* Note: The population database is derived from the 2018 American Community Survey (ACS) 5-Year Estimates as provided by the U.S. Bureau of the Census and validated by the Legislative Counsel Bureau.

The American Community Survey (ACS) does not provide demographic data at the NSHE Regent district level. To obtain 2018 ACS estimates for each NSHE Regent district, data was downloaded at the census block group level and aggregated by the district boundary. This is not a perfect method, as some block groups are not contained wholly within a district. For block groups that were split across NSHE Regent district boundaries, their data was apportioned among intersecting districts by the percentage of its geographic area contained in each district. One limitation to this method is that it assumes population types are evenly distributed throughout a block group, which may not necessarily be the case.

Racial population data is based on self-identification. Respondents have the option of selecting one or more races.
