Senate Concurrent Resolution No. 45—Senators Gibson and Wagner

FILE NUMBER.....131

SENATE CONCURRENT RESOLUTION—Directing the legislative commission to study the adequacy of the state's standard of need for aid to families with dependent children.

WHEREAS, The program of aid to families with dependent children provides essential benefits to families in economic crisis; and

WHEREAS, The standard of need used by the welfare division of the department of human resources to determine the eligibility of families for benefits was established in 1969; and

WHEREAS, During the intervening period there has been rapid growth in the population of poor persons in this state and a dramatic increase in the need for assistance with the basic necessities of life; and

WHEREAS, The resulting increase in the cost of medical care for indigent persons is borne directly by the counties and local communities; now, therefore, be it

RESOLVED BY THE SENATE OF THE STATE OF NEVADA, THE ASSEMBLY CONCURRING, That the legislative commission is hereby directed to study the adequacy of the standard of need used to determine eligibility for aid to families with dependent children, including the present cost of the goods and services which the program is intended to provide; and be it further

RESOLVED, That the legislative commission report the results of its study and any recommendations for legislation to the 64th session of the Nevada legislature.

SUMMARY OF RECOMMENDATIONS

This summary represents the major conclusions and recommendations of the subcommittee. The recommendations were developed after considerable review of the current needs standard and an in-depth analysis of a number of alternative approaches which could be used in modifying the current needs standard. The subcommittee also took into consideration the testimony from various state, county, city and private officials plus the input and recommendations from recipients and concerned members of the general public. The subcommittee was not charged with determining or examining the philosophical merit of the ADC program, but was charged with determining the adequacy of the current need standard including the present cost of the goods and services which the program is intended to provide. It was understood that final recommendations concerning funding of the payment levels would rest with the 64th session of the Nevada legislature. The subcommittee recommends:

1. That the current standard of need used by the state welfare division to determine eligibility for the aid to families with dependent children program should be modified to reflect the current cost of living. The existing needs standard was developed in 1969 and was modified slightly through 1975. The needs standard has not been adjusted or modified by the state welfare division since that time. The subcommittee felt that this needs standard is inadequate and does not reflect the current cost of living for an adult with children.

The subcommittee reviewed data which showed, for a family of three, Nevada's need standard ranked 49 out of 54 states and political subdivisions in order of dollar amounts. The ranking ranged from \$812 for number 1 (Vermont) to \$160 for number 54 (Puerto Rico). Nevada, at number 49, has a needs standard for an adult with two children of \$285 per month.

The subcommittee further recommends that the state welfare division, in determining the standard of need for aid to families with dependent children, use as a basis the Federal Poverty Guidelines reduced by the amount of dollars allocated under the Thrifty Food Plan (Food Stamps). Both the Federal Poverty Guidelines and the dollars allocated under the Thrifty Food Plan are updated and modified each year. The subcommittee, therefore, felt that this was a reasonable and equitable method to be used in determining the needs standard for aid to families with dependent children. The subcommittee also felt that the state welfare division, as part of its budgetary process, should recommend updating the needs standard every biennium by presenting revised figures to each session of the Nevada legislature.

If the current needs standard is modified, as recommended by the subcommittee, the dollar amount of the needs standard for a mother and two children would increase from the current level of \$285 to approximately \$550. This would move Nevada's needs standard ranking from 49 to 15.

2. That in determining the average grant for payment levels, Nevada should attempt to pay 100 percent of need; however, if that is not economically feasible, the payment level should be no less than 70 percent of the revised needs standard.

For a mother and two children with a revised needs standard of \$550, the 70 percent payment level would be \$385 and the 100 percent payment level would be \$550. It should be noted that the current payment level for a mother and two children was increased by the 1985 legislature to 100 percent of need which equates to \$285.

Nevada's \$285 payment level for the Aid to Dependent Children (ADC) program ranks 38th out of 54 states and political entities. The payment levels range from a high of \$719 in Alaska to a low of \$80 in Puerto Rico. At the 70 percent payment level, Nevada's payment of \$385 a month for a mother and two children would place Nevada's ranking at number 17 out of 54 states and political entities.

MISC21/sum

REPORT OF THE LEGISLATIVE COMMISSION

TO THE MEMBERS OF THE 64TH SESSION OF THE NEVADA LEGISLATURE:

This report is being submitted in compliance with Senate Concurrent Resolution No. 45 of the 63rd session of the Nevada legislature which directed the legislative commission to study the adequacy of the state's standard of need for aid to families with dependent children.

In order to conduct the study, the legislative commission, under the auspices of the joint interim finance committee, appointed a subcommittee to recommend appropriate action to the 1987 session of the Nevada Legislature. Legislative members of the subcommittee were:

Senator John M. Vergiels, Chairman
Assemblyman Terry Tebbs, Vice Chairman
Senator Donald R. Mello
Assemblyman Marvin M. Sedway

The subcommittee held four meetings and received considerable testimony concerning the status and limitations of the state's current standard of need for aid to families with dependent children. The subcommittee received testimony from state officials, county officials, the Nevada Association of Counties (NACO), representatives of interest groups, recipients and members of the general public concerning the inadequacy of the current needs standard used to determine assistance under the state's aid to families with dependent children program.

The subcommittee reviewed a great deal of information and has attempted in this report to present its findings and recommendations briefly and concisely. All supporting documents and minutes are on file in the fiscal division of the legislative counsel bureau and are available to any member.

The subcommittee wishes to recognize and thank the many persons who attended and participated in the meetings of the subcommittee for their cooperation in providing valuable information about the operation of the state's program of aid to families with dependent children. In addition, the subcommittee would like to thank the staff of the state welfare division, in particular: Mrs. Linda Ryan, administrator; Mr. Mike Willden, chief of eligibility and payments; Mr. Keith MacDonald, chief, Medicaid program; and Mr. Joel Pinkerton, chief of financial program services.

This report is transmitted to the members of the 64th session of the Nevada legislature for its consideration and appropriate action.

Respectfully submitted,

Legislative Commission
Legislative Counsel Bureau
State of Nevada

Carson City, Nevada

MISC21/SCR45

REPORT TO THE 64TH SESSION OF THE NEVADA LEGISLATURE BY THE
LEGISLATIVE COMMISSION'S SUBCOMMITTEE TO STUDY THE ADEQUACY
OF THE STATE'S STANDARD OF NEED FOR AID TO FAMILIES WITH
DEPENDENT CHILDREN

I. INTRODUCTION AND BACKGROUND

The 63rd session of the Nevada legislature, in 1985, adopted Senate Concurrent Resolution No. 45 (File Number 131, Statutes of the 1985 session) which directed the legislative commission to study the adequacy of the state's standard of need for aid to families with dependent children. Senate Concurrent Resolution No. 45 recognized that the current standard of need used by the state welfare division of the department of human resources to determine the eligibility of families for benefits was established in 1969. Since then, the state has experienced rapid growth in population and inflation has generally been very high. The commission was directed to complete a review of the adequacy of the standard of need used to determine eligibility for aid to families with dependent children, including the present costs of goods and services which the program is intended to provide. The results of the study are to be reported for further consideration by the 64th session of the Nevada legislature.

SUBCOMMITTEE MEETINGS

The S.C.R. 45 subcommittee held a total of four meetings: one in Las Vegas, one in Reno, one in North Las Vegas and the final meeting in Carson City.

SUBCOMMITTEE STUDY METHODOLOGY

The S.C.R. 45 subcommittee conducted its study through the public hearing process and requested and received considerable input from governmental entities within the State of Nevada, private non-profit entities, interested parties and representatives from the department of human resources and state welfare division.

II. HISTORY AND OPERATION OF THE STATE'S AID TO DEPENDENT
CHILDREN (ADC) PROGRAM

Aid to families with dependent children (AFDC) was established by the Social Security Act in 1935. Nevada entered the program in 1955, providing cash assistance only until Medicaid was implemented in 1967. Under Title IV-A of the Social Security Act, federal funds are available to all states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands for the purpose of maintaining and strengthening life by providing

financial assistance and care to needy dependent children in their homes or in the homes of responsible, caretaker relatives. Nevada provides assistance only to single-parent households and to two-parent households where one or both of the parents are incapacitated or disabled. Nevada has not chosen the AFDC unemployed parent program option which is available to two-parent households when the principal wage earner is unemployed. Twenty-five states and the District of Columbia offer benefits through the Unemployed Parent Option (AFDC-UP).

