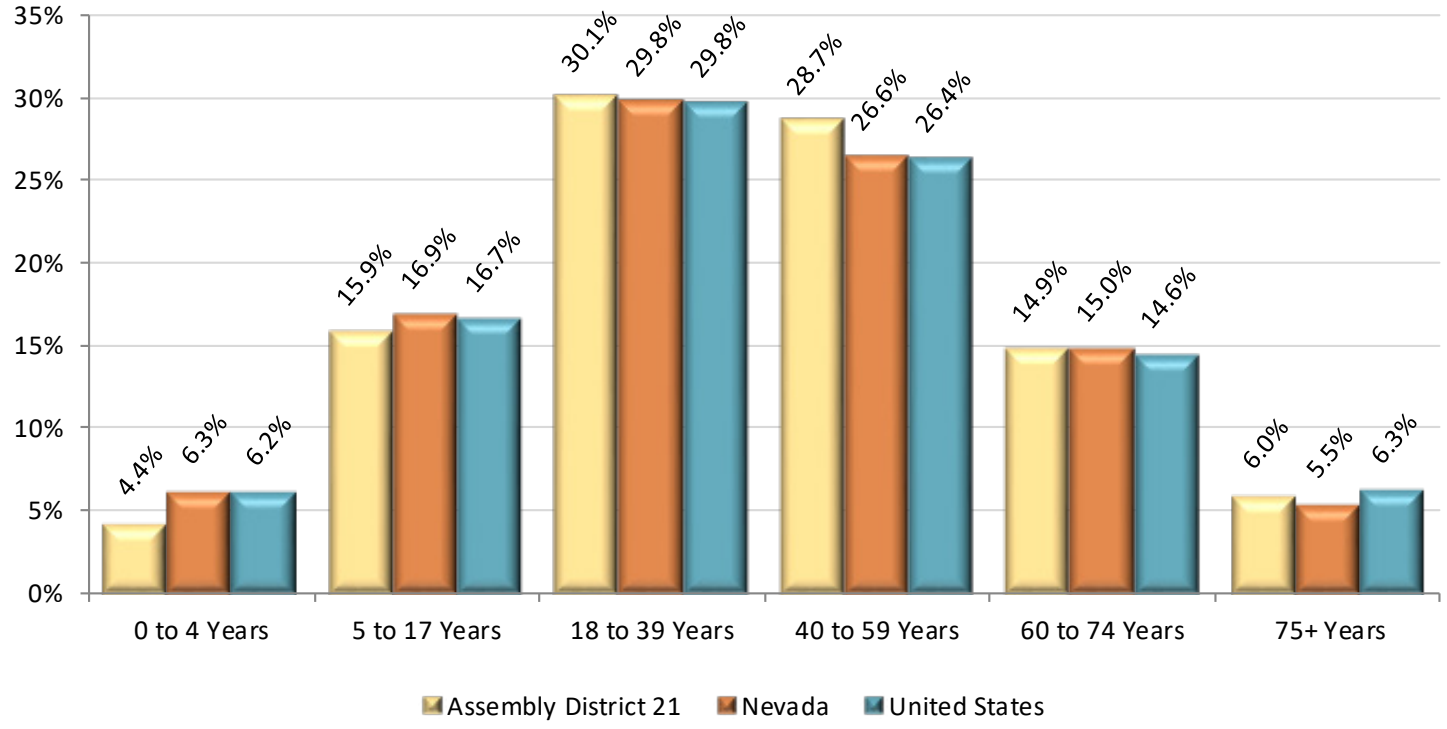
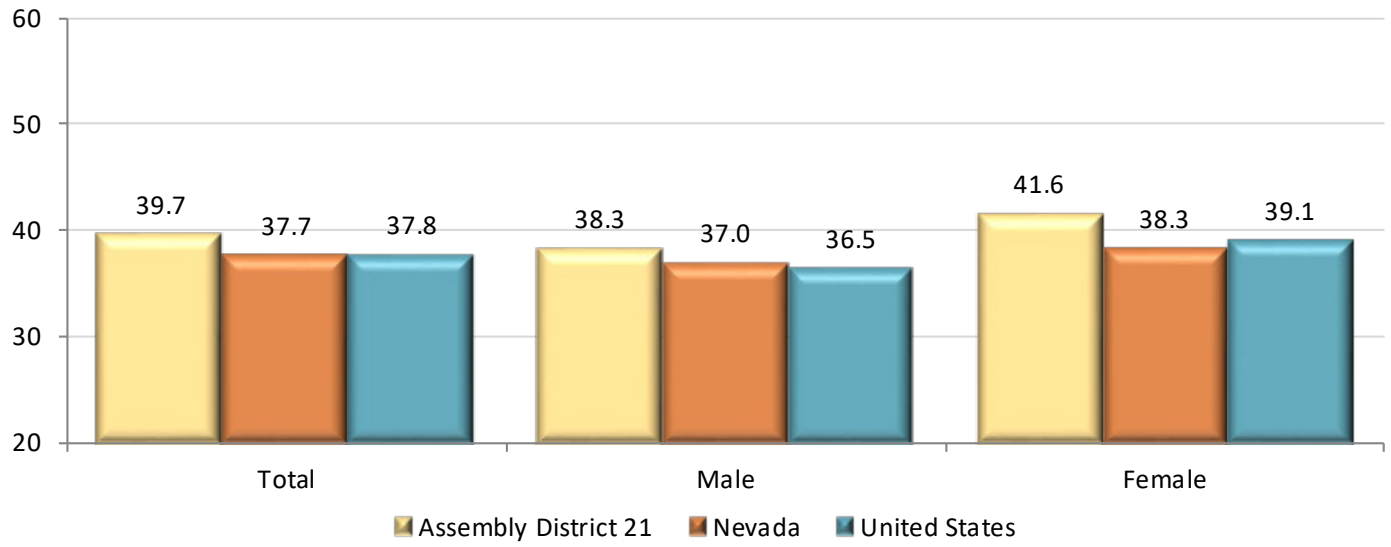
Chart 1—Population Distribution by Age



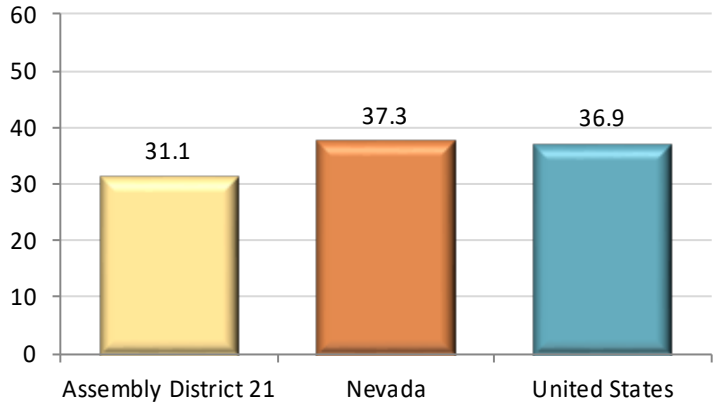
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



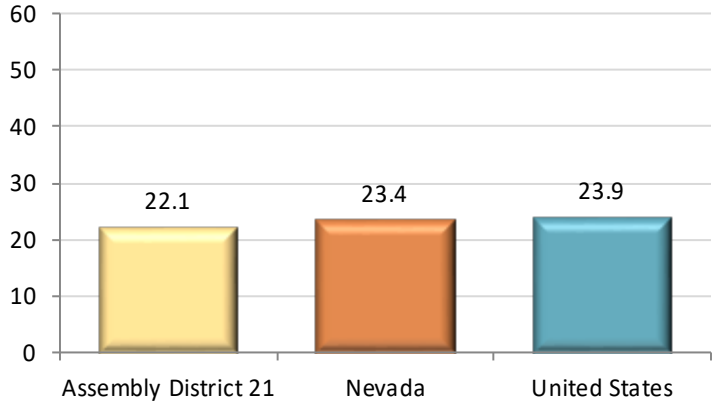
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

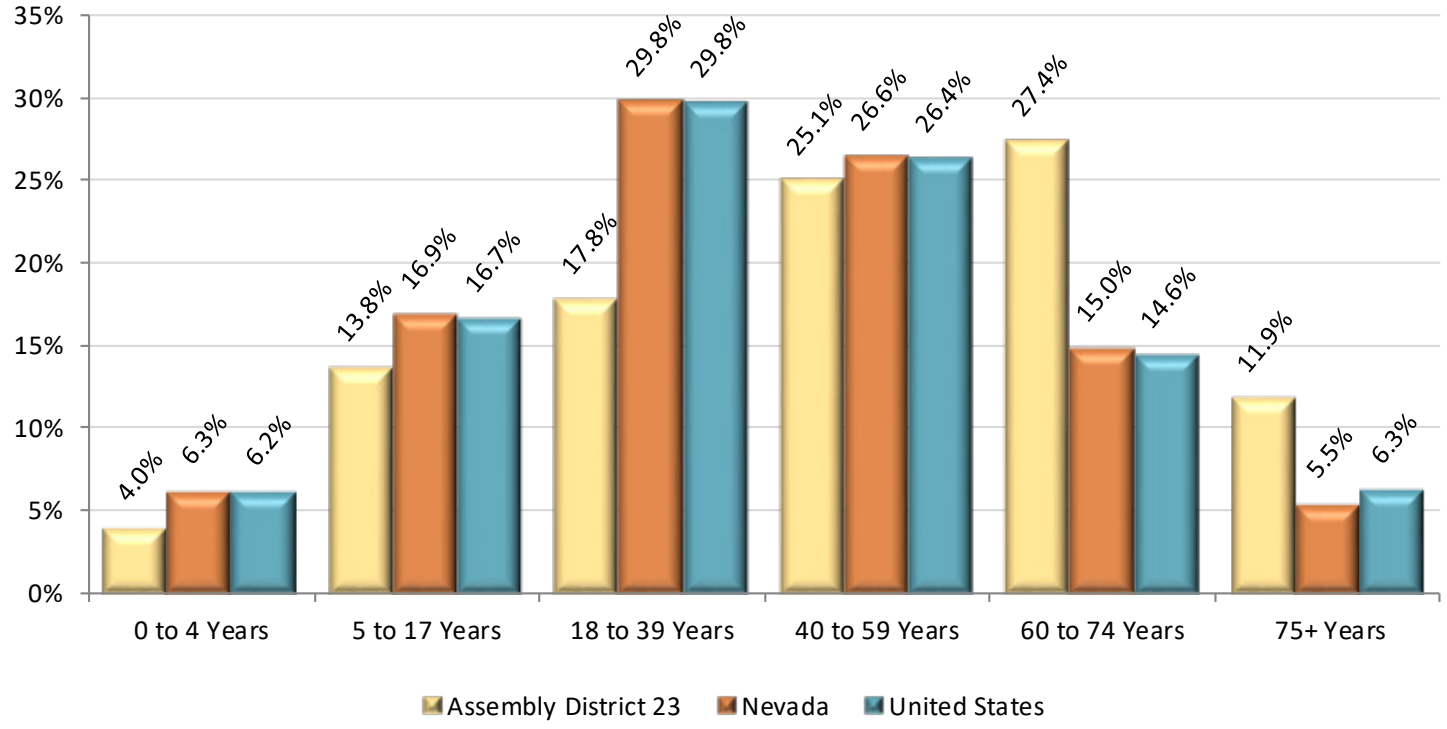
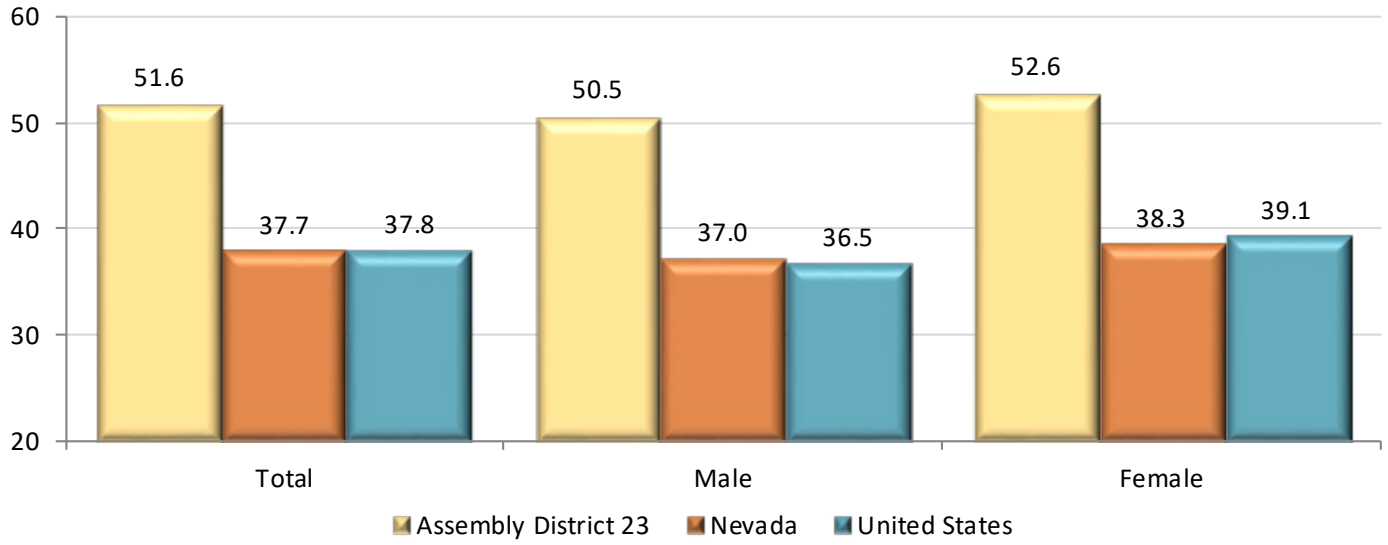
Chart 1—Population Distribution by Age



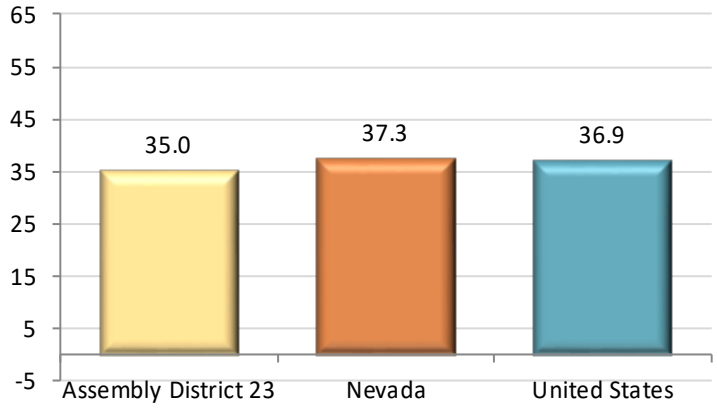
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



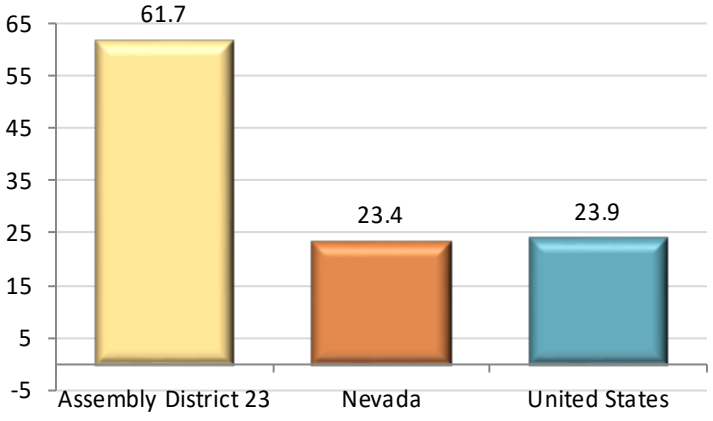
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

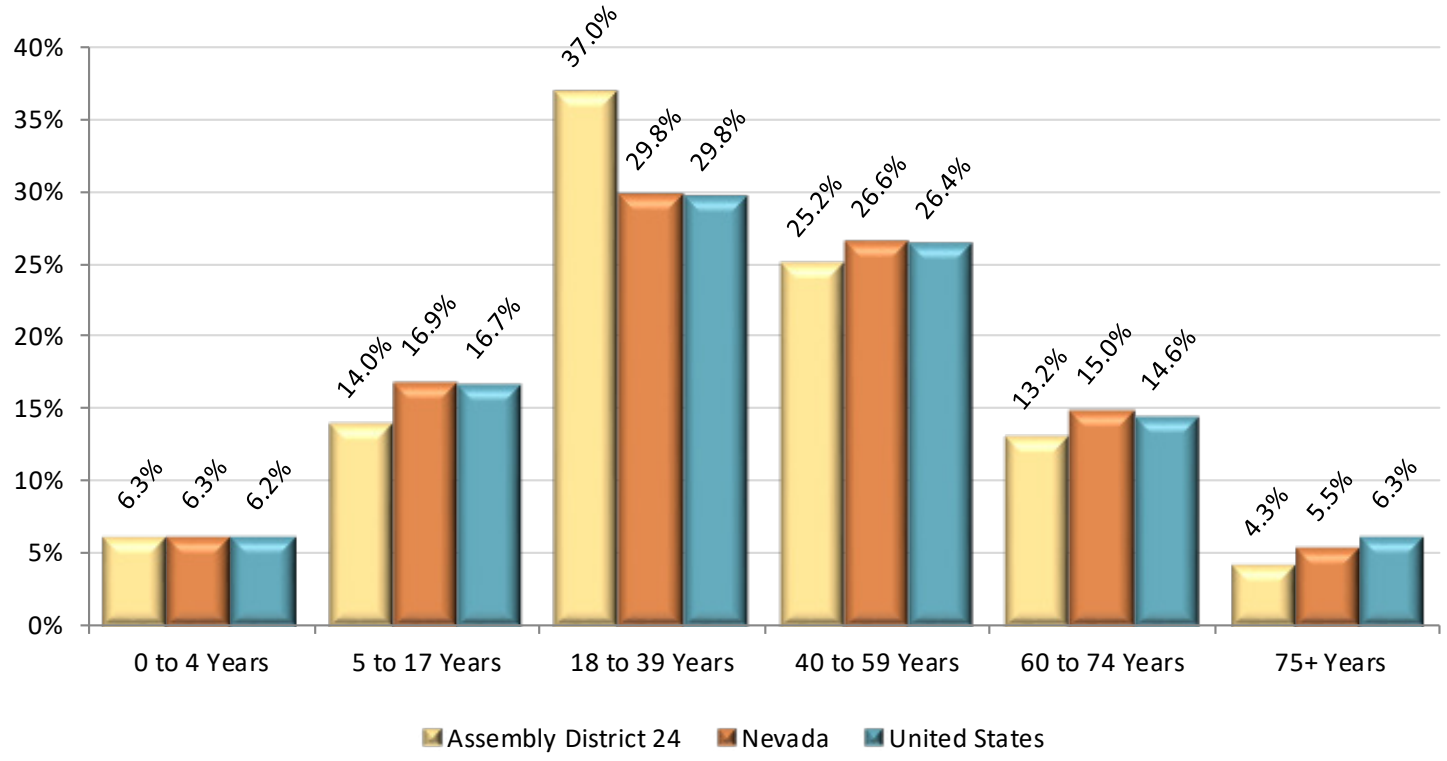
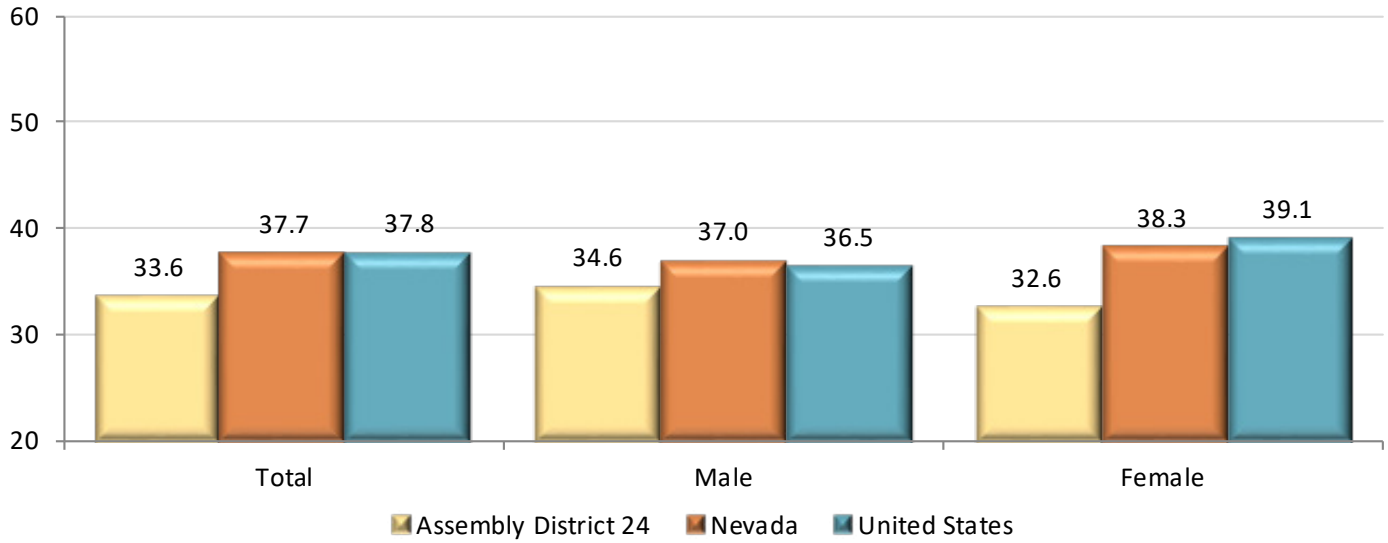
Chart 1—Population Distribution by Age



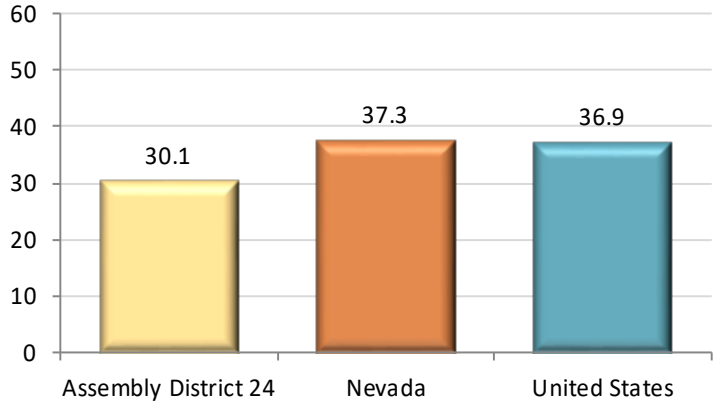
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



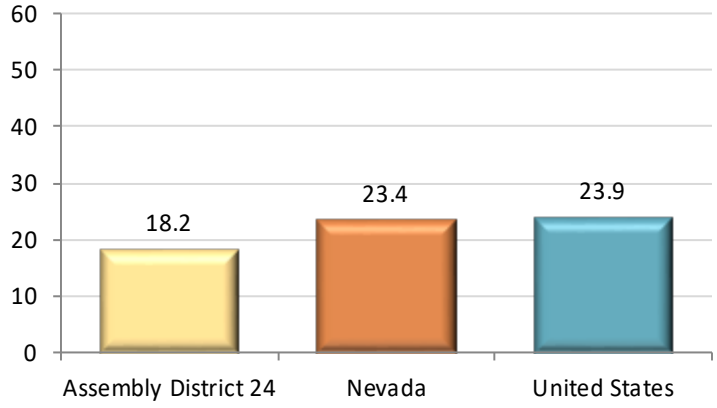
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 25

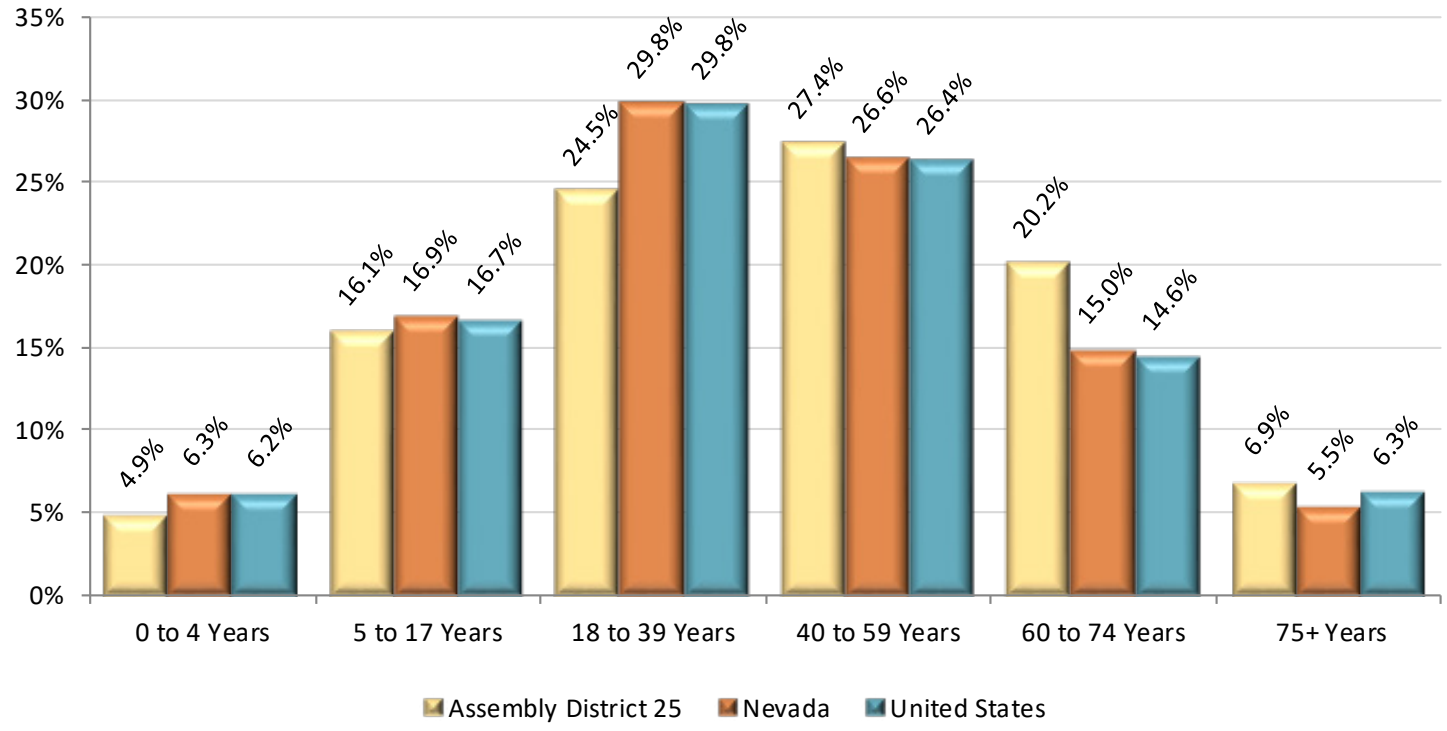
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 25	67,610	33,138	49.0%	34,472	51.0%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

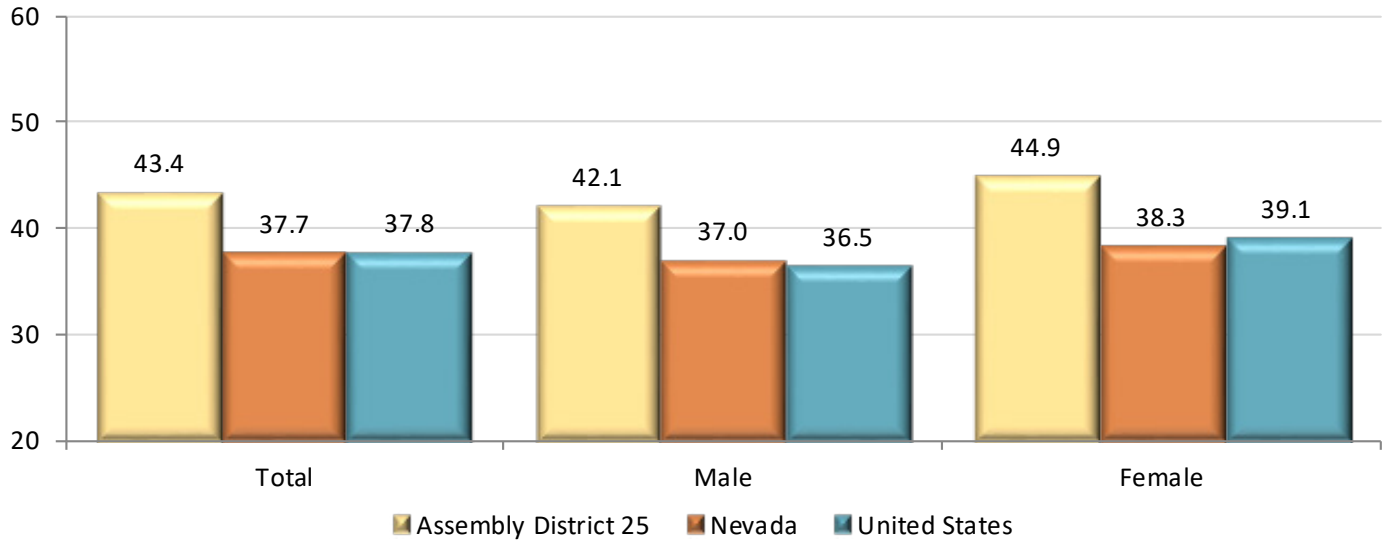
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 25	3,322	10,859	16,586	18,521	13,637	4,685
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



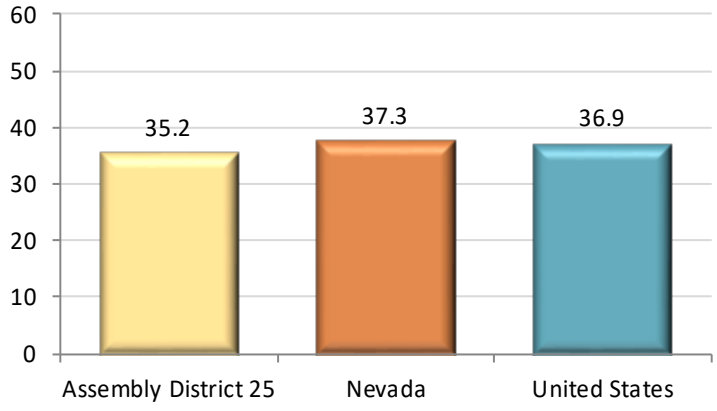
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



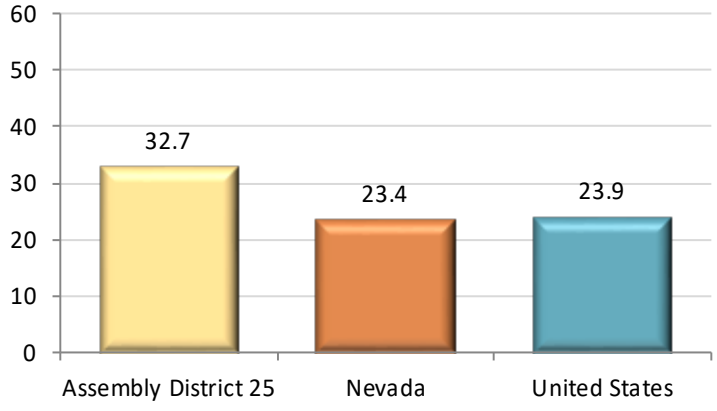
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

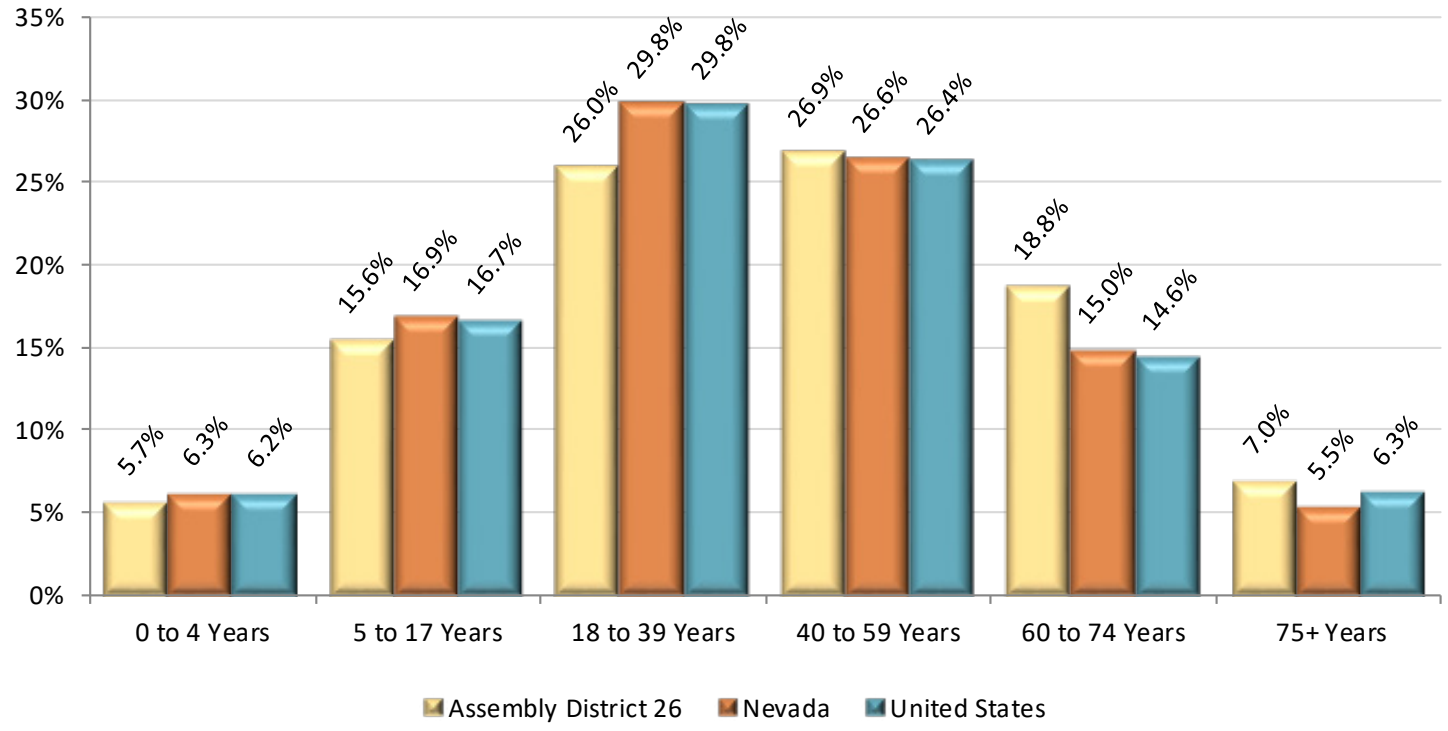
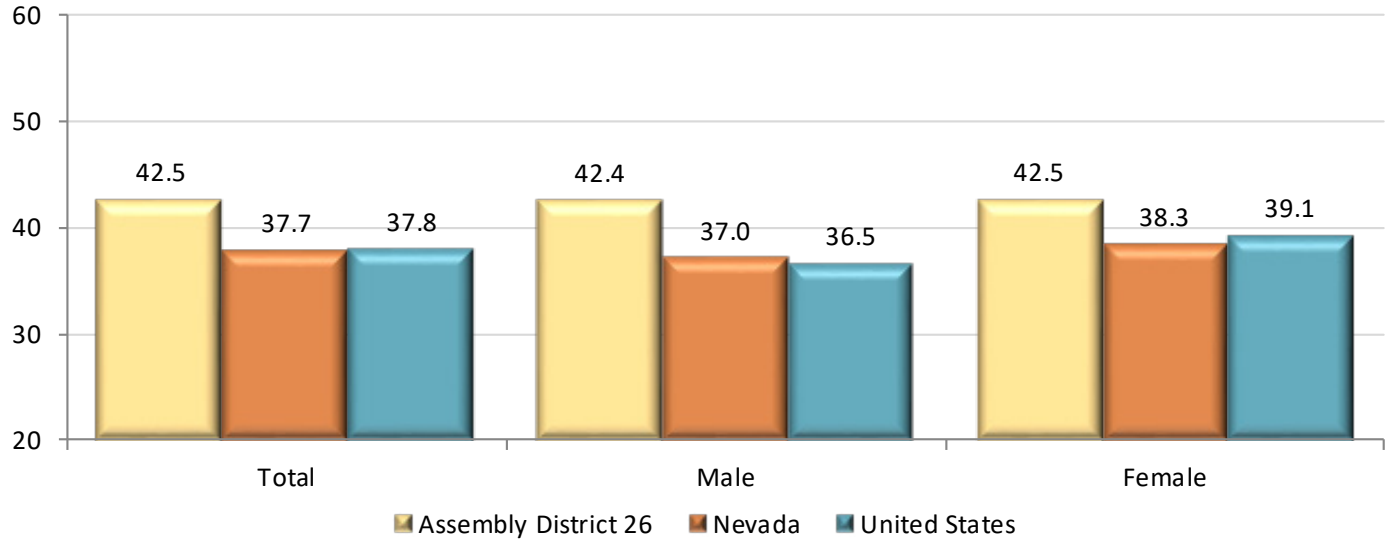
Chart 1—Population Distribution by Age



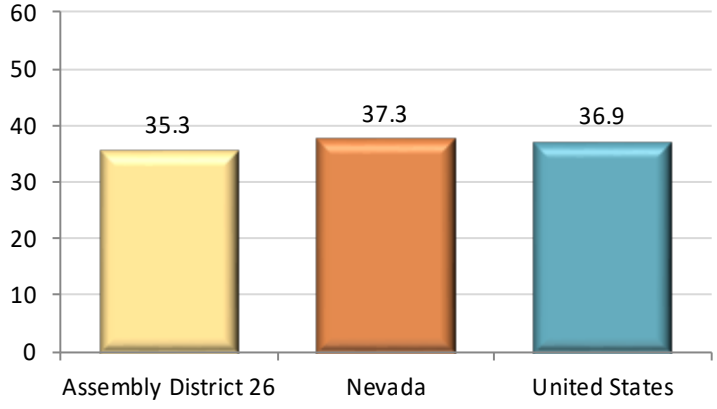
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



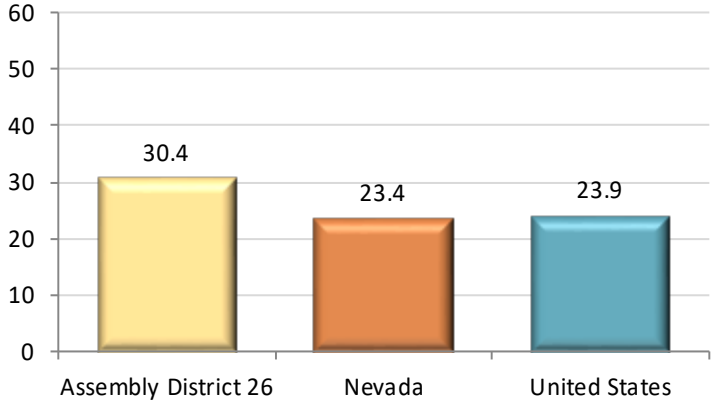
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

