# **Demographic Profile**

**Nevada Assembly District 31**

**Jill Dickman (R)**  
Jill.Dickman@asm.state.nv.us

## A Brief Note About the Statistics in This Document

With the exception of voter registration data on page 29, the statistical information displayed in this document was extracted from the U.S. Bureau of the Census, *2015–2019 5-Year American Community Survey (ACS)*, which became available on December 10, 2020. The ACS provides estimates of demographic, economic, housing, and social characteristics for numerous geographies every year including five-year estimates for all geographies down to the block group level. In this document, we have used estimates that the Bureau of the Census has compiled at the legislative district and state levels for Nevada, as well as corresponding national data.

The ACS produces period estimates that describe the average socioeconomic and housing characteristics of an area over a specific period of time, not for a specific point in time. Therefore, these data may not be comparable with point-in-time estimates. Additional information about the ACS is available at the following website: <https://www.census.gov/programs-surveys/acs>.

Figures for active voters were obtained from Nevada’s Office of the Secretary of State’s website. Those figures are updated by the Secretary of State on a regular basis. The data included herein were the most currently available statistics at the time this document was prepared. More current voter registration information is available at the following website: <https://nvsos.gov/sos/>.

Detail in some tables may not sum to 100 percent due to rounding.

# Population Characteristics

## Nevada Assembly District 31

Chart 2—Median Age (in years)\*

\*The median is the value separating the higher half of a data set from the lower half when the data are arranged in numerical order. In simple terms, it may be thought of as the “middle” value of a data set.

Chart 3—Child Dependency Ratio\*

Chart 4—Old-Age Dependency Ratio\*

\*Child Dependency Ratio is the number of young people (0-17 years) in a population divided by the total adult working age population (18-64 years) times 100.

\*Old-Age Dependency Ratio is the number of elderly people (65+ years) in a population divided by the total adult working age population (18-64 years) times 100.