Funding History

Overall funding for the state's aid to dependent children budget is roughly 50 percent federally funded and 50 percent state funded. An exception is the federal Indo-Chinese Program which is 100 percent federally funded. Table 1, which follows, traces the funding and caseload history of the ADC program from fiscal year 1976 through fiscal year 1985. As can be seen from the table, caseloads in the ADC program have varied up and down from year-to-year with no clear trend. In fiscal year 1976, the program had an average person count per month of 15,451. This average monthly caseload declined to 9,532 in fiscal year 1979 and increased to 13,365 in fiscal year 1985.

Revenues, expenditures and general fund reversions align closely to the volume of caseload in each fiscal year. The expenditure level for the program has been fairly stable, ranging from \$9.9 million in fiscal year 1976 to approximately \$10.7 million in fiscal year 1985. The ADC budget was capped beginning in 1982 and the average payment per person per month was adjusted continuously to stay within the capped revenue levels. The 1985 session of the Nevada legislature removed the cap on the ADC average monthly grant and instituted a more flexible cap which now includes the programs of ADC, Medicaid, food stamps and child welfare.

The average payment per month from fiscal year 1976 through fiscal year 1985 has ranged from \$53.20 to \$75.12. The 1985 legislature increased the average monthly grant from \$80 recommended in The Executive Budget to \$85 per month for each year of the biennium. The 1985 session of the legislature supported the administration's caseload estimates of 13,500 recipients per month. However, the average monthly ADC caseload increased to 15,307 for fiscal year 1986. A month by month comparison of aid to dependent children caseload figures is shown in table 2. The table reflects caseload figures by month from fiscal year 1979 through fiscal year 1986.

As a result of the increase in the average monthly caseload in fiscal year 1986, the legislatively approved budget of \$13,770,000 for fiscal year 1986 proved inadequate. The welfare division requested and received approval from the legislature's interim finance committee for a budgetary transfer of \$1,552,142 from the state's Medicaid program to have adequate funding to complete the fiscal year. For fiscal year 1987, the welfare division has a total approved ADC budget of \$13,770,000. It is anticipated that this amount will also be inadequate to meet the increased caseloads in the ADC program.

Application Process

Clients must complete an ADC application and submit it to their local Nevada state welfare district office for processing. A decision is made within 45 days from the application date. The ADC application is also a Medicaid application. Clients who are eligible for ADC cash assistance are automatically eligible for Medicaid. The Medicaid card will be attached to the assistance check.

Medicaid assistance can be requested and will be granted when certain criteria are met up to three months prior to the month of the ADC application. Also, an ADC assistance unit that becomes ineligible for ADC cash assistance, solely due to increased earnings, may remain eligible for Medicaid for four to nine additional months when certain criteria are met.

Eligibility Criteria

To be eligible for ADC the following requirements must be met:

A. Deprivation of Parental Care/Support Must Exist

One or both natural/adoptive parents must be deceased, absent or incapacitated.

The federal regulations include an option for states to aid families when the parents are in the home where the principal earner is unemployed. Nevada has never offered this type of assistance.

B. Children Must be Living in the Home of a Relative of a Specified Degree

The child must be living with an individual who is applying for assistance on the child's behalf and who provides care and supervision and is the child's:

1. Father, mother, sister, brother, grandfather, grandmother.

2. Uncle, aunt, nephew, niece, first cousin.
3. Stepfather, stepmother, stepsister, stepbrother.

C. Persons Who Must Be Included in the Assistance Unit

An application for dependent child must also include, if living in the same household and otherwise eligible to apply for assistance:

1. Any natural or adoptive parent of the dependent child;
AND
2. Any blood-related or adoptive brothers or sisters of the dependent child who are themselves dependent children who meet age and deprivation requirements.

D. Age/School Requirements

Children must be under age 18, OR

Be age 18 (1) attending school full-time expecting to graduate before age 19, or (2) they have not completed high school but are attending vocational or technical training and the course of study is expected to be completed before the child reaches age 19.

E. Residency

Clients must be living in Nevada with the intention of making Nevada their home permanently or for an indefinite period OR entering Nevada with a job commitment or seeking employment.

F. Citizenship

Client must be a U.S. citizen or an alien legally admitted for permanent residence to the U.S.

G. Support Enforcement Program (SEP)

Clients must cooperate with SEP in establishing paternity or in seeking child support. Any caretaker or parent applying for or receiving ADC is not eligible for assistance if he/she refuses to assist the SEP or district attorney in establishing paternity or in seeking support.

H. Work Incentive Program (WIN)

Clients must register for WIN at the employment security department unless exempt. Failure to cooperate will result in the removal of that person's needs from the ADC grant.

I. Furnishing Social Security Numbers

Each applicant/recipient must provide proof of a Social Security number or apply for a Social Security number to be eligible for assistance.

J. Cooperation/Reporting Obligations

ADC applicants/recipients are required to cooperate in providing necessary information to determine initial and ongoing eligibility and amount of assistance and to report changes which may affect their eligibility/grant. Clients who meet certain criteria are required to report monthly on a specified report form.

K. Resources

Resources/property are evaluated to determine if they are countable or exempt. Countable resources cannot exceed specified limits.

The property reserve limit is \$1,000 per case.

L. Income Consideration/Budgeting

Clients must have income within certain limits to be eligible for assistance. The maximum allowable is based on the number of persons in the assistance unit. A monthly budget is completed for all persons with income to determine ongoing eligibility and the amount of the grant. A 185 percent of needs test is first completed to determine eligibility without application of disregards. Also, some incomes are counted in this test that are not counted in the cash grant computation. If the client has gross income less than the 185 percent of need figure, a cash grant is then computed by subtracting the allowable disregards from gross income. Stepparent income must be budgeted towards the needs of the assistance unit.

a. Need/Payment Standards

Agency need standards are used to determine eligibility and grant amounts. These need standards include food, clothing, recreation, personal incidentals, fuel for heating, cooking and water heating, electricity for refrigeration and lights, household supplies, medical chest supplies and shelter.

Table 3
FISCAL YEAR 1985

NEED/PAYMENT STANDARDS FOR CASES WITH NO ADULT INCLUDED FOR ASSISTANCE

<u>CHILDREN</u>	<u>185%</u>	<u>NEED STANDARD 100%</u>	<u>PAYMENT ALLOWANCE 82%</u>
1	\$103.60	\$ 56.00	\$ 45.92
2	207.20	112.00	91.84
3	310.80	168.00	137.76
4	414.40	224.00	183.68
5	518.00	280.00	229.60
6	621.60	336.00	275.52

Table IV
NEED/PAYMENT STANDARDS FOR CASES WITH AN ADULT INCLUDED FOR ASSISTANCE - INCLUDES INCAPACITATED PARENTS

<u>PERSONS</u>	<u>185%</u>	<u>NEED STANDARD 100%</u>	<u>PAYMENT ALLOWANCE 82%</u>
1	\$320.05	\$173.00	\$141.86
2	423.65	229.00	187.78
3	527.25	285.00	233.70
4	630.85	341.00	279.62
5	734.45	397.00	325.54
6	838.05	453.00	371.46

For each additional person add \$56.00 to the 100 percent need standard.

b. Earned Income Disregards

The following are deducted from each person's gross earnings when certain conditions are met:

1) Standard Work Expense

\$75 when wage earner reports timely with verification of earnings.

2) Child Care

Actual amount paid up to a maximum of \$160 per month per child if wage earner worked 120 hours or more. A maximum of \$80 per month per child is allowed when the wage earner worked less than 120 hours or when verification of the number of hours worked is not reported/provided.