*The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

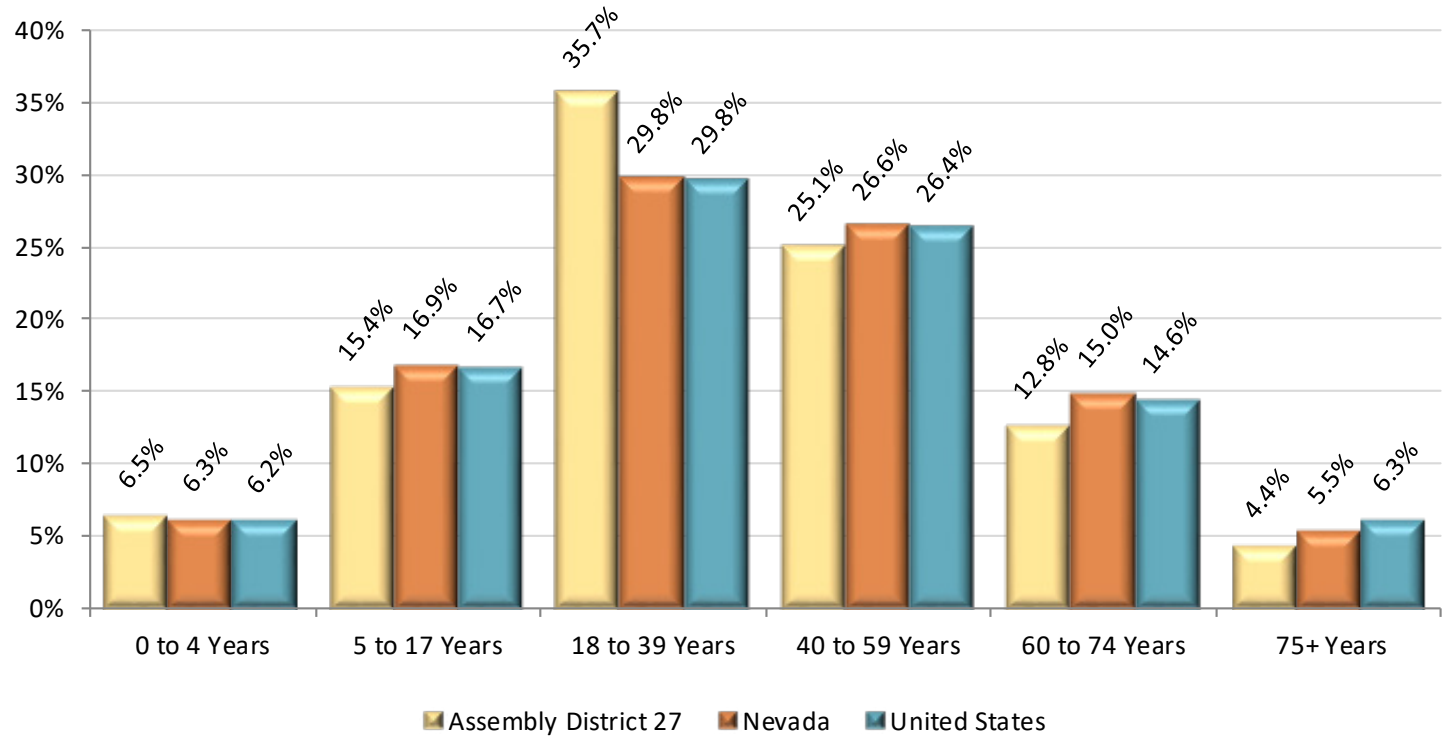
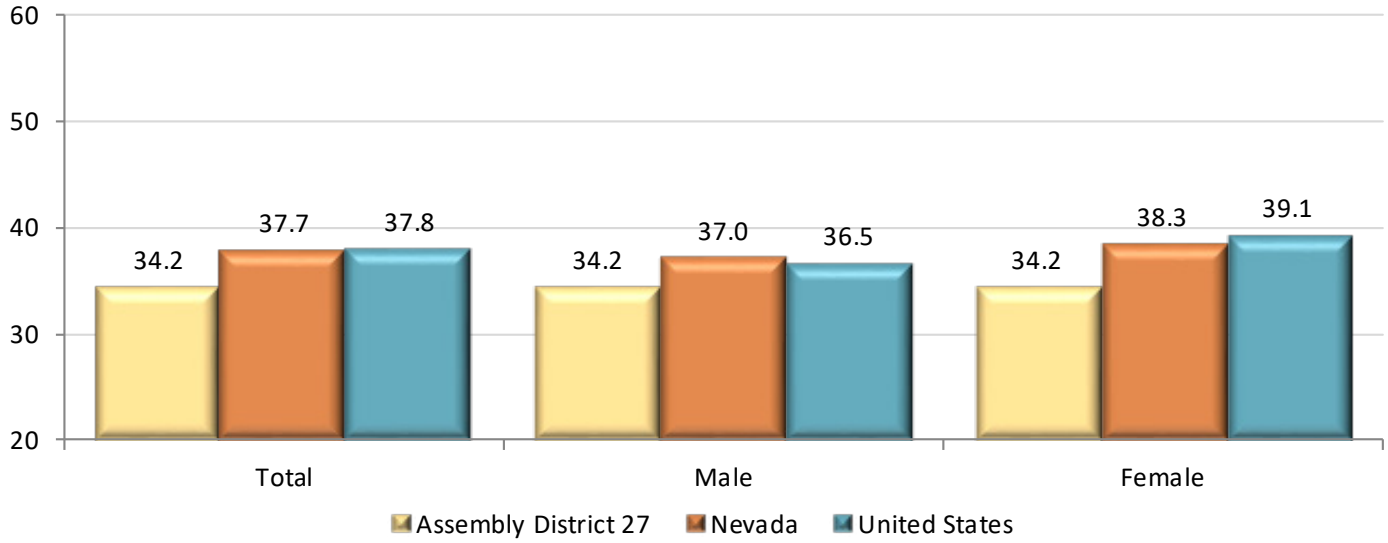
Chart 1—Population Distribution by Age



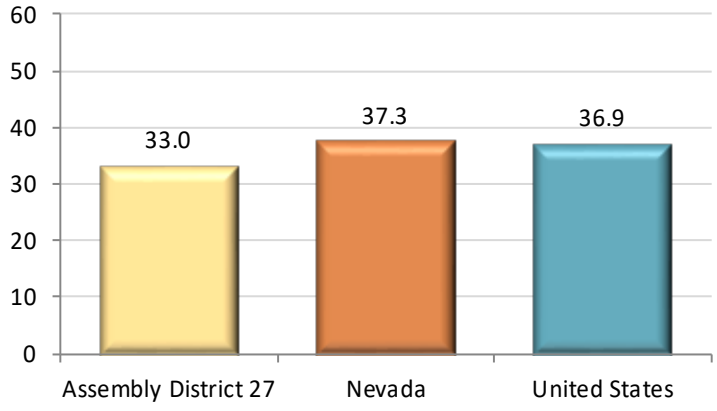
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



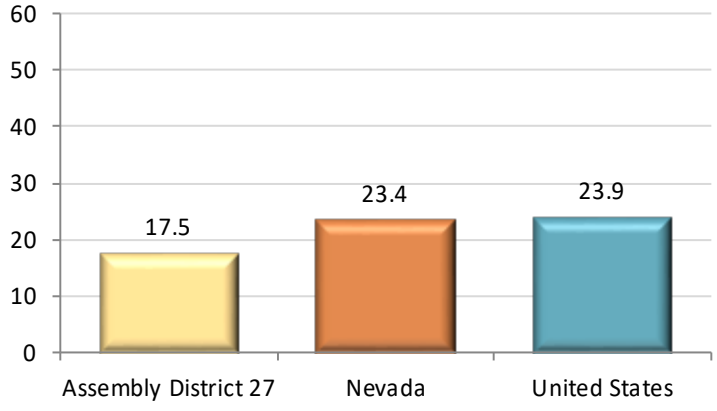
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

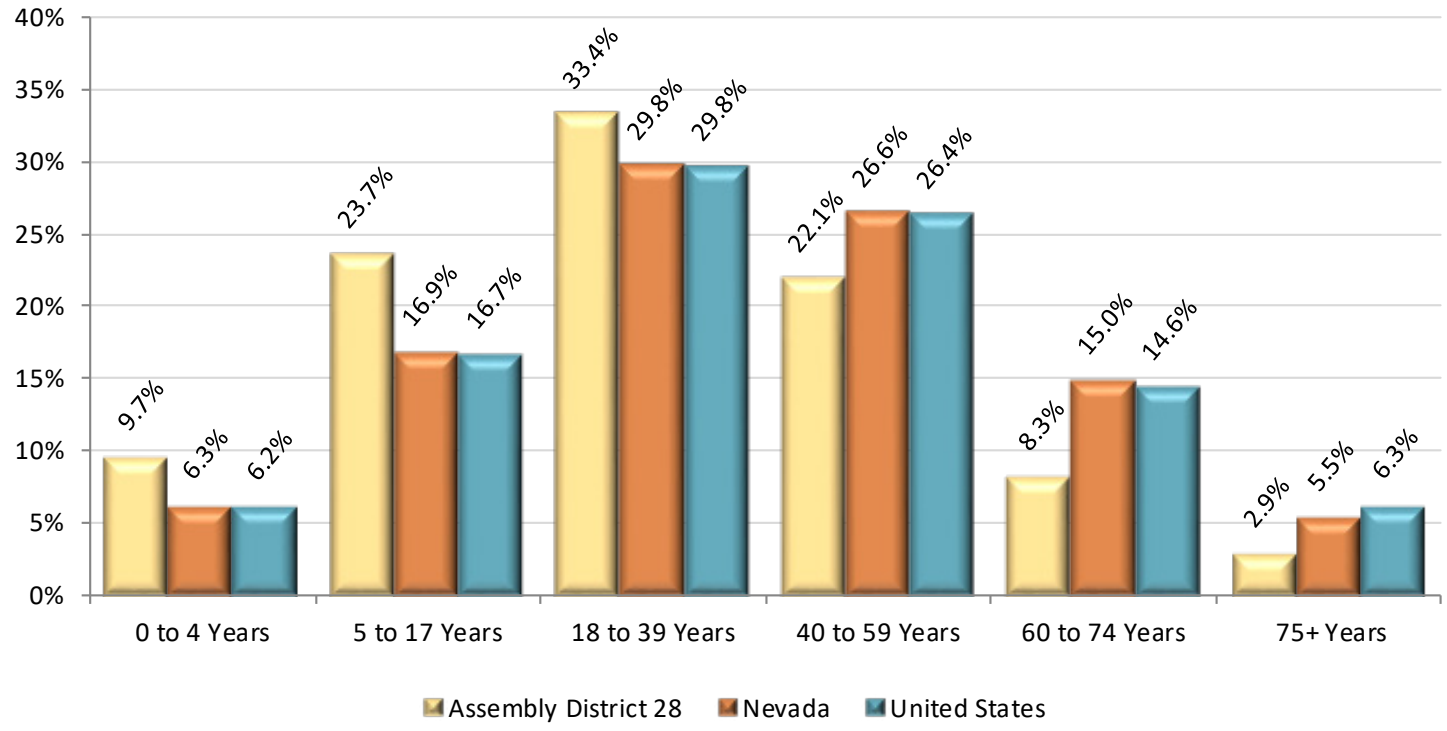
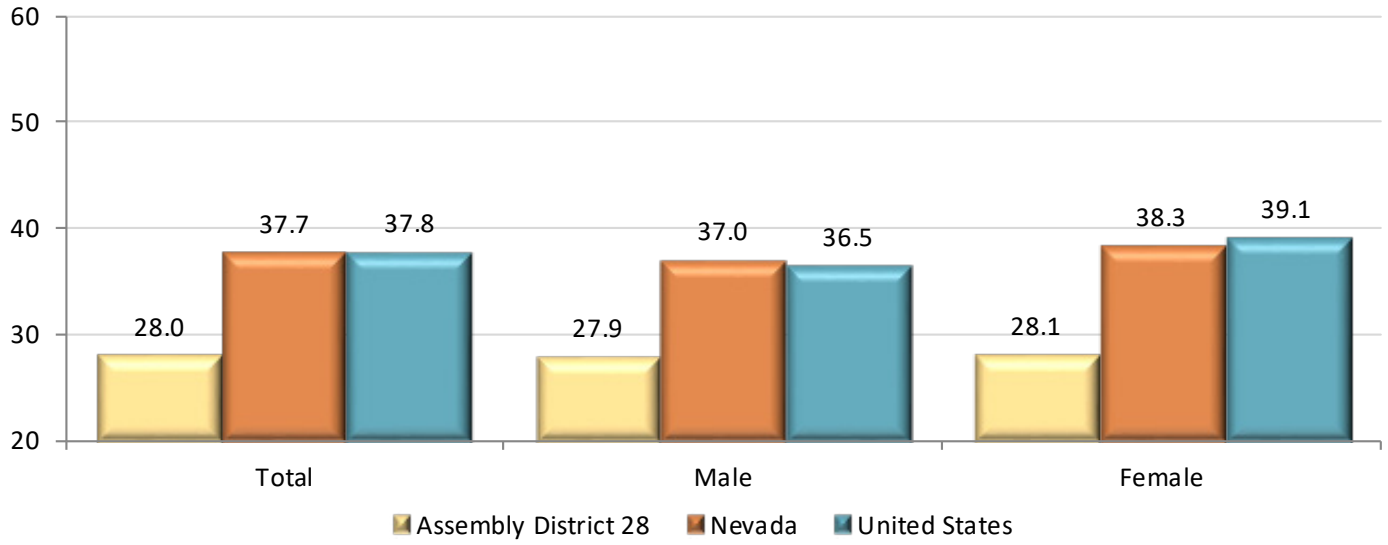
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



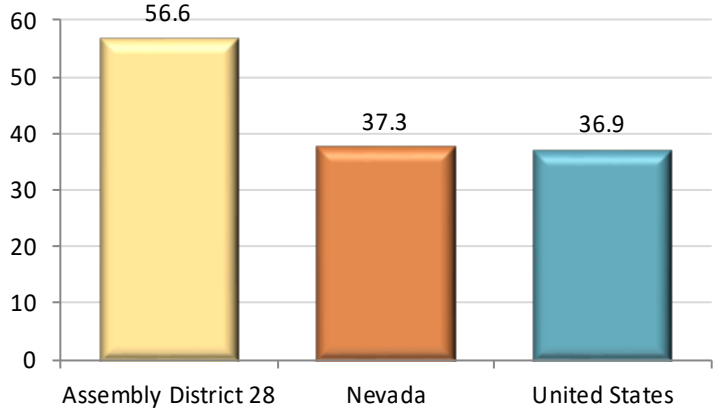
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



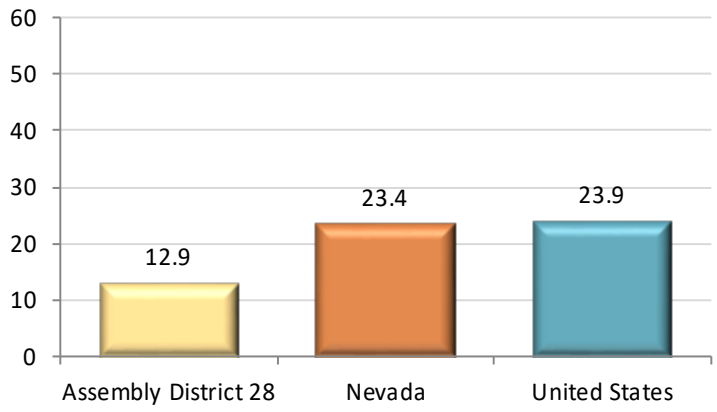
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

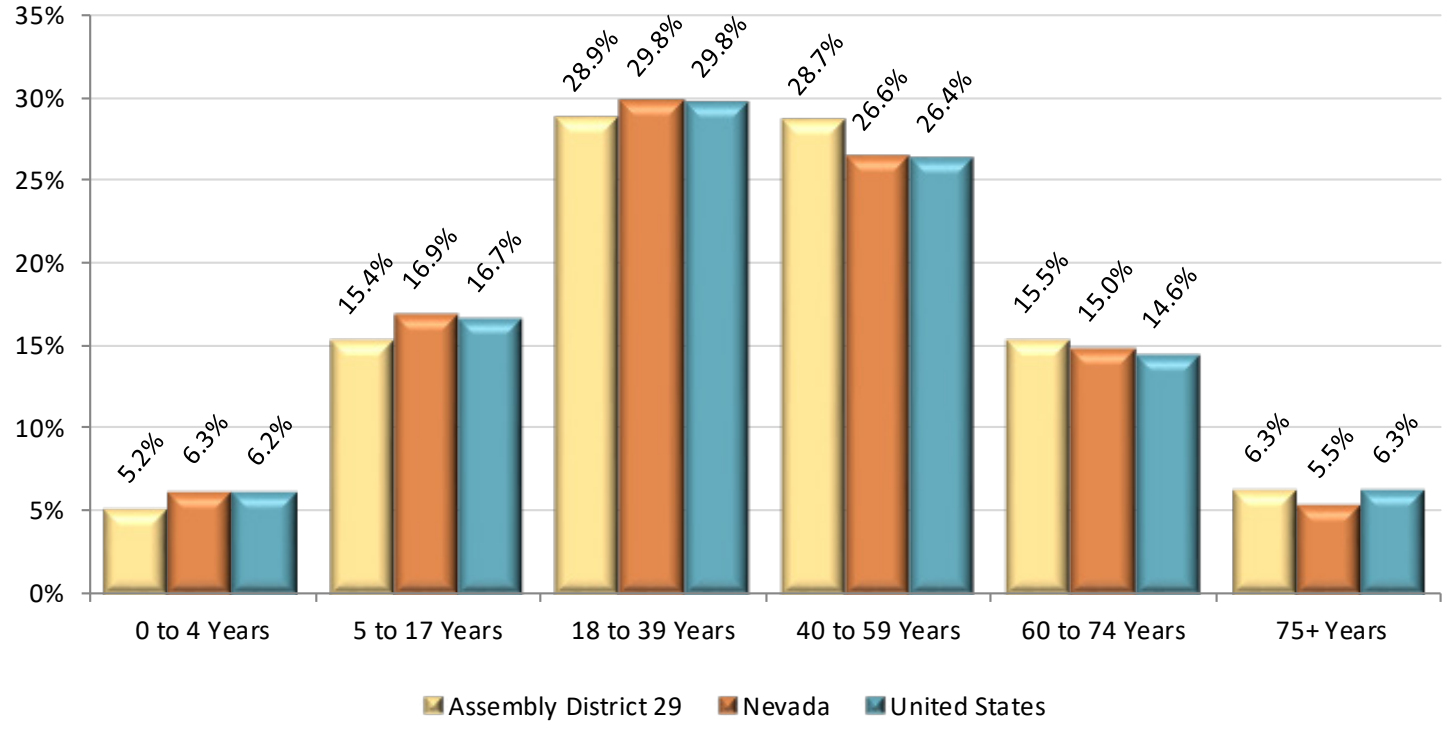
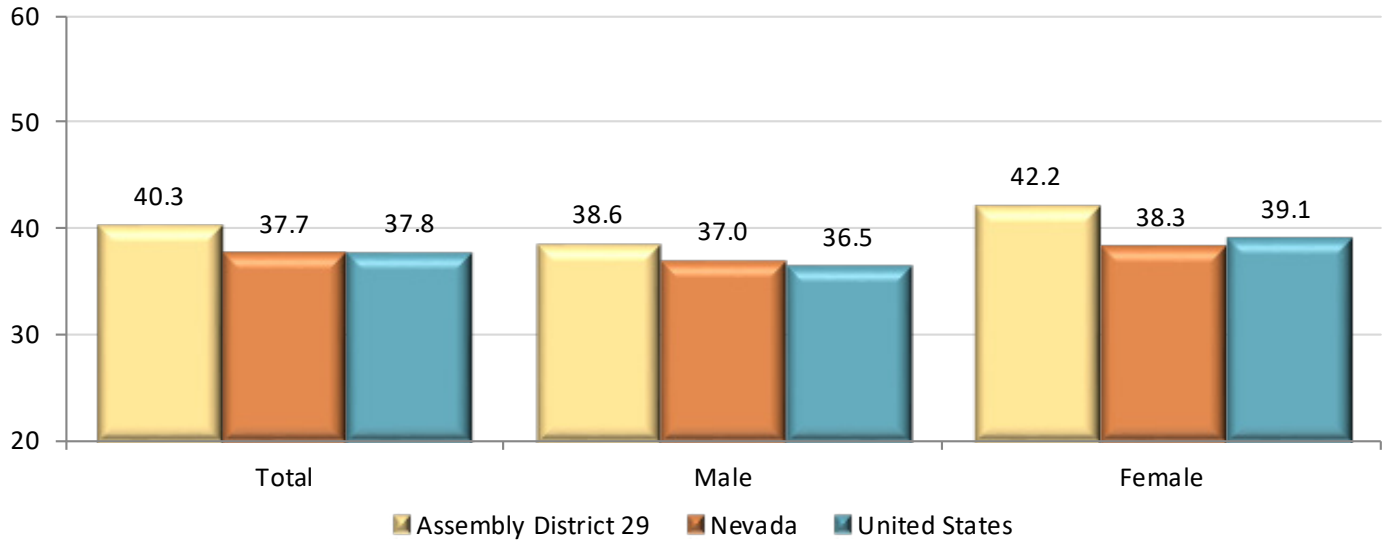
Chart 1—Population Distribution by Age



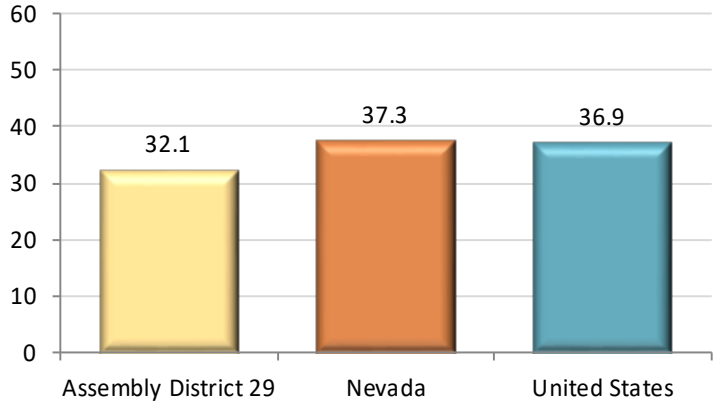
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



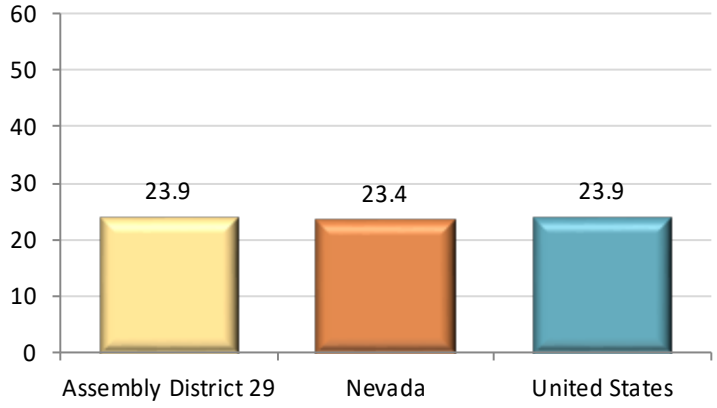
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

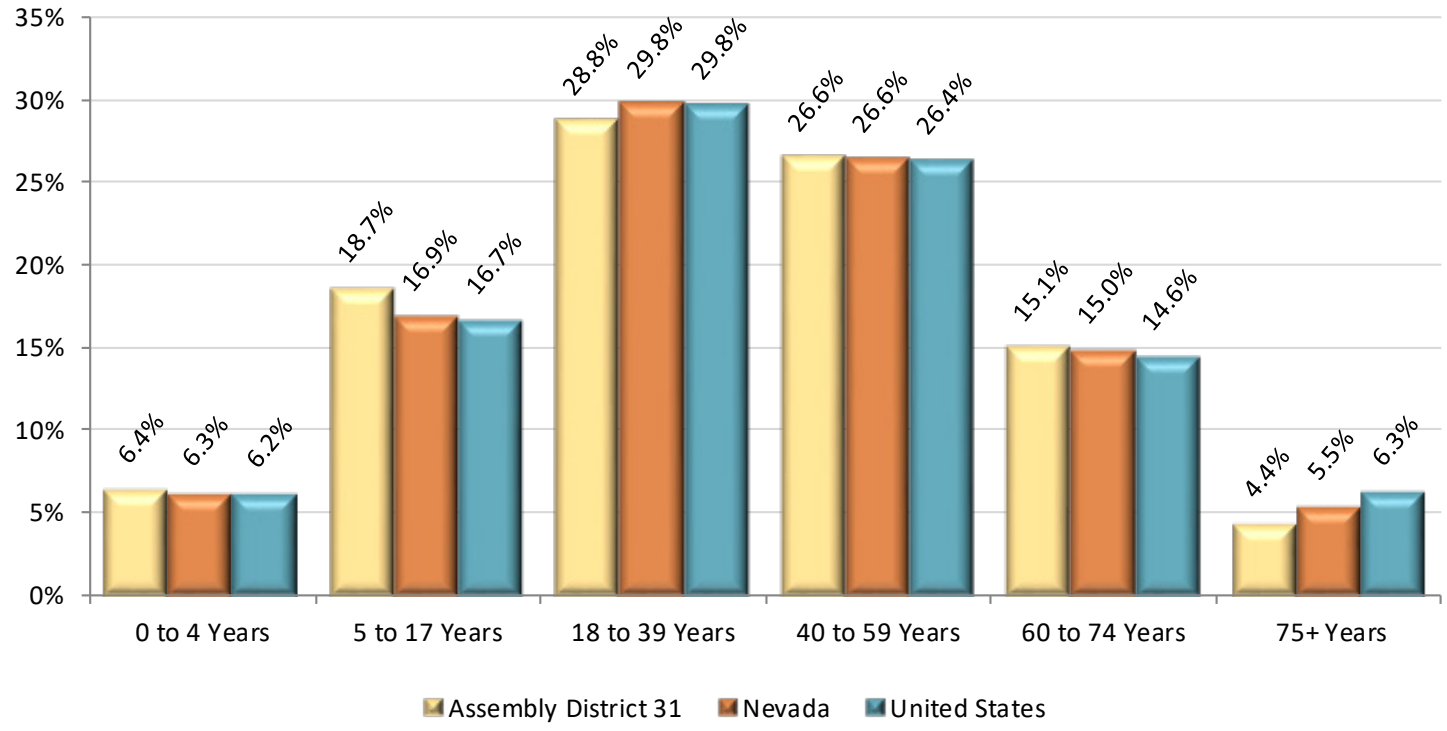
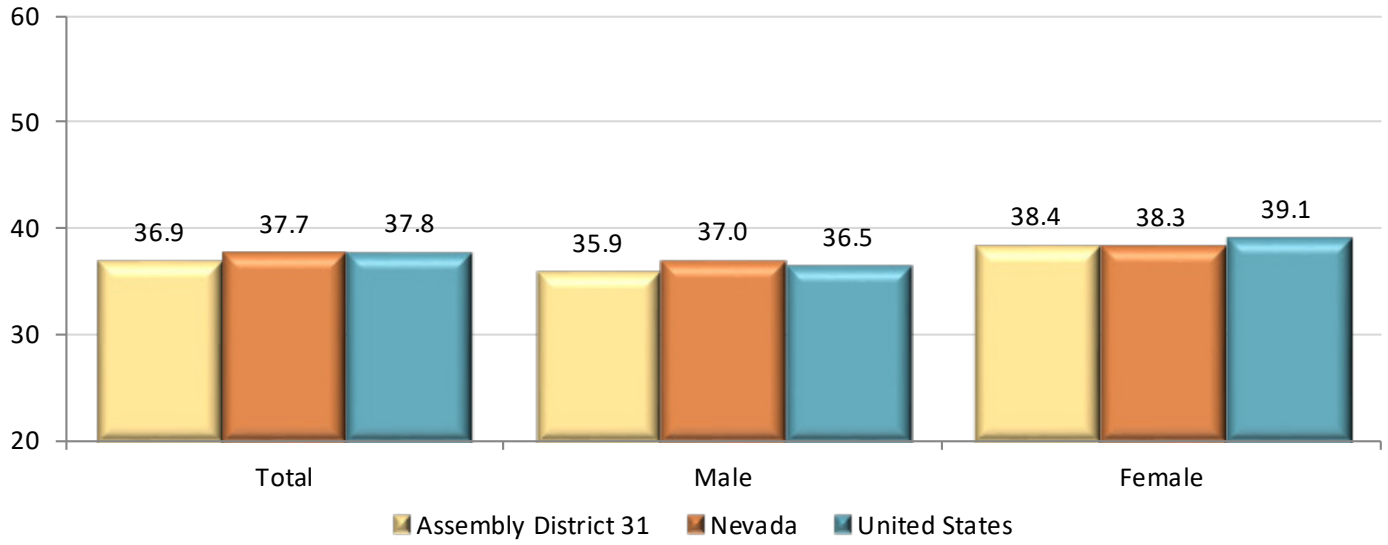
Chart 1—Population Distribution by Age



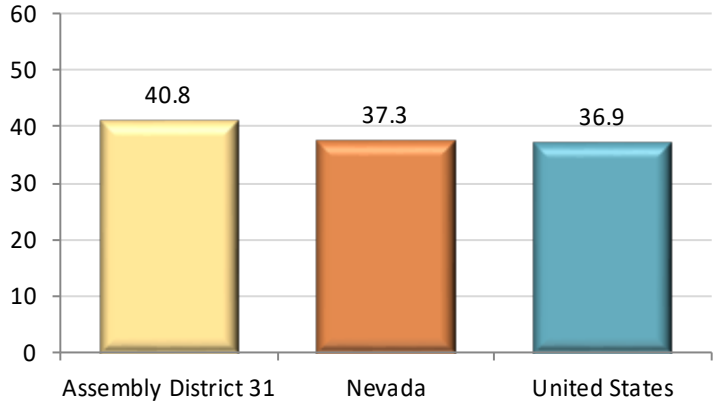
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



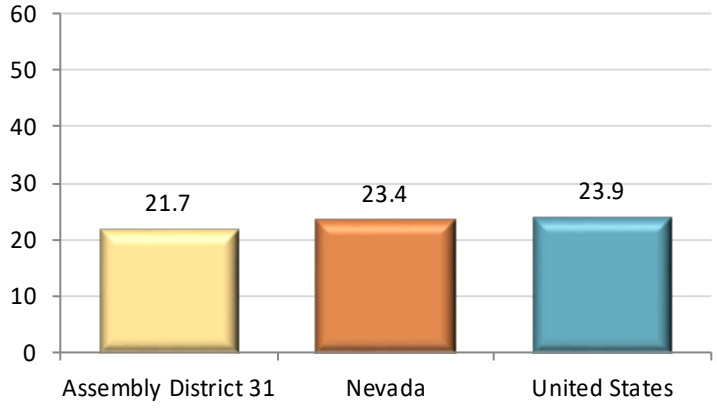
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

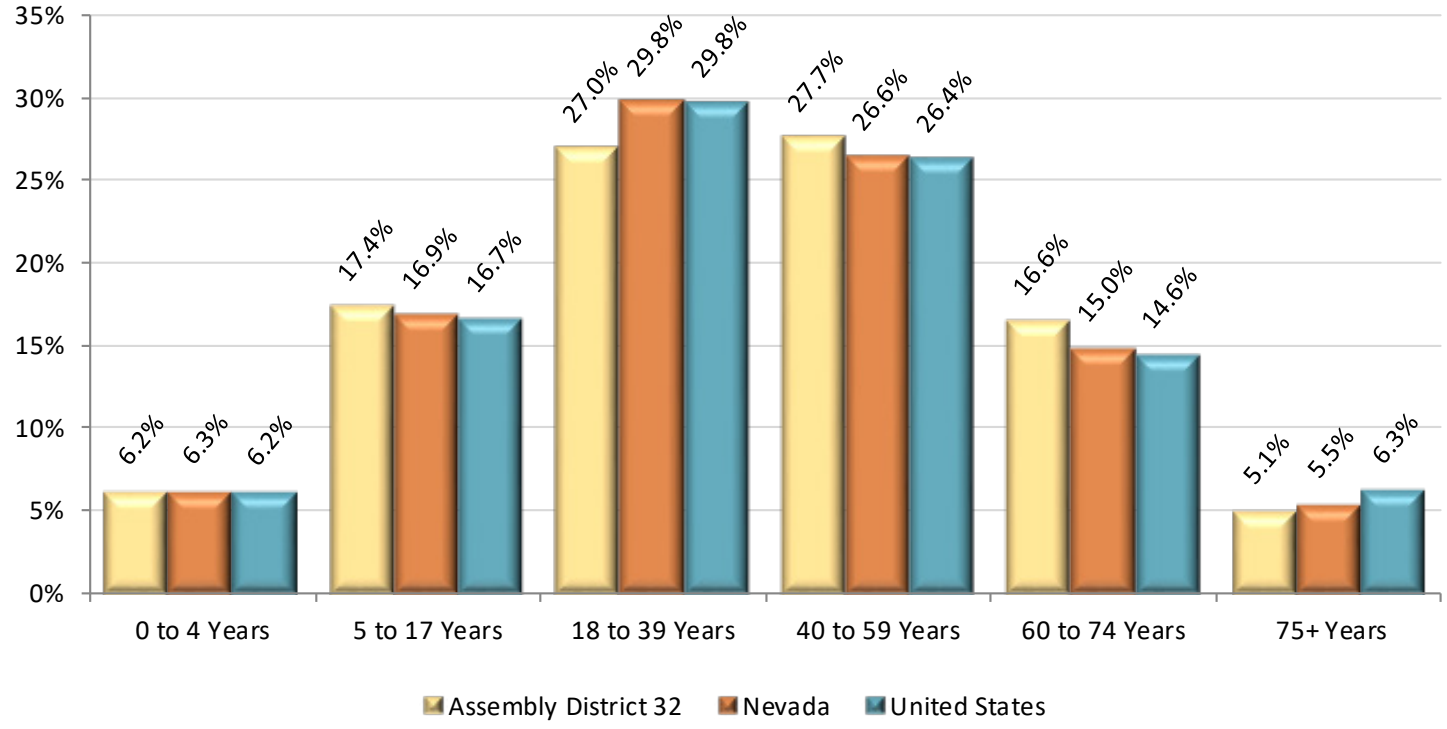
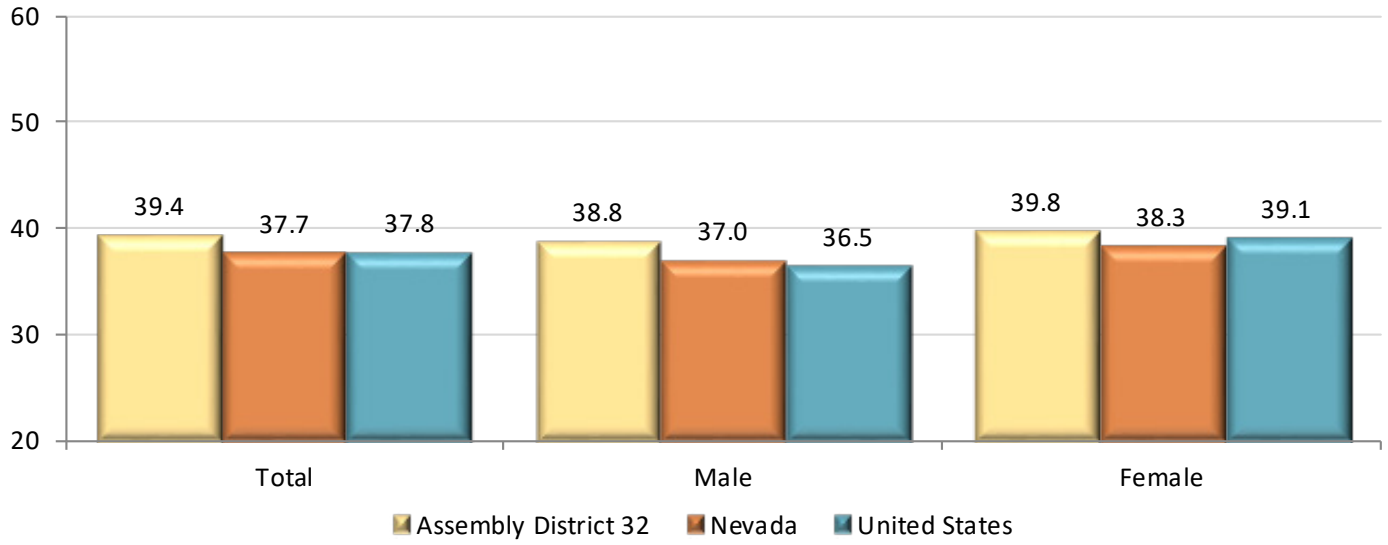
Chart 1—Population Distribution by Age



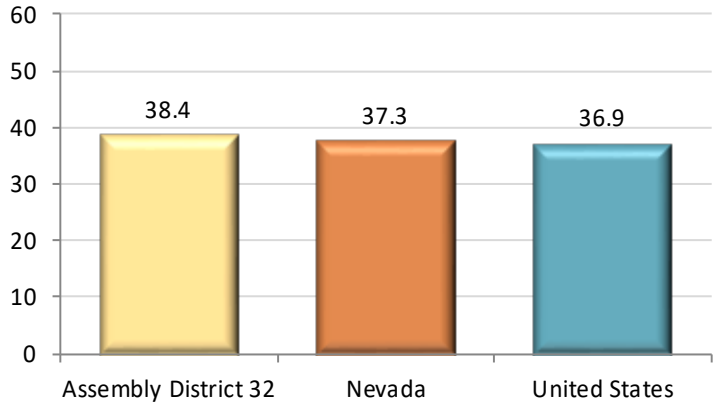
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



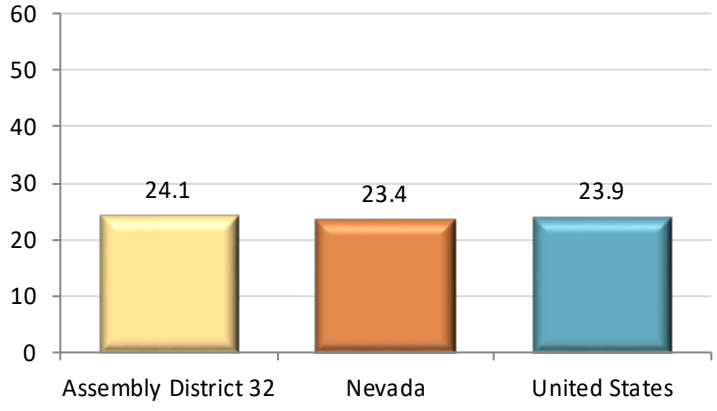
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 33

