FRANCISCO V. AGUILAR
NEVADA
SECRETARY of STATE

101 N Carson Street, Suite 3
Carson City, NV
775.684.5708

March 4, 2025

Ms. Diane Thornton, Acting Director
Nevada Legislative Counsel Bureau
401 South Carson Street
Carson City, Nevada 89701

Dear Director Thornton:

Pursuant to Nevada Revised Statute 293.4695, the Secretary of State hereby submits the following report on the election process for the 2024 election cycle to the Nevada Legislature.

This report is based on information collected from Nevada's 17 counties and the new Statewide Voter Registration System (implemented for the General Election) as it pertains to the 2024 Presidential Preference Primary, Primary Election and General Election. This report is composed of an executive summary and the following seven sections:

- Ballots not included in the final canvass of votes;
- Mechanical voting system malfunctions;
- Polling places not open during the prescribed time;
- Challenges made to the eligibility of a voter;
- Complaints regarding ballots cast by mail or facsimile;
- Results of voting system audits;
- Provisional ballots cast; and
- Same-Day Registrations.

This report provides a detailed summary of the information submitted by each county. Individual county reports are available upon request.

If you should need clarification or have additional questions regarding this report, please do not hesitate to contact my office at (775) 684-5705.

Respectfully,

Francisco V. Aguilar
Secretary of State

Mark Wlaschin
Mark Wlaschin
Deputy Secretary for Elections

2024 Election Cycle Summary

Presidential Preference Primary Election

The 2024 Presidential Preference Primary (PPP) Election was held on February 6, 2024. Voter participation in the Presidential Preference Primary Election was 18.6%, with 215,742 ballots being cast for candidates from both the Democratic and Republican parties. For this election, there were 1,157,258 registered Democratic and Republican voters who were eligible to cast a ballot in the Presidential Preference Primary Election.

Of those that cast a ballot in the PPP, 168,849 (78.3%) voted by mail ballot, 23,802 (11.0%) voted during the early voting period, and 23,091 (10.7%) voted on election day.

Primary Election

The 2024 Primary Election took place on June 11, 2024. Voter participation in the Primary Election was 16.2% percent. In the 2024 Primary Election, there were 1,997,488 registered voters, and 323,948 ballots cast in this election.

Of those that cast a ballot in the Primary Election, 193,399 (59.7%) voted by mail ballot, 65,618 (20.2%) voted during the early voting period, and 65,031 (20.1%) voted on election day.

General Election

The General Election was held on November 5, 2024. Of the 2,042,607 active registered voters, a total of 1,487,887 or 72.8% cast a ballot in the election. Of those who voted, 669,334 (45.0%) voted by mail ballot, 553,719 (37.2%) voted during the early voting period, and 264,834 (17.8%) voted on Election Day.

Nevada's online voter registration system also continues to grow in popularity. The online voter registration system allows voters to register to vote and to update certain voter registration information such as their political affiliation and contact information. 288,942 voters used Nevada's Online Voter Application (NOVA) between the 2022 General Election and the 2024 General Election.

The use of the Effective Absentee System for Elections (EASE) has been approved in Nevada law for active-duty military members, their spouses and voting-age dependents, overseas citizens, voters with a disability, and tribal voters who live on a colony or reservation. This year, EASE was used by 269 voters in the Presidential Preference Primary, 363 voters in the Primary, and 6,848 voters in the General Election.

2024 Election Security

Since the 2020 election, the Office of the Secretary of State has received a major increase in questions about election fraud, election integrity and investigations into elections. The number of Election Integrity Violation Reports (EIVR) we have received has grown

exponentially. The office is releasing quarterly reports on elections investigations to bring transparency to the public into Nevada's secure elections.

Elections investigations are identified through a number of safeguards within the electoral system; through automatic security checks in the election systems on the county-level, post-election audits, reports from the public and collaborations among Nevada State agencies, trusted organizations and elections offices across the country.

The Secretary of State's Office takes every allegation of an election integrity violation very seriously and investigates each to the full extent of the law.

The Nevada Secretary of State 2024 Election Security Quarterly Reports are available at https://www.nvsos.gov/sos/Home/Components/News/News/3548/33.

2024 Cycle Election Process Report

The following Presidential Preference Primary Election, Primary Election and General Election reports provide a detailed summary of the information submitted by each county.

FRANCISCO V. AGUILAR
NEVADA SECRETARY of STATE

2024 General Election Process Report

In accordance with NRS 293.4695 each county election official prepared and submitted the following information to be included in the Secretary of State's legislative report.