3) Earned Adjusted Net Income

The first \$30 of the monthly net earned income (after the child care and work expense deductions) plus 1/3 of the remainder is deducted for a maximum of four consecutive months. After the above deduction has been applied, the client is eligible to receive a \$30 wage deduction for eight additional consecutive months.

c. Stepparent Income Disregards

When the ADC natural parent is married to and living with a stepparent, the stepparent's income must be considered towards the needs of the assistance unit. The following deductions are subtracted from the stepparent's gross income when certain conditions are met:

1) Standard Work Expense

\$75 when stepparent worked 120 hours or more.

\$50 when stepparent worked less than 120 hours or when verification of hours worked is not reported/provided.

2) Need Standard Deductions

The 100 percent need standard is deducted for the stepparent plus any other persons living in the home who are NOT included in the ADC assistance unit who are claimed by the stepparent as dependents for federal income tax purposes.

3) Support Payment Deductions

Amounts actually paid by the stepparent to persons not living in the home who are claimed by the stepparent as dependents for federal income tax purposes AND payments made by stepparents for alimony and/or child support.

d. Responsible Parent Income Disregards

When a minor parent caretaker (age 17 or younger) applicant/recipient is living with one or both natural/adoptive parents, the income and resources of the minor's parent's must be used to determine eligibility and amount of assistance for the minor's assistance unit. The following deductions are subtracted from the responsible parent's gross income when certain conditions are met:

1) Standard Work Expense

\$75 when parent worked 120 hours or more.

\$50 when parent worked less than 120 hours or when verification of hours worked is not reported/provided.

2) Need Standard Deductions

The 100 percent standard is deducted for the responsible parent plus any other persons living in the home who are not included in the ADC assistance unit but who are claimed by the responsible parent as dependents for federal income tax purposes.

3) Support Payment Deductions

Amounts actually paid by the responsible parent to persons not living in the home who are claimed by the responsible parent as dependents for federal income tax purposes AND payments made for alimony and/or child support.

Recipient Characteristics Study

In July 1984, the state welfare division prepared a recipient characteristics study for presentation to the 1985 legislature. The S.C.R. 45 subcommittee, as part of their review of the aid to dependent children program, reviewed this characteristics study which is included as Appendix A.

In reviewing the Characteristics of Recipients of Aid to Dependent Children, the S.C.R. 45 subcommittee found that 97 percent of the adults who receive aid to dependent children are women. The average age is 28 and one-half of the eligible children who receive ADC are under six years of age. The average family size is approximately 2.8 persons per family. Approximately 18 percent of ADC cases have income, the primary source coming from child support followed by earned income and Social Security benefits. Over two-thirds of the ADC recipients have lived in Nevada at least five years. Half of the ADC families share households with other individuals and half maintain their own household. First time recipients make up approximately 50 percent of welfare's open caseload with the average length of time on welfare being 9.1 months. A more recent study by the state welfare division indicates the average length of time on welfare has increased to just under 12 months. Only 7.6 percent of Nevada's cases are on ADC longer than two years.

III. STANDARD OF NEED

The state welfare division bases ADC benefits on a standard of need. Grant amounts historically have been paid as a percentage of the need standard. The percentage of the need standard has historically been adjusted as needed to keep the welfare division within spending limitations and to provide ADC recipients with the maximum grant possible.

Federal regulations define the needs standard as follows: "A statewide standard, expressed in money amounts, to be used in determining (a) the need of applicants and recipients and (b) the amount of assistance payment" [45 CFR 233.30 (a) (2)].

The 1969 Standard of Need

States were required, prior to July 1, 1969, by federal regulation, to adjust their need standards to reflect in full cost-of-living changes since the state last updated their need standard. Nevada's welfare division at that time developed a

consolidated standard which included "food, clothing, recreation, personal incidentals, fuel for heating, cooking and water heating, electricity for refrigeration and lights, household supplies, medical chest supplies and shelter." There were some minor adjustments made periodically between 1969 and 1974 to the need standard and as of July 1, 1985, the need standard used by the welfare division is as follows:

Table 3-A
Effective FY 1986
Need Standards for Cases with no Adult included for Assistance

<u>CHILDREN</u>	<u>185%</u>	<u>NEED STANDARD 100%</u>	<u>PAYMENT ALLOWANCE 100%</u>
1	\$103.60	\$ 56.00	\$ 56.00
2	207.20	112.00	112.00
3	310.80	168.00	168.00
4	414.40	224.00	224.00
5	518.00	280.00	280.00
6	621.60	336.00	336.00
7	725.00	392.00	392.00

Table 3-B
Effective FY 1986
NEED STANDARDS FOR CASES WITH AN ADULT INCLUDED FOR ASSISTANCE -
INCLUDES INCAPACITATED PARENTS

<u>PERSONS</u>	<u>185%</u>	<u>NEED STANDARD 100%</u>	<u>PAYMENT ALLOWANCE 100%</u>
1	\$ 320.05	\$173.00	\$173.00
2	423.65	229.00	229.00
3	527.25	285.00	285.00
4	630.85	341.00	341.00
5	734.45	397.00	397.00
6	838.05	453.00	453.00
7	941.65	509.00	509.00
8	1,045.25	565.00	565.00

As can be seen in table 3-B, for an adult with two children, the need standard is \$285 and the payment level at 100 percent is also \$285. The column titled "185%" is an important eligibility test against an applicant's gross income. The column shows the dollar amounts which an applicant may have under gross income

which is figured prior to income tax withholding, FICA, child care expenses, necessary work expenses, etc. This gross income may not exceed 185 percent of the standard. For example, the same adult with two children cannot have a gross income which exceeds \$527.50 per month.

Nevada's Ranking

Comparative data as of July 1, 1985, on how Nevada's aid to dependent children need standard ranks in comparison to other states and political entities is shown in table 4. The table shows comparative data for one adult and two children. At that time, Nevada's need standard of \$285 was ranked 45th out of 54 states and political entities. Table 5 shows comparative data on ADC payment levels as of July 1, 1985. At that time Nevada was ranked 33rd with a payment level of \$285 for one adult and two children. More recent data, which reflects a number of changes among states and their need standard and payment levels, drops Nevada's need standard ranking to 49 out of 54. The latest information concerning ADC payment levels drops Nevada's ranking to 38th out of 54.

In fiscal year 1984, Nevada's percentage of population on the aid to dependent children program was the lowest in the nation at 1.3 percent. The comparative data showing Nevada's ranking compared to other states is shown in table 6.

2) ADC recipient counts are from "Social Security Administration Monthly Benefit Statistics" except Nevada which is 7734 average.

IV. ALTERNATIVE METHODS CONSIDERED FOR MODIFYING THE 1969 NEEDS STANDARD

As was discussed earlier, the current need standard used by the state welfare division was developed in 1969 with some minor modifications being made until 1975. After receiving considerable testimony from state officials, representatives of interest and support groups, recipients and concerned citizens, and after reviewing numerous written reports and material, the S.C.R. 45 subcommittee believes that the current need standard in use by the state welfare division should be significantly modified. The subcommittee feels that the need standard has not kept pace with the inflation that has taken place since 1974. Further, the standard does not include budgetary items to adequately measure the poverty level of a family trying to support itself in 1986.

In analyzing the federal requirements for an ADC need standard, the S.C.R. 45 subcommittee discovered there was a considerable lack of specificity in what needs to be included in the standards. Specifically, the 1969 federal requirements do not include: (a) need standard amounts; (b) items to be included in a need standard; (c) how to establish a need standard; and (d) methods and frequency for updating the need standard. In addition, the subcommittee found there is no uniformity from state to state in the development and updating of the ADC need standard.

Alternative Methods Considered in Updating the Need Standard

At the request of the S.C.R. 45 subcommittee, the state welfare division undertook the study of four separate methodologies which could be utilized to update Nevada's standard of need for aid to dependent children. The four methodologies studied by the division at the subcommittee's direction were:

- (1) Poverty Income Guidelines - figures produced by the Federal Government to determine what the income levels are below which a family must live in poverty.
- (2) Consumer Price Index - increases in the cost of living since the need standard was developed in 1969 and last modified in 1975.
- (3) Expenditure Survey - the results of a client survey conducted by the state welfare division to illustrate how ADC recipients spend their money.
- (4) Market Basket Survey - reflecting the amount of money a person/family needs in Nevada today to pay for the basic necessities of life.