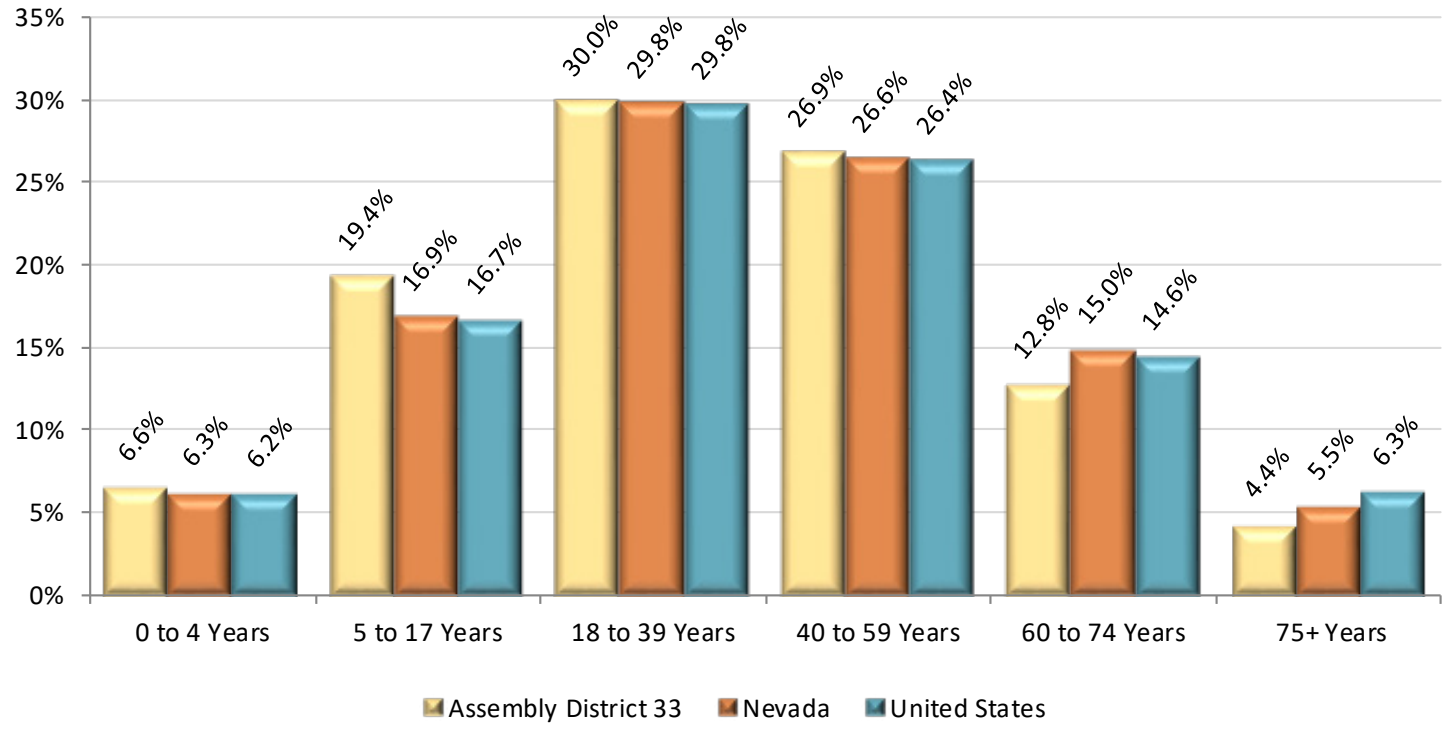
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 33	67,700	35,846	52.9%	31,854	47.1%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

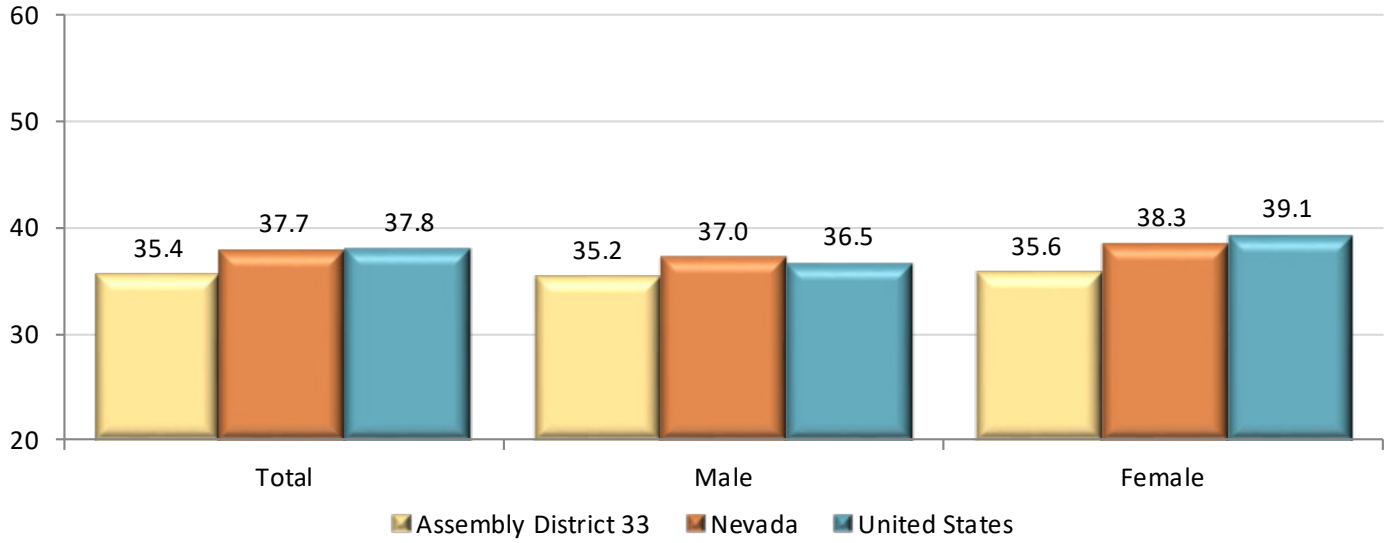
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 33	4,452	13,131	20,280	18,204	8,684	2,949
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



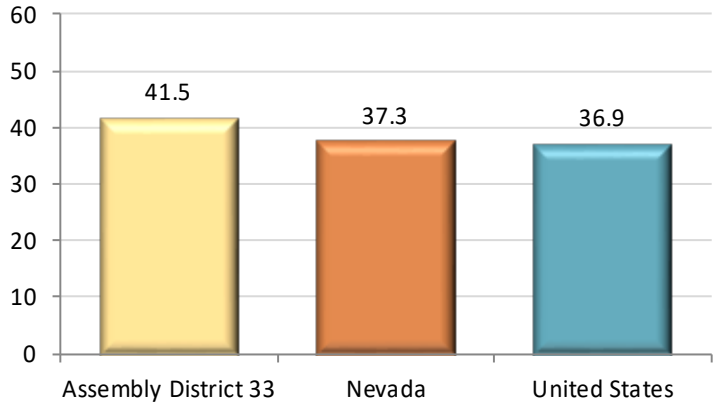
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



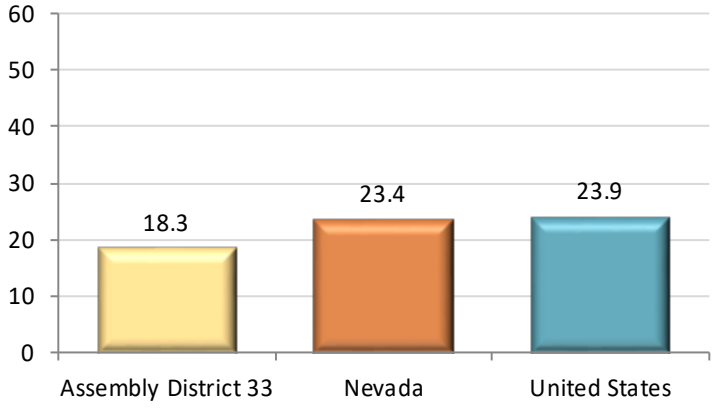
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

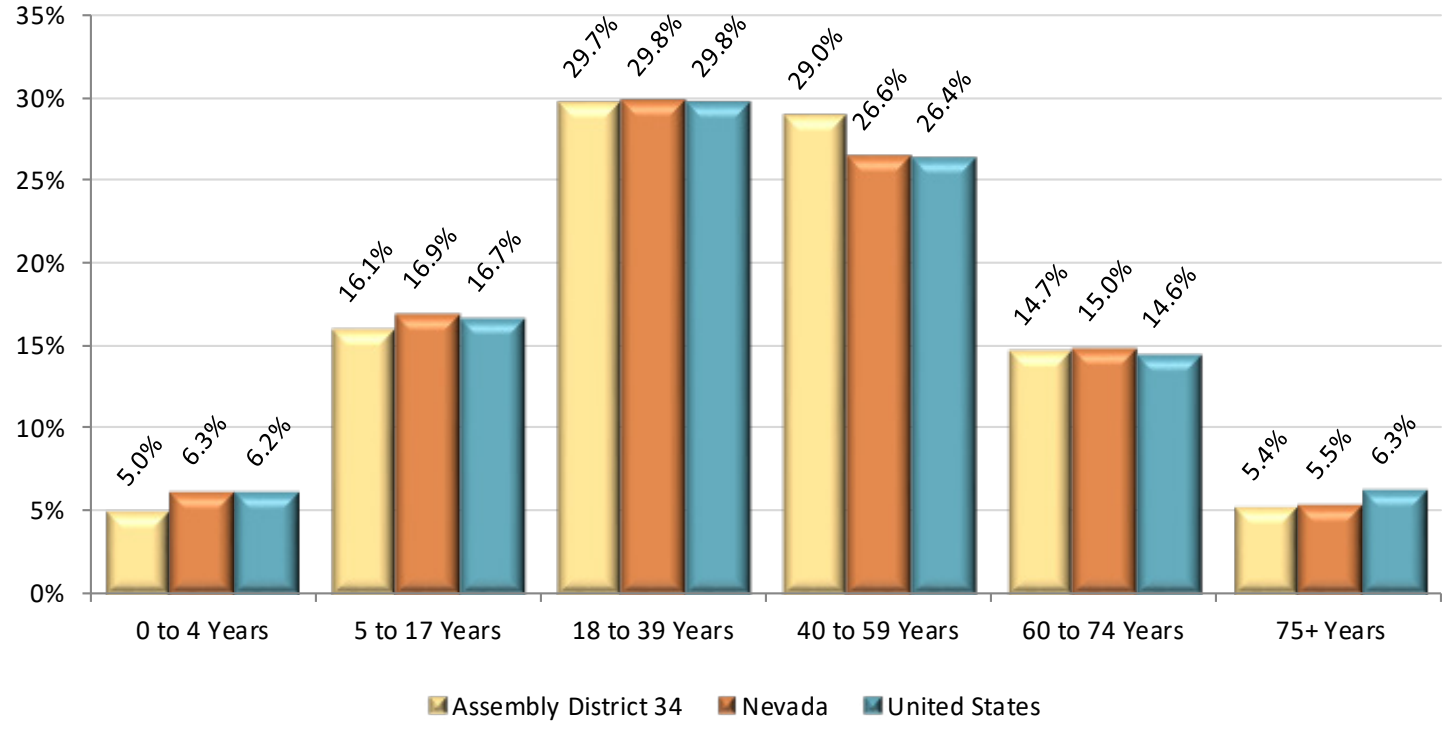
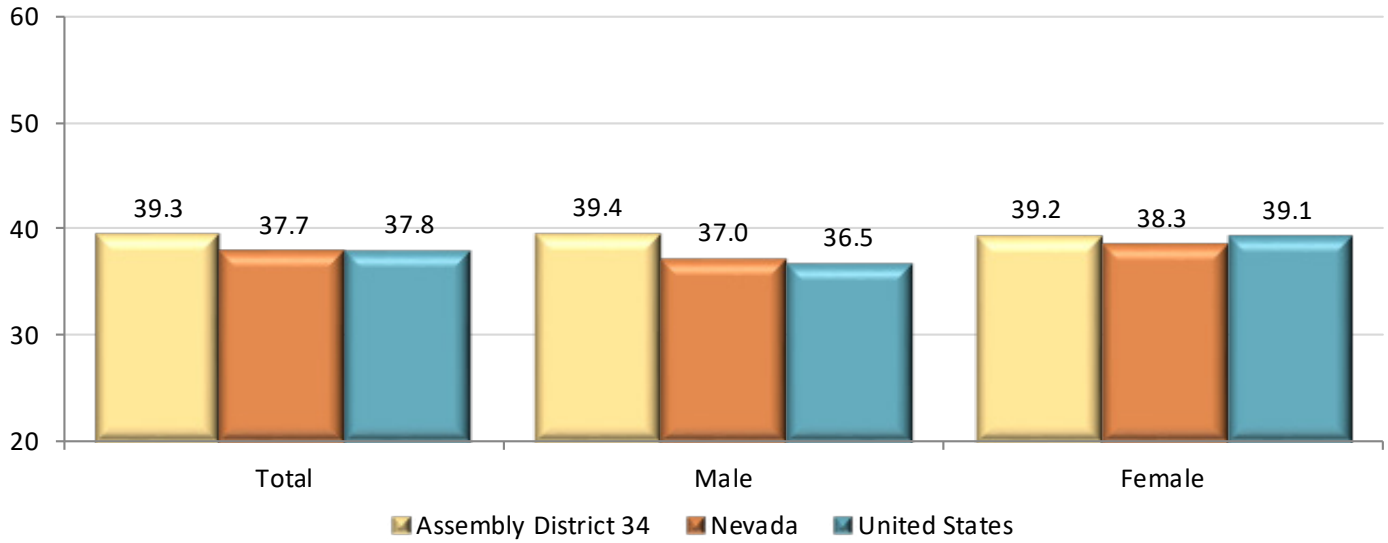
Chart 1—Population Distribution by Age



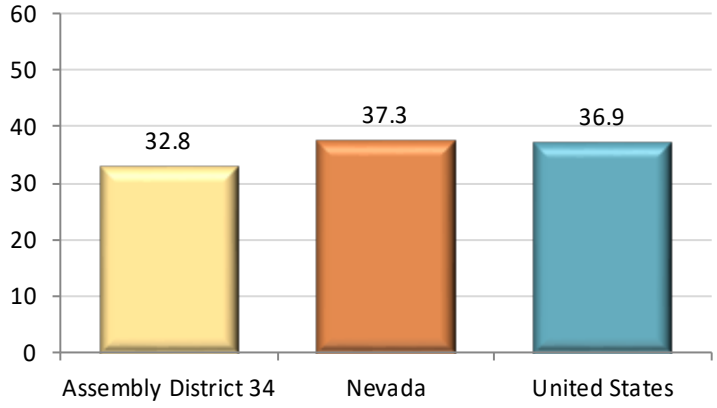
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



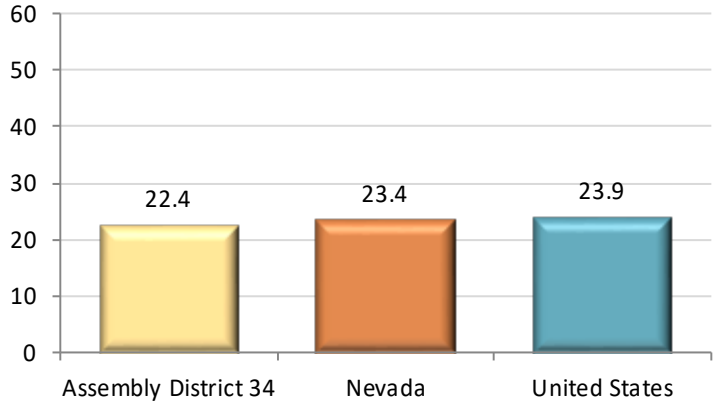
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

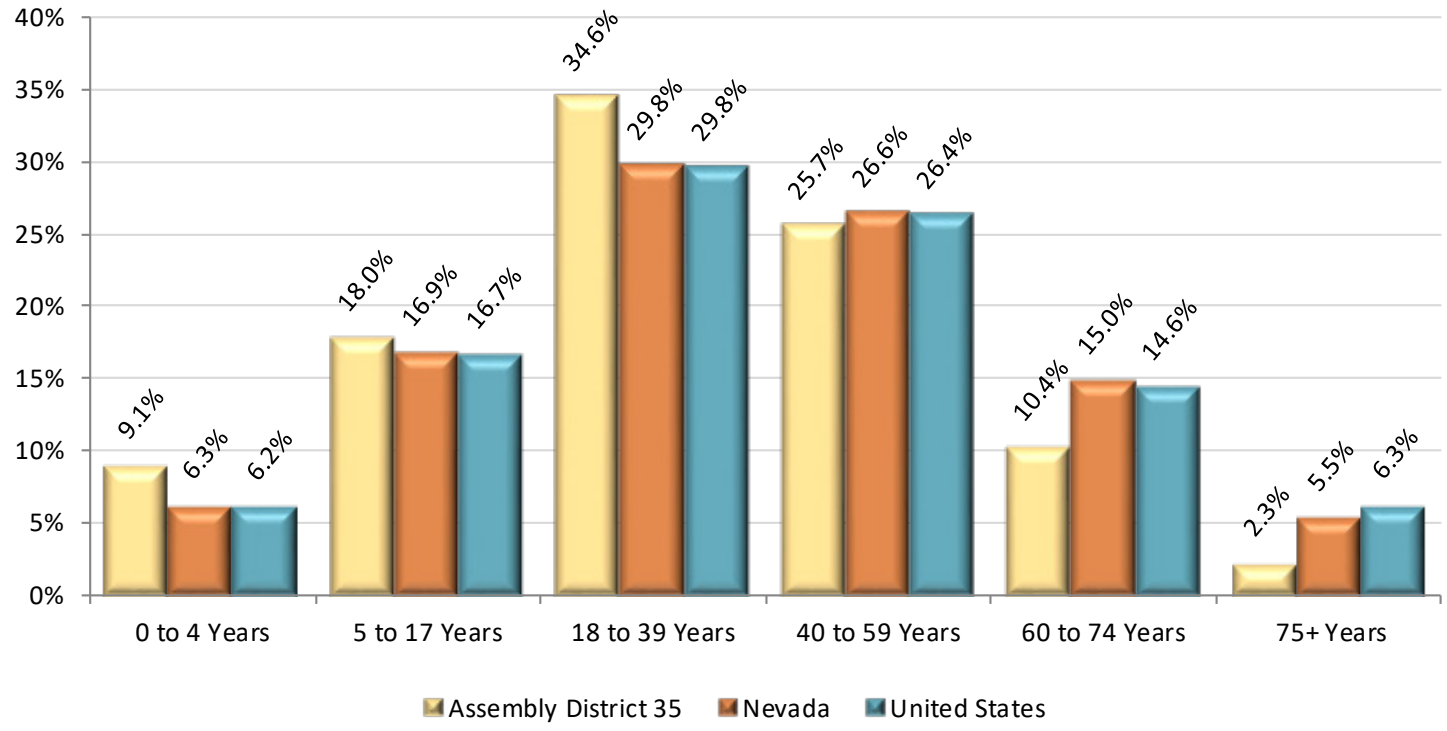
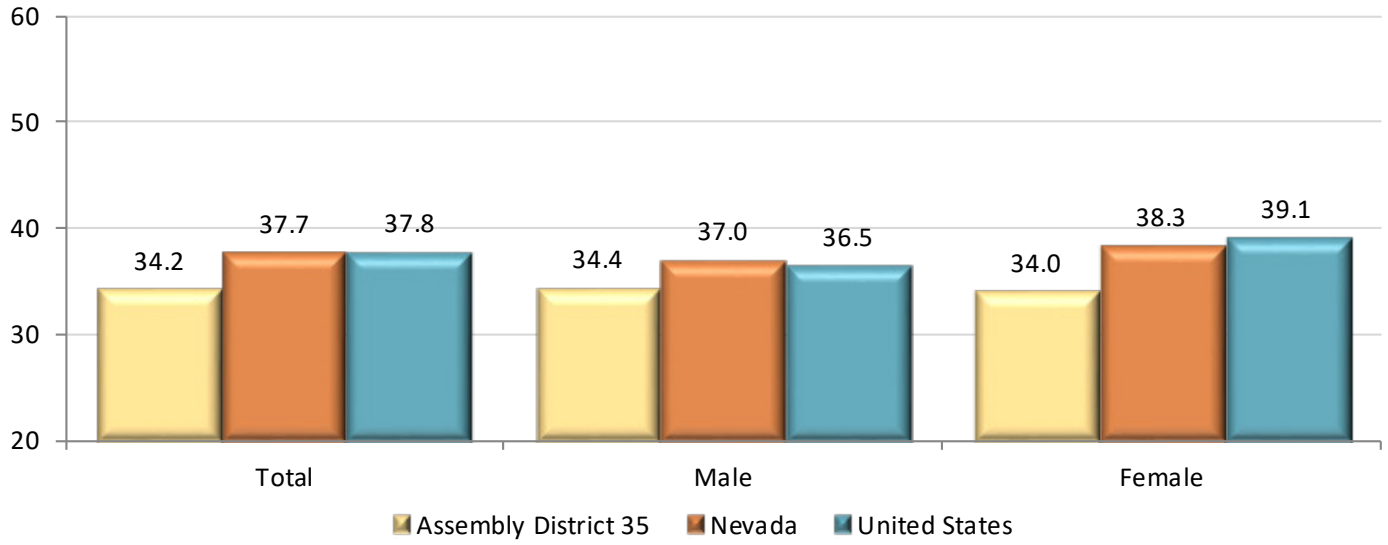
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



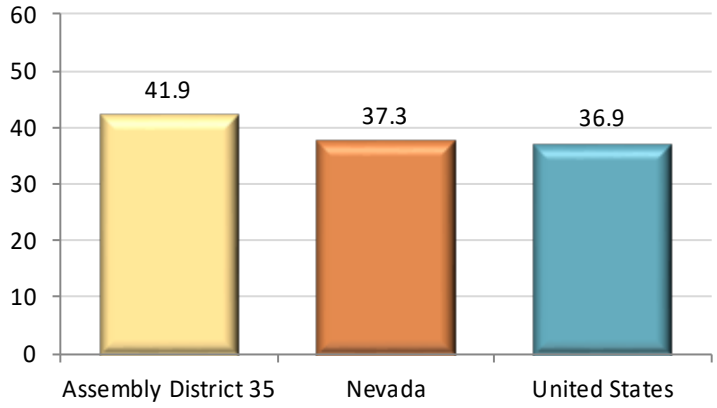
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



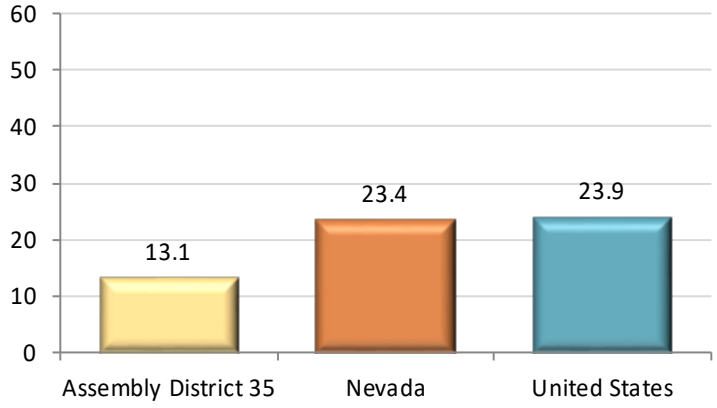
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

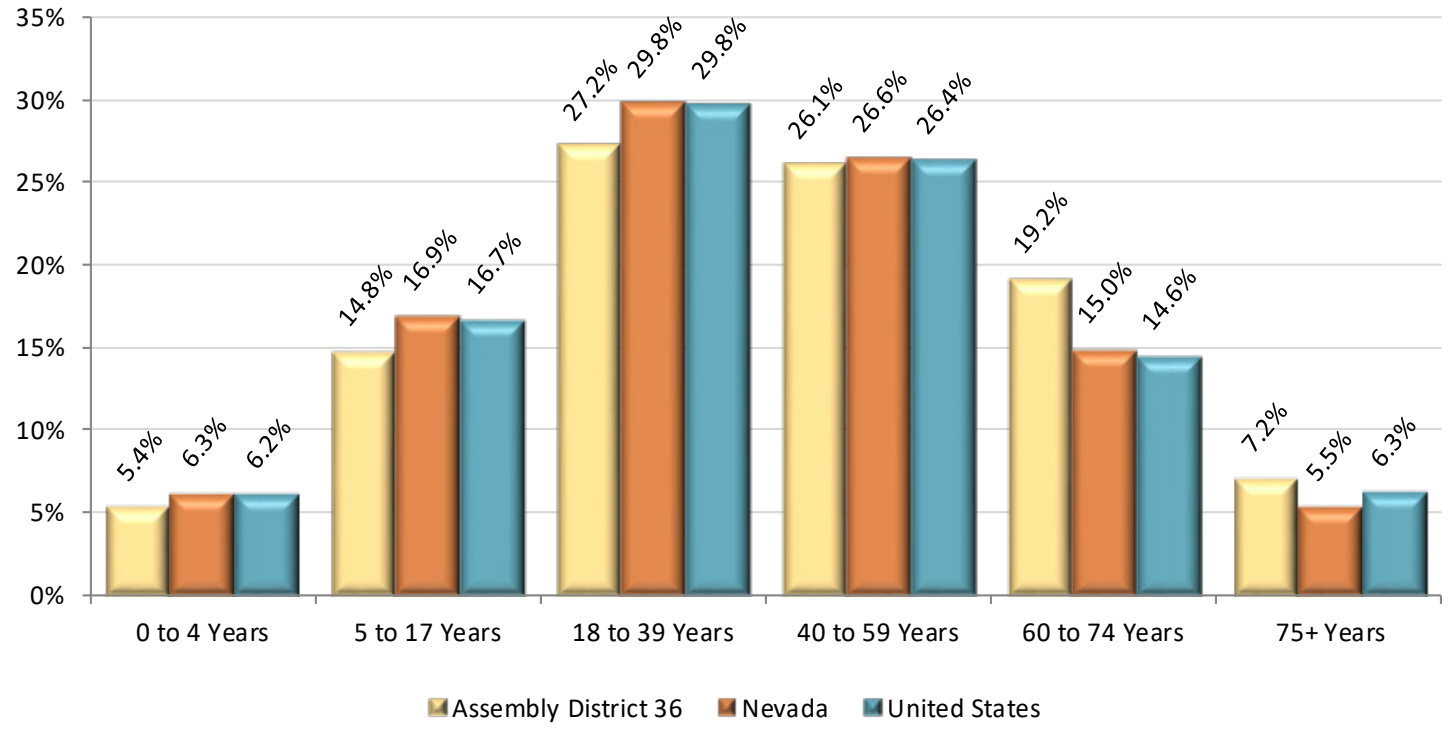
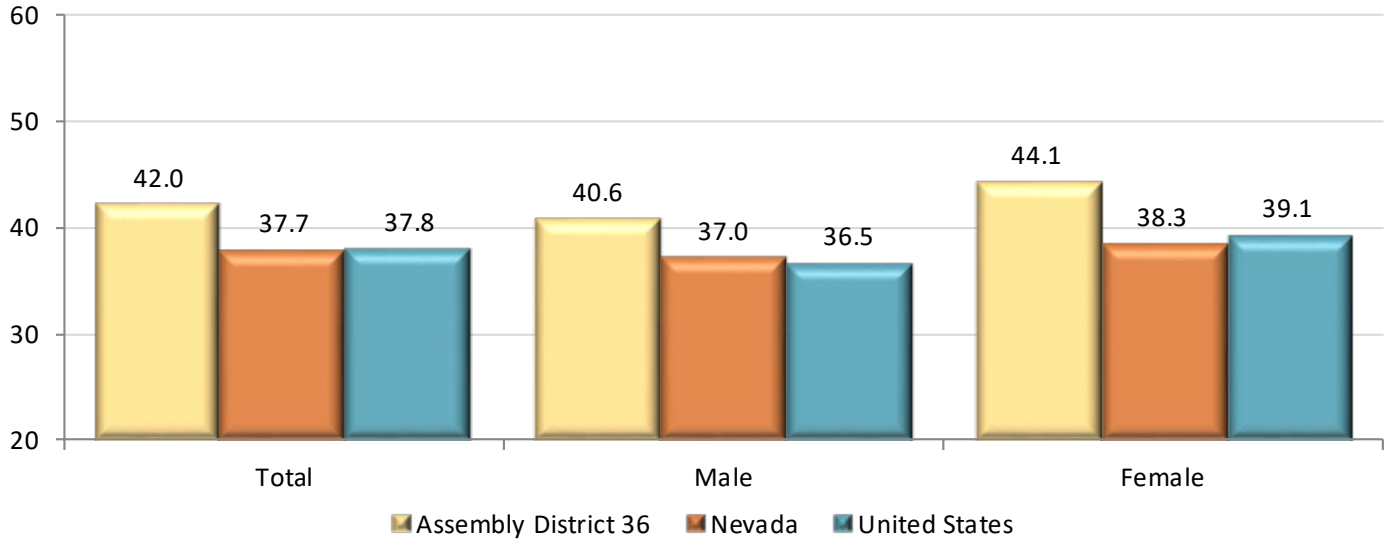
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



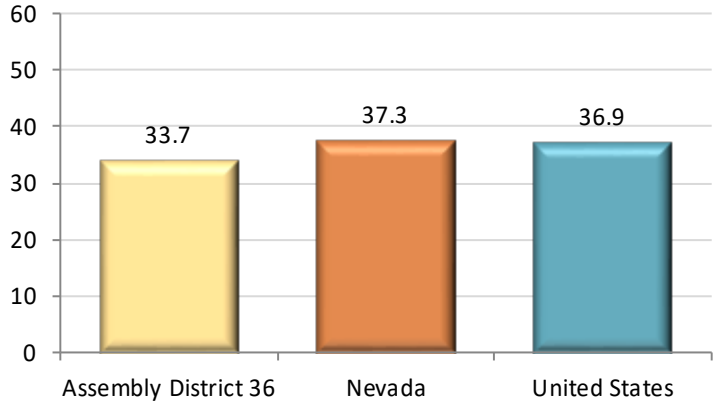
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



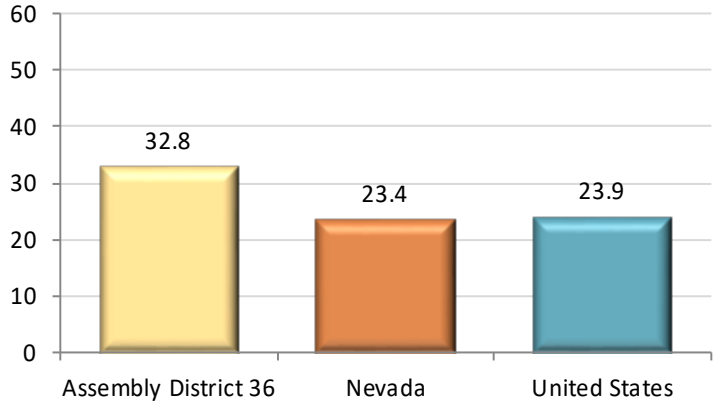
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

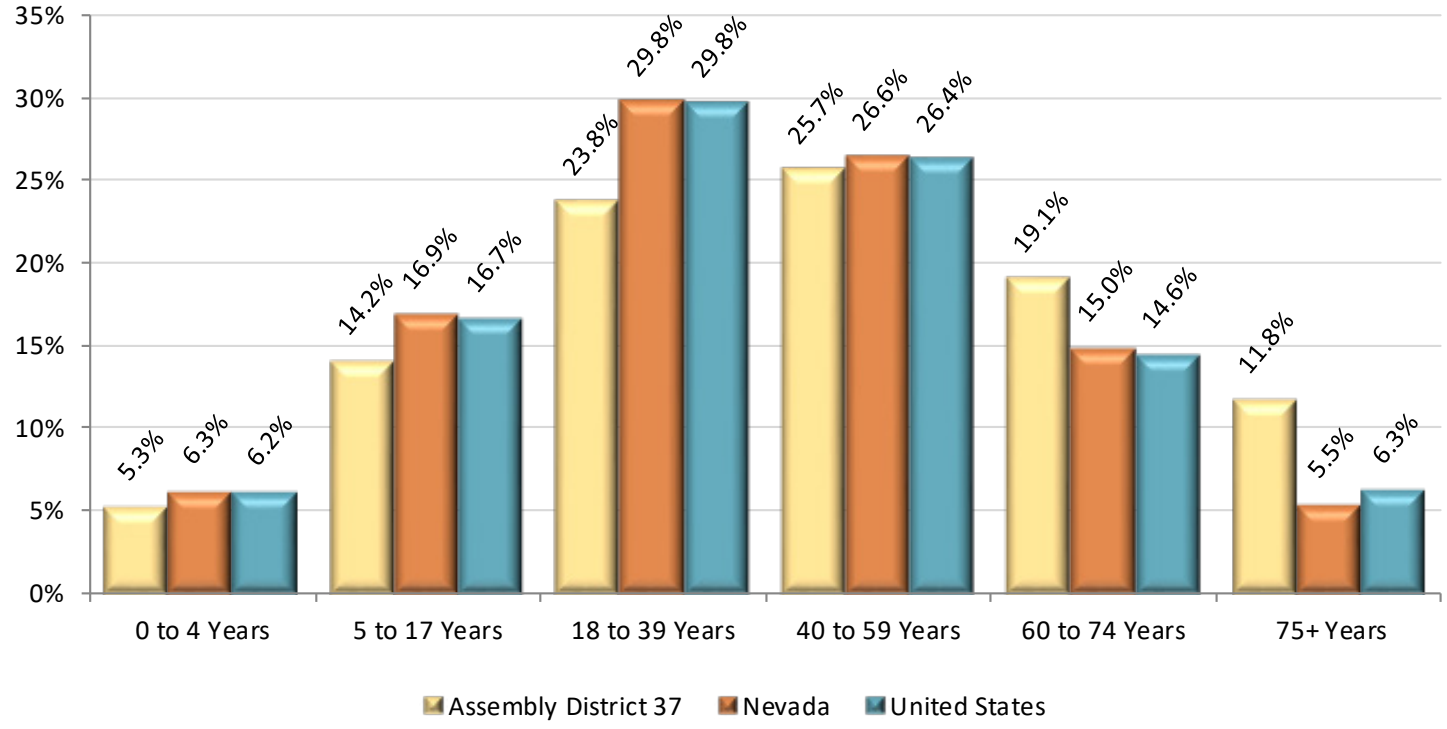
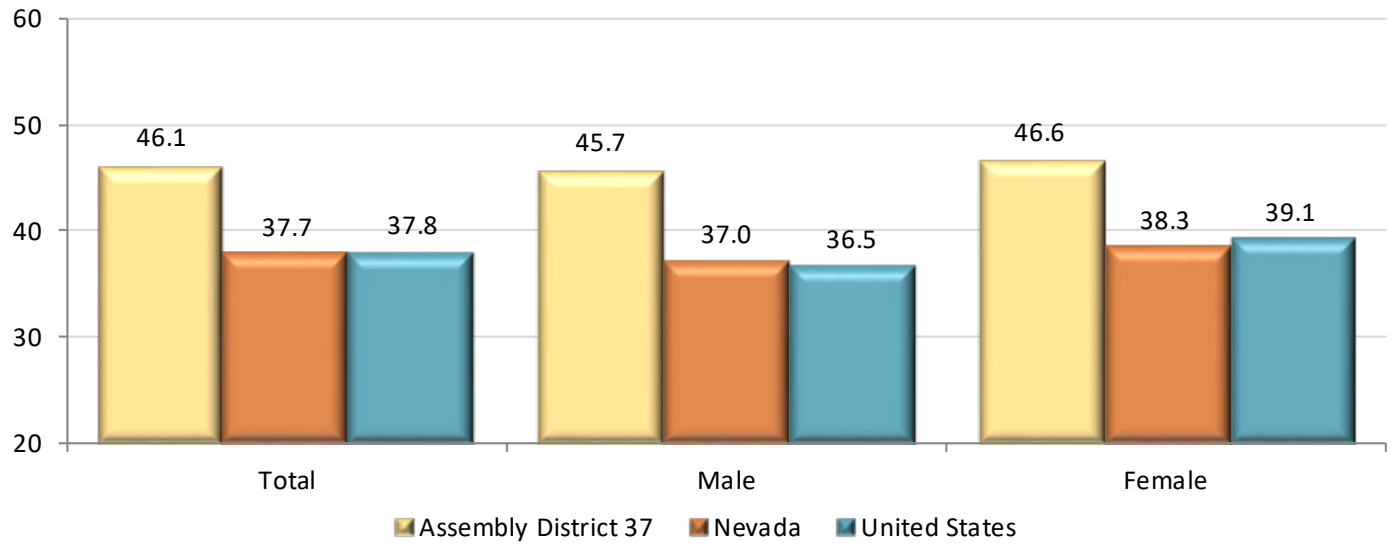
Chart 1—Population Distribution by Age



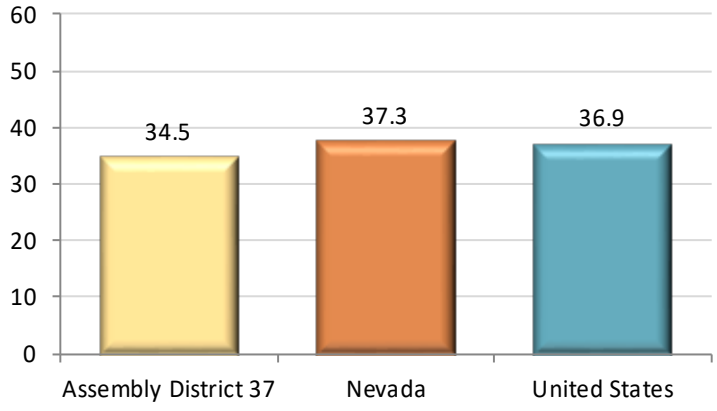
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



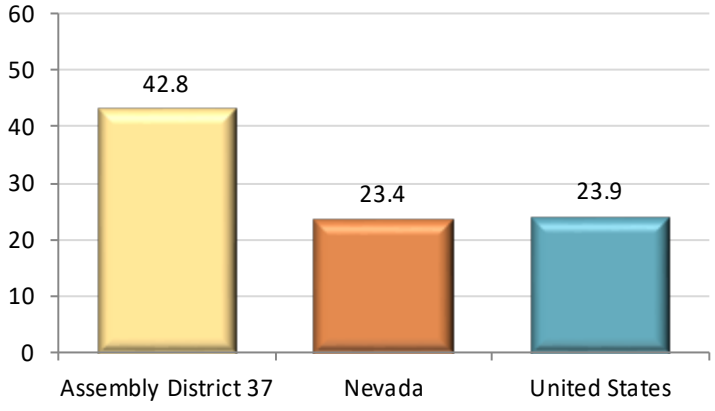
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