This report is composed of the eight sections for the 2024 General Election. These include ballots not included in the final canvass of votes, complaints regarding ballots cast by mail or facsimile, voting systems malfunctions, polling places, vote challenges, voting systems audits, provisional ballots cast, and same-day registrations.

BALLOTS NOT INCLUDED IN THE FINAL CANVASS

There are several reasons a ballot might not be included in the final canvass of votes. These ballots are often excluded because they do not meet specific criteria as required by statute.

County election officials reported a total of 19,126 ballots that were not included in the final canvass for the 2024 General Election. The following table provides the total number of ballots not included in the final canvass for each county as well as the reasons they were excluded.

2024 General Election
Excluded Ballots

County Totals		Exclusions by Reason	State Total
Carson City	289	No Signature	553
Churchill	59	Signature Mismatch	9,497
Clark	9,608	Identifying Marks	100
Douglas	235	Multiple Ballots in One Envelope	13
Elko	240	Ballot Not Received on time/missed deadline	1,652
Esmeralda	-	Missing or Incomplete Documentation	243
Eureka	5	Returned in Unofficial Envelope	3
Humboldt	25	Ballot Missing from Envelope	124
Lander	5	Voter Deceased	15
Lincoln	5	Already Voted in Person/Submitted Prior Ballot	969
Lyon	534	Ballot Cancelled	213
Mineral	7	Spoiled	46
Nye	159	Other	69
Pershing	8		
Storey	60		
Washoe	2,234		
White Pine	24		
TOTAL	13,497	STATEWIDE TOTAL	13,497

Complaints regarding ballots cast by mail or facsimile

The most prevalent complaints received regarding mail ballots were that a voter did not receive their mail ballot or the voter received two mail ballots for the election. The most common reason for a voter to have not received a mail ballot was either the voter's registration had not been updated or ballots had not been mailed by that time. Once ballots had been sent, and after confirming that the voter's registration was current, the county could offer the options available to the voter, which would include issuing and mailing the voter a new ballot in the mail or that they could pick up directly from the office or informed them of the early voting or election day vote centers that the voter could use to vote in person. When a voter was issued more than one ballot, the county researched the reason the voter received a second ballot, such as a change to the voter's record after the first batch of ballots were mailed, and then the county could inform the voter which ballot was the correct one to vote and return.

Additional complaints in Washoe County were that voter name suffix on the envelope was sometime missing which led to confusion in a household where the voters were not sure which ballot belonged to which family member (e.g., Jr./Sr. or II/III, etc. that resided in one household). The other complaints were from voter confusion over the newly created Reno City Ward and the changes to voters City Wards in relation to this change. The county validated each voter's address that called and provided clarifying information to ensure that the voter had received the correct ballot for the City Ward in which they resided.

MECHANICAL VOTING SYSTEM MALFUNCTIONS

Counties are required to track and report the following information regarding mechanical voting system malfunctions experienced during an election.

(1) Any known reason for the malfunction;
(2) The length of time during which the mechanical voting system could not be used;
(3) Any remedy for the malfunction which was used at the time of the malfunction; and
(4) Any effect the malfunction had on the election process.

Electronic Rosters

For the 2024 General Election, all 17 counties used the KNOWiNK Poll Pad electronic roster poll book system that synchronized to the new Total Vote voter registration system implemented prior to the election. There were few malfunctions reported by the counties relating to the Poll Pads, and of those reported there were tablet screens freezing, printer jams, connectivity issues due to Wi-Fi dropping (electronic rosters must be connected to the internet to ensure voter history is recorded in near-real-time to prevent double voting), and poll pad not writing precinct number on a voter card. Most issues were resolved quickly by rebooting the systems or replacing the unit in order to minimize any delays in checking in and processing voters.

Voting Machines

For the 2024 General Election two (2) Counties use the ES&S Express Vote System (BMD), eleven (11) counties use Dominion Voting System's ICX voting machine with a voter verifiable paper audit trail

(VVPAT) and four (4) counties use Dominion Voting System's ICX voting machine with a Ballot Marking Device (BMD).