In reviewing the four alternatives, the S.C.R. 45 subcommittee believes that any new need standard should be comprehensive and include as many expenditure items as is typically experienced by an ADC recipient family. A revised need standard methodology should be one that is error-free and computer oriented, requiring the least amount of staff and no great increase in paperwork for the state welfare division and the recipients. Also, the methodology must be easy for the applicants/recipients to understand.

The subcommittee also kept in mind that the basic ADC need standard is associated with and is used in determining eligibility for a number of other state welfare programs. These include the child health assurance program (CHAP), the refugee program and Medicaid. In addition to affecting other state programs, the ADC need standard is used by the Indian General Assistance (IGA) which is paid with 100 percent federal dollars from the Bureau of Indian Affairs. The need standard is used by the IGA and, although no state dollars are used to support indigent Indians, any increases in the need standard will impact this population of Nevadans. By federal regulation, the maximum benefit level for IGA in a state is equivalent to the state's ADC need standard.

Poverty Income Guidelines

The first method presented by the state welfare division and considered by the subcommittee was poverty income guidelines. The guidelines are basically a measure of poverty developed in 1964 by the Social Security Administration and adopted by the Office of Management and Budget in 1969. The measure is built around the department of agriculture's food economy plan and also national average ratios of family food expenditures and other household consumption patterns. It consists of 124 separate cutoffs and determinations as to what families spent. The complete study is shown in Appendix B and is titled Poverty Income Guidelines Information and Analysis. Page 4 of that appendix illustrates the poverty guidelines by family size for the year 1985. The chart illustrates that for a family of three the monthly income allowable would be up to \$737.50. With Nevada's current maximum allowable ADC need standard for a family of three of \$285, this would place the family short of the poverty level by \$452 a month.

The chart on page 5 of the appendix is a comparison of Low Income Assistance Program need levels to the 1985 Poverty Income Guidelines. As can be seen from a review of the chart, a number of programs utilize the Federal Poverty Guidelines in determining eligibility under their programs. For example, the WIC Program uses 185 percent, the school lunch program uses 145 percent and

the food stamps programs use 135 percent of the federal poverty guidelines. In 1985, the ADC need standard used by the state welfare division ranged from 30 to 39 percent of the Federal Poverty Guidelines.

Statistics released in the governor's report titled On the Extent and Distribution of Poverty in the State of Nevada, published by the office of community services, the problem of increased poverty rates among children is illustrated. The report points out that nearly one of every three persons in poverty in Nevada is a child under 18, and children constitute one of the few segments of the state population which saw a rise in poverty rates from 1970 to 1980 (an increase from 9.1 percent to 10 percent). The report estimates out of a total state population of 208,447 children under 18, that 20,752 are in poverty.

Consumer Price Index Analysis

The second method considered by the subcommittee in updating the need standard is contained in Appendix C and titled Consumer Price Index Analysis. In comparing the Consumer Price Index Analysis methodology, the subcommittee actually considered two separate sets of numbers as possible ways of updating the need standard. Since the original need standard was developed in 1969, the subcommittee considered what the effect would be of updating those figures using the Consumer Price Index Analysis. The subcommittee realized that some minor modifications were done to the 1969 need standard up until 1975 and considered figures presented by the state welfare division as to what the effect would be by updating the need standard from the last time it was modified in December 1975.

Again using the family of three, updating the need standard from 1969 would revise the cost of that standard up to \$810 a month. By comparison, the cost of updating the 1975 standard using the Consumer Price Index would be \$555 a month.

The chart on page 37 of Appendix C points out that in May of 1969, the Consumer Price Index stood at 108.7 and as of December 1, 1985, the Consumer Price Index had risen to 322.6 for an increase of 196.8 percent. By comparison, as shown on page 36, the Consumer Price Index for a family of three in December 1975 stood at 165.6 percent and this compares to the December 1985 Consumer Price Index of 322.6 percent or an increase of 94.8 percent. A complete listing of the changes in the Consumer Price Index from January 1968 through November 1985 are shown on page 39 of Appendix C.

Client Expenditure Survey Analysis

Appendix D titled Client Expenditure Survey Analysis, was a joint survey conducted by the state welfare division in conjunction with Nevada legal services and the Nevada Association of Counties. The group jointly developed a questionnaire to send to clients who were receiving both ADC and food stamps and to clients who were recently denied benefits from those programs because of too much income. A sample of the questionnaire is shown on pages 2 through 5 of Appendix D.

The survey divided expenses into two major groups: basic needs and supplemental components. The survey sample consisted of 99 active and 96 denied joint ADC and food stamp cases. The 96 cases were denied due to income exceeding the current need standard. The survey was a sequential sampling proportional to district office caseload size. The state welfare division informed the subcommittee that the results of the client survey expenditure study were not verified and the survey was done over the telephone to obtain average expenditures per month.

Page 54 of Appendix D shows a compilation of the survey results by household size and the detailed expenditures for basic components and supplemental components. Because a number of respondents did not answer all of the questions, the survey results are shown two ways: the average costs for those who had an expense and the overall average costs for the sample group.

The results indicate that for a family of three, the Client Expenditure Survey average of those with costs is \$515 a month and for the overall average of the sample group the same family of three has costs of \$424 a month. With the limited sample size and the lack of verification on the data, the subcommittee did not feel the client survey adequately reflected costs of aid to dependent children recipients.

Market Basket Survey Analysis

The final method studied by the subcommittee was a market basket approach to a new need standard. The state welfare division utilized eight basic need items presently included in the need standard and six additional items that were considered in the survey. The detailed results of the market basket survey are shown in Appendix E. The elements and results of the market basket survey are included on page 21 of the appendix. The basic need elements included in the survey are rent/mortgage, food, utilities, household supplies/operation, clothing, medical supplies, personal care and recreation. The supplemental items considered were telephone and transportation. The state welfare division, in their analysis, did not include school supplies and

child care. In reference to school supplies, the welfare division stated they were advised by the state department of education, that Nevada law requires a free education for children up to age 18 and that if a family cannot afford paper, pencils and supplies for school, the school district must supply those necessities. In reference to child care, the welfare division stated that working mothers represent only 6 to 8 percent of the ADC caseload and receive a deduction from their income for child care up to a maximum of \$160 per month per child. Also, they stated many working mothers receive assistance from JTPA or WIN to cover the costs of child care and, consequently, no allowance for child care was recommended in the Market Basket Analysis.

The results of the Market Basket Survey for a family of three showed a monthly income allowable of up to \$789 per month.

V. COSTS AND COMPARISONS OF THE FOUR METHODOLOGIES FOR CHANGING THE ADC NEED STANDARD

After reviewing each individual method for changing the existing ADC need standard, the subcommittee summarized the basic costs of each method by household size. In addition, the subcommittee thought it would be helpful to do a comparison as to how any proposed changes would place Nevada in relation to its adjoining states. The results of that comparison are shown in table 7 which shows the present ADC need standard and compares the costs of that against the four methodologies. As can be seen from the table, the most expensive method would be the consumer price index over the 1969 standard which, for a family of three, lists the poverty level at \$810 a month. This compares to the present ADC need standard of \$285 a month. The lowest dollar amount per month is shown for the client expenditure survey (overall average of sample group) which, for a family of three, is \$424.

In addition to analyzing and comparing the basic dollar ranking of the need standard comparisons, the subcommittee analyzed what the various costs would be at different payment levels for different household sizes under the different options. The results of that comparison are shown in Appendix F.

Federal Poverty Guidelines Less the Thrifty Food Plan

The S.C.R. 45 subcommittee also considered another methodology which was jointly presented by Nevada legal services and the state welfare division. The proposal recommended that the ADC need standard be determined by subtracting the value of the Thrifty Food Plan from the published Federal Poverty Guidelines. It was the feeling of the welfare division and Nevada legal

Table 7

Idaho (55%)	365	446	554	627	700	760	841	917
Oregon (100%)	246	312	368	446	524	596	666	731

services that this methodology would be equitable and would include all the elements contained in the Federal Poverty Guidelines including food. Because all ADC recipients are considered for food stamps, dependent upon their level of income, the proposal would reduce the Federal Poverty Guidelines amount by the dollar amount allocated for the Thrifty Food Plan. The results of that recommendation are shown in table 8. The difference between the Nevada Legal Services recommendation and the welfare recommendation is that the welfare division is recommending that a uniform dollar amount be utilized between each household size for ease in administration. The initial welfare division recommendation was that for each increase in household size, the dollar amount allocated would increase by \$90. For example, for a family of three it would be \$530 under the welfare division recommendation, \$620 for a family of four and \$710 for a family of five. These figures are updated yearly based upon federal revisions to the poverty guidelines and the thrifty food plan.