District Map 30

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 38

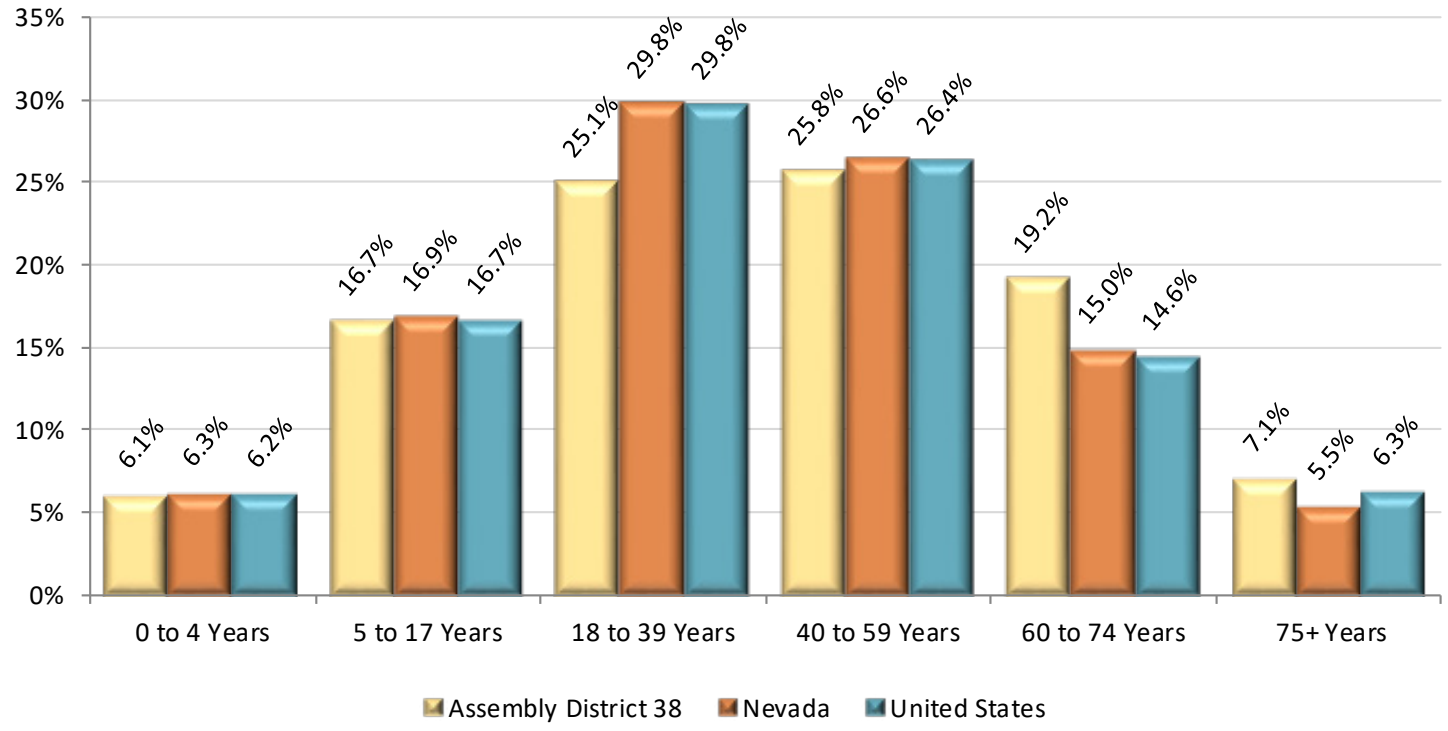
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 38	63,537	32,151	50.6%	31,386	49.4%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

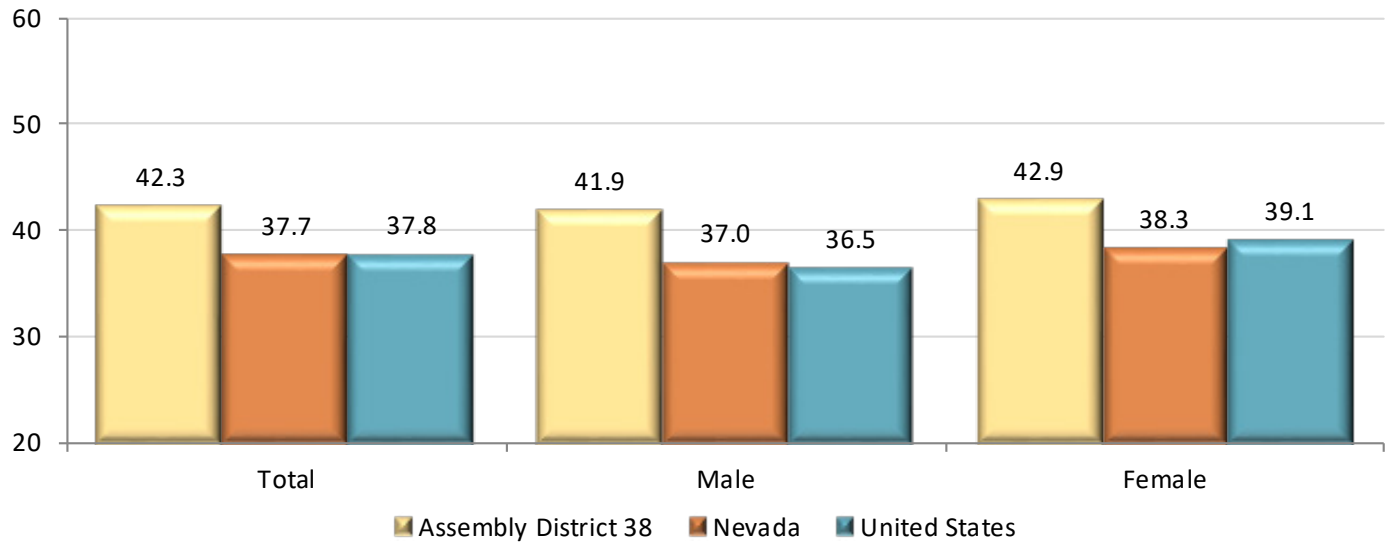
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 38	3,902	10,582	15,917	16,388	12,230	4,518
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



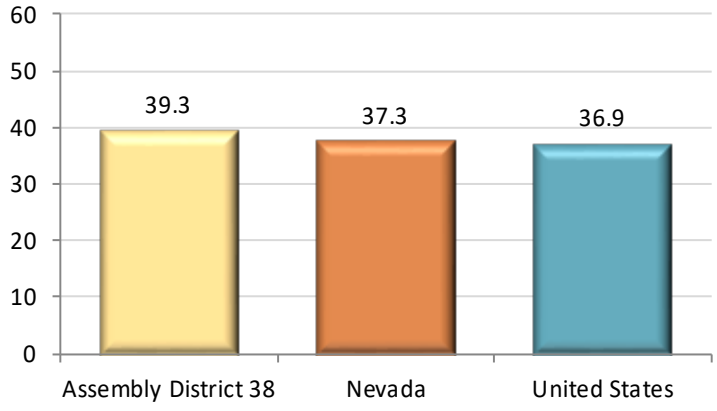
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



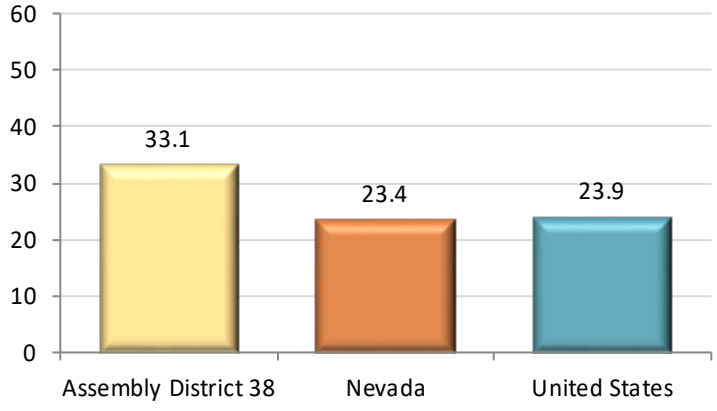
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Assembly District 39

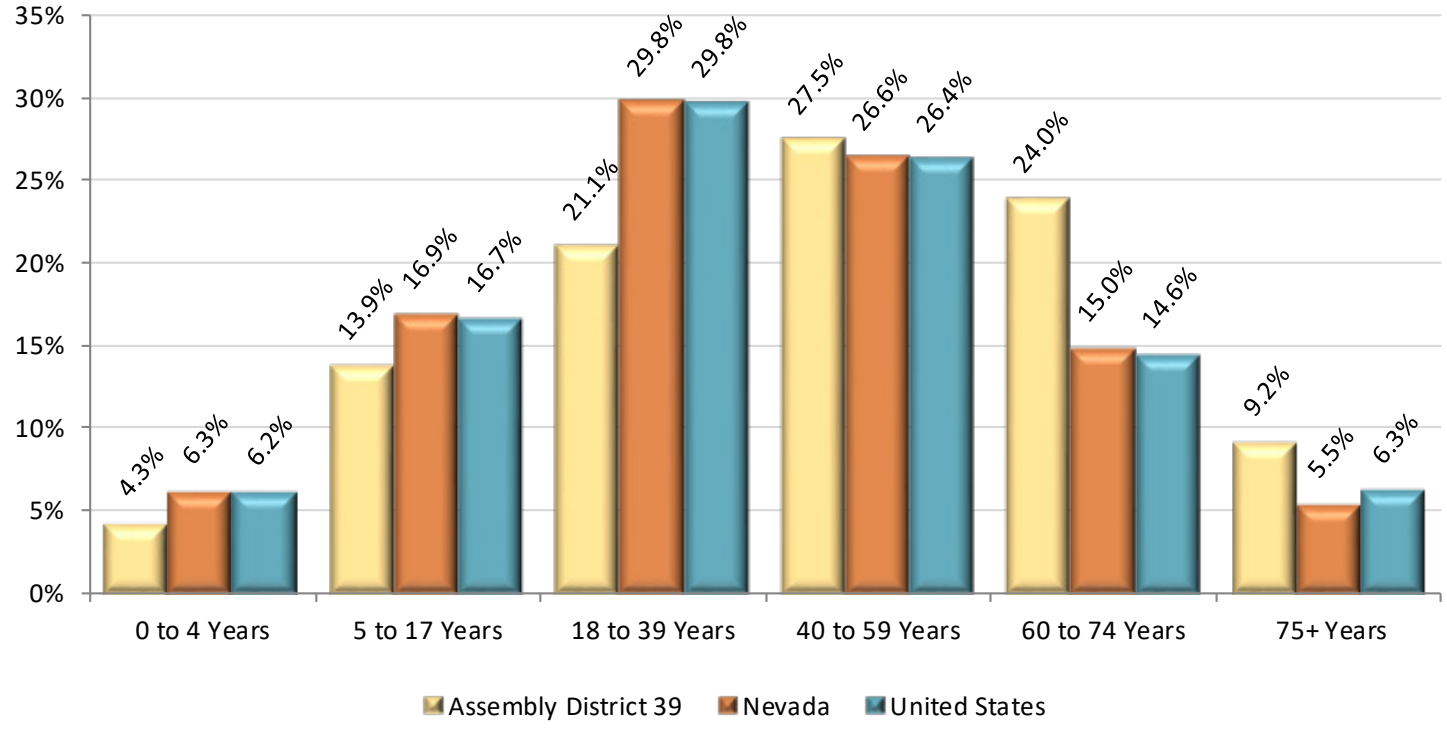
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Assembly District 39	64,311	32,367	50.3%	31,944	49.7%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

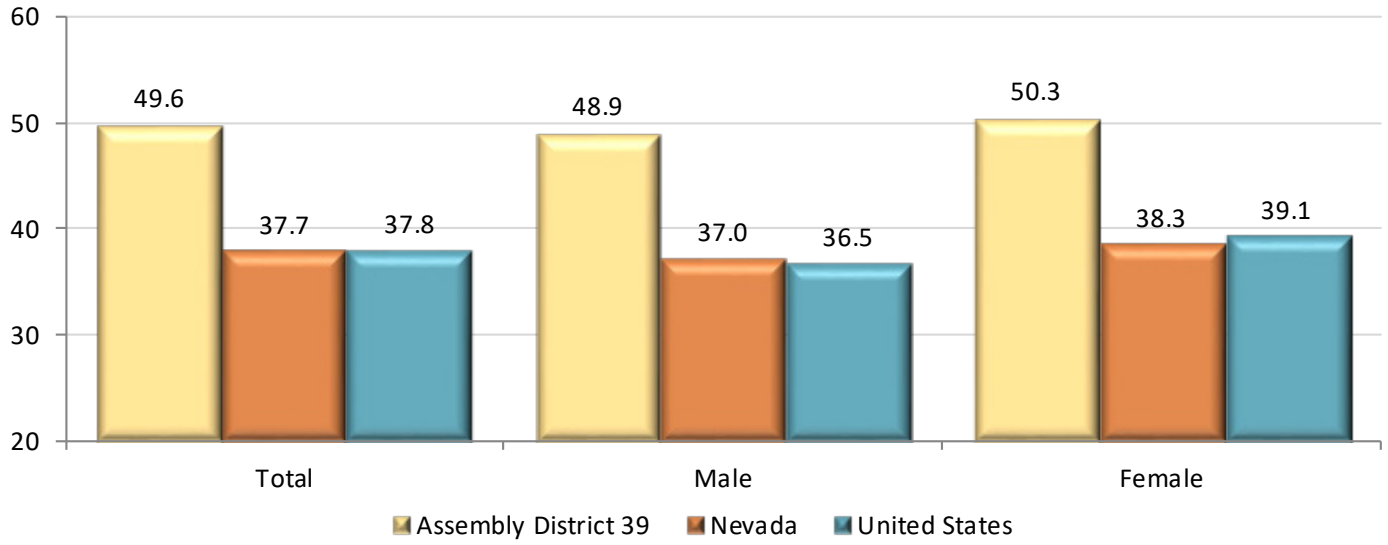
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Assembly District 39	2,769	8,910	13,583	17,697	15,429	5,923
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



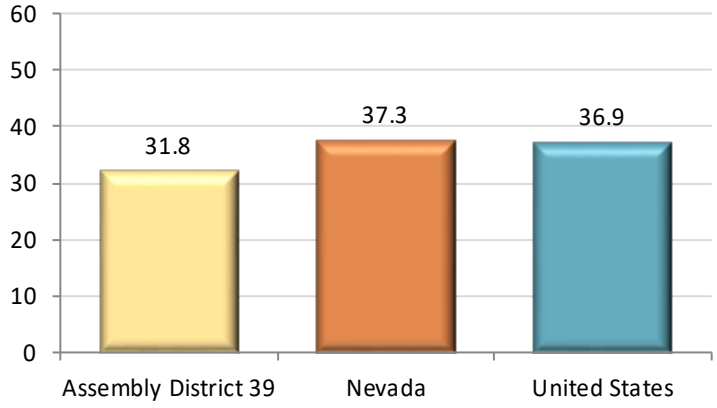
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



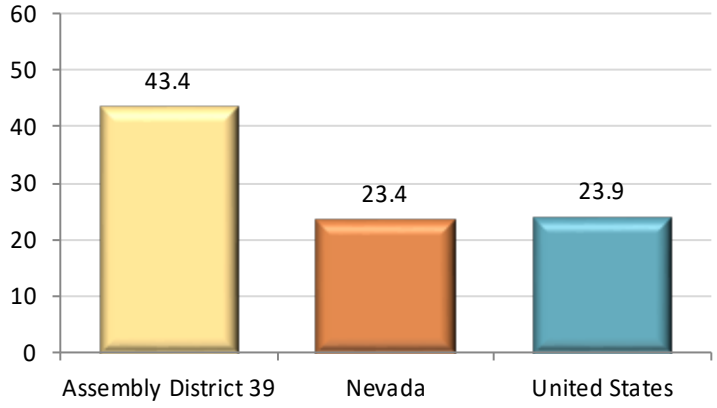
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

*The median is the value separating the higher half of a data set from the lower half when the data is arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.
**Nonfamily Households include people who live alone or nonrelatives living together, such as unmarried partners or roommates.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

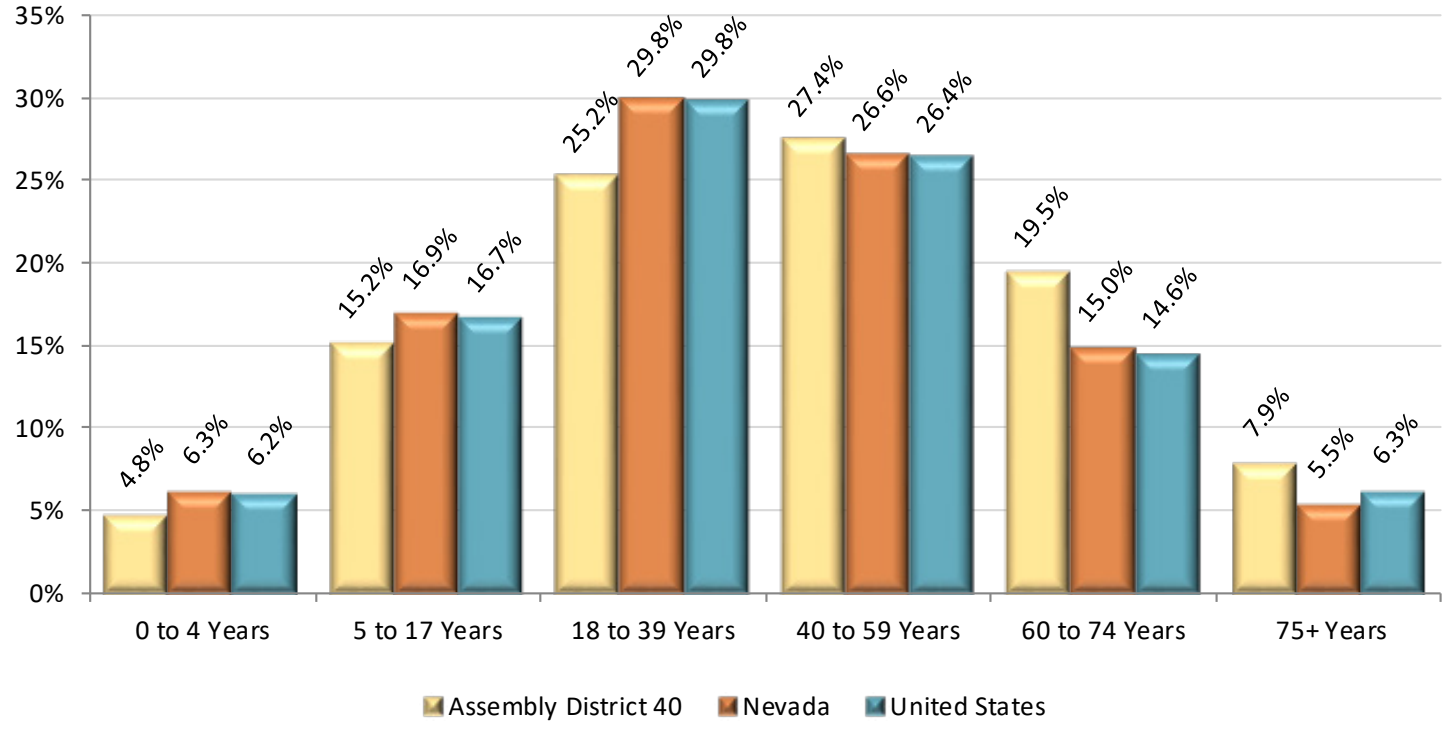
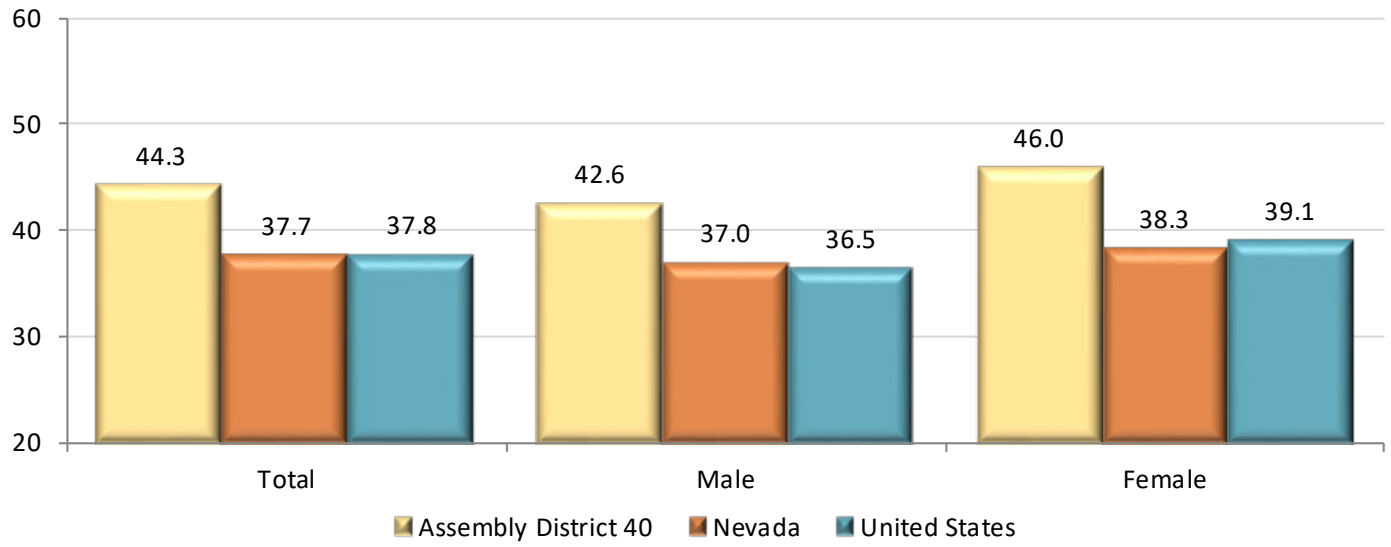
Chart 1—Population Distribution by Age



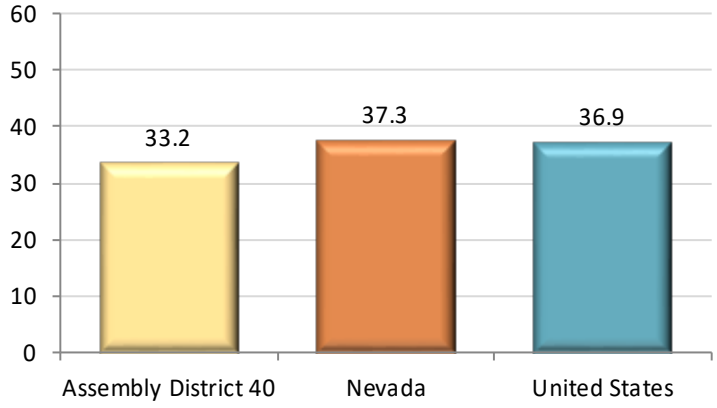
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



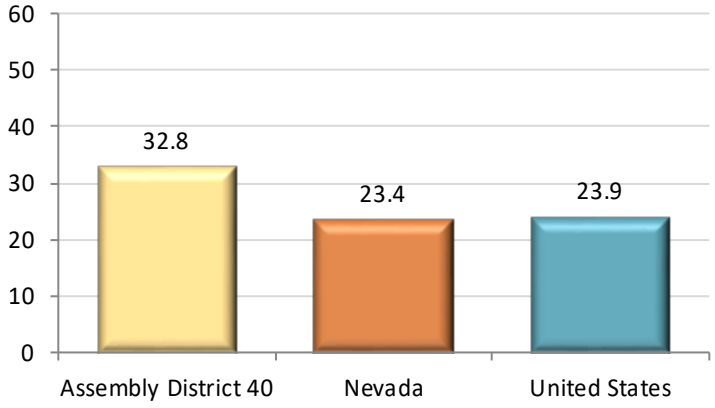
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

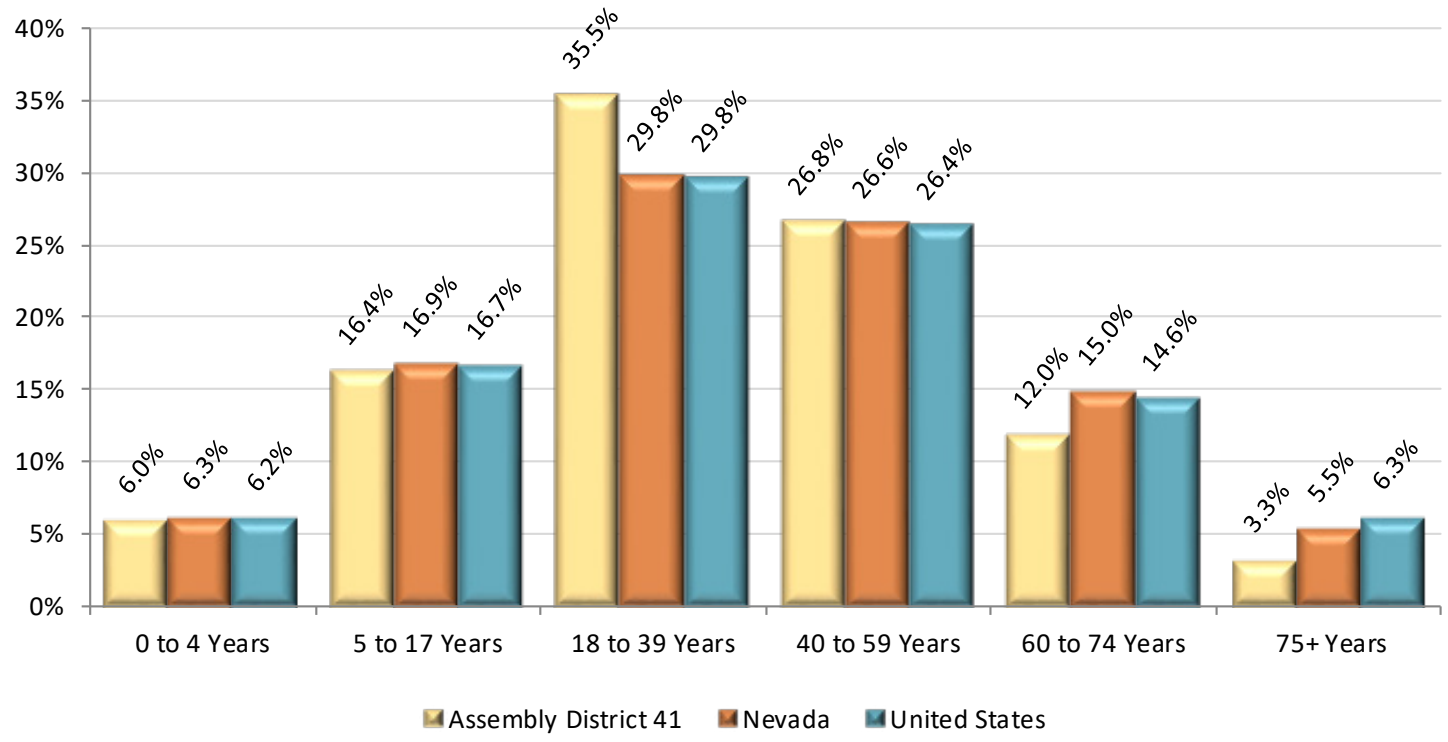
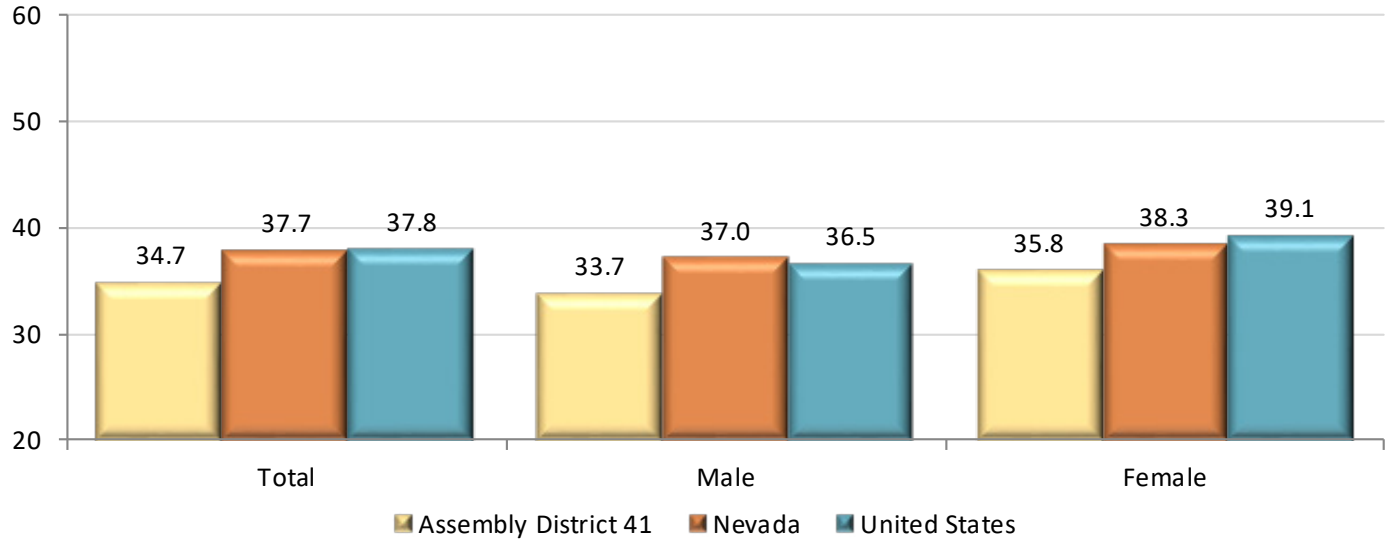
Chart 1—Population Distribution by Age



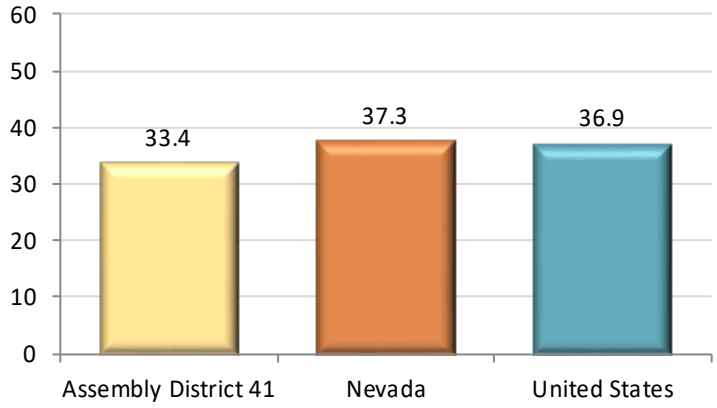
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



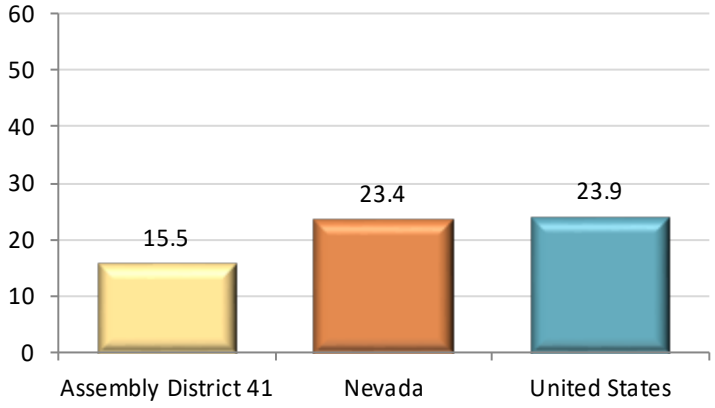
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

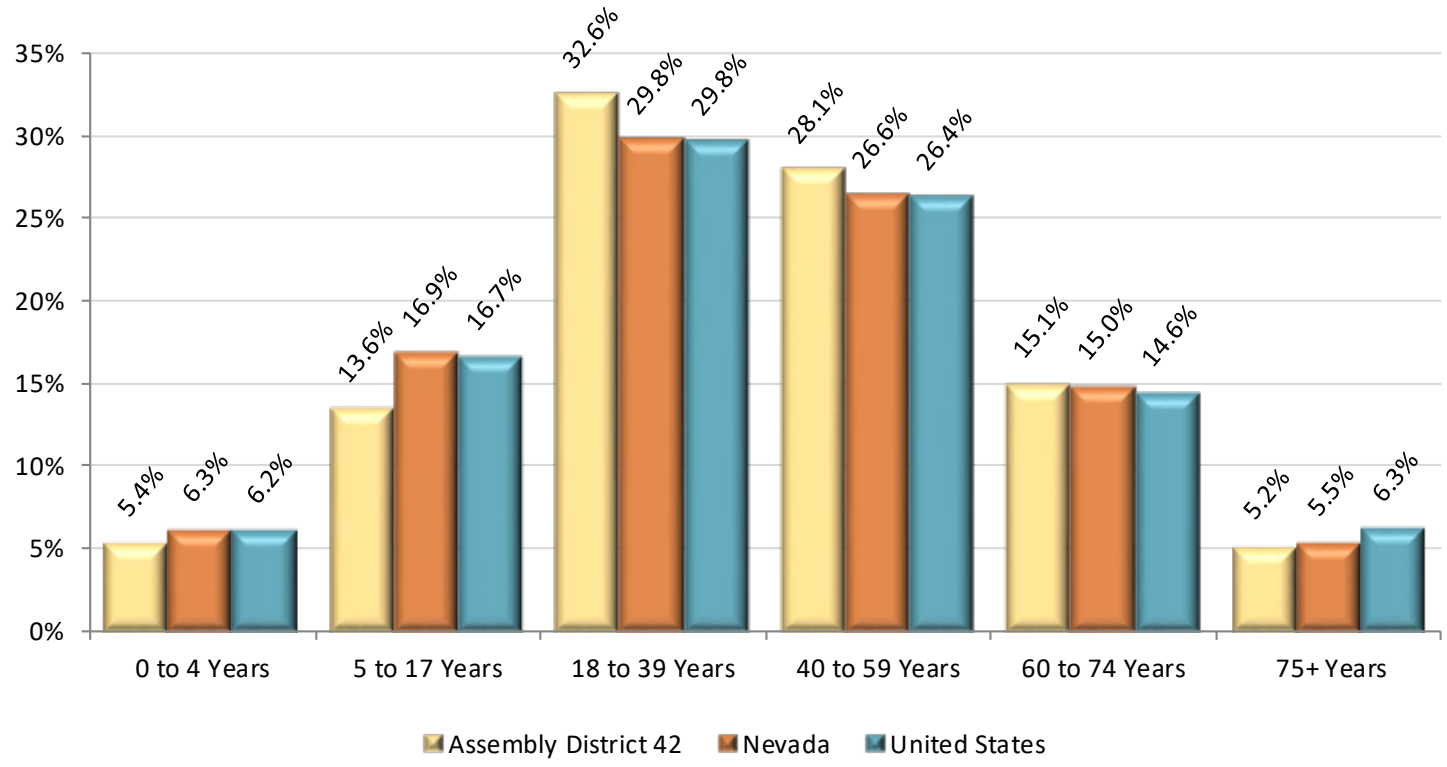
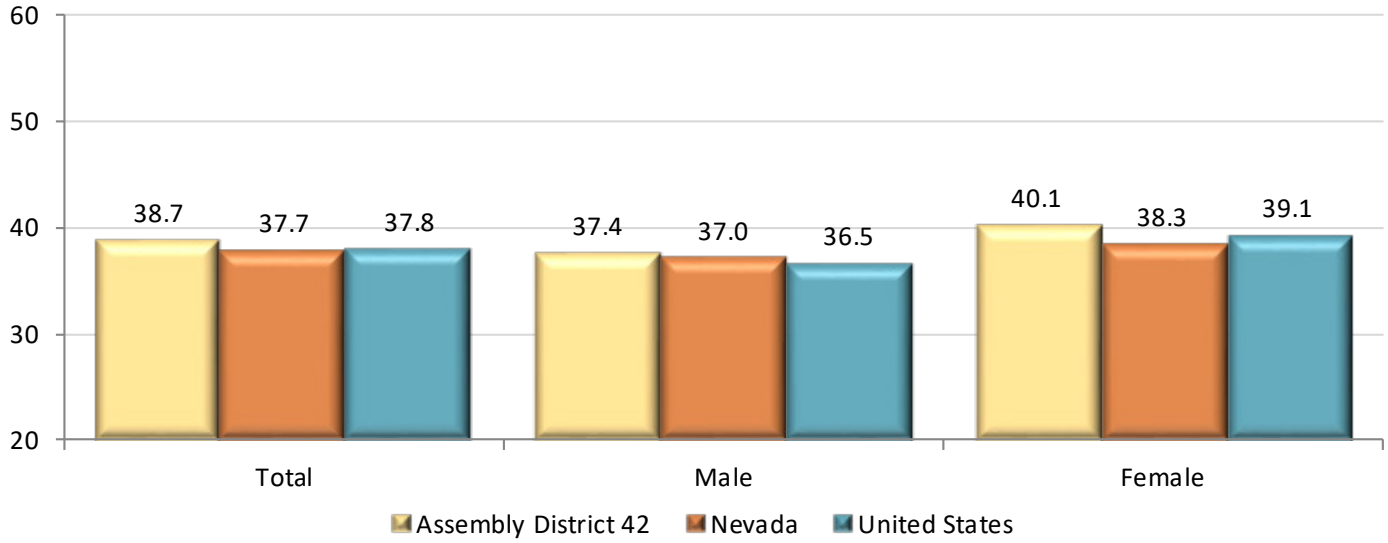
Chart 1—Population Distribution by Age



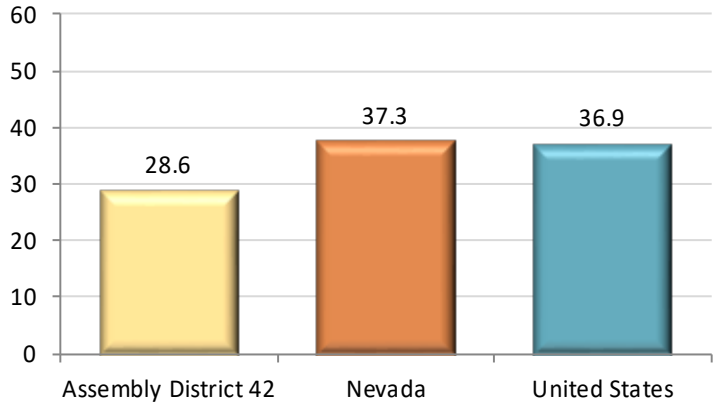
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



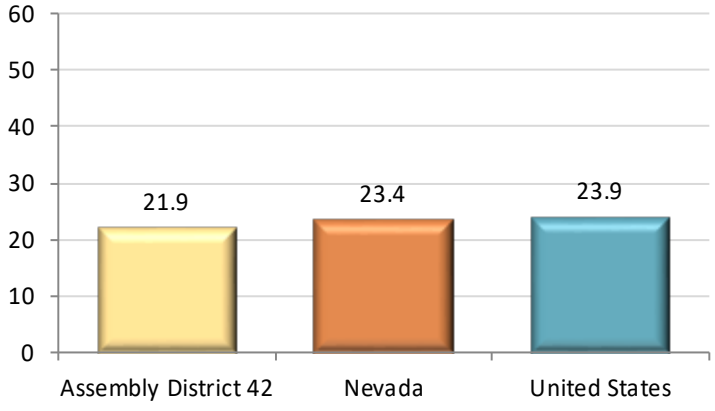
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Senate District 1