Election System and Software (ES&S)

System Version: EVS 6.3.0.0

County	Voting Machine Model	Quantity	BMD Printer	Quantity	Scanner 1 Model	Quantity	Scanner 2 Model	Quantity

Storey	ImageCast X	25	VVPAT	25	ICC G2140	1		
Washoe	ImageCast X	1,475	VVPAT	1,475	ICC G2140	11		

Dominion Voting Systems - With Ballot Marking Device (BMD)

System Version: Democracy Suite 5.17

County	Voting Machine Model	Quantity	BMD Printer	Quantity	Scanner 1 Model	Quantity	Scanner 2 Model	Quantity	Precinct Scanner Model	Quantity
Esmeralda	ImageCast X	9	BMD 404	9	ICC M160	2			ICP2	2
Eureka	ImageCast X	9	BMD 404	9	ICC G2140	1			ICP2	-

Mineral	ImageCast X	23	BMD 404	23	ICC G2140	1	ICC M160	1	ICP2	2
White Pine	ImageCast X	20	BMD 404	20	ICC G2140	1	ICC M160	1	ICP2	2

Few malfunctions were reported on the ES&S Express Vote machines. The malfunctions included flickering screens and printer jams while printing the ballot.

For the Dominion ICX voting machines with the VVPAT, issues reported included card reader errors, touchscreens not being calibrated, machine freezes, QR codes not being read on the VVPAT and the ballot could not be cast until that error was fixed, and USB ports being out or not seated properly. VVPAT malfunctions included paper not being threaded correctly in the machine, thermal paper not printing, and voting machine not recognizing the VVPAT USB port connection.

Malfunctions reported for the Dominion ICX voting machines with BMD printers had similar issues reported, with the main difference being the paper jams reported when printing the voter card.

The remedies for the malfunctions typically included restarting the machine, repairing the defect or addressing the reason for the paper jams, and replacing or swapping out the unit with a backup unit. No reported malfunctions significantly or negatively affected the election process as down time was typically minimal or because backup units were available quickly to replace a malfunctioning unit.

POLLING PLACES

Pursuant to NRS 293.4695, counties are required to report each polling place not open on Election Day from 7:00 am to 7:00 pm and an explanation why any polling place was not open.

For the 2024 General Election all counties reported all polling locations were open by 7:00 a.m. on Election Day with no delays and remained open until 7:00 pm.

VOTER CHALLENGES

There were 146 challenges submitted to three (3) counties that challenged the eligibility of voters. In Clark County, thirty-nine (39) challenges were submitted, Eureka County had one (1) challenge submitted, and Washoe County had one hundred six (106) challenges submitted.

2024 General Election
Challenges made to the Eligibility of Voters
and Result of Each Such Challenge

County	Challenges	Result, if any
Clark	39 Voter Challenges Submitted	13 LTR-RTS; 2 mail ballots; 1 Provisional vote; 6 SDRU; 17 letter sent
Eureka	1 Challenge submitted	Voter challenged by another voter claiming that she was not in the correct jurisdiction. The District Attorney's office was notified and handling the challenge.

Washoe	106 Voter Challenges Submitted	21 - Deemed Sufficient; 85 - Deemed Deficient

VOTING SYSTEMS AUDITS

Tests Conducted Before and After the Official Count of Ballots (Paper Ballots) (NRS 293B.165)
Counties are required to appoint an accuracy and certification board to conduct and review the tests conducted before the start and after the official count of ballots.

Preelection Logic and Accuracy Testing

Preelection testing was conducted by each of the 17 counties prior to the election and all tests results produced expected outcomes with no variations. Below is the number of units tested for each system:

Voting System Audits
By System and County
Preelection Logic and Accuracy Testing

Post-election certification of Voter Verifiable Paper Audit Trail (NAC 293.255)

In accordance with NAC 293.255 counties are required to carry out a post-election certification of the Voter Verified Paper Audit Trail (VVPAT) printers used in the election. Counties with a population of 100,000 or more are required to certify at least two percent or no less than 20 devices, whichever is greater, while counties with less than 100,000 are required to certify at least three percent or not less than four devices whichever is greater. Accordingly, counties tested a total of 496 units and reported 100 percent accuracy and no variations.

In addition, counties that utilized the BMD systems reported auditing 839 individual ballots that were 100% accurate with no discrepancies found.

Post-election Audit for Verification of Operating Systems (NAC 293B.120)

In order to comply with the requirements of NAC 293B.120 counties must verify that the operating system and the election management (voting system tabulation) software version has not been changed or modified since certification. Counties with a population of 100,000 or more are required to certify at least two percent or no less than 20 devices, whichever is greater, while counties with less than 100,000 are required to certify at least three percent or not less than four devices whichever is greater.

Voting System Firmware (Operating Systems)

Each county tested the required number of units or more.

The ES&S counties tested 56 Express Vote units, 14 Express Vote activation card printers, 8 DS200 scanners, 2 DS450 scanners and 1 DS950 scanner.