Table 8

<u>Household Size</u>	<u>Poverty Guideline</u>	<u>Thrifty Food Plan</u>	<u>Legal Services Recommendation</u>	<u>Welfare Div.* Recommendation</u>
1	438	80	358	350
2	588	147	441	440
3	738	211	527	530

7	1,338	422	916	890
8	1,488	483	1,005	980

* For ease of administration, the Division needs to have the same amount of increase for each additional household member.

Comparison of Grant Levels

The subcommittee analyzed what the estimated average grants per person per month are using all the methodologies including the proposed Federal Poverty Guidelines less the Thrifty Food Plan. The subcommittee felt it would be helpful to know what the monthly payment levels are at different percentage payment levels. Table 9 reflects the costs considered by the subcommittee in early 1986. Some of the cost levels have been updated

since then, but the levels of comparisons still apply. As can be seen from an examination of the table, the estimated average grant per month per person at a payment level of 100 percent is currently \$85. If the Federal Poverty Guidelines less the Thrifty Food Plan is used, this rises to a maximum of \$154. The Consumer Price Index (CPI) over 1969 provides the highest grant level at \$234 per month per person. If a payment level of 70 percent is used, benefits under the Federal Poverty Guidelines less the Thrifty Food Plan drop to an average of \$107 per month and benefits based on the CPI over 1969 drop to \$164 per month per person. The welfare division estimates that in addition to the costs of the average ADC grant per month per person, the state Medicaid program would also experience additional costs of approximately \$90 per month per eligible individual. Persons eligible for the ADC program are automatically eligible for the Medicaid program.

Table 9
Estimated Average Grant Per Person Per Month

Option	Percentage of Need Paid					
	100%	90%	80%	70%	60%	50%
Current Need	\$ 85	n/a	n/a	n/a	n/a	n/a
Poverty Less Thrifty Food Plan	\$154	\$138	\$123	\$107	\$ 93	\$ 77
Poverty Guidelines	\$214	\$192	\$171	\$149	\$128	\$106
CPI Over 1969	\$234	\$211	\$187	\$164	\$141	\$117
CPI Over 1975	\$161	\$144	\$129	\$112	\$ 96	\$ 81
Client Survey Overall Avg.	\$149	\$134	\$120	\$105	\$ 89	\$ 75
Client Survey Average With Costs	\$123	\$110	\$ 98	\$ 86	\$ 73	\$ 61
Market Survey	\$228	\$205	\$182	\$160	\$137	\$115

Estimated Medicaid costs for ADC recipients is \$90 to \$113 per eligible person per month.

VI. FINDINGS AND RECOMMENDATIONS

The S.C.R. 45 subcommittee received considerable input from concerned individuals and groups regarding the inadequacy of the current need standard utilized by the state welfare division in determining eligibility for the aid to dependent children program. Appendix G is a letter from the Nevada Association of Counties to Governor Richard H. Bryan concerning the inadequacy of the current ADC need standard. The letter is supported by 95 different individuals, groups and agencies.

The subcommittee recommends:

1. That the current standard of need used by the state welfare division to determine eligibility for aid to families with dependent children should be modified to reflect the current cost of living. The existing need standard was developed in 1969 and was modified slightly through 1975. The need standard has not been adjusted or modified by the state welfare division since that time. The subcommittee felt that this need standard is inadequate and does not reflect the current costs of living for an adult with children.

The subcommittee reviewed data which shows that for a family of three, Nevada's need standard now ranks 49th out of 54 states and political subdivisions in order of dollar amounts. The ranking range is from \$812 for number 1 (Vermont), to \$160 for number 54 (Puerto Rico). Nevada (number 49) has a need standard for an adult with two children of \$285 a month.

The subcommittee further recommends that the state welfare division, in determining the standard of need for aid to families with dependent children, use the Federal Poverty Guidelines reduced by the amount of dollars allocated under the Thrifty Food Plan (food stamps). Both the Federal Poverty Guidelines and the dollars allocated under the Thrifty Food Plan are updated and modified on a yearly basis. The subcommittee, therefore, feels that this is a reasonable and equitable method to be used in determining the need standard for aid to families with dependent children. The subcommittee also believes that the state welfare division, as part of its budgetary process, should recommend updating the need standard every biennium by presenting revised figures to each session of the Nevada legislature. Table 10 reflects the updated need standard based upon revisions by the Federal Government of the Federal Poverty Guidelines and the Thrifty Food Plan. As can be seen in the chart, the revised need standard for a family of three would be \$550 a month.

Table 10
Revised Need Standard
Poverty Guidelines and Thrifty Food Plan

<u>Household Size</u>	<u>Old Need</u>	<u>Revised Need</u>
1	\$350	\$ 360
2	440	445
3	530	550
4	620	645
5	710	745
6	800	835
7	890	930
8	980	1,025

If the current need standard were modified, as recommended by the subcommittee, the dollar amount of the need standard for a mother and two children increases from the current level of \$285 to approximately \$550 per month. This will move Nevada's need standard ranking from 49 to 15. (See Appendix H)

The revised dollar amounts contained in the 1986 Federal Poverty Level, the Thrifty Food Plan, the Poverty Level less the Thrifty Food Plan, and the adjusted standard of need are shown in table 11.

Table 11
CALCULATION OF NEED STANDARD BASED ON POVERTY
FIGURES LESS THE THRIFTY FOOD PLAN
(REVISED TO REFLECT 1986 ADJUSTMENTS)

<u>HH Size</u>	<u>1986 Poverty Level</u>	<u>Thrifty Food Plan</u>	<u>Poverty Less TFP</u>	<u>Adjusted* Standard</u>
1	\$ 447	\$ 80	\$ 367	\$ 360
2	604	147	457	455
3	760	211	549	550
4	917	268	649	645
5	1,074	318	756	740
6	1,230	382	808	835
7	1,387	422	965	930
8	1,544	483	1,061	1,025

* For ease of administration, Need Standard is adjusted so incremental increases are given for each additional household number.

2. That in determining the average grant for payment levels, Nevada should attempt to pay 100 percent of need. However, if that is not economically feasible, the payment level should be no less than 70 percent of the revised need standard. Table 12 portrays revised payment levels at various percentages of the proposed new need standard. For example, for a mother and two children with the revised need standard of \$550, the 70 percent payment level would be \$385 a month and the 100 percent payment level would be \$550 a month. It should be noted that the current payment level for a mother with two children was increased by the 1985 legislature to 100 percent of need which equates to \$285 per month.

Nevada's \$285 ADC payment level ranks 38th out of 54 states and political entities. The payment levels range from a high of \$740 in Alaska to a low of \$80 in Puerto Rico. At the 70 percent payment level, Nevada's payment of \$385 for a mother and two children would place Nevada's ranking at number 17 out of 54 states and political entities. (Appendix H, Page 4).

ADC Caseload and Budget Projections

The revised need standard is displayed in table 13-A. This revised need standard is based upon use of the Federal Poverty Guidelines minus the Thrifty Food Plan. The table displays what the standard will be for various household sizes. For example, a three-person household would have a need standard of \$550 per month.

Table 13-B displays what the new payment levels and average grants would be at the new percentage of need payment levels.