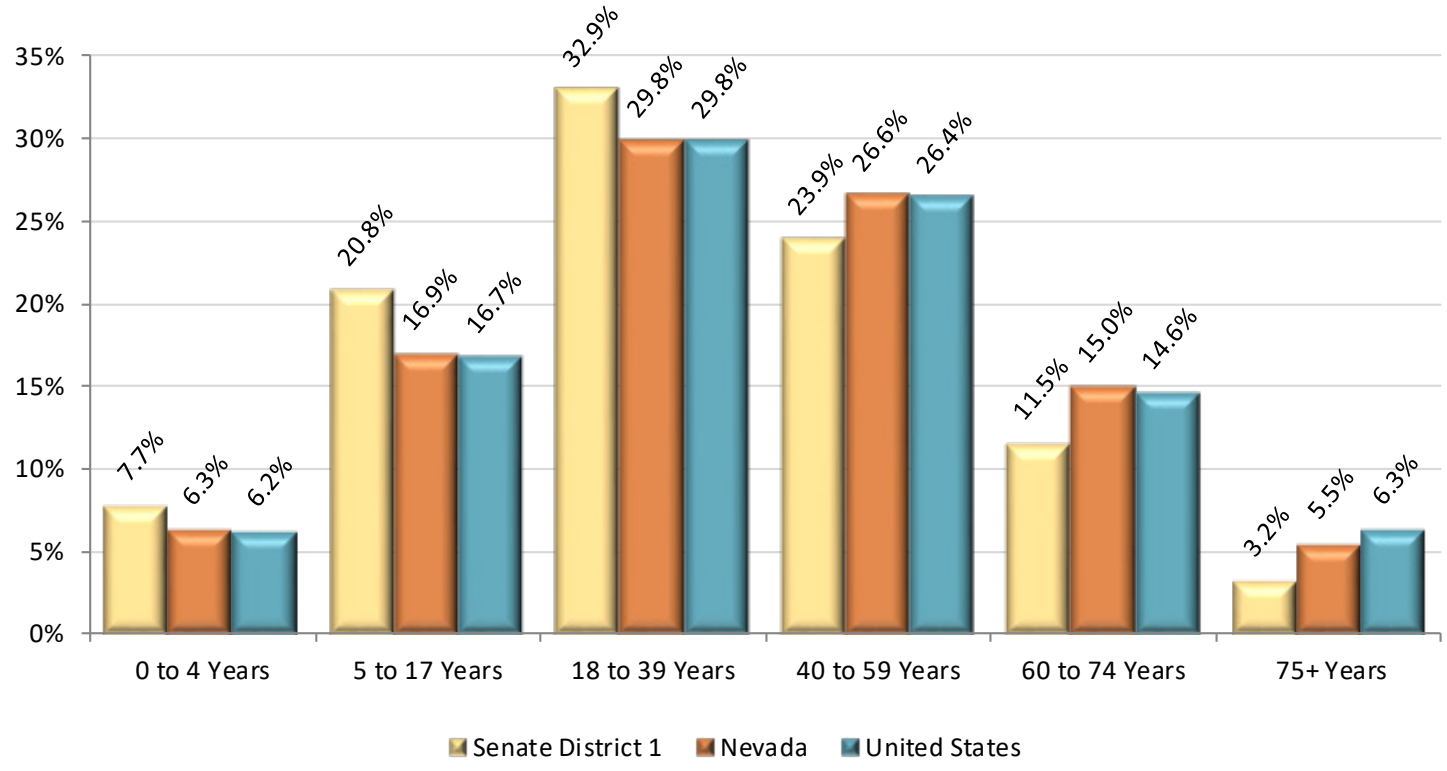
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 1	148,755	73,030	49.1%	75,725	50.9%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

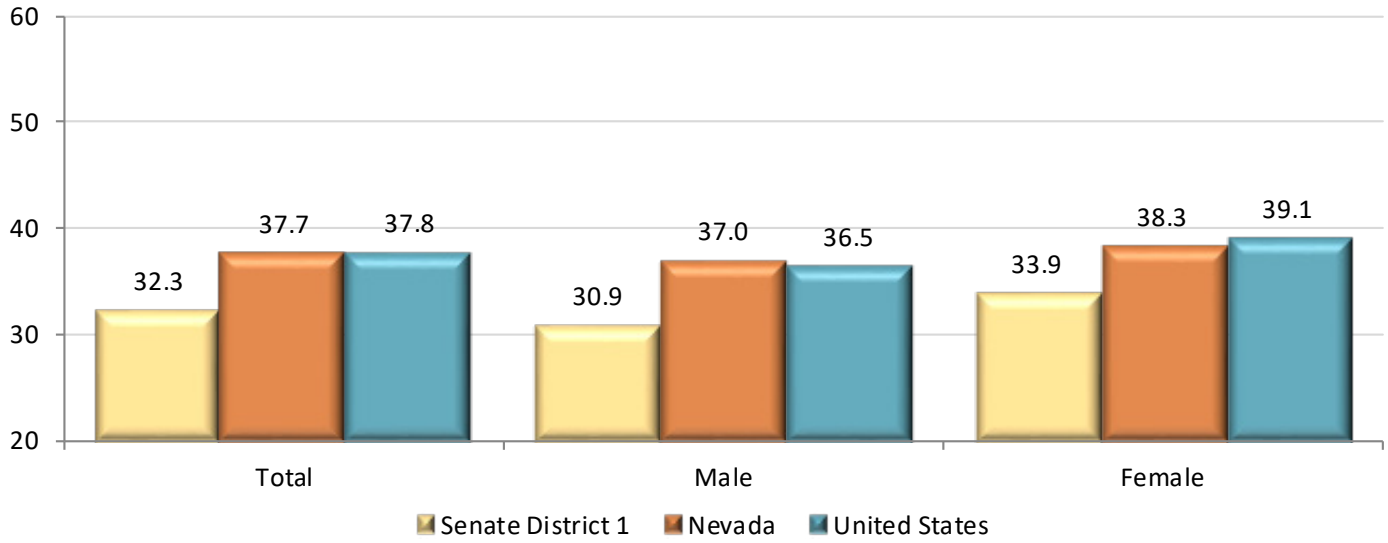
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 1	11,492	30,988	48,892	35,578	17,111	4,694
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



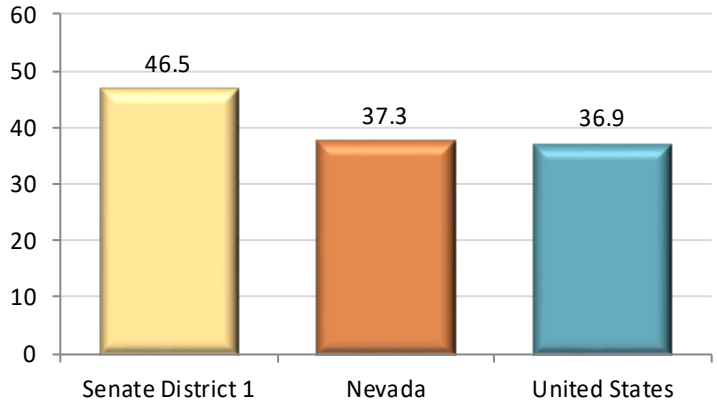
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



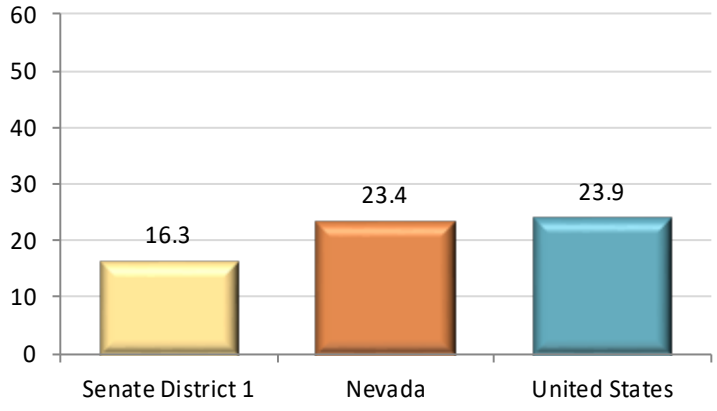
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

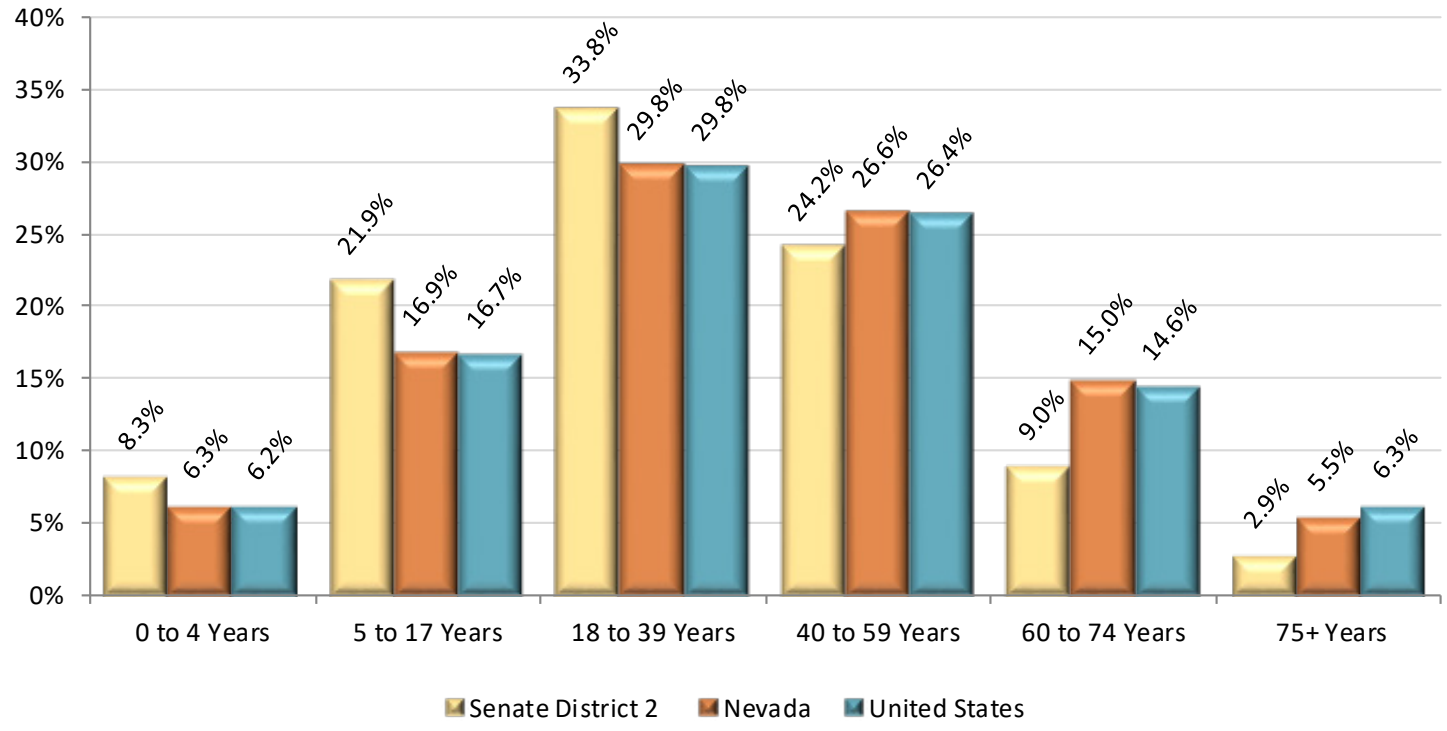
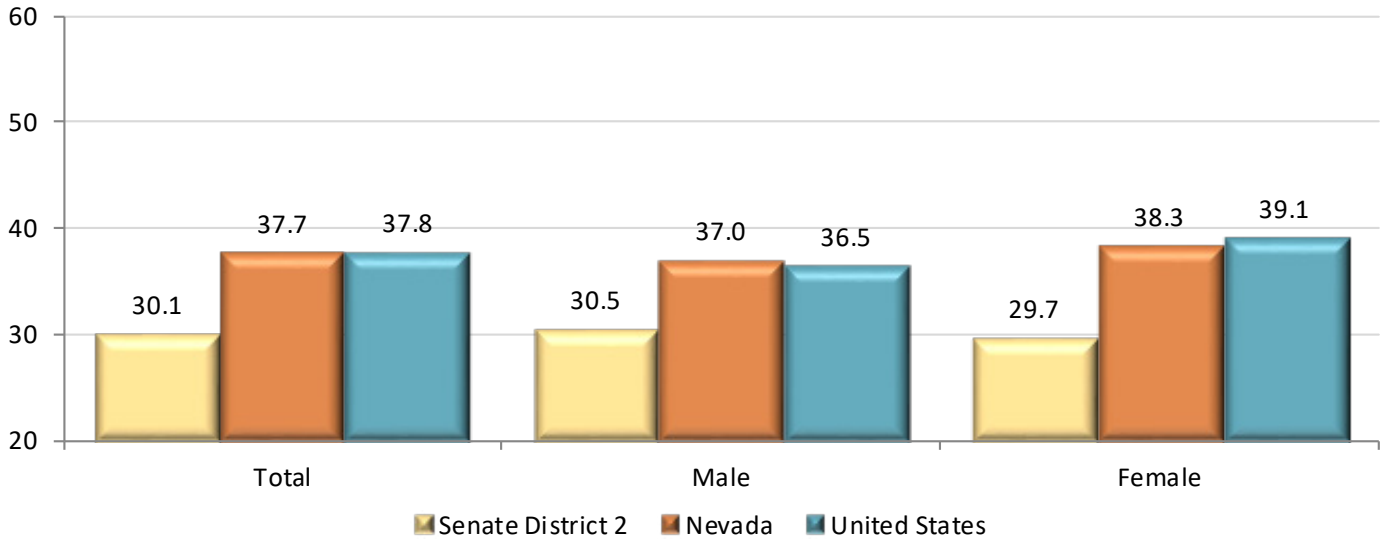
Chart 1—Population Distribution by Age



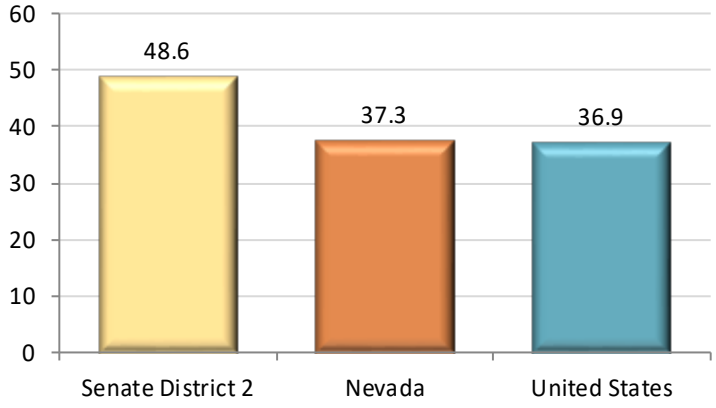
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



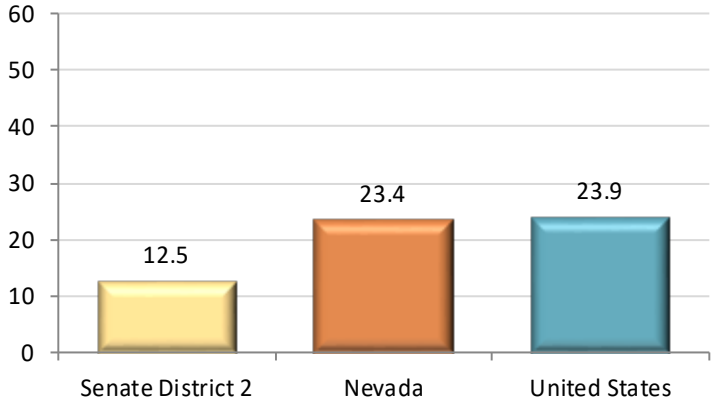
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

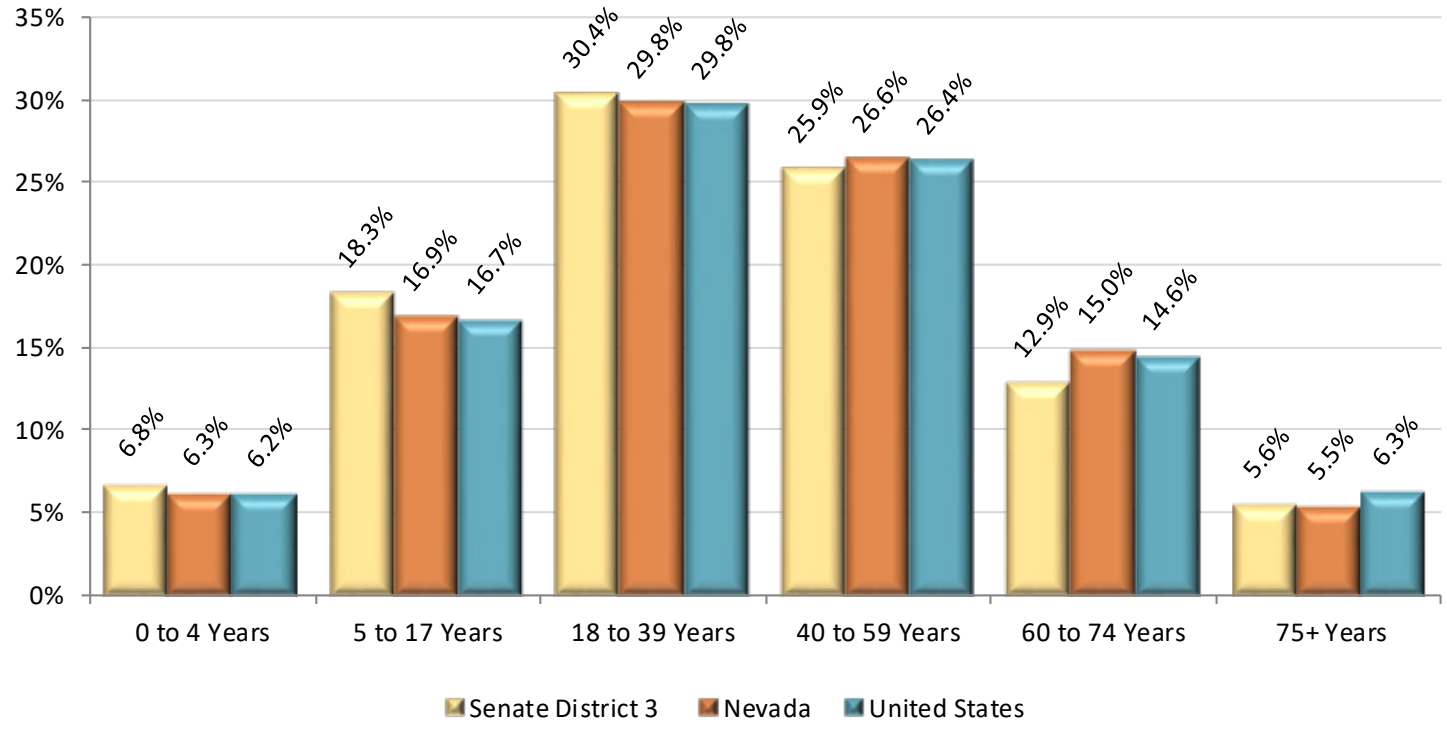
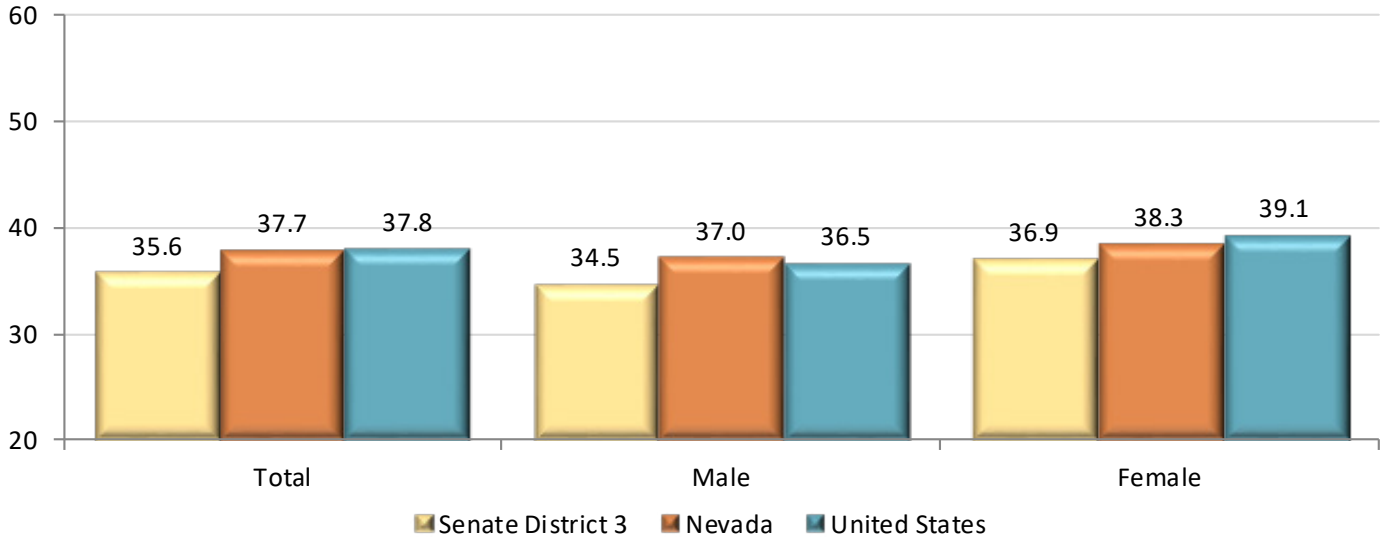
Chart 1—Population Distribution by Age



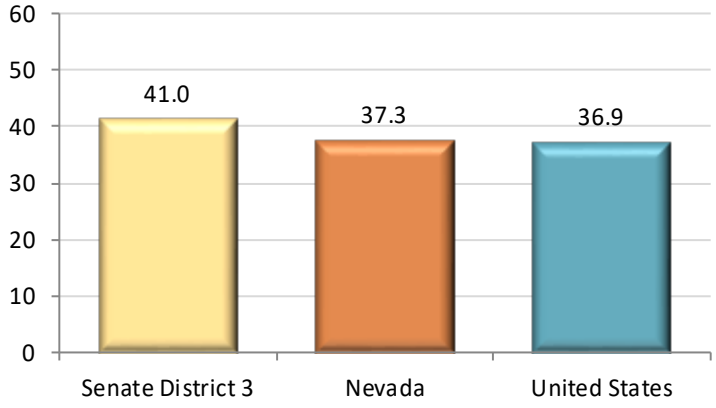
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



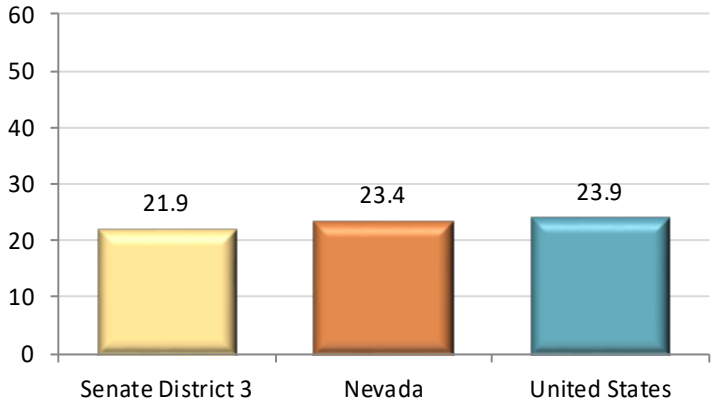
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

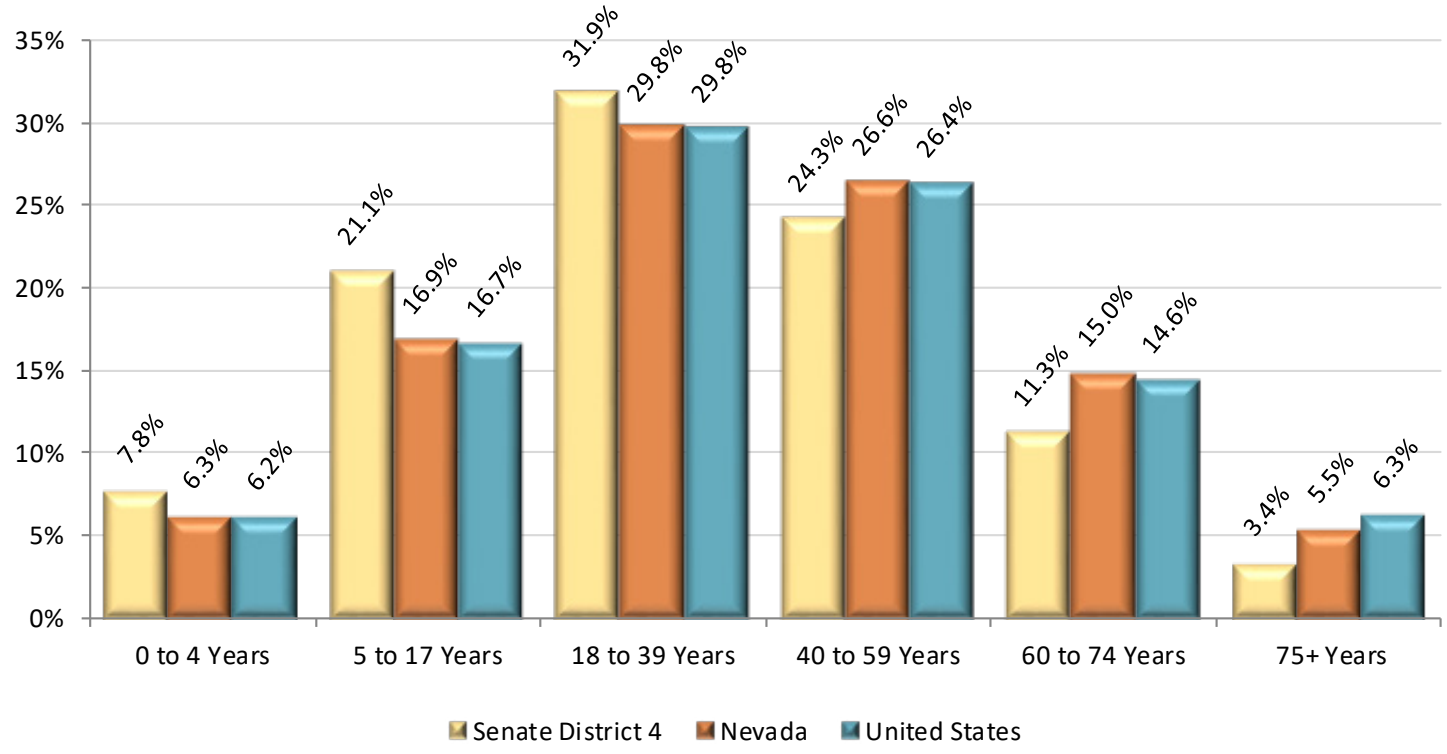
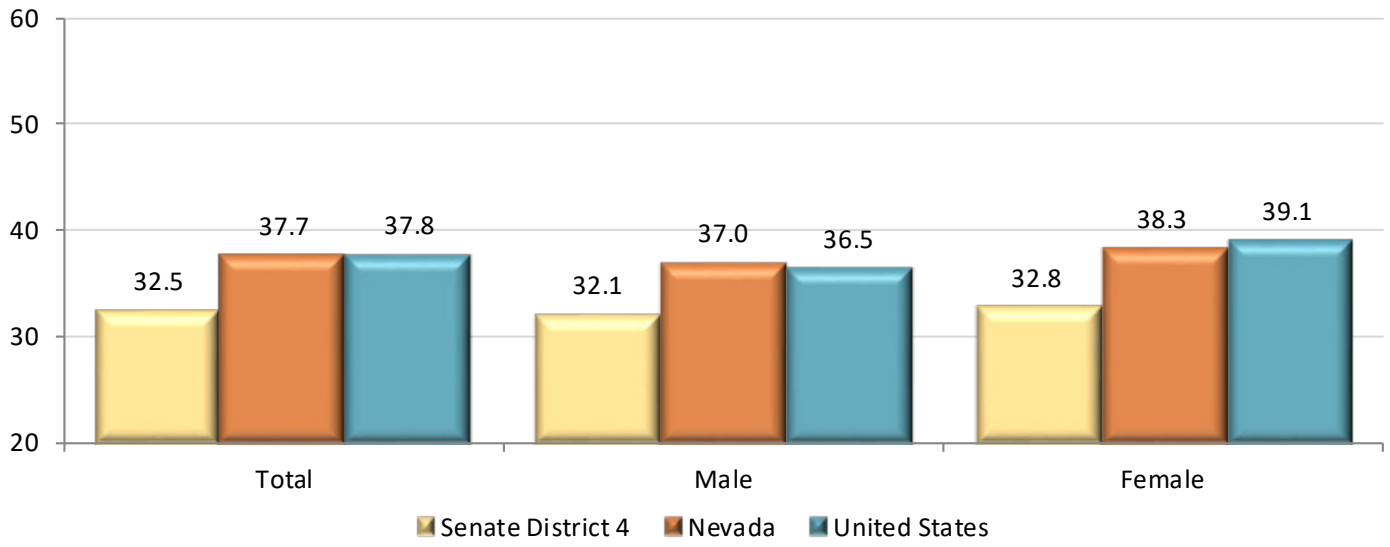
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



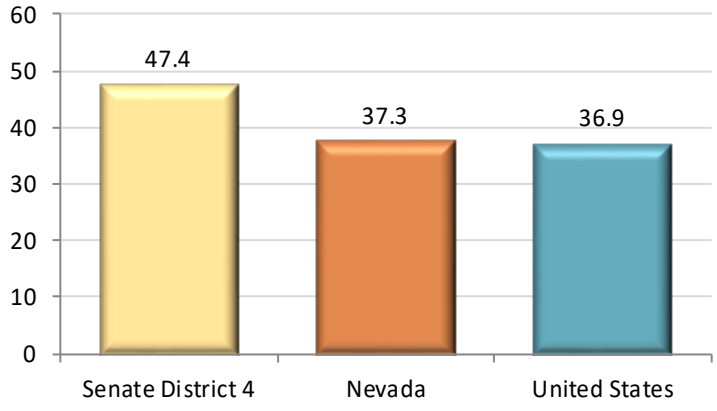
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



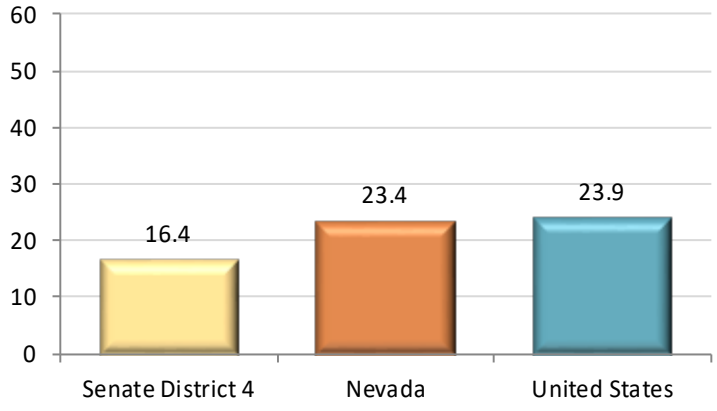
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

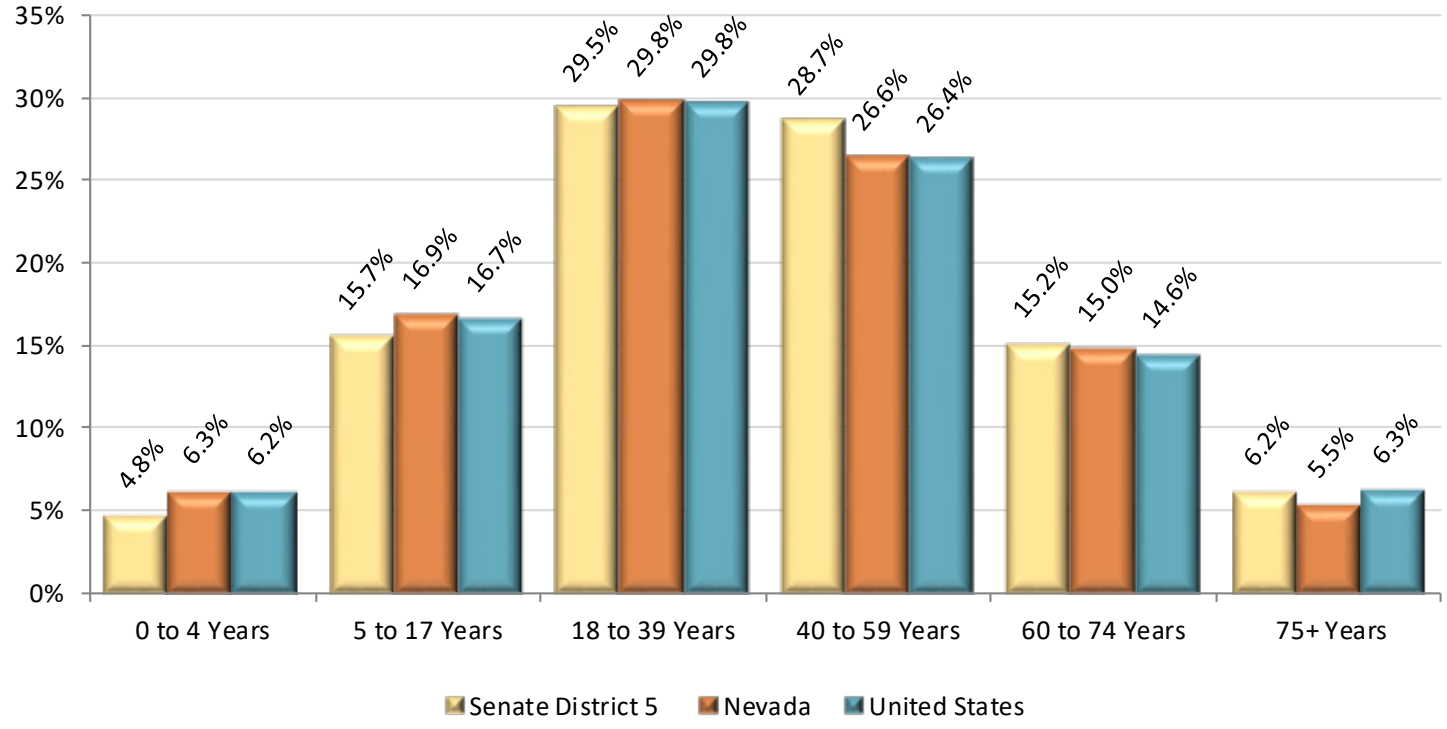
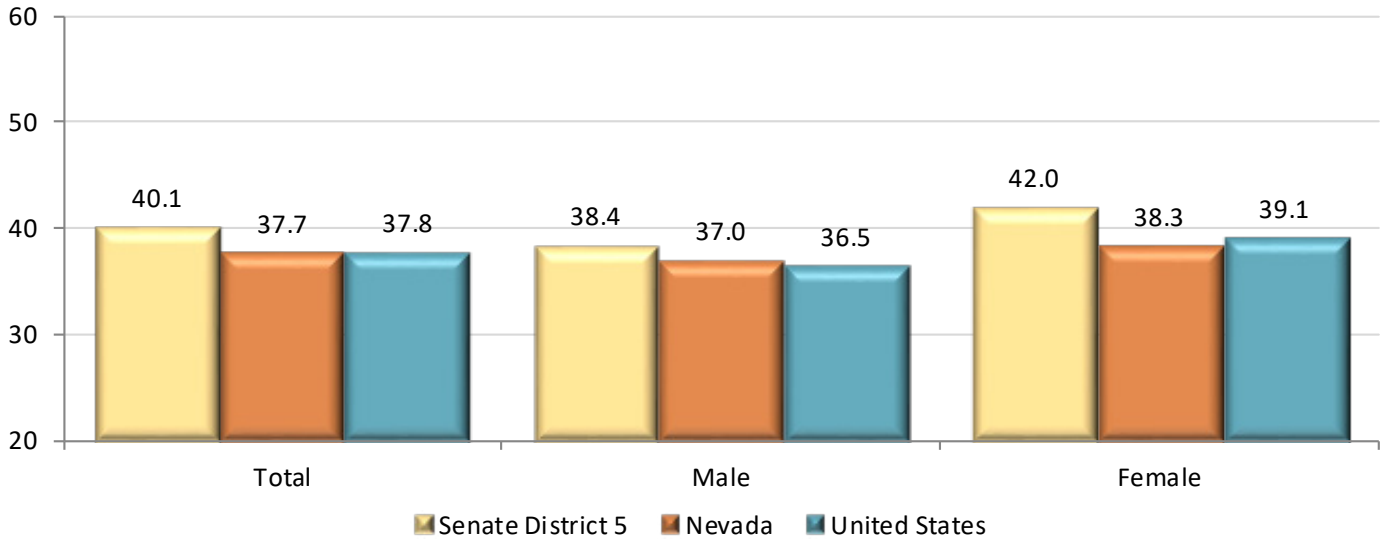
Chart 1—Population Distribution by Age



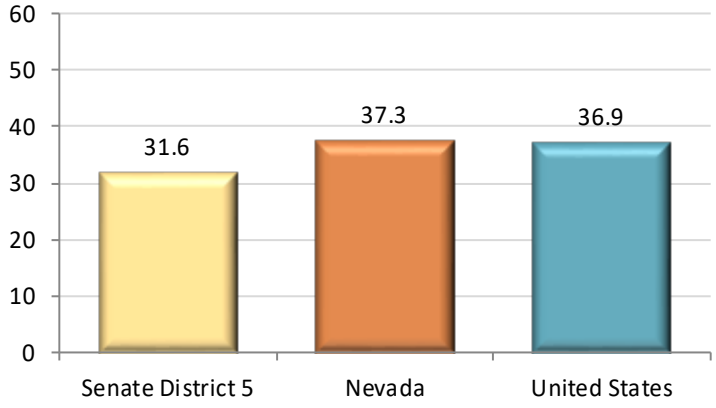
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



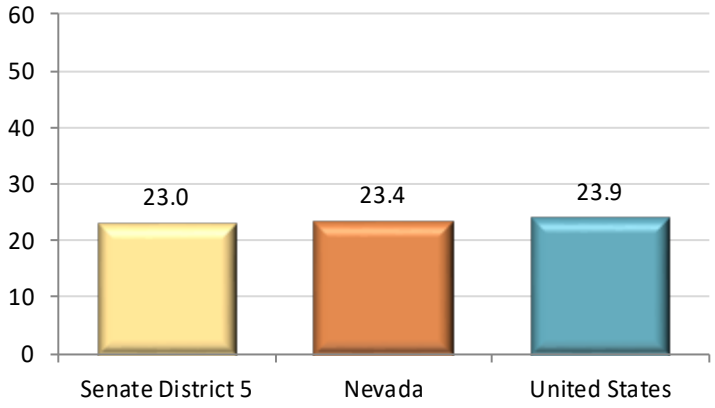
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