The Dominion Voting System counties with the VVPAT tested 1468 ImageCast X (ICX) with VVPAT voting machines, 38 ImageCast X (ICX) with BMD printers, 21 ImageCast Central (ICC) G2140 scanners, 6 ImageCast Central (ICC) M160 scanners, 2 ImageCast Central (ICC) 1130 scanners, 5 ImageCast Precinct 2 (ICP2) scanners and all counties reported 100 percent accuracy and no variations.

Election Management System (Computer Software)

Each county tested and certified their software with 100 percent accuracy and no variations.

Maintenance of Audit Trail for Software and Operating Systems (NAC 293B.110)

In accordance with NAC 293B.110 counties are required to maintain an audit trail documenting each time a device is accessed. Each county reported maintaining an audit trail and that no chain-of-custody variations occurred and chain of custody was maintained through the election process.

PROVISIONAL BALLOTS

Nevada uses provisional ballots in elections with federal offices on the ballot and for voters who are registering for the first time during the same day voter registration period. Voters who do not appear on the voter registration list but may otherwise be eligible to vote are eligible to vote, and those registering for the first time, vote by casting a provisional ballot. Provisional ballots are only counted if a voter's eligibility to vote can be confirmed and it is verified that the voter has not cast another ballot for this election in another county in the state.

The table below lists all provisional ballots cast in the 2024 General Election as reported by the counties. There were 30,813 provisional ballots cast of which 28,256 were counted while 2,556 ballots were not counted due to various reasons as shown in the following table.

2024 General Election
Provisional Ballots

County	Total Issued	Total Counted	Total Not Counted	Reason Provisional Ballot Not Counted	State Total
Carson City	450	432	18	**Voter Not Registered in the State/Not Eligible for SDR**	781

SAME DAY REGISTRATION

Nevada allows voters to register to vote or update their current voter registration information after the close of registration through the same day registration process. Voters can register to vote or update their voter registration information through the extended registration period either online or in-person at a polling location during the period for early voting and on election day.

The table below lists the number of same day registrants in the 2024 General Election as reported by the counties. There were 59,591 same day registrants, of which 23,550 were online or during the period for early voting and 36,041 occurred on election day.

2024 General Election
Same Day Registration

Includes New Registrations and Updates

Statewide	**59,591**	**36,041**	**23,550**

This report is composed of the eight sections for the 2024 Primary Election. These include ballots not included in the final canvass of votes, complaints regarding ballots cast by mail or facsimile, voting systems malfunctions, polling places, vote challenges, voting systems audits, provisional ballots cast, and same-day registrations.

BALLOTS NOT INCLUDED IN THE FINAL CANVASS

There are several reasons a ballot might not be included in the final canvass of votes. These ballots are often excluded because they do not meet specific criteria as required by statute.

County election officials reported a total of 3,870 ballots that were not included in the final canvass in the 2024 Primary Election. The following table provides the total number of ballots not included in the final canvass for each county as well as the reasons they were excluded.

2024 Primary Election
Excluded Ballots

County Totals		Exclusions by Reason	State Total
Carson City	3	No Signature	830
Churchill	45	Signature Mismatch	2,519
Clark	2,253	Identifying Marks	47

Pershing	-		
Storey	33		
Washoe	867		
White Pine	-		
TOTAL	3,870	STATEWIDE TOTAL	3,870

Complaints regarding ballots cast by mail or facsimile

Like in the General Election, the most prevalent complaints received regarding mail ballots were that a voter did not receive their mail ballot or the voter received two mail ballots for the election. In the case the voter did not receive a ballot, the county could offer the options available to the voter, which would include issuing and mailing the voter a new ballot in the mail or that they could pick up directly from the office or informed them of the early voting or election day vote centers that the voter could use to vote in person. Where a voter was issued more than one ballot, the county researched the reason the voter received a second ballot, such as there was a change to the voter's record after the first batch of ballots were mailed, and then the county could inform the voter which ballot was the correct one to vote and return.

Additional complaints for the Primary occurred in Washoe County were voters in precinct 5020 were initially mailed the incorrect ballot for their precinct. Once identified, the county mailed new ballots to the voters containing the correct combination of contests and candidates for that precinct.

MECHANICAL VOTING SYSTEM MALFUNCTIONS

Counties are required to track and report the following information regarding mechanical voting system malfunctions experienced during an election.

(1) Any known reason for the malfunction;
(2) The length of time during which the mechanical voting system could not be used;
(3) Any remedy for the malfunction which was used at the time of the malfunction; and
(4) Any effect the malfunction had on the election process.