8	1,896.25	1,025.00	922.50	820.00	717.50	615.00	512.50

EXHIBIT 13-B
NEW PAYMENT LEVELS AND AVERAGE GRANTS
BASED UPON THE PERCENT OF NEED PAYMENT

<u>Need Percentage</u>	<u>New Payment (Avg. Grant)</u>
100%	\$550 (\$158)
90%	495 (\$142)
80%	440 (\$127)
70%	385 (\$111)
60%	330 (\$ 95)
50%	275 (\$ 79)

The costs and anticipated caseloads utilizing the new need standard at various payment levels are displayed in tables 14-A through 14-D. Table 14-A displays the current costs and caseload levels of the ADC program, plus what the caseload and estimated expenditures would be in utilizing the new need standard with no change in the current payment level of \$85 per month. Table 14-B displays caseload and estimated expenditures utilizing the new need standard and payment levels at 60 percent of need. Exhibit 14-C utilizes the new need standard and change in payment levels at 70 percent of need. For example, in fiscal year 1988, utilizing an average grant of \$111 a month, times 12 months, times 21,012 anticipated recipients, the total estimated expenditures for that fiscal year would be \$27,987,984. This would be the anticipated costs at the 70 percent of need payment level with about half of that total cost being paid from federal funds.

Finally, table 14-D displays what the caseload and expenditure estimates would be utilizing payment levels at 100 percent of need.

The state could also anticipate additional expenditures being necessary in order to provide additional case workers for the state welfare division in administering the expanded ADC program. Using the division's current staffing standard of 190 cases per worker for ongoing cases and 35 cases per worker for intake cases, and an 18 percent ratio of intake cases to ongoing cases, the staffing needs could be calculated at the various payment levels. The welfare division uses a staffing ratio of one supervisor to eight eligibility workers and one clerical for every four professional positions. Additional expenses would be anticipated for telephone, equipment, operating supplies, rental of office space, travel and data processing.

In addition to the administrative costs of the state welfare division, there would be additional expenditures incurred in the state Medicaid program. The state welfare division anticipates their additional expenditures per new ADC recipient will be anywhere from \$90 to \$115 per recipient per month.

ANTICIPATED ADC COSTS AND CASELOADS

APPENDIX A

ADC Program Recipient Characteristics
Study, July 1984

**Aid to Dependent Children Program
Recipient Characteristics Study**

July 1984

**Research and Statistics
January 1985**

The Nevada State Welfare Division has conducted a study of ADC cases to determine characteristics of applicants and recipients. The study is based on data from the month of July 1984, a typical grant month. Data was obtained through two methods, the Welfare Computer Master File and a client survey form.

3,758 cases from the Master File were studied and survey forms were given to all applicants during July 1984 and mailed with all redetermination packets during July 1984. 1010 questionnaires were returned.

I. Welfare Master File Data

Tables 1 through 27 contain data extracted from the Welfare Master file. Each of the major findings summarized here are keyed to the appropriate tables. All refer to open cases unless otherwise stated.

Family Composition: Family Size, Age, Gender

1. Almost 97 percent of the adults are women. Of the 3,636 adults, only 116 are men. (Table 10)
2. One-half of the adults are between the ages of 13 and 26; the average age is just under 28. (Table 12)
3. One-half of the eligible children are under six years of age; the average age is 6.7 years.
4. Slightly more than one-half of the cases have three or more eligible persons on the case. The average family size is 2.8 persons. (Tables 9, 10)
5. Forty-nine percent of ADC cases have just one eligible child on the case. (Table 8)

Ethnicity

6. About half of recipients are Black and the other half are White, Hispanic, Indian or Other. (Table 1)

Income

7. 17.9% of cases had income; the average amount was \$118.60. The most common source of income was child support (52.7%), followed by earned income (29.3%), Social Security benefits (5.3%), and child earnings (3.4%). (Tables 15, 16)

WIN

8. Of 3,636 adults, 816 participate in the WIN program (22%); 21% of these participants are voluntary - that is, they had waived a legitimate exemption. (Table 24)
9. The most common reason for non-participation is that there is a child under six in the home; this accounts for 22% of exemptions. (Table 24)

(WIN status by ethnicity and age are presented in Tables 24 and 25.)

Absent Parents

There is one absent parent in 57% of ADC cases, two absent in 30.8%, and 11.8% of cases had three or more absent parents. (Table 26)

Time on Rolls

In looking at the length of time on the caseload, we separated open from closed cases. Within these categories, only data on ethnicity and previous enrollment in Nevada was available to compare differences.

10. Most recipients are on our caseload for the first time. First-time recipients make up 50% of the open caseload, and 71% of the closed caseload. (Table 23)
11. The average length of time an open case is on the rolls is 18.6 months. One-half have been ongoing for less than 10.2 months.

Less than one-quarter of ongoing cases (23.3%) have been open more than two years. (Table 17)

12. Case-life is halved when closed cases are examined. The average time now-closed case was on the rolls is 9.1 months; one-half of the cases were closed within 5 months.

Only 7.6 % of these cases has been on longer than two years. (Table 20)

13. For 71% of the closed cases, their time on the rolls had been their first time on welfare in Nevada. For only 50% of the open cases is it their first time. (Table 23)
14. There is only one other variable available to us to compare difference: between open and closed cases: ethnicity.

In the open caseload, Oriental and Black recipients are on the rolls the longest time - averages of 22.7 and 22.6 months, compared to the overall average of 18.6 months. (Table 19)

Among closed cases, Blacks have the longest average duration: 12.5 months. The other ethnic groups' averages are less than a month over the overall average of 9.1 months, or less than the average. (Table 22)

15. The Welfare Master file includes cases closed within the preceding three years, in addition to the ongoing caseload. The ratio of open to closed cases is 3,758/7,558 or 0.50. That is, in a three-year period, we have twice as many cases closed as ongoing cases.

II. Client Survey

The second part of the study is based on a survey of all applicants in the month of July, and of all recipients sent redeterminations in July. The questionnaire requested information not carried on the Welfare Master file. People were asked to answer eleven closed-ended questions (i.e., multiple-choice), and return the form with the application or redetermination. The return rate was 39.2% for applications and 78.4% for redeterminations. Eighty of the survey forms were not marked as application or redetermination by the case workers; we have labeled them separately as "unknown status."

"Respondents" refers to all who answered the questionnaire. "Applicants" are those who filled out the questionnaire at the time of application. "Recipients" are those people on our ADC caseload in July who were up for redetermination and returned the questionnaire with the RD.

Birthplace and Residence

1. The proportion of respondents who were born in Nevada (22.2%) is slightly larger than the proportion of natives in the state's population reported by the 1980 Census (21.3%).

California is the next most common place of birth (17.2%), followed by Louisiana (6.8%). (Table 33)

2. Most applicants/recipients are long-time residents; 57.3% have lived in Nevada at least five years, 45.6% over ten years. Over two-thirds of ongoing recipients have lived in Nevada at least five years (67.6%), and 55.2% over ten years. Just under one-half (48.6%) of applicants have been in the state five years or more, although 68% have lived here at least one year. (Table 29)
3. Of those respondents who had lived elsewhere, the largest group had most recently come from California (25.9%), the next largest from Louisiana (6.4%). (Table 30)
4. The most frequently given reason for coming to Nevada was having friends or family here (43.1%), followed by job hunting (11.7%); 6.4% reported they had had a job promised here or a job or military transfer. "Better quality of life" was given by 7.5% and "health reasons" by 5.2%. (Table 31)

Welfare History

5. One-fifth (20.1%) of all the respondents report that they have never received public assistance before this application or this time on our caseload. (Table 34)

Just under half of the applicants (48.8%) report they have previously been "on public assistance" in Nevada; 43.6% say they have been on assistance in another state. Because 19.1% report they have never been on assistance before, it appears that about 11% have been on both in Nevada and in at least one other state. (Table 34)

Welfare History (Cont)

A much smaller proportion of on-going recipients report a history of assistance in another state (26.6%), but a larger proportion (58.2%) say they have previously been on assistance in Nevada. (Table 34) This is more than our actual case file would seem to indicate: 49.9% of those from open cases have been on our rolls before. (Table 23)

6. California is the most frequently-named state (42.5%) where public assistance was previously received. (Table 35)
7. Sixteen percent of persons with welfare history in another state report having received public assistance in more than one state. (Table 36)
8. Of those who have been on assistance previously (in Nevada or elsewhere), 62.4% had been on only as an adult, 9.5% only as a child, and 28.1% as both a child and as an adult. This seems to indicate a fair amount of family history of dependency: 37.6% of applicants/recipients report having been on public assistance as a child. (Table 37)

Other Assistance

9. A question was asked to determine what other forms of assistance the respondents were receiving. The question appeared to have confused the respondents and therefore was dropped from the study. The Welfare Division has previously obtained information relative this question from recipients.