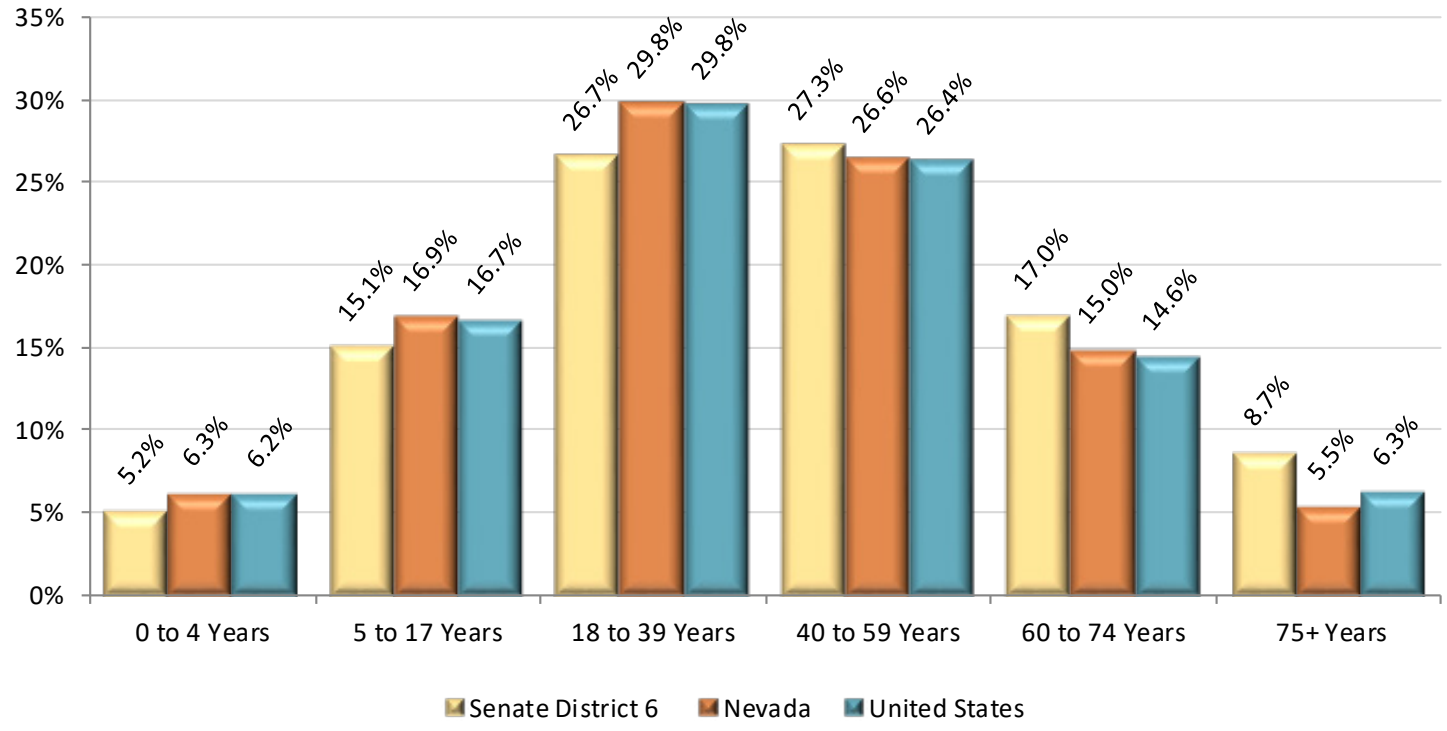
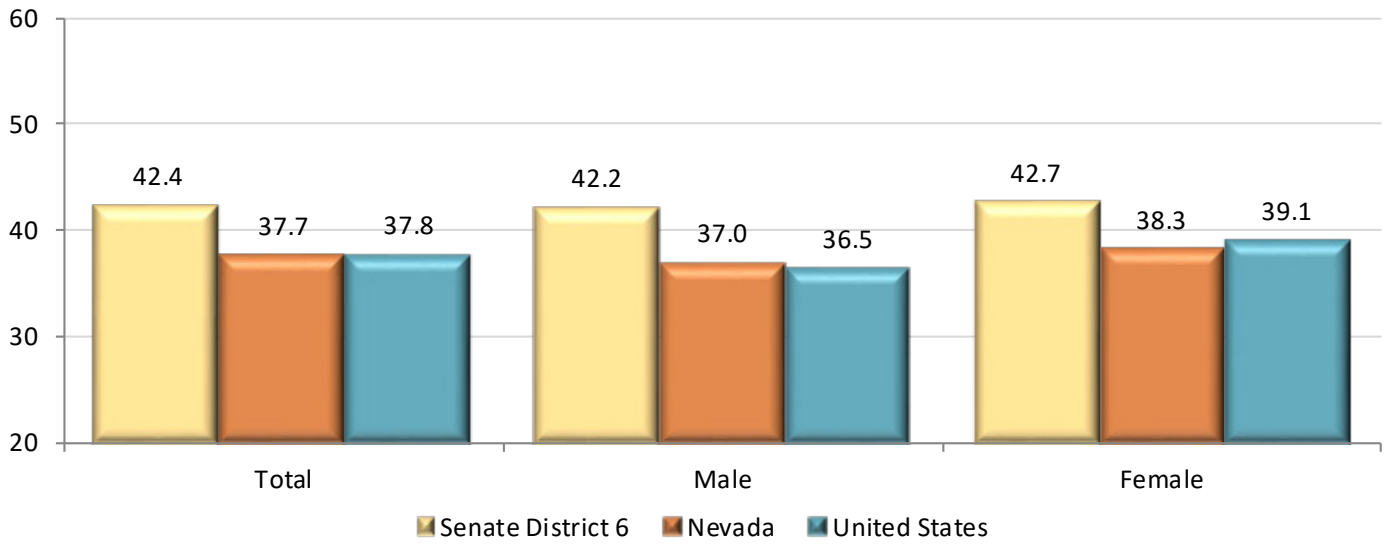
Chart 1—Population Distribution by Age



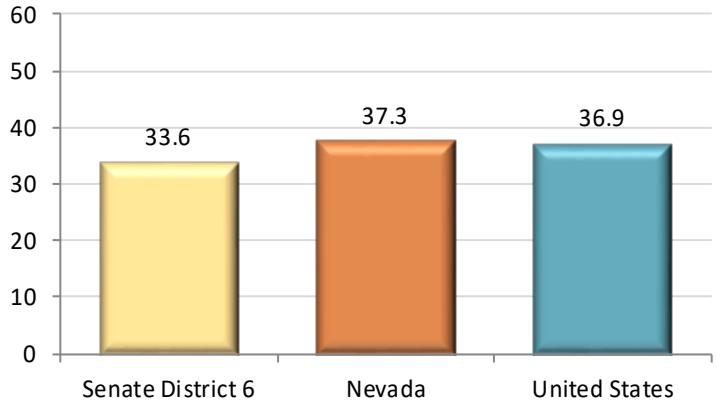
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



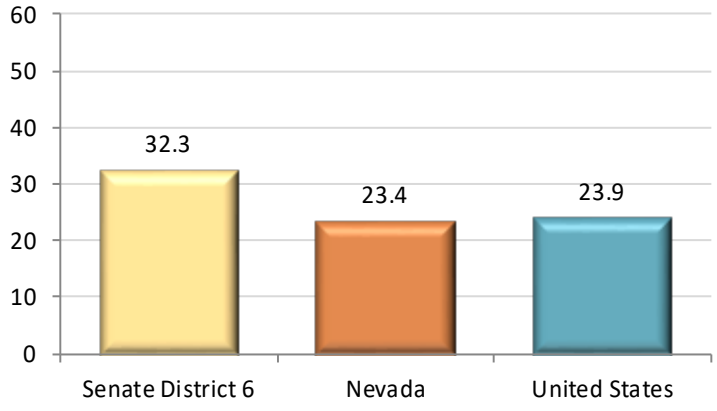
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

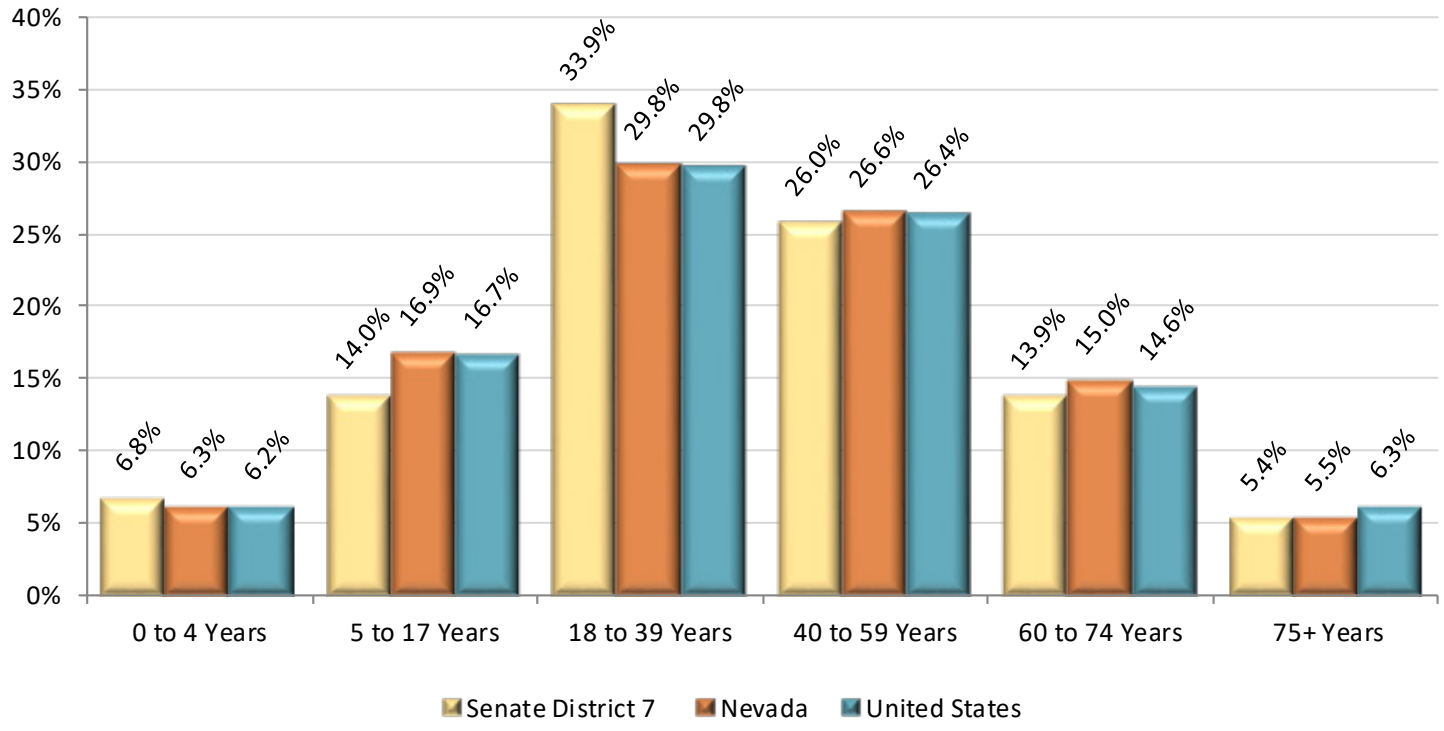
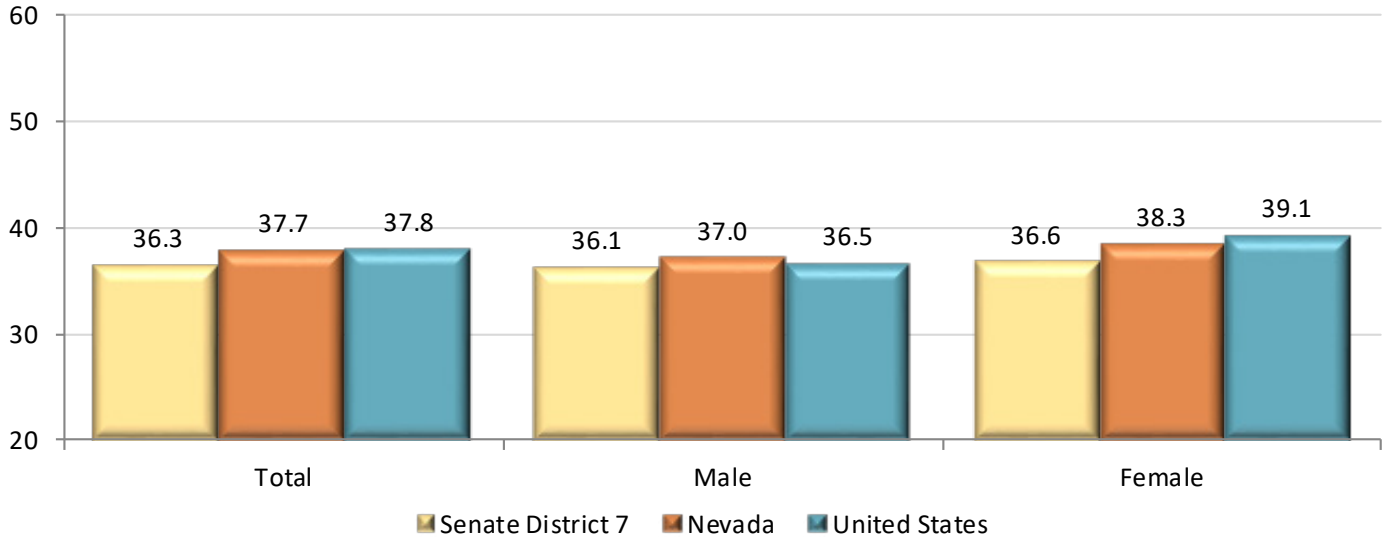
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



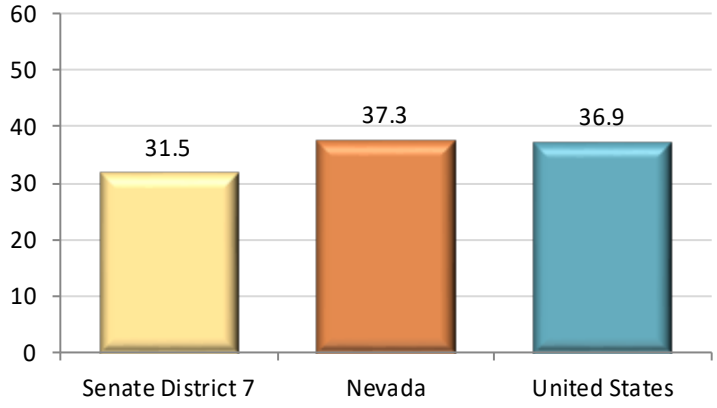
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



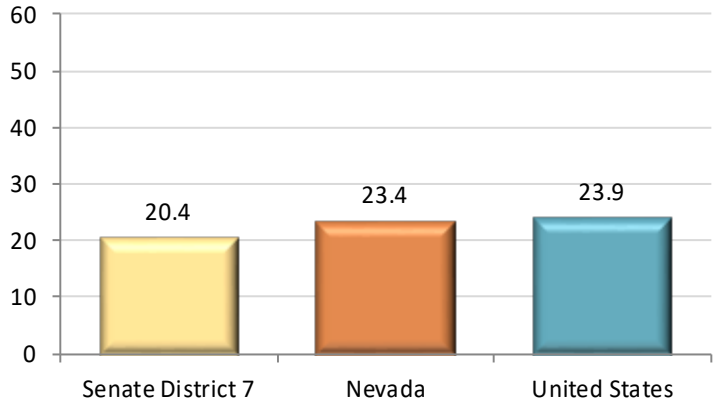
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

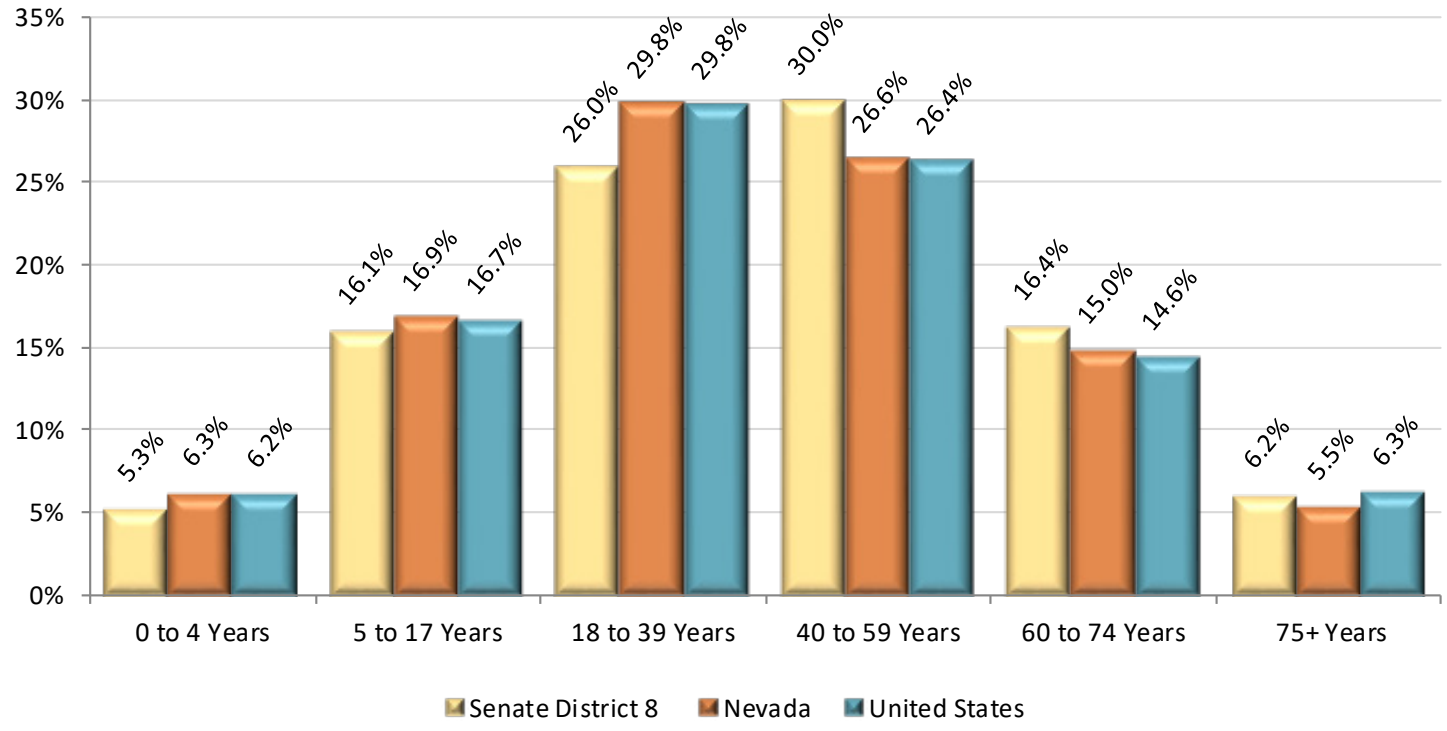
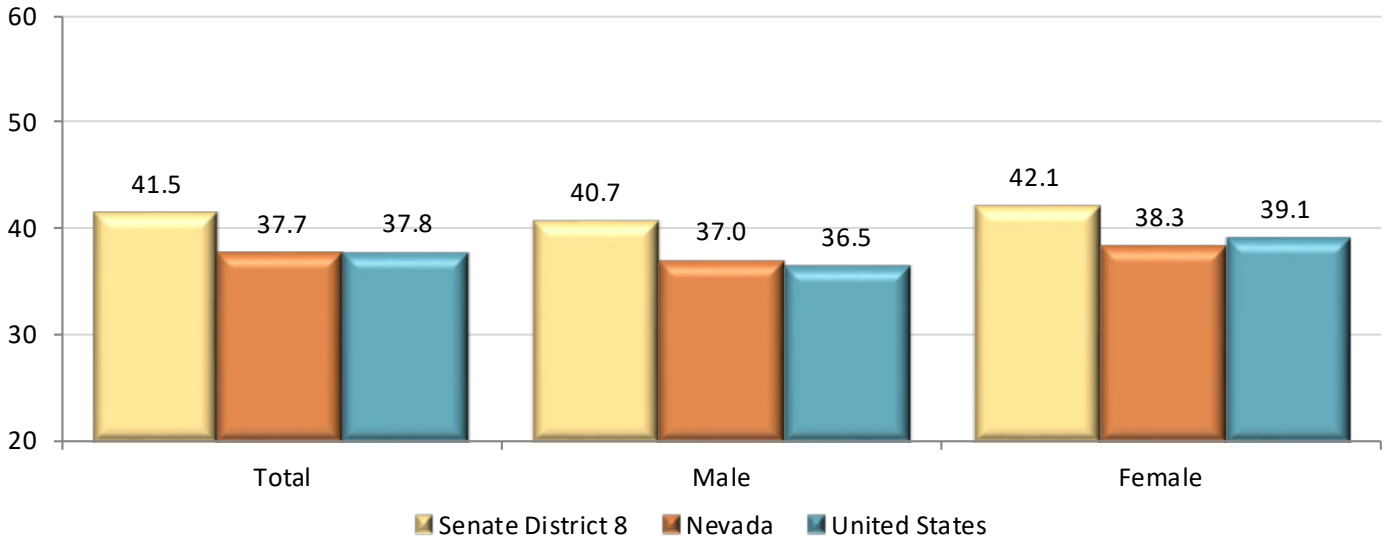
Chart 1—Population Distribution by Age



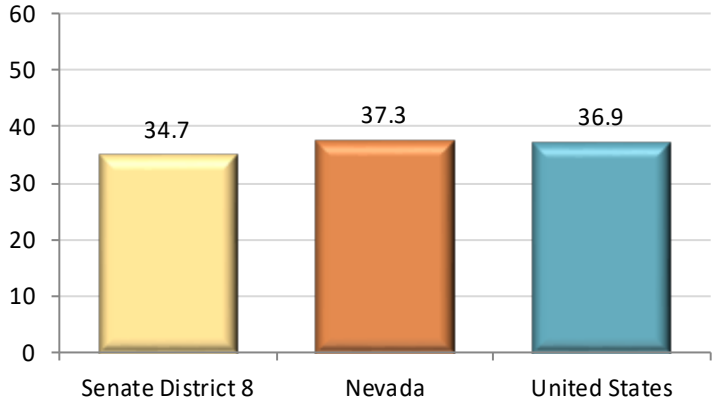
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



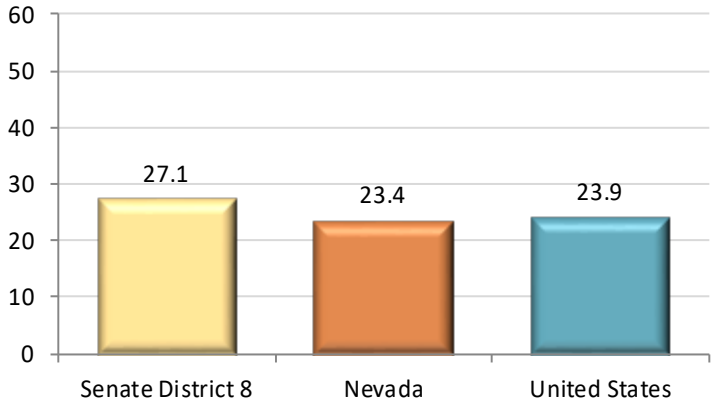
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Senate District 9

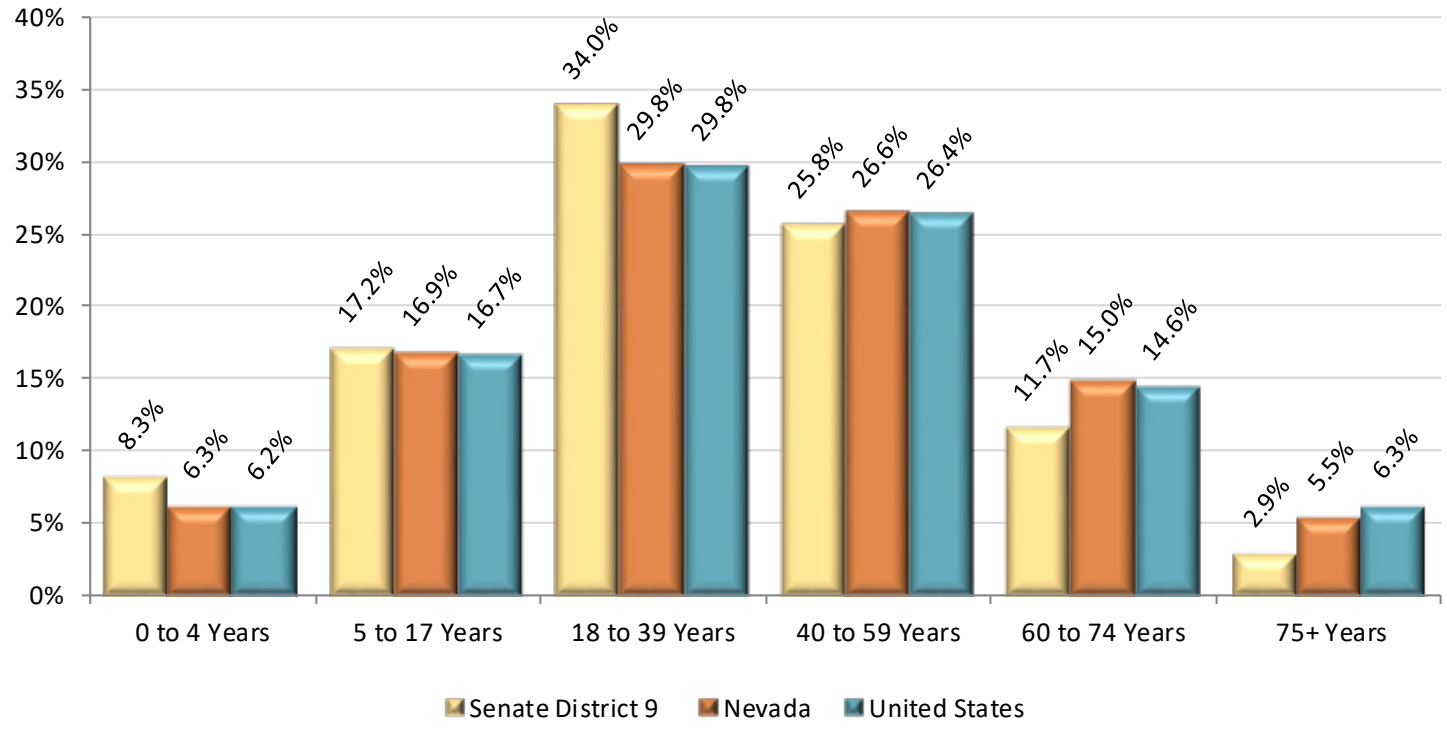
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 9	164,053	80,068	48.8%	83,985	51.2%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

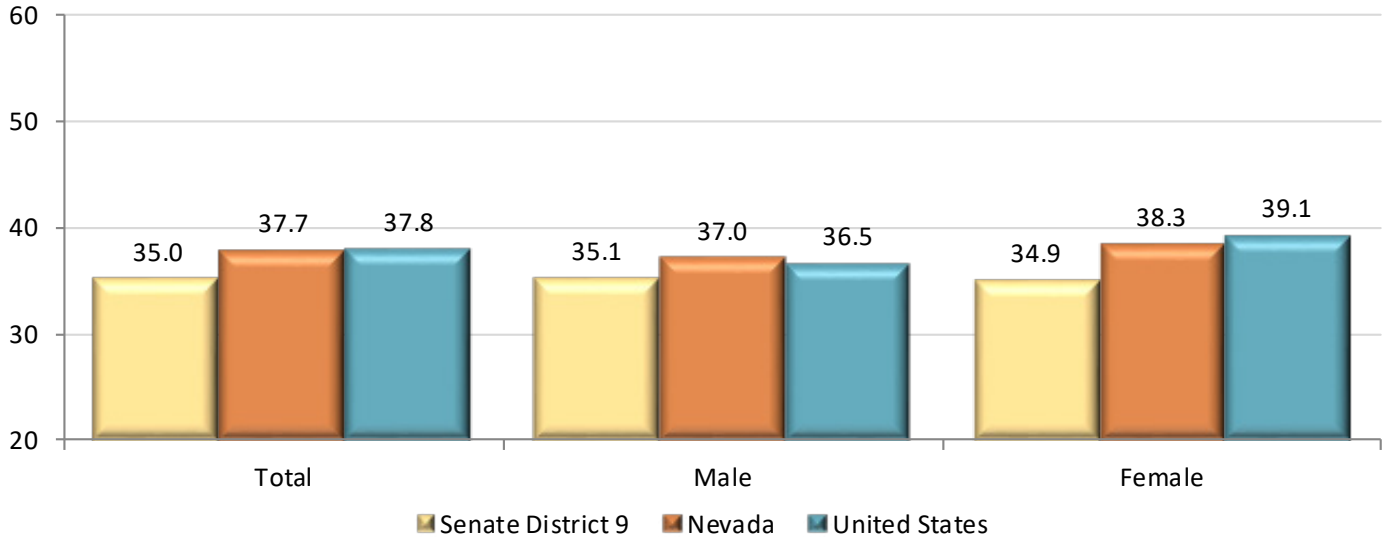
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 9	13,636	28,192	55,820	42,297	19,273	4,835
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



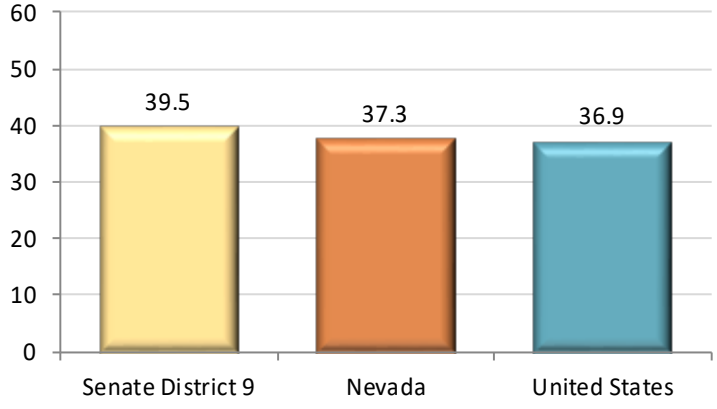
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



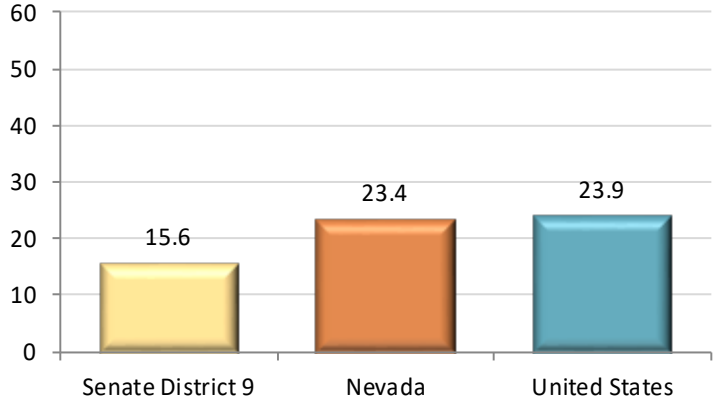
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

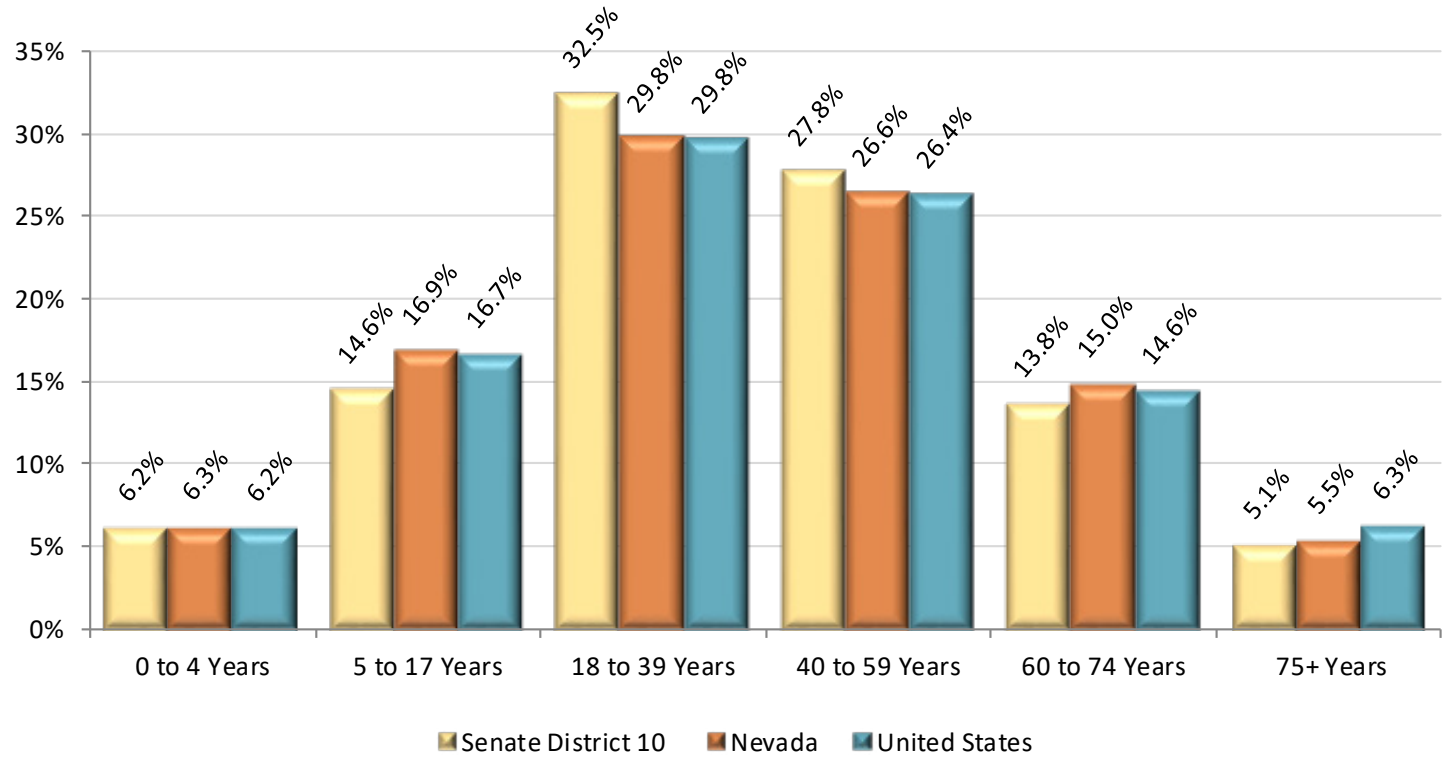
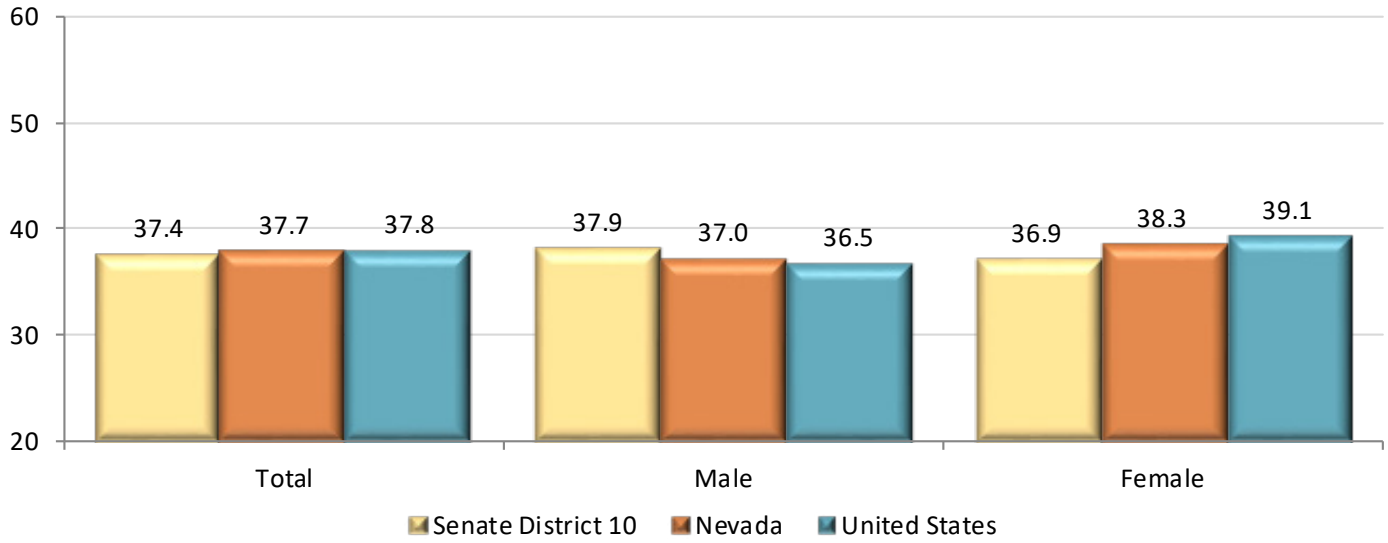
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



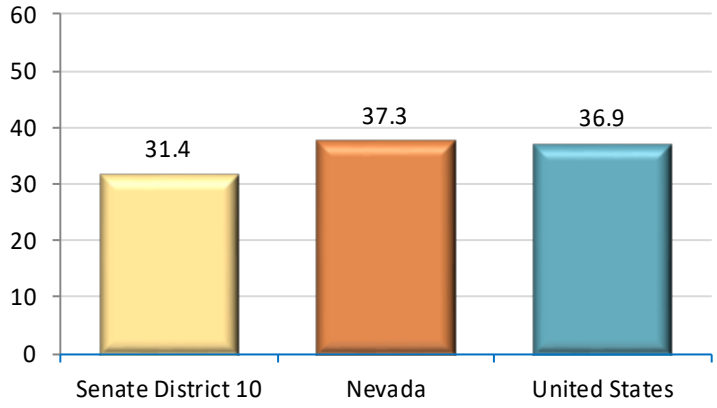
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



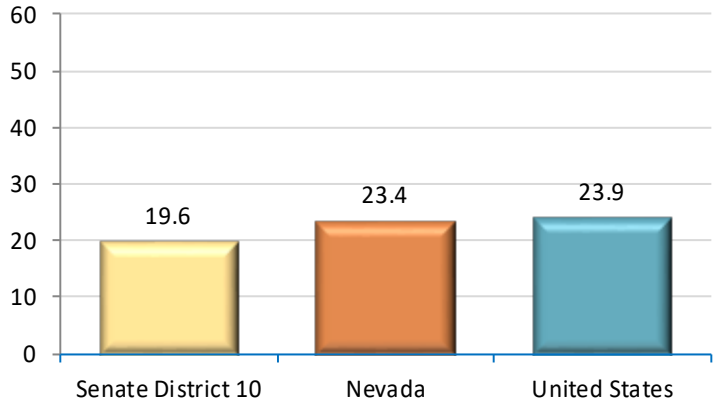
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