Electronic Rosters

For the 2024 Primary Election, all 17 counties used their legacy electronic roster poll book systems that synced with their legacy voter registration systems to provide voter processing and check-in. Minimal issues were reported in the primary, but of the issues reported, stable connectivity/connectivity issues with the Wi-Fi and system freezing were the two main issues. The remedies were to restart the pollbook which would resolve the issue or to replace/swap out the unit for a backup unit.

There were no significant delays or impact to the voting process reported from any of the poll book malfunctions submitted.

Voting Machines

For the 2024 Primary Election two (2) Counties use the ES&S Express Vote System (BMD), eleven (11) counties use Dominion Voting System's ICX voting machine with a voter verifiable paper audit trail (VVPAT) and four (4) counties use Dominion Voting System's ICX voting machine with a Ballot Marking Device (BMD).

Dominion Voting Systems - With Ballot Marking Device (BMD)

System Version: Democracy Suite 5.17

County	Voting Machine Model	Quantity	BMD Printer	Quantity	Scanner 1 Model	Quantity	Scanner 2 Model	Quantity	Precinct Scanner Model	Quantity
Esmeralda	ImageCast X	9	BMD 404	9	ICC M160	2			ICP2	2
Eureka	ImageCast X	9	BMD 404	9	ICC G2140	1			ICP2	-
Mineral	ImageCast X	23	BMD 404	23	ICC G2140	1	ICC M160	1	ICP2	2
White Pine	ImageCast X	20	BMD 404	20	ICC G2140	1	ICC M160	1	ICP2	2

Two (2) malfunctions were reported on the ES&S Express Vote machines. The two malfunctions reported were the touch screen was not responsive on one unit and the other was ballot card jamming in the BMD printer.

For the Dominion ICX voting machines with the VVPAT, minimal issues were reported and included card reader errors, printer not ready due to a USB port being unresponsive, and VVPAT printer issues such as QR code not reading or not being able to print the opening report on the machine. Most impacts were minimal to the voting process where machines were either rebooted or replaced/swapped out for new units. Washoe did express some extended interruptions to the voting process from some malfunctions.

There were no malfunctions reported for the Dominion ICX voting machines with BMD printers in this election.

POLLING PLACES

Pursuant to NRS 293.4695, counties are required to report each polling place not open on Election Day from 7:00 am to 7:00 pm and an explanation why any polling place was not open.

Polling places were open from 7:00 am to 7:00 pm on Election Day in all but one (1) county. Humboldt County reported that their Fort McDermitt Tribal Administration location had a delay of approximately 1 hour and 15 minutes in opening due to facility staff not arriving in time to open the building for their election board officers until 8:00 a.m. As soon as the facility was opened, they were able to open their polling location and set up quickly and resumed voting around 8:15 a.m. The polling place staff reported to the county clerk that no voters arrived at the polling place during the period of time that they had not been open.

VOTER CHALLENGES

There were zero (0) challenges to the eligibility of voters submitted to the counties pursuant to NRS 293.4695(1)(d) in the Primary Election.

VOTING SYSTEMS AUDITS

Tests Conducted Before and After the Official Count of Ballots (Paper Ballots) (NRS 293B.165)
Counties are required to appoint an accuracy and certification board to conduct and review the tests conducted before the start and after the official count of ballots.

Preelection Logic and Accuracy Testing

Preelection testing was conducted by each of the 17 counties prior to the election and all tests results produced expected outcomes with no variations. Below is the number of units tested for each system:

Voting System Audits
By System and County
Preelection Logic and Accuracy Testing

Election System and Software (ES&S)

System Version: EVS 6.3.0.0

County	Equipment	Number Tested
Carson City	Express Vote	60
	Express Vote Activation Card Printers	12
	DS200	4
	DS450	1

Postelection certification of Voter Verifiable Paper Audit Trail (NAC 293.255)

In accordance with NAC 293.255 counties are required to carry out a post-election certification of the Voter Verified Paper Audit Trail (VVPAT) printers used in the election. Counties with a population of 100,000 or more are required to certify at least two percent or no less than 20 devices, whichever is

greater, while counties with less than 100,000 are required to certify at least three percent or not less than four devices whichever is greater.

Accordingly, counties tested a total of 237 VVPAT units and reported 100 percent accuracy and no variations.

In addition, counties that utilized the BMD systems reported auditing 981 individual ballots that were 100% accurate with no discrepancies found.