Education

10. Over one-half of respondents (51.5%) are high school graduates; this includes those who have some higher education. In fact, there are as many people who have at least some college education as have not gone beyond ninth grade (11.8% each). (Table 38)

Marital Status

11. About half of the respondents had been married. (Table 39)

Living Arrangements

12. Most respondents (55.1%) are not sharing living arrangements with other people to reduce expenses. (Table 40)

APPENDIX B

ADC Program Standard of Need--Poverty Income Guidelines - Information & Analysis

**STUDY OF NEVADA'S
AID TO DEPENDENT CHILDREN PROGRAM
STANDARD OF NEED**

**POVERTY INCOME GUIDELINES
INFORMATION & ANALYSIS**

WHAT IS POVERTY?

The current measure of poverty was originally developed by Mollie Orshansky of the Social Security Administration in 1964 and was, with revisions, officially adopted in 1969 by the Office of Management and Budget as the Federal Government's official statistical measure of poverty. The measure is built around the Department of Agriculture's economy food plan of 1961 and the national average ratio of family food expenditures to total family after-tax income as measured in the 1955 Household Food Consumption Survey. It consists of 124 separate poverty cutoffs differentiating families by size, number of children, age and sex of head, and farm or nonfarm residence. The cutoffs are updated annually by changes in the Consumer Price Index.

The Orshansky poverty definition is widely used to measure the nation's progress in reducing the extent of poverty. It is also used as a statistical tool to identify the target populations of government programs that help the financially needy and to evaluate the effectiveness of such programs.

Data Services, Vicksburg, Mississippi, in conducting data processing activities as a service to banks and non-banks. Such activities will involve the collections, subscription, processing, and storage of banking, financial or related economic data for itself and others in the marketing by-products of data processing activity as well as making excess processing time available to other users. These activities would be conducted in the State of Mississippi.

Board of Governors of the Federal Reserve System, March 4, 1985.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 3210-01-01

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on March 1, 1985.

Public Health Service

National Institutes of Health

Subject: Cohort Study of Grain Millers—New.

Respondents: Businesses or other for-profit.

OMB Desk Officer: Fay S. Iudicello.

Food and Drug Administration

Subject: Premarket Notification Submission (510(k)) Extension—(0910-0120).

Respondents: Businesses or other for-profit.

Subject: Product License Application for the Manufacture of Source Plasma (Human) Product License Application for Therapeutic Exchange Plasma—Extension—(0910-0040).

Respondents: Businesses or other for-profit.

OMB Desk Officer: Bruce Artim.

Centers for Disease Control

Subject: NIOSH Information Dissemination Strategy—Extension (0920-0031).

Respondents: Individuals.

OMB Desk Officer: Fay S. Iudicello.

Health Care Financing Administration

Subject: Annual Report for Home and Community Based Services Waiver (HCFA-371)—Extension (0938-0272).

Respondents: State Medicaid Agencies.

Subject: Annual Expenditure Report for Home and Community Based Services Waiver (HCFA-372)—Extension (0938-0272).

Respondents: State Medicaid Agencies.

Subject: Integrated Quality Control Review Worksheet (HCFA-316)—Reinstatement (0938-0094).

Respondents: State Agencies.

Subject: Hospice Statements of Reimbursements HCFA 278.279.280—Revision (0938-0177).

Respondents: Hospices.

OMB Desk Officer: Fay S. Iudicello.

Social Security Administration

Subject: Winter 1984-1985 Private Sector Energy Assistance Survey—New.

Respondents: Utility companies.

Subject: Corrective Action Plan and Progress Report—Extension (0980-0279).

Respondents: States.

Subject: Annual Survey of Refugees—Revision—(0980-0308).

Respondents: Individuals or households.

OMB Desk Officer: Robert J. Fishman.

Copies of the above information collection clearance packages can be obtained by calling the HHS Report Clearance Officer on 202-245-6511.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503. Attn: (name of OMB Desk Officer).

Dated: March 4, 1985.

Wallace O. Kenna,

Acting Deputy Assistant Secretary for Management Analysis and Systems.

[FR Doc. 85-5554 Filed 3-7-85; 8:45 am]

BILLING CODE 4180-04-01

Annual Revision of the Poverty Income Guidelines

AGENCY: Department of Health and Human Services

ACTION: Notice.

SUMMARY: This notice provides a revision of the Federal poverty income guidelines to account for increases in the Consumer Price Index.

DATE: Effective March 8, 1985.

ADDRESS: Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services, Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT:

For information about the poverty guidelines in general, contact Joan Turek-Brezina or Michele Adler (telephone: (202) 245-6141).

Questions about applying these guidelines to a particular program should be referred to the Federal office which is responsible for that program.

For information about the Hill-Burton Uncompensated Services Program, contact the Office of the Director, Division of Facilities Compliance (telephone: (301) 443-6512).

SUPPLEMENTARY INFORMATION: This notice provides the 1985 revision of the poverty income guidelines required by sections 852 and 873(2) of the Omnibus Reconciliation Act of 1981. As required by the statute, this revision reflects changes in the Consumer Price Index; it was accomplished using the same methodology used in previous years.

These poverty income guidelines are used as an eligibility criterion by a number of Federal programs. In certain cases, as noted in the relevant authorizing legislation or program regulations, a program uses the poverty guidelines as only one of several eligibility criteria, or uses a modification of the guidelines (e.g., 130% or 185% of the guidelines). Some other programs, while not using the guidelines as a criterion of individual eligibility, use them for the purpose of targeting assistance or services. In some cases, these poverty income guidelines may not become effective until a regulation or notice specifically applying to the program in question has been issued.

The following definitions (derived for the most part from language used in U.S. Bureau of the Census, *Current Population Reports Series P-60*, No. 144 and earlier reports in the same series) are made available for use in connection with the poverty income guidelines. Programs may use somewhat different definitions. The poverty guidelines are applicable to both farm and nonfarm families.

(a) *Family.* A family is a group of two or more persons related by birth, marriage, or adoption who reside together; all such related persons are considered as members of one family. (If a household includes more than one family and/or more than one unrelated individual, the poverty guidelines are applied separately to each family and/or unrelated individual, and not to the household as a whole.)

(b) *Family unit of size one.* In conjunction with the Federal poverty income guidelines, a family unit of size one is an unrelated individual (as defined by the Census Bureau)—i.e., a person 15 years old or over (other than an inmate of an institution) who is not living with any relatives. An unrelated individual may be the sole occupant of a housing unit, or may be residing in a housing unit (or in group quarters such as a rooming house) in which one or more persons also reside who are not related to the individual in question by birth, marriage, or adoption. (Examples of unrelated individuals residing with others include a lodger, a foster child, a ward, or an employee.)

(c) *Income.* Refers to total annual cash receipts before taxes from all sources. (Income data for a part of a year may be annualized in order to determine eligibility—for instance, by multiplying by four the amount of income received during the most recent three months.) Income includes money wages and salaries before any deductions, but does not include food or rent in lieu of wages. Income also includes net receipts from nonfarm or farm self-employment (receipts from a person's own business or farm after deductions for business or farm expenses). Income includes regular payments from social security, railroad retirement, unemployment compensation, workers' compensation, strike benefits from union funds, veterans' benefits, public assistance (including Aid to Families with Dependent Children, Supplemental Security Income, and General Assistance money payments), training stipends, alimony, child support, and military family allotments or other regular support from an absent family member or someone not living in the household; private pensions, and regular insurance or annuity payments; and income from dividends, interest, rent, royalties, or periodic receipts from estates or trusts. For eligibility purposes, income does not include the following money receipts: capital gains; any assets drawn down as withdrawals from a bank, the sale of property, a house, or a car; tax refunds, gifts, lump-sum inheritances, one-time insurance payments, or compensation for injury. Also excluded are noncash benefits, such as the employer-paid or union-paid portion of health insurance or other employee fringe benefits, food or rent received in lieu of wages, the value of the food and fuel produced and consumed on farms, the imputed value of rent from owner-occupied nonfarm or farm housing, and such Federal

programs as Medicaid, Food Stamps, or public housing.