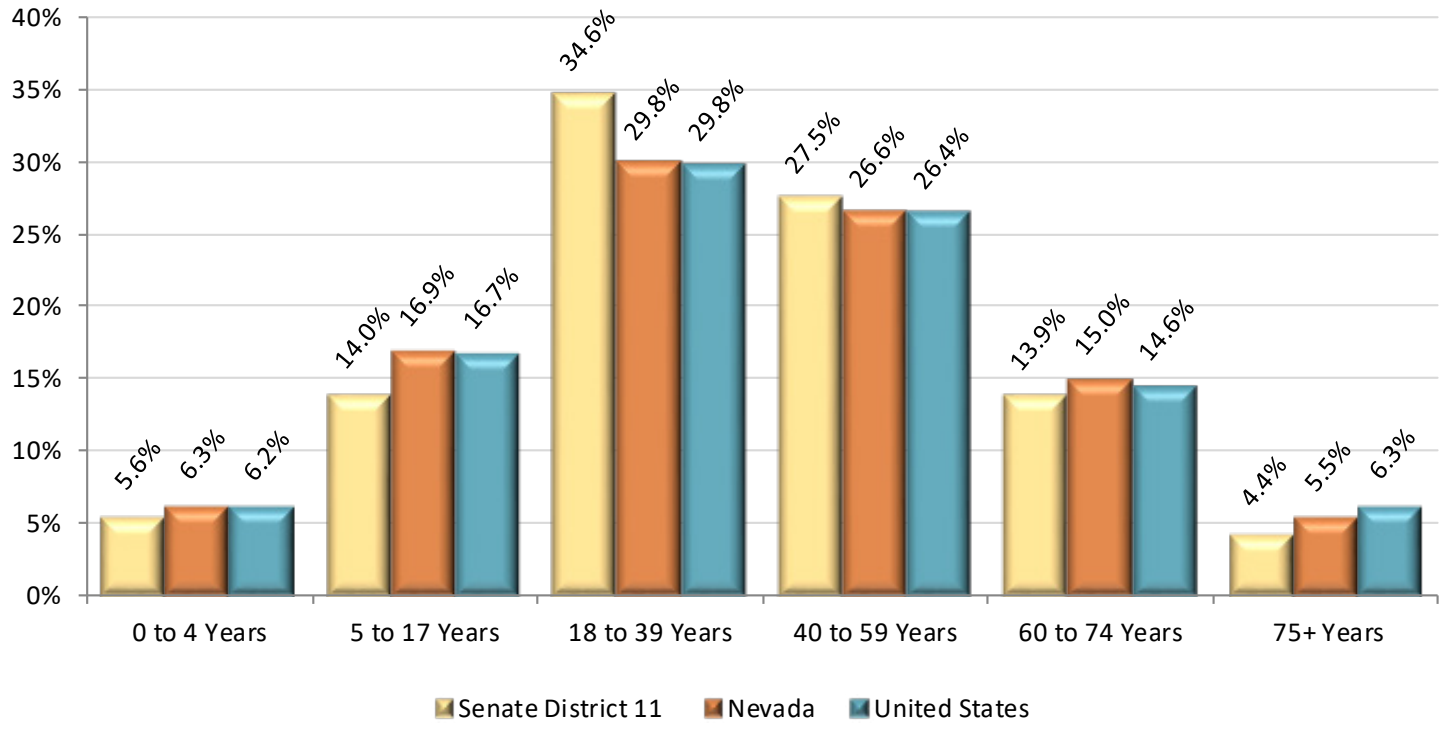
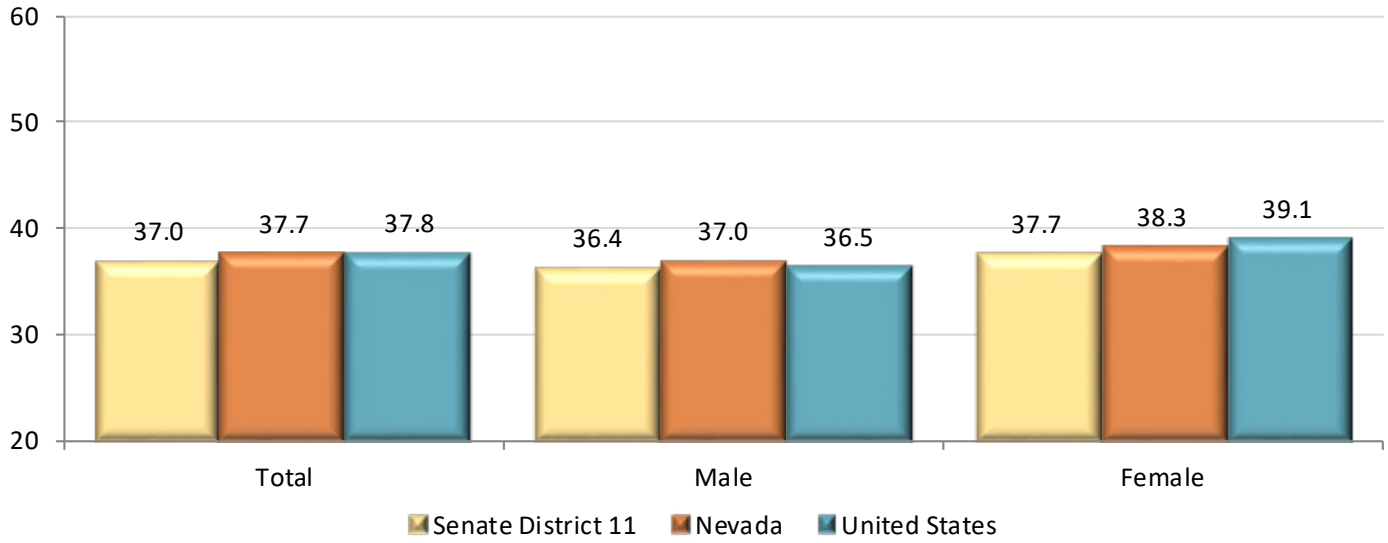
Chart 1—Population Distribution by Age



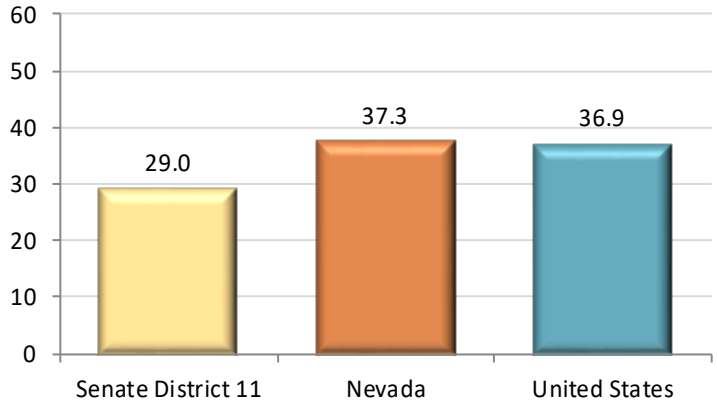
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



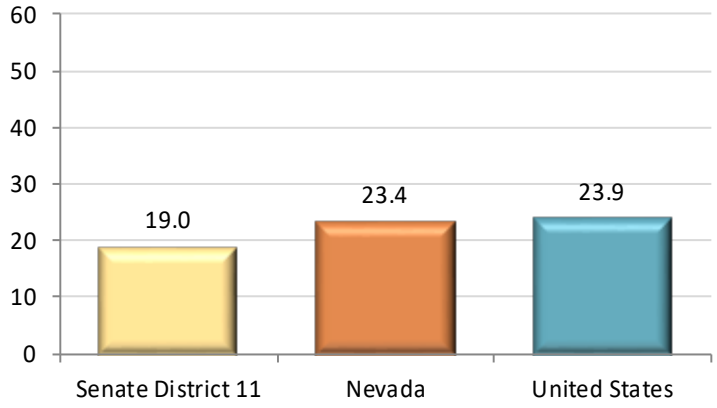
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

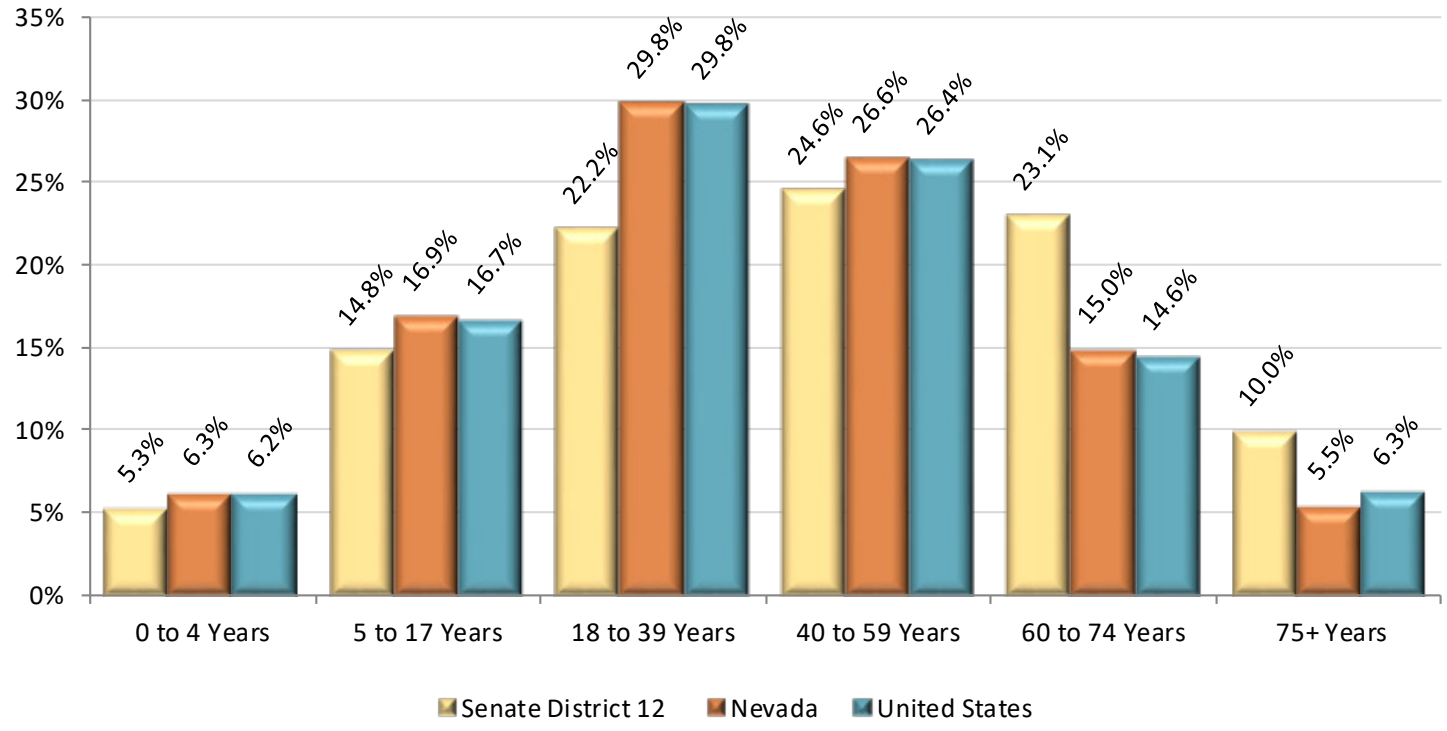
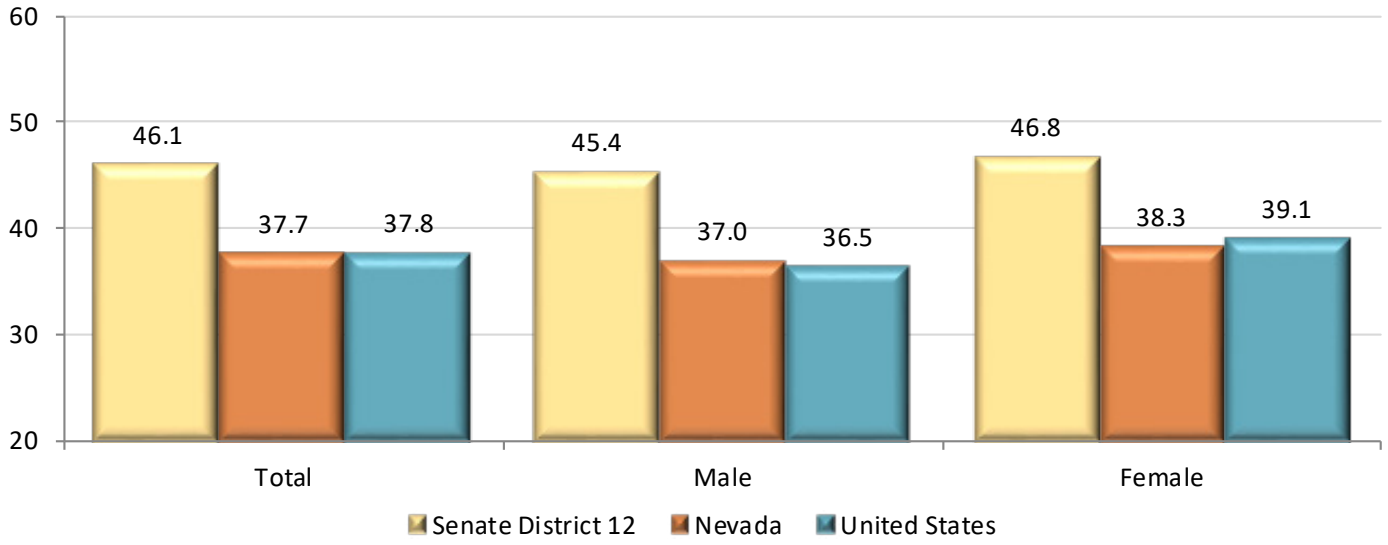
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



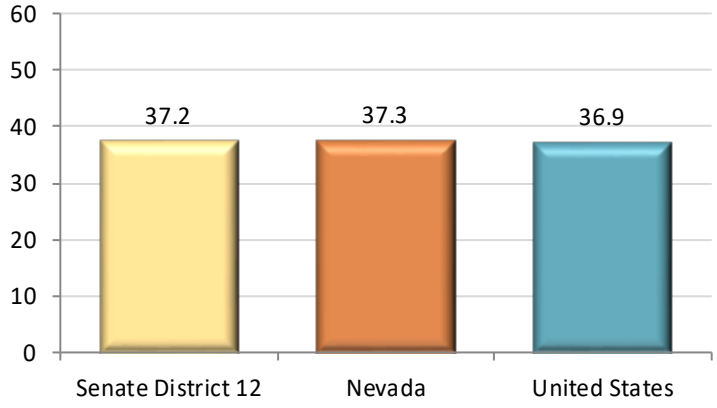
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



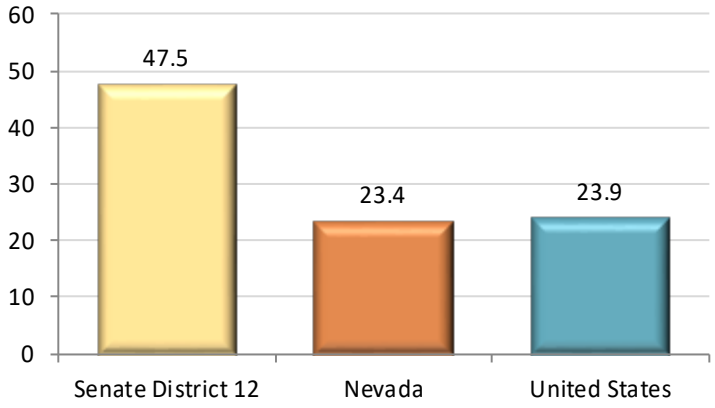
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

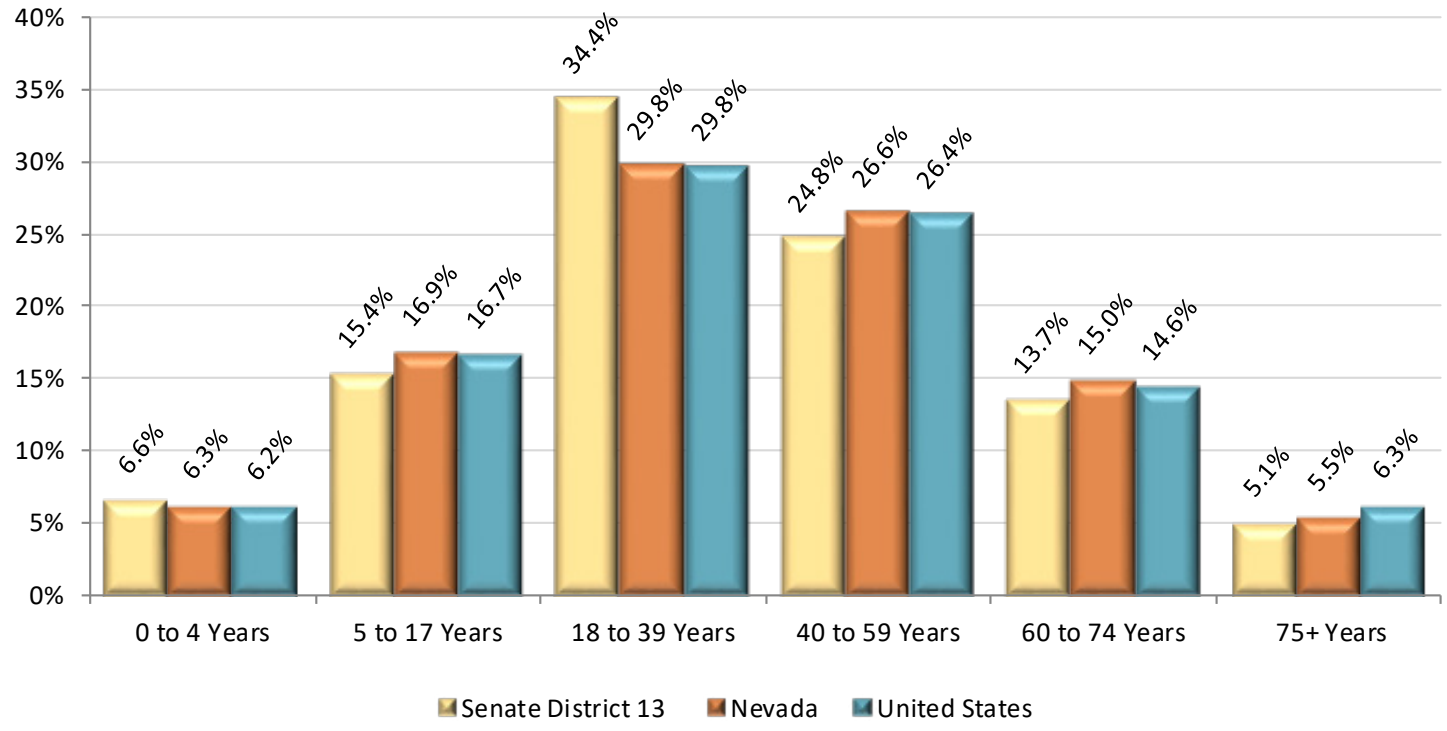
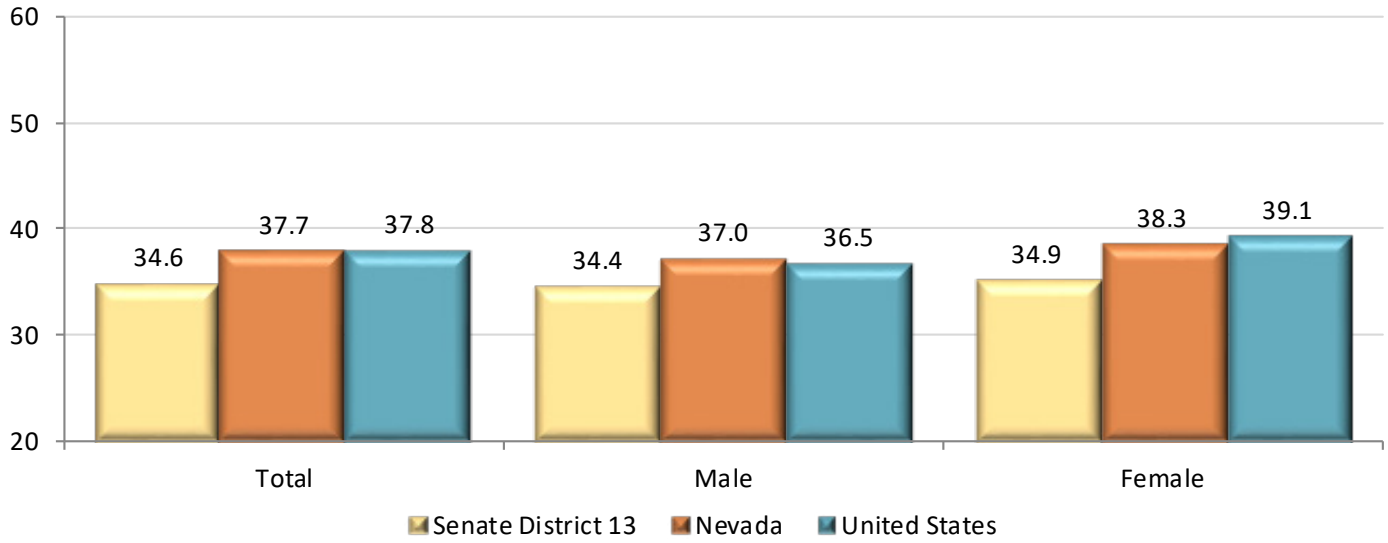
Chart 1—Population Distribution by Age



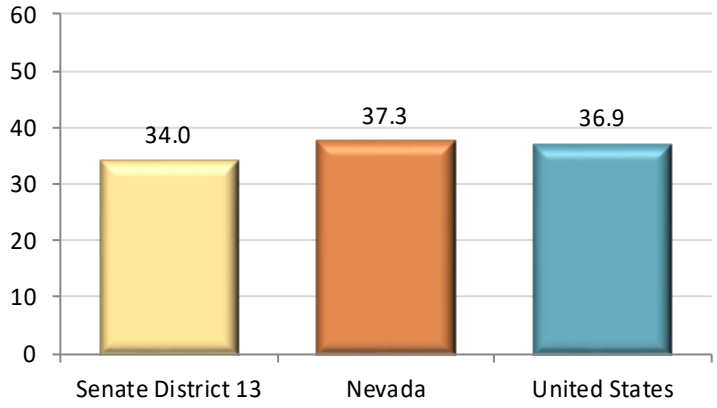
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



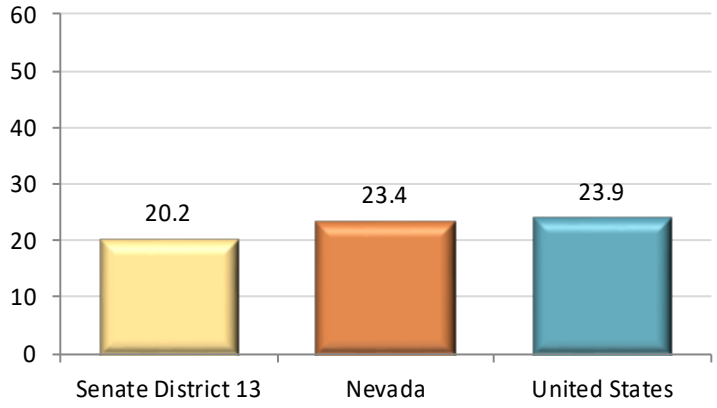
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

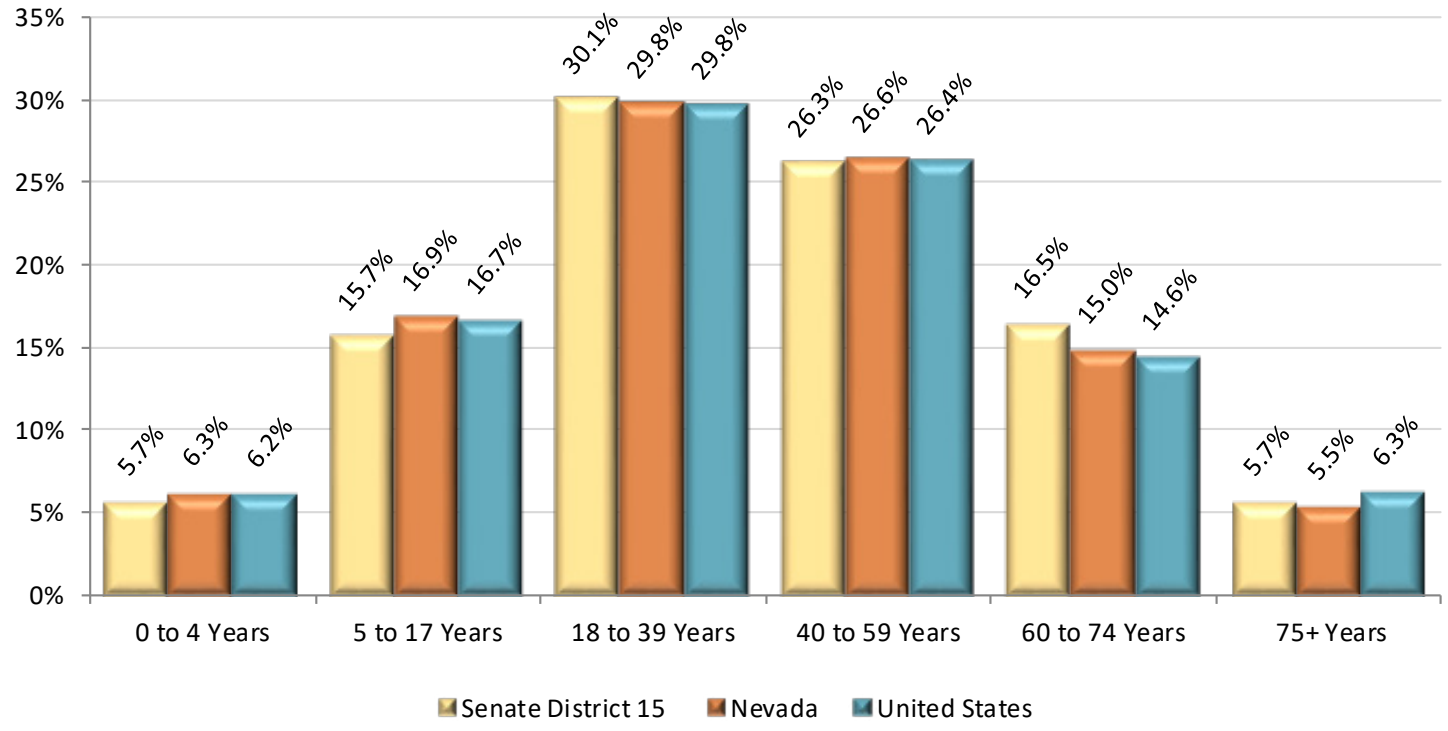
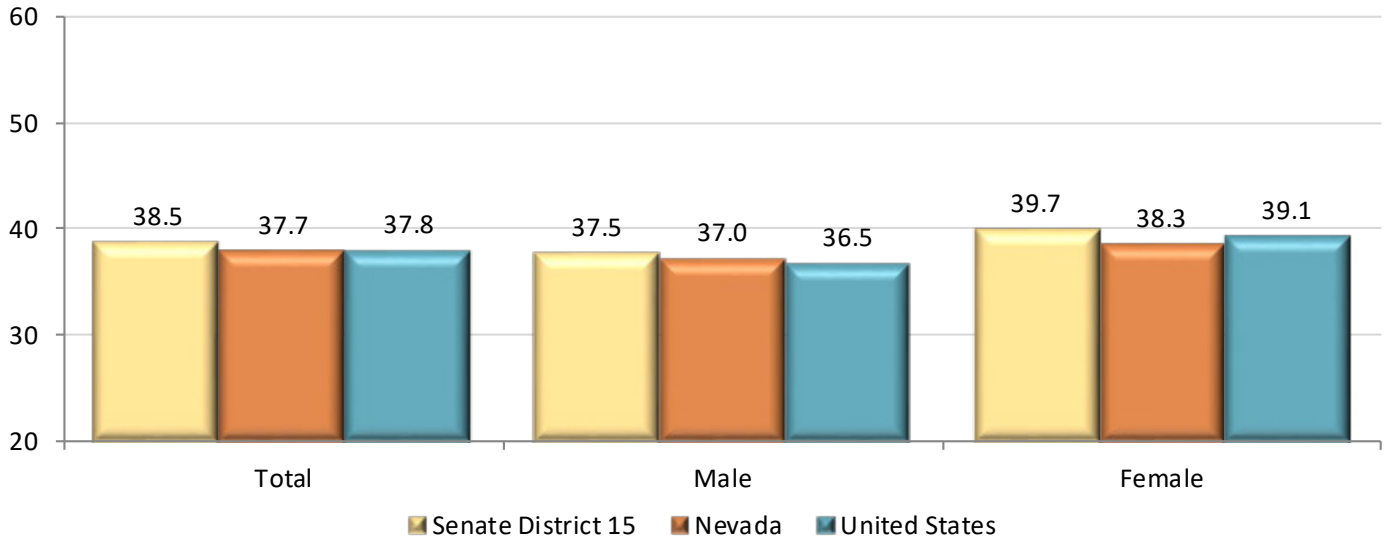
Chart 1—Population Distribution by Age



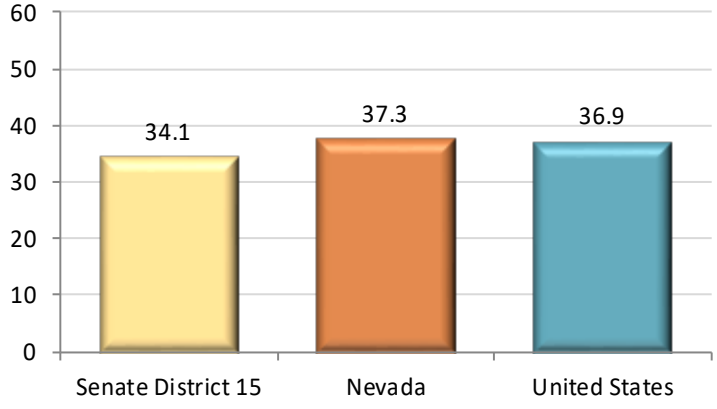
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



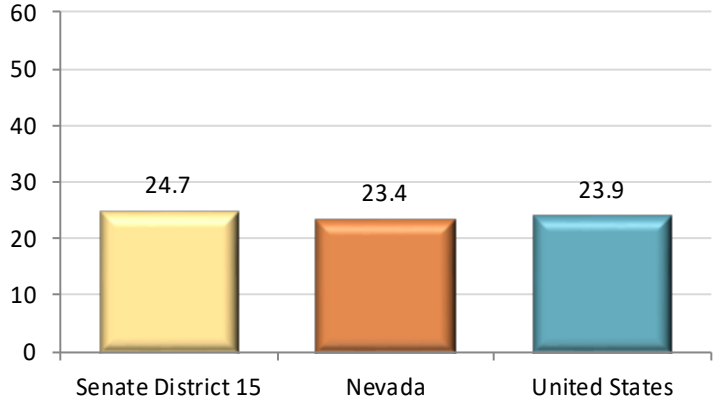
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

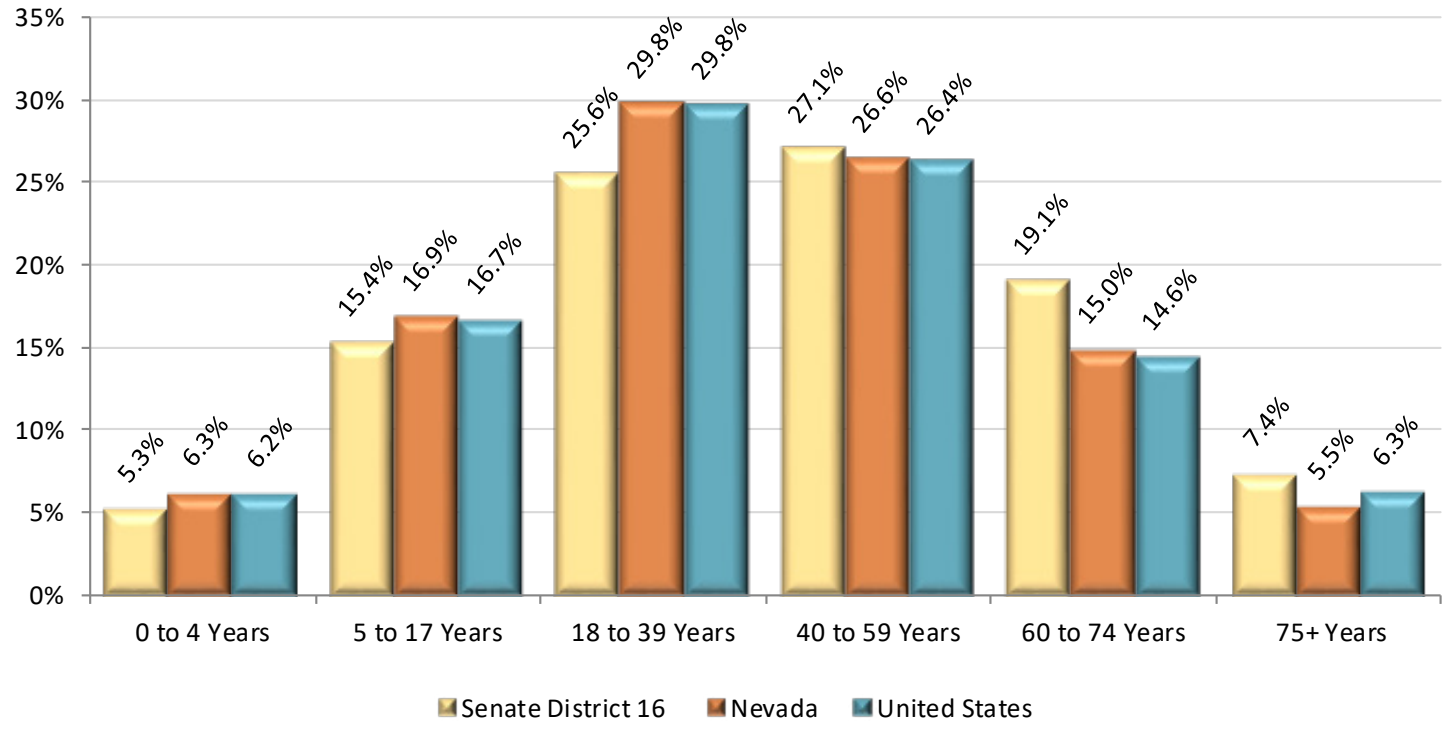
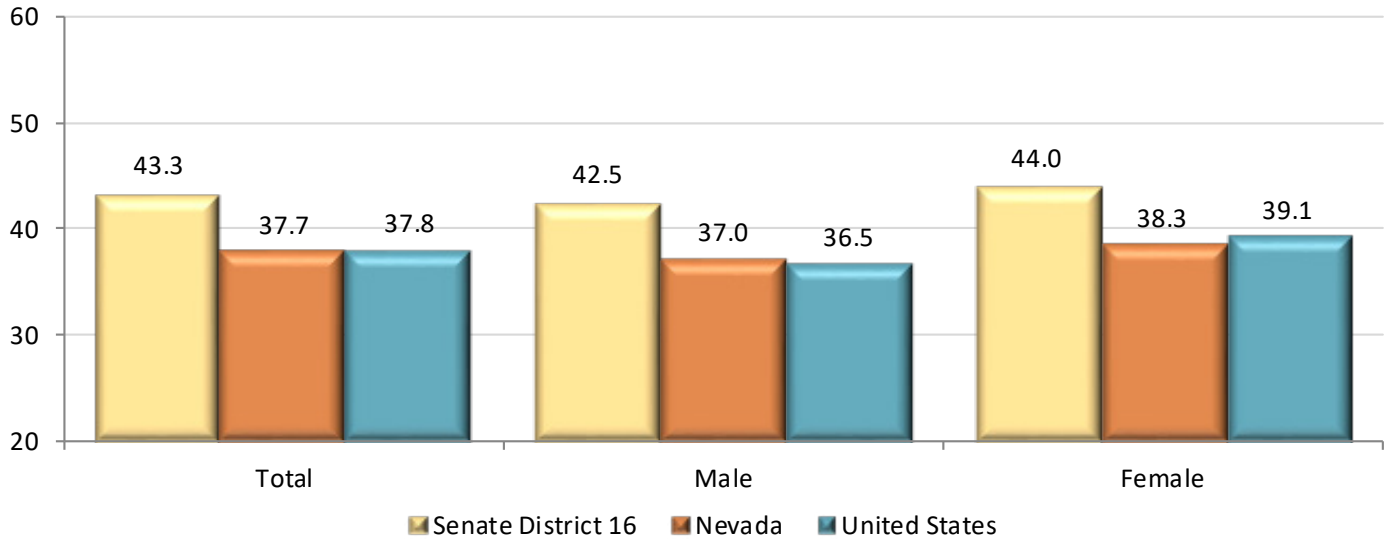
Chart 1—Population Distribution by Age



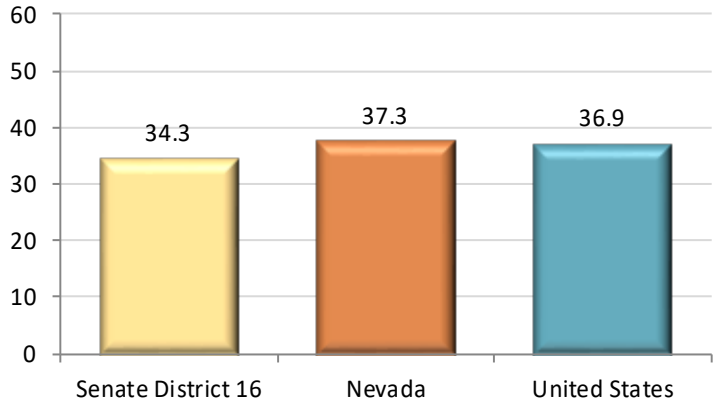
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



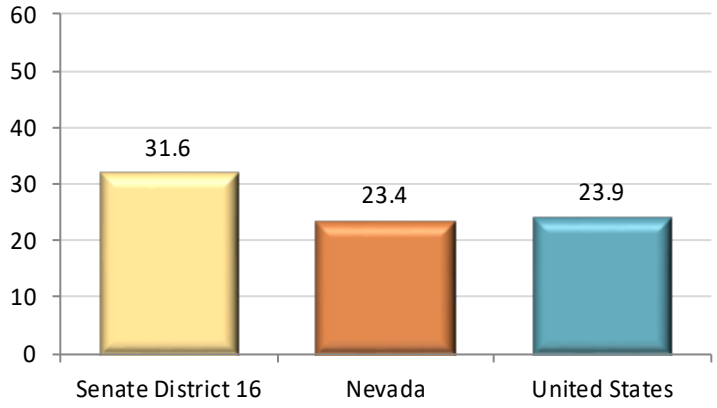
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