Postelection Audit for Verification of Operating Systems (NAC 293B.120)

In order to comply with the requirements of NAC 293B.120 counties must verify that the operating system and the election management (voting system tabulation) software version has not been changed or modified since certification. Counties with a population of 100,000 or more are required to certify at least two percent or no less than 20 devices, whichever is greater, while counties with less than 100,000 are required to certify at least three percent or not less than four devices whichever is greater.

Voting System Firmware (Operating Systems)

Each county tested the required number of units or more.

The ES&S counties tested 60 Express Vote units, 12 Express Vote activation card printers, 4 DS200 scanners, 1 DS450 scanners and 1 DS950 scanner.

The Dominion Voting System counties with the VVPAT tested 1,224 ImageCast X (ICX) with VVPAT voting machines, 15 ImageCast X (ICX) with BMD printers, 10 ImageCast Central (ICC) G2140 scanners, 1 ImageCast Central (ICC) M160 scanners, 3 ImageCast Central (ICC) 1130 scanners, 9 ImageCast Precinct 2 (ICP2) scanners and all counties reported 100 percent accuracy and no variations.

Election Management System (Computer Software)

Each county tested and certified their software with 100 percent accuracy and no variations.

Maintenance of Audit Trail For Software and Operating Systems (NAC 293B.110)

In accordance with NAC 293B.110 counties are required to maintain an audit trail documenting each time a device is accessed. Each county reported maintaining an audit trail and that no chain-of-custody variations occurred and chain of custody was maintained through the election process.

PROVISIONAL BALLOTS

Nevada uses provisional ballots in elections with federal offices on the ballot and for voters who are registering for the first time during the same day voter registration period. Voters who do not appear on the voter registration list but may otherwise be eligible to vote are eligible to vote, and those registering for the first time, vote by casting a provisional ballot. Provisional ballots are only counted if a voter's eligibility to vote can be confirmed and it is verified that the voter has not cast another ballot for this election in another county in the state.

The table below lists all provisional ballots cast in the 2024 Primary Election as reported by the counties. There were 1,428 provisional ballots cast of which 1,305 were counted while 123 ballots were not counted due to various reasons as shown in the following table.

2024 Primary Election

Provisional Ballots

County	Total Issued	Total Counted	Total Not Counted	Reason Provisional Ballot Not Counted	State Total
Carson City	31	31	-	Not Registered/Did Not Meet Requirements for SDR	84
Churchill	14	14	-	No Proof of ID or Residence	24
Clark	507	406	101	Person Already has Vote Credit	
Douglas	11	11	-	Missing Signature on Affirmation	
Elko	12	12	-	Signature Mismatch

Lyon	15	15	-	Wrong Party Ballot Voted	
Mineral	-	-	-	Other	14
Nye	13	13	-		
Pershing	6	6	-		
Storey	7	7	-		
Washoe	780	758	22		
White Pine	23	23	0		
TOTAL	1,428	1,305	123	Statewide Total	123

SAME DAY REGISTRATION

Nevada allows voters to register to vote or update their current voter registration information after the close of registration through the same day registration process. Voters can register to vote or update their voter registration information through the extended registration period either online or in-person at a polling location during the period for early voting and on election day.

The table below lists the number of same day registrants in the 2024 Primary Election as reported by the counties. There were 5,851 same day registrants, of which 187 were online during early voting or on election day, 575 were new in-person registrations and 5,089 were updates to existing voter records.

2024 Primary Election

Same Day Registration

SDR Totals by County		Same Day Registrations By Type	State Total
Carson City	117	SDR NEW - In Person	575
Churchill	73	SDR Update - In Person	5,089

Clark	4,324		SDR Online - Early Voting & Election Day	187

White Pine	47			
TOTAL	5,851		Statewide Total	5,851

This report is composed of the eight sections for the 2024 Presidential Preference Primary Election. These include ballots not included in the final canvass of votes, complaints regarding ballots cast by mail or facsimile, voting systems malfunctions, polling places, vote challenges, voting systems audits, provisional ballots cast, and same-day registrations.

BALLOTS NOT INCLUDED IN THE FINAL CANVASS

There are several reasons a ballot might not be included in the final canvass of votes. These ballots are often excluded because they do not meet specific criteria as required by statute.

County election officials reported a total of 2,936 ballots that were not included in the final canvass in the 2024 Presidential Preference Primary Election. The following table provides the total number of ballots not included in the final canvass for each county as well as the reasons they were excluded.

2024 PPP Election
Excluded Ballots

County Totals		Exclusions by Reason	State Total
Carson City	8	No Signature	493
Churchill	17	Signature Mismatch	2,088

Clark	1,811		Identifying Marks	45
Douglas	49		Multiple Ballots in One Envelope	7
Elko	22		Ballot Not Received on time/missed deadline	172
Esmeralda	1		ID Required but Not Provided	6
Eureka	5		Returned in Unofficial Envelope	1
Humboldt	19		Ballot Missing from Envelope	98

Lincoln	4		Already Voted in Person/Submitted Prior Ballot	-
Lyon	179		Other	
Mineral	6			
Nye	104			
Pershing	3			
Storey	25			
Washoe	669			
White Pine	4			
TOTAL	2,936		STATEWIDE TOTAL	2,936

<u>Complaints regarding ballots cast by mail or facsimile</u>

Similar to the other elections in 2024, the most prevalent complaints received regarding mail ballots were that a voter did not receive their mail ballot or the voter received two mail ballots for the election. In the case the voter did not receive a ballot, the county could offer the options available to the voter, which would include issuing and mailing the voter a new ballot in the mail or that they could pick up directly from the office or informed them of the early voting or election day vote centers that the voter could use to vote in person. Where a voter was issued more than one ballot, the county researched the reason the voter received a second ballot, such as there was a change to the voter's record after the first batch of ballots were mailed, and then the county could inform the voter which ballot was the correct one to vote and return.

Voters also expressed concern and confusion about the conduct of both a Republican caucus as well as a Presidential Preference Primary, but those individuals were directed to the statutes that require the conduct of the PPP regardless of the actions of the political parties.

Additional complaints for the Presidential Preference Primary occurred due to the way in which vote credit was displayed between county systems and the statewide voter registration list and the state website. Vote credit was displayed incorrectly for some voters which caused confusion but while the vote history was displayed in error, all votes were tabulated without issue.

MECHANICAL VOTING SYSTEM MALFUNCTIONS

Counties are required to track and report the following information regarding mechanical voting system malfunctions experienced during an election.

(1) Any known reason for the malfunction;

(2) The length of time during which the mechanical voting system could not be used;
(3) Any remedy for the malfunction which was used at the time of the malfunction; and
(4) Any effect the malfunction had on the election process.

Electronic Rosters

For the 2024 Presidential Preference Primary Election, all 17 counties used their legacy electronic roster poll book systems that synchronized with their legacy voter registration systems to provide voter processing and check-in.

Minimal issues were reported regarding the poll books in the PPP, but of the issues reported, stable connectivity/connectivity issues with the Wi-Fi, label printer issues, and problems activating voter cards were reported. The remedies were to restart the pollbook which would resolve the issue, fix the label printer issues, or to replace/swap out the unit for a backup unit.

There were no significant delays or impact to the voting process reported from any of the poll book malfunctions submitted.

Voting Machines

For the 2024 Presidential Primary Election two (2) Counties use the ES&S Express Vote System (BMD), eleven (11) counties use Dominion Voting System's ICX voting machine with a voter verifiable paper audit trail (VVPAT) and four (4) counties use Dominion Voting System's ICX voting machine with a Ballot Marking Device (BMD).

Election System and Software (ES&S)

System Version: EVS 6.3.0.0

County	Voting Machine Model	Quantity	BMD Printer	Quantity	Scanner 1 Model	Quantity	Scanner 2 Model	Quantity
Carson City	ExpressVote	130	Express Vote Activation Card Printers	22	DS200	9	DS450/DS950	1/1
Lander	ExpressVote	20	Express Vote Activation Card Printers	8	DS200	3	DS450	1

Dominion Voting Systems - With Voter Verifiable Paper Audit Trail (VVPAT)

System Version: Democracy Suite 5.17

Mineral	ImageCast X	23	BMD 404	23	ICC G2140	1	ICC M160	1	ICP2	2
White Pine	ImageCast X	20	BMD 404	20	ICC G2140	1	ICC M160	1	ICP2	2

Zero (0) malfunctions were reported on the ES&S Express Vote machines.

For the Dominion ICX voting machines with the VVPAT, minimal issues were reported and included time setup error, card reader errors, touch screen not calibrated or unresponsive, and VVPAT printer issues such as QR code not reading or not being able to print the opening report on the machine. Most impacts were minimal to the voting process where machines were either rebooted or replaced/swapped out for new units. Washoe did express some extended interruptions to the voting process from some malfunctions.

There were zero (0) malfunctions reported for the Dominion ICX voting machines with BMD printers in this election.