Population Characteristics
Nevada Senate District 17

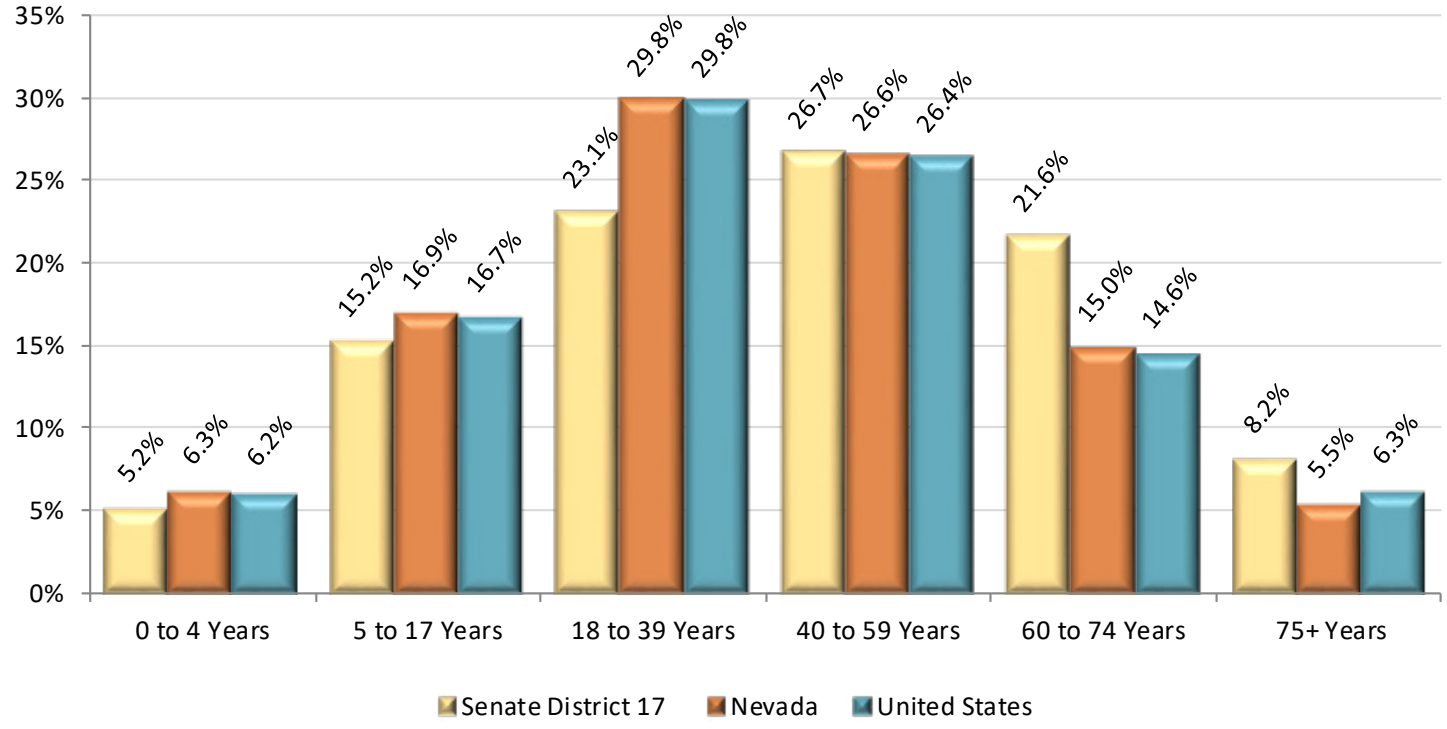
Table 1—Estimated Population

	Total Population	Number of Males	Percentage of Males	Number of Females	Percentage of Females
Senate District 17	127,848	64,518	50.5%	63,330	49.5%
Nevada	2,887,725	1,450,091	50.2%	1,437,634	49.8%
United States	321,004,407	158,018,753	49.2%	162,985,654	50.8%

Table 2—Population by Years of Age

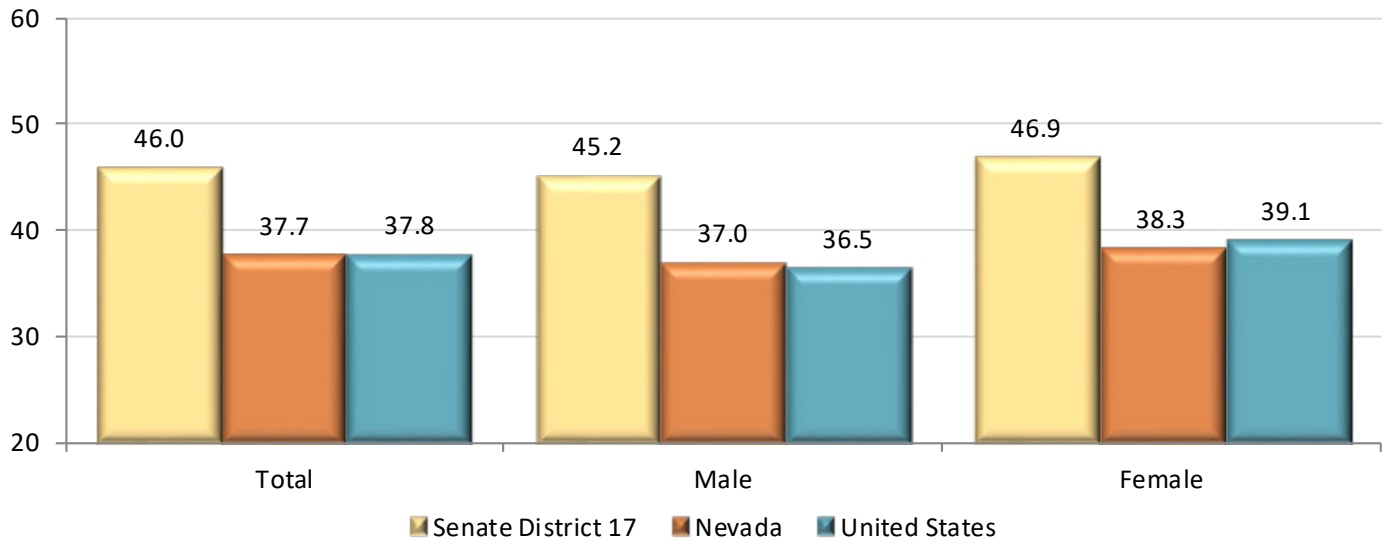
	Age 0-4	Age 5-17	Age 18-39	Age 40-59	Age 60-74	Age 75+
Senate District 17	6,671	19,492	29,500	34,085	27,659	10,441
Nevada	181,207	488,795	861,505	766,890	431,944	157,384
United States	19,853,515	53,747,764	95,565,066	84,881,613	46,727,449	20,229,000

Chart 1—Population Distribution by Age



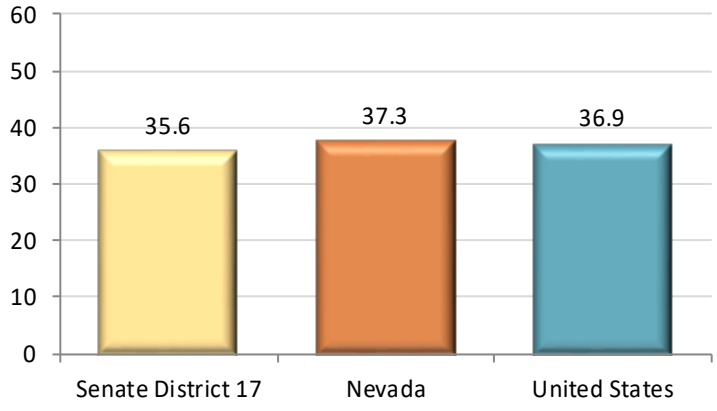
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



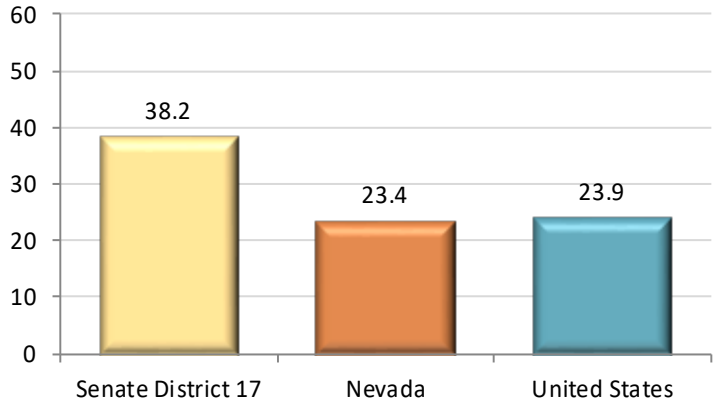
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

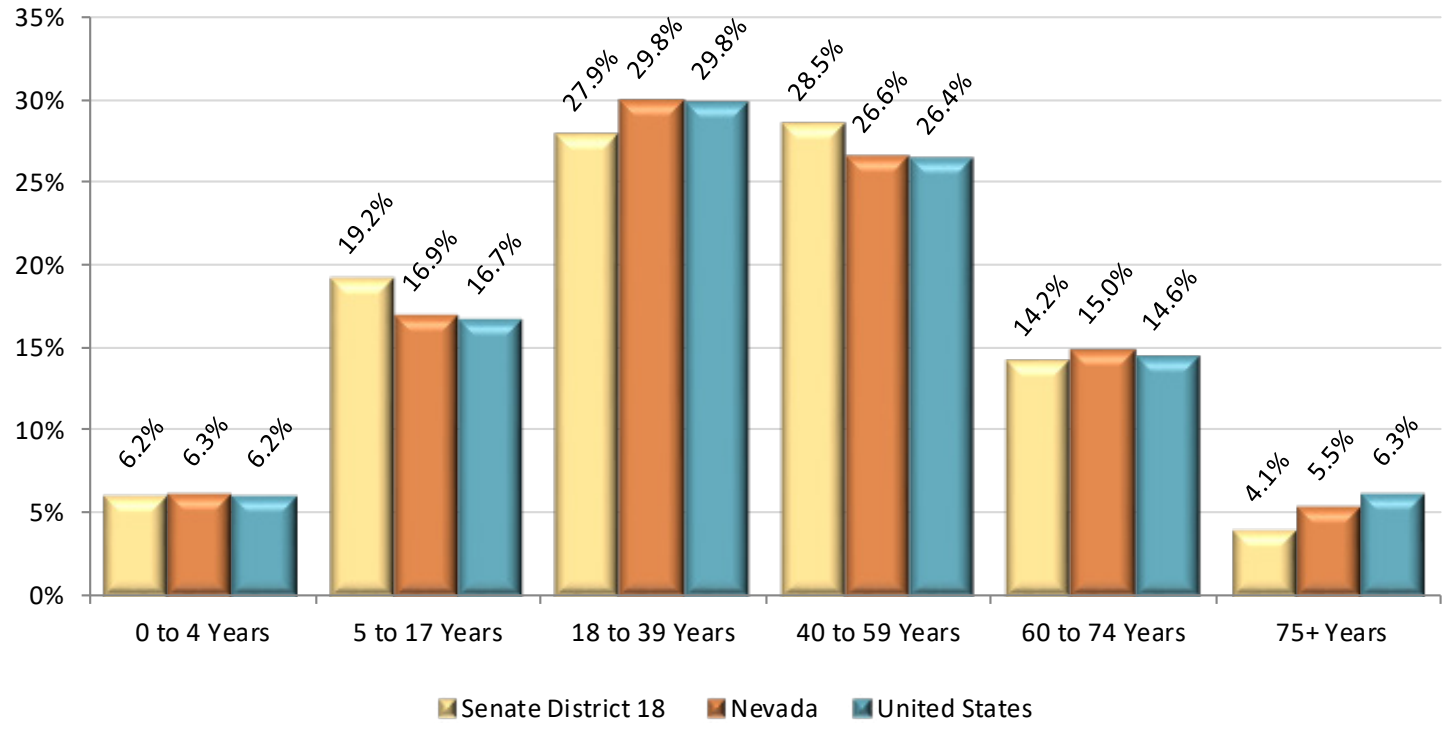
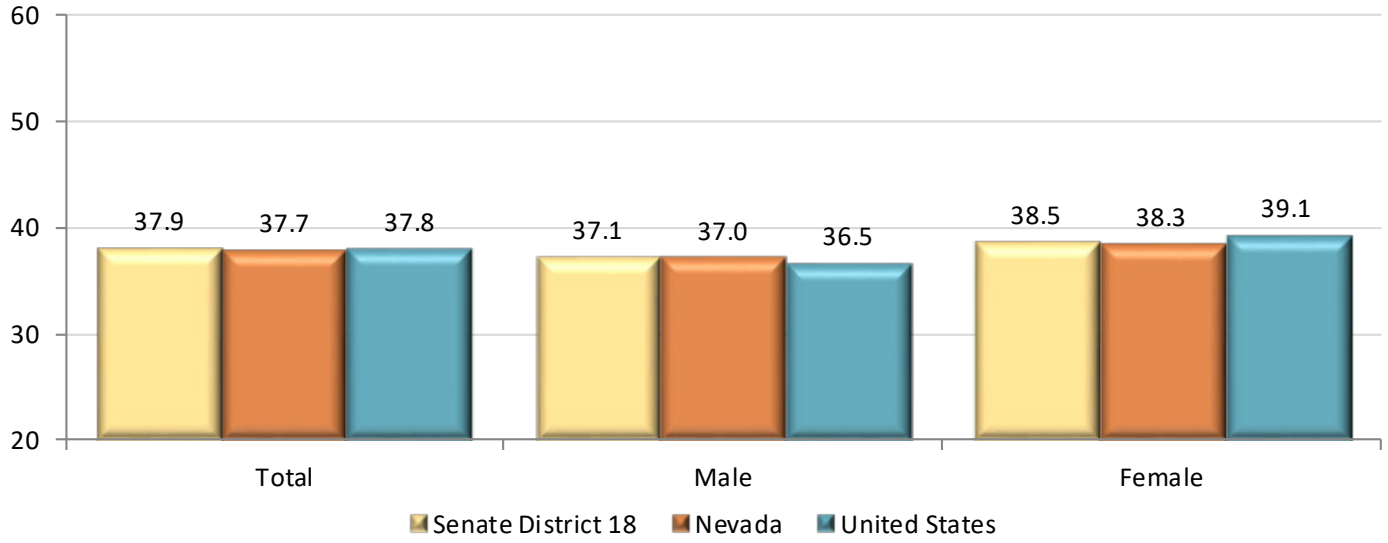
Chart 1—Population Distribution by Age



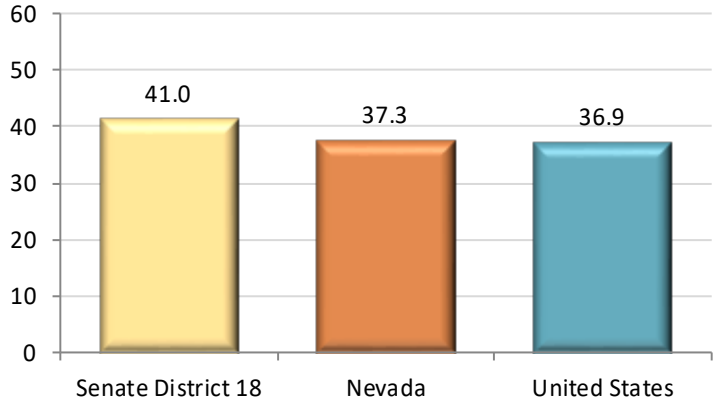
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



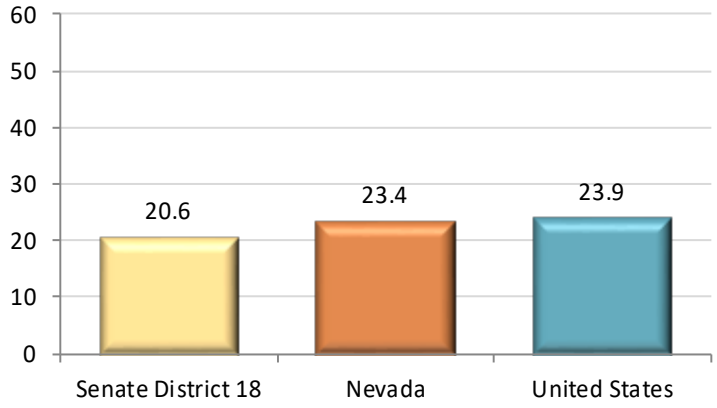
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

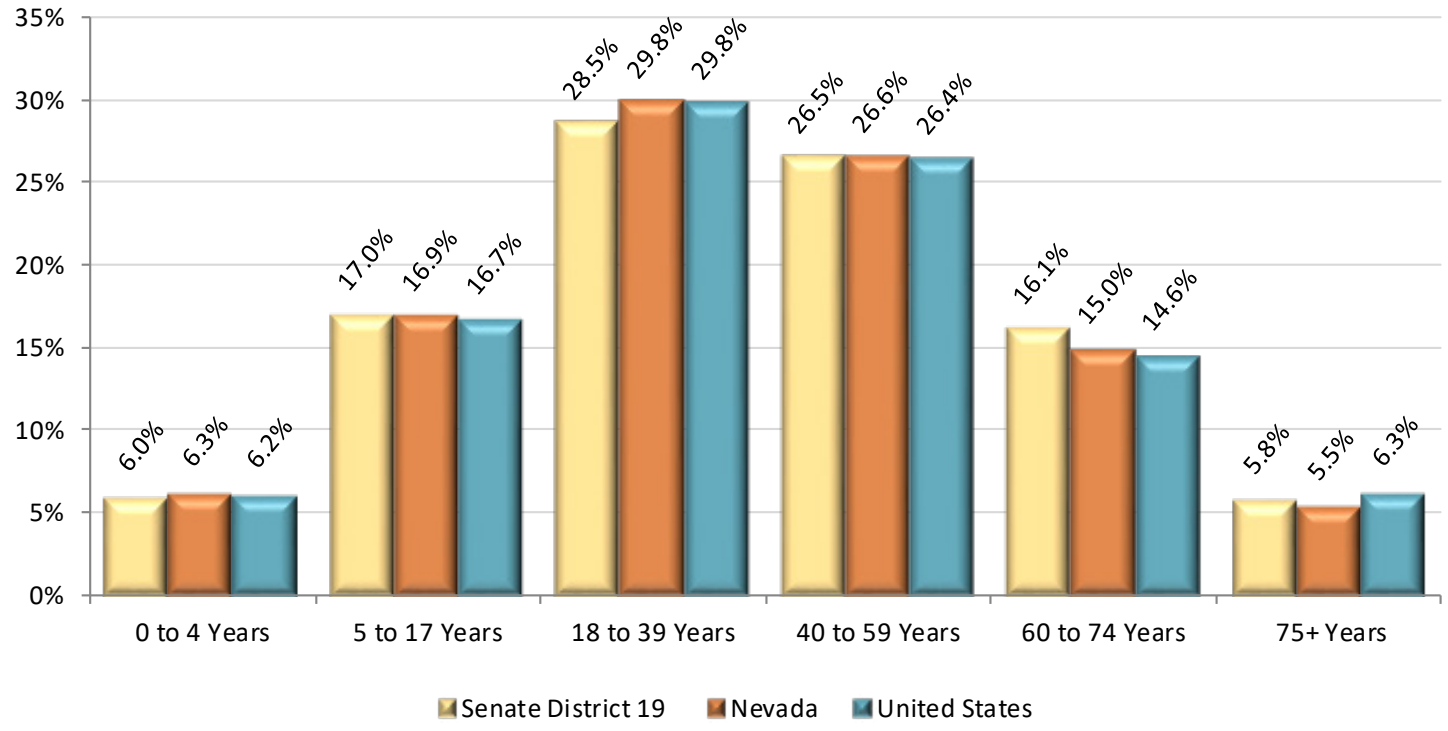
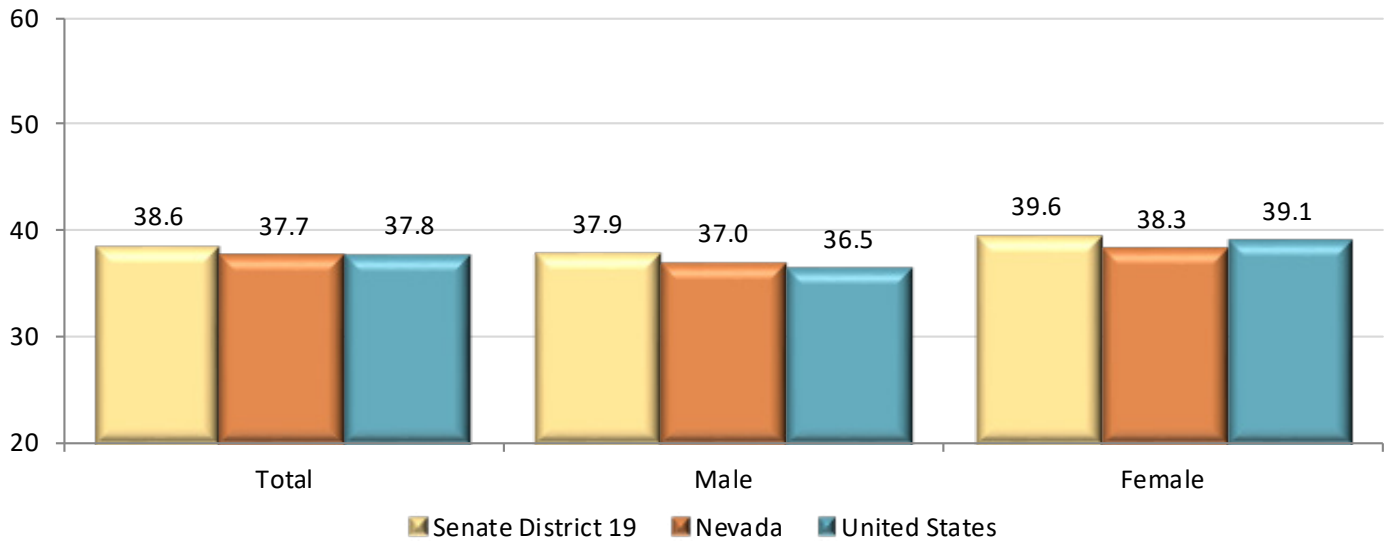
Chart 1—Population Distribution by Age



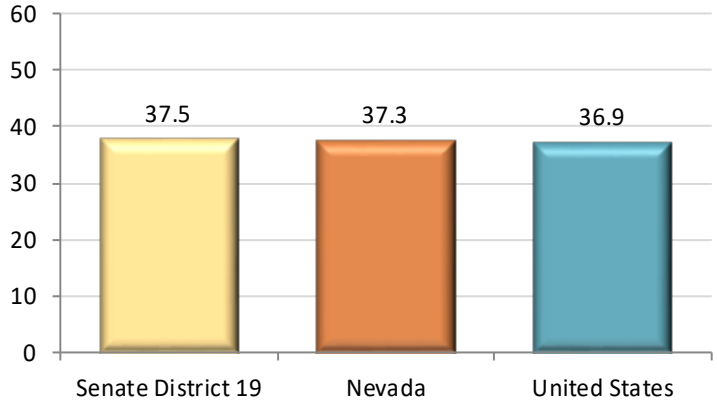
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



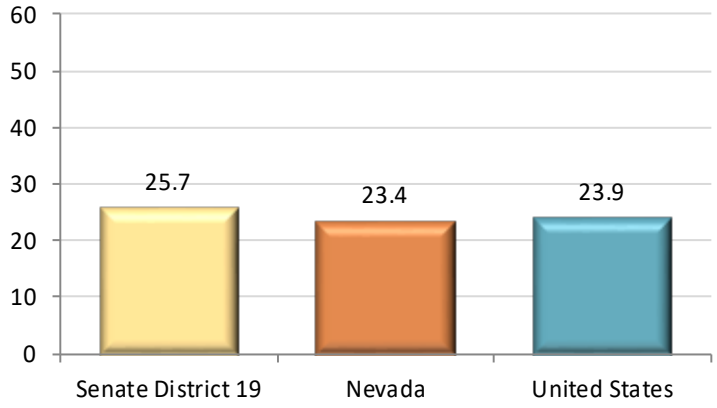
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

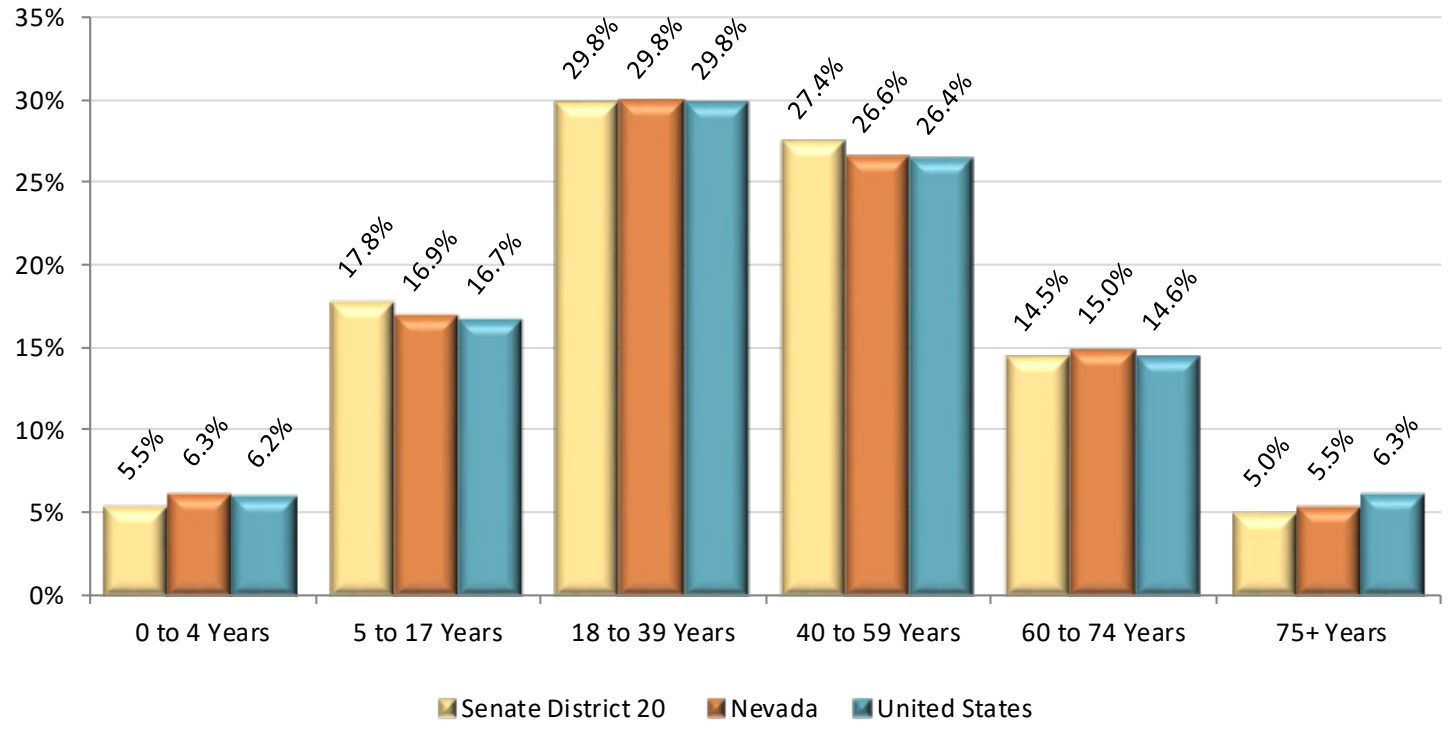
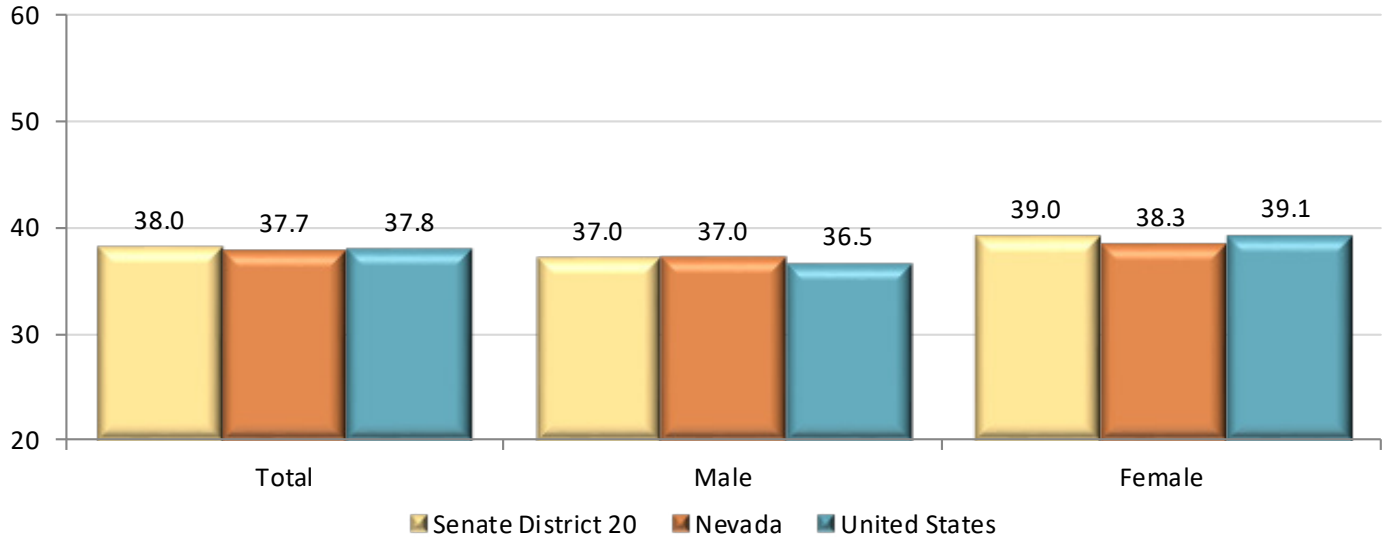
Chart 1—Population Distribution by Age



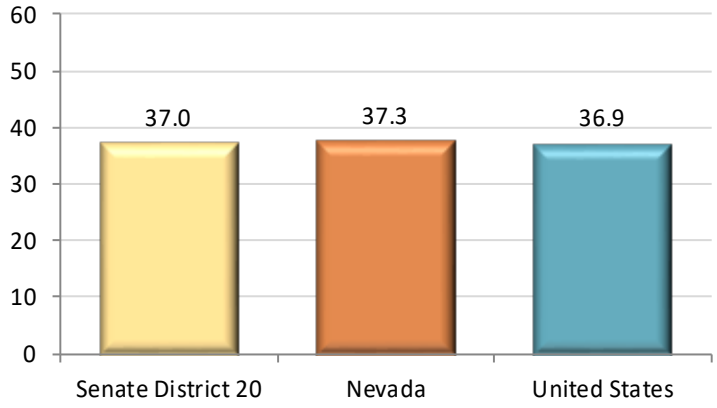
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



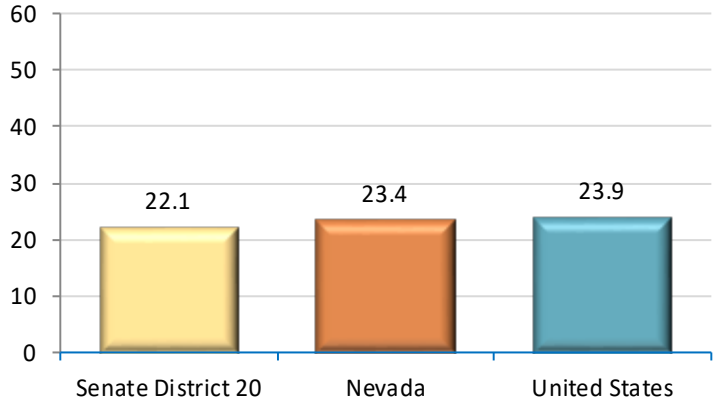
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.

A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2013-2017 5-Year American Community Survey* (ACS), which became available on December 6, 2018. The ACS provides estimates of demographic, housing, social, and economic characteristics for numerous geographies every year including 5-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: https://factfinder.census.gov/.

Figures for active voters were obtained from Nevada's Office of the Secretary of State's website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: http://nvsos.gov/sos/.

Detail in some tables may not sum to 100 percent due to rounding.

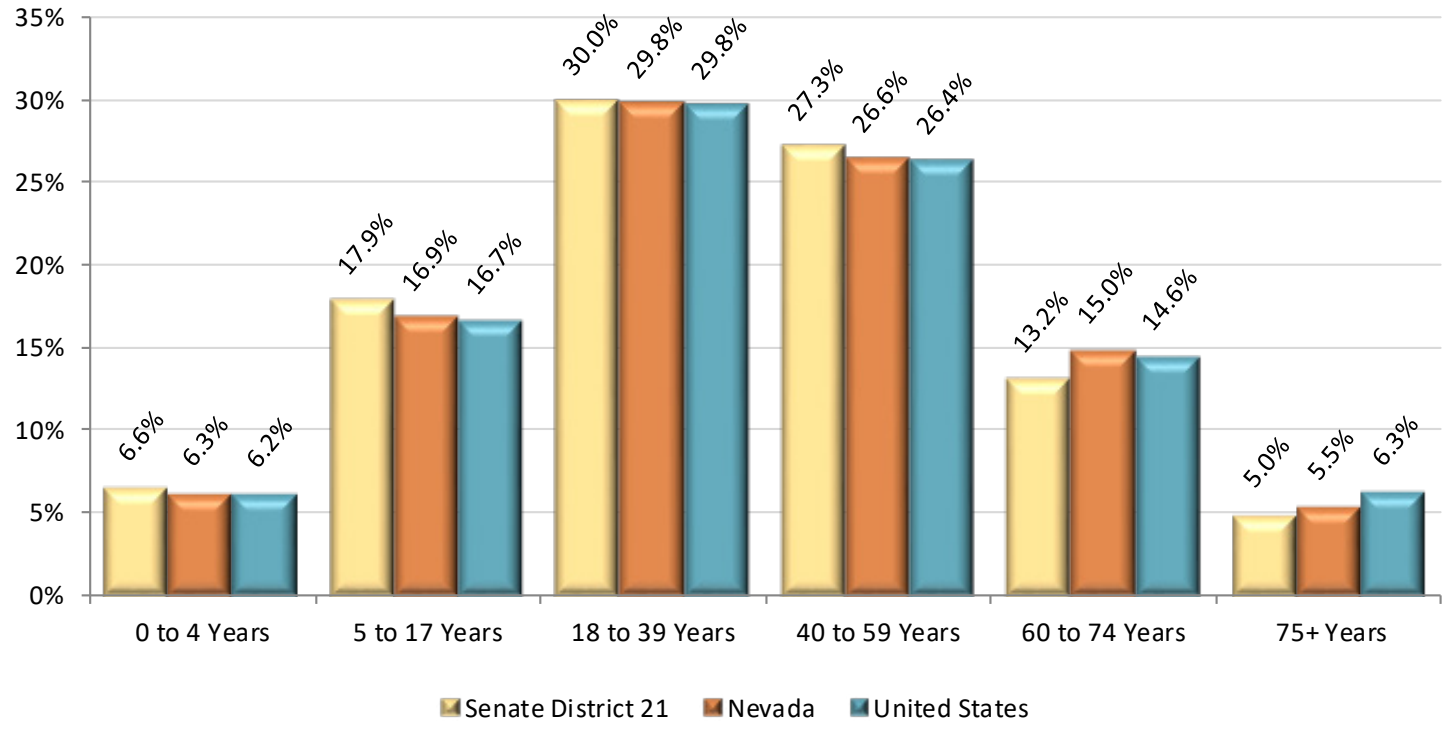
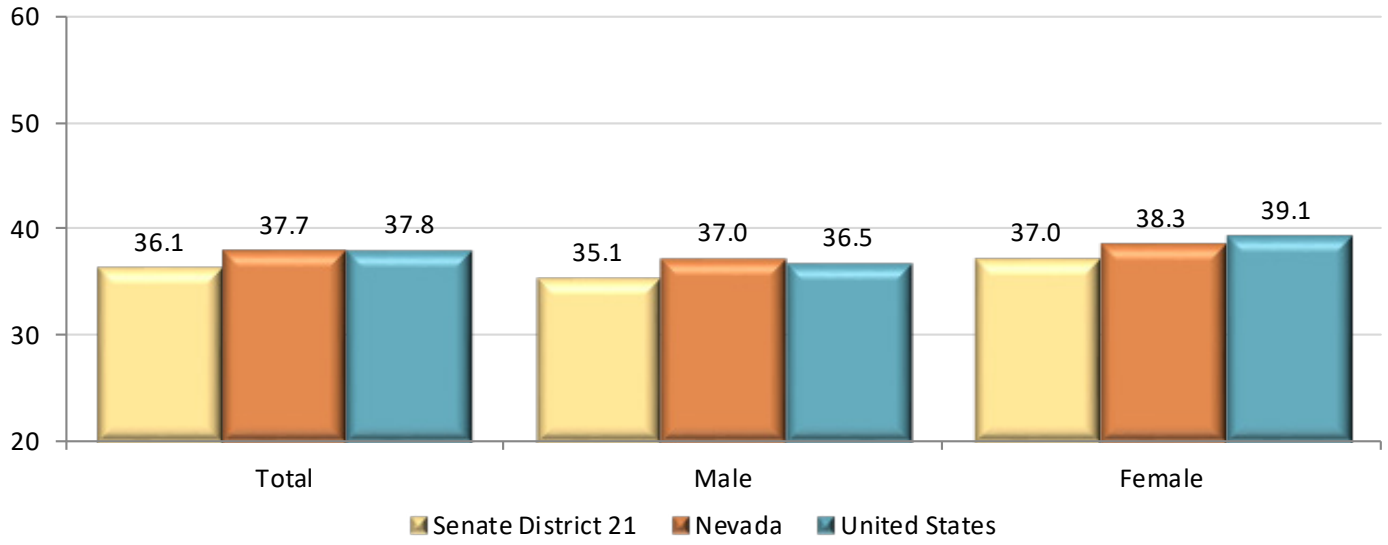
Chart 1—Population Distribution by Age



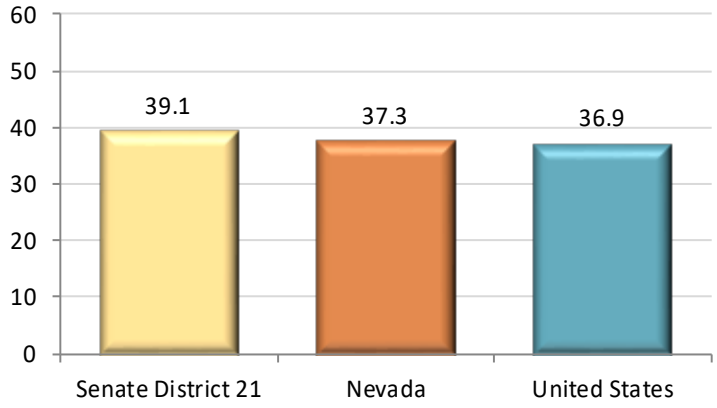
Source: U.S. Census Bureau, *2013-2017 5-Year American Community Survey*, Table B01001: Sex by Age

Chart 2—Median Age (in years)*



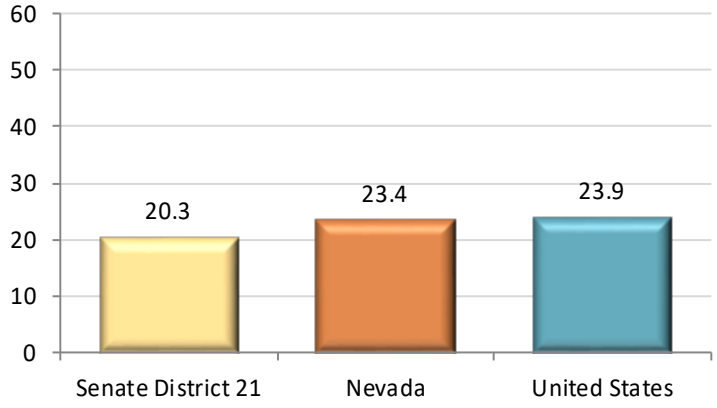
*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the "middle" value of a data set.

Chart 3—Child Dependency Ratio*



*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

Chart 4—Old-Age Dependency Ratio*



*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.