POLLING PLACES

Pursuant to NRS 293.4695, counties are required to report each polling place not open on Election Day from 7:00 am to 7:00 pm and an explanation why any polling place was not open as required.

For the 2024 Presidential Preference Primary Election all counties reported all polling locations were open on Election Day by 7:00 a.m. with no delays.

VOTER CHALLENGES

There were zero (0) challenges to the eligibility of voters submitted to the counties pursuant to NRS 293.4695(1)(d) in the Presidential Preference Primary Election.

VOTING SYSTEMS AUDITS

Tests Conducted Before and After the Official Count of Ballots (Paper Ballots) (NRS 293B.165)
Counties are required to appoint an accuracy and certification board to conduct and review the tests conducted before the start and after the official count of ballots.

Preelection Logic and Accuracy Testing

Preelection testing was conducted by each of the 17 counties prior to the election and all tests results produced expected outcomes with no variations. Below is the number of units tested for each system:

Voting System Audits
By System and County
Preelection Logic and Accuracy Testing

Postelection certification of Voter Verifiable Paper Audit Trail (NAC 293.255)

In accordance with NAC 293.255 counties are required to carry out a post-election certification of the Voter Verified Paper Audit Trail (VVPAT) printers used in the election. Counties with a population of 100,000 or more are required to certify at least two percent or no less than 20 devices, whichever is greater, while counties with less than 100,000 are required to certify at least three percent or not less than four devices whichever is greater.

Accordingly, counties tested a total of 282 VVPAT units and reported 100 percent accuracy and no variations.

In addition, counties that utilized the BMD systems reported auditing 148 individual ballots that were 100% accurate with no discrepancies found.

Postelection Audit for Verification of Operating Systems (NAC 293B.120)

In order to comply with the requirements of NAC 293B.120 counties must verify that the operating system and the election management (voting system tabulation) software version has not been changed or modified since certification. Counties with a population of 100,000 or more are required to certify at least two percent or no less than 20 devices, whichever is greater, while counties with less than 100,000 are required to certify at least three percent or not less than four devices whichever is greater.

Voting System Firmware (Operating Systems)

Each county tested the required number of units or more.

The ES&S counties tested 61 Express Vote units, 12 Express Vote activation card printers, 8 DS200 scanners, 2 DS450 scanners and 1 DS950 scanner.

The Dominion Voting System counties with the VVPAT tested 615 ImageCast X (ICX) with VVPAT voting machines, 25 ImageCast X (ICX) with BMD printers, 17 ImageCast Central (ICC) G2140 scanners, 1 ImageCast Central (ICC) M160 scanners, 3 ImageCast Central (ICC) 1130 scanners, 10 ImageCast Precinct 2 (ICP2) scanners and all counties reported 100 percent accuracy and no variations.

Election Management System (Computer Software)

Each county tested and certified their software with 100 percent accuracy and no variations.

Maintenance of Audit Trail For Software and Operating Systems (NAC 293B.110)

In accordance with NAC 293B.110 counties are required to maintain an audit trail documenting each time a device is accessed. Each county reported maintaining an audit trail and that no chain-of-custody variations occurred and chain of custody was maintained through the election process.

PROVISIONAL BALLOTS

Nevada uses provisional ballots in elections with federal offices on the ballot and for voters who are registering for the first time during the same day voter registration period. Voters who do not appear on the voter registration list but may otherwise be eligible to vote are eligible to vote, and those registering for the first time, vote by casting a provisional ballot. Provisional ballots are only counted if a voter's eligibility to vote can be confirmed and it is verified that the voter has not cast another ballot for this election in another county in the state.

The table below lists all provisional ballots cast in the 2024 Presidential Preference Primary Election as reported by the counties. There were 452 provisional ballots cast of which 393 were counted while 59 ballots were not counted due to various reasons as shown in the following table.

2024 Presidential Preference Primary Election
Provisional Ballots

County	Total Issued	Total Counted	Total Not Counted	Reason Provisional Ballot Not Counted	State Total
Carson City	11	11	-	Not Registered/Did Not Meet Requirements for SDR	42
Churchill	35	35	-	No Proof of ID or Residence	10

SAME DAY REGISTRATION

Nevada allows voters to register to vote or update their current voter registration information after the close of registration through the same day registration process. Voters can register to vote or update their voter registration information through the extended registration period either online or in-person at a polling location during the period for early voting and on election day.

The table below lists the number of same day registrants in the 2024 Presidential Preference Primary Election as reported by the counties. There were 1,041 same day registrants, of which 235 were new in-person registrants and 806 were in-person updates to existing voter records.