1985 POVERTY INCOME GUIDELINES FOR ALL STATES (EXCEPT ALASKA AND HAWAII) AND THE DISTRICT OF COLUMBIA

Size of family unit	Poverty guideline
1	\$5,250
2	7,050
3	8,850
4	10,650
5	12,450
6	14,250
7	16,050
8	17,850

For family units with more than 8 members, add \$1,800 for each additional member.

7	20,000
8	22,310

For family units with more than 8 members, add \$2,250 for each additional member.

POVERTY INCOME GUIDELINES FOR HAWAII

Size of family unit	Poverty guideline
1	\$5,040
2	6,110
3	7,180
4	8,250
5	9,320
6	10,390
7	11,460
8	12,530

For family units with more than 8 members, add \$2,250 for each additional member.

Dated: March 6, 1985.

Margaret M. Heckler,
Secretary of Health and Human Services.

COMPUTATION FOR 1985 ANNUAL REVISION TO POVERTY INCOME GUIDELINES

(Families in all States (except Alaska and Hawaii) and the District of Columbia.)

Size of family unit	Poverty threshold in 1983 (weight of average ¹)	Column multiplied by 1.0428 (price index ²)	Difference between column 3 and column 1	Average difference in column 3 ³	Fed. 1985 guidelines
(1)	(2)	(3)	(4)	(5)	(6)
1	\$5,381	\$5,617	\$236	\$236	\$5,250
2	7,463	7,758	295	295	7,050
3	9,545	9,978	433	433	8,850
4	11,627	12,112	485	485	10,650
5	13,709	14,252	543	543	12,450
6	15,791	16,396	605	605	14,250
7	17,873	18,540	667	667	16,050
8	19,955	20,684	729	729	17,850

¹ Source: Column 2 entries are from Table E-1 of U.S. Bureau of the Census, Technical Paper 52, *Estimates of*

Poverty Including the Value of Noncash Benefits: 1983, U.S. Government Printing Office, Washington, D.C., August 1984.

² Source: U.S. Department of Labor, CPI Press Release, USDL 85-28, January 1985, Table LA (The Consumer Price Index (CPI-U) for all items was 258.4 for calendar year 1983 and 311.1 for calendar year 1984, an increase of 4.28 percent).

³ The arithmetic average of Column 4 entries, rounded to the nearest multiple of \$20.

⁴ Obtained by multiplying the average poverty threshold for a family of 4 persons in 1983, as published in Table E-1-1 (\$10,178), by the inflation factor from calendar year 1983 to calendar year 1984 (1.0428) and rounding the result upward to the nearest whole multiple of \$50. All other entries in Column 6 are obtained by successive addition or subtraction of the average difference (\$1,800) to the base 1985 guideline entry (\$10,650).

For Alaska and Hawaii, scaling factors of 1.25 and 1.15 are applied to the 1985 continental guidelines and the results rounded to multiples of \$10. For family units with more than 8 members, add \$1,800 for each person in the continental U.S., \$2,250 for each person in Alaska and \$2,070 for each person in Hawaii.

APPENDIX C

ADC Program Standard of Need - Consumer Price Index Analysis

**STUDY OF NEVADA'S
AID TO DEPENDENT CHILDREN PROGRAM
STANDARD OF NEED**

CONSUMER PRICE INDEX ANALYSIS

HISTORY OF THE ADC NEED STANDARD

The methodology for the present ADC Need Standard was developed in May 1969. It has been accepted over the past years that no changes have been made since 1969. Recent research by Welfare Division staff shows the Need Standard was last updated in December 1975.

Included within this package are copies of an explanation of the 1969 Need Standard methodology, copies of Welfare Division budget forms from 1970 until 1975 showing the changes made and copies of some Welfare Board Exhibits, with the final change effective December 1, 1975.

Since revisions were made between 1969 and 1975, Consumer Price Index Analysis was done from both May 1969 and December 1985.

**PROPOSED DRAFT
PRIOR TO SUBMISSION TO THE NEVADA STATE WELFARE BOARD
UPDATING OF AFDC STANDARDS, AS REQUIRED JULY, 1969
NEVADA**

Preface:

Before recording the actual statistics and computations used in the updating of Nevada AFDC standards, there are seven preliminary statements that need to be made. These statements will deal with the background and supporting data used for the AFDC update.

- A. In 1967, a thorough characteristics study of the AFDC caseload was conducted. A 539 case sample, which represented 33% of the active caseload, was thoroughly reviewed as a part of that study. Throughout the AFDC update, the needs standard for a child between the ages of 6 - 12 is used. The characteristics study supports this as the average age of the AFDC child. That study showed that 36% of the children were between ages 0 - 5. Forty-three percent were between the ages of 6 - 12. Twenty-one percent were 13 years of age or older.
- B. Throughout the AFDC update, Areas I and II, which are used for shelter items such as utilities, heating, etc., are combined at a ratio of 75% to 25%. This is borne out by the 1967 characteristics study. Area I includes the larger areas of the state, including Reno and Las Vegas. Seventy-five percent of the AFDC active cases are in that area.
- C. In some of the 1955 needs standards, a third area is also mentioned for certain shelter expenses. Area III was dropped from the AFDC budgeting standard on March 22, 1968. At that time it was combined with Area II and all Area II shelter and utility amounts were raised to the former Area III level.
- D. One of the items dropped from the consolidated needs standard was special diets. A sample of 808 cases that were on AFDC in 1968 were reviewed for special diets. Twenty of those cases had special diets totaling \$158.05. This is an average of \$.20 for special diets per case. At that time there were an average of 4.15 persons per ADC case. This average means that special diets accounted for an average of \$.05 per person in the AFDC caseload. It will be noted that in the food schedule in the actual updating figures this amount has been taken into consideration.
- E. In computing the shelter maximum, the consumer price index both for owning and renting homes were used. The 1967 characteristics study indicates that 75% of the AFDC families rented their shelter accommodations. The remaining 25% were buying or owned outright their accommodations.

- F. In 1968, the average family size--ascertained by dividing total number of recipients by total number of cases--was 4.15 persons per family assistance unit.
- G. The final item taken from a 1967 characteristics study deals with the number of rooms occupied by families of various sizes. This data is relevant in the need item for fuel for heating. On the average, a family of 3 persons or less occupied 5.2 rooms. A family of 4 or 5 persons occupied, on the average, 4.4 rooms. A family of from 6 - 8 persons occupied, on the average, 3.7 rooms. The final group, the family of 9 or more persons, averaged 5.7 rooms in their living accommodations.

UPDATE OF AFDC NEED ITEMS, ACCORDING TO THE COST OF LIVING INCREASE AS OF JULY 1969.

I. Room

Last changed - October, 1960

US Consumer Price Index 10/60 = 90.6

US Consumer Price Index 7/69 = 109.5

Percent of Increase = 20.86%

10/60 Standard

	Number of Persons in Family			
	1	2	3	4 or more
Adult	38.00	33.50	30.00	27.50
Child 6 - 12		28.00	25.50	23.00

PROPOSED STANDARD

	Number of Persons in Family			
	1	2	3	4 or more
Adult	45.93	40.49	36.26	33.24
Child		33.84	30.82	27.80*

* \$.05 per person will be added to account for the deletion of special diets. This means that the \$45.93 becomes \$45.98, etc.

II. Clothing:

Last changed - October, 1960

US Consumer Price Index 10/60 = 90.9

US Consumer Price Index 7/69 = 111.2

Percent of Increase = 22.38

10/60 Standard

NEEDY CARETAKER AND DISABLED PARENT

Two Adults \$154.28

1	2	3	4	5	6	7
189.61	225.54	266.08	309.26	350.85	393.29	

Add \$40.07 for each additional child

SUMMATION:

- A. We planned to use the personal needs total amounts with no finer breakdown. I assume that it would be permissible to round each of the figures in the paragraph above to the nearest 5 cent or 10 cent amount. Also, on the shelter amounts we assumed that it would be permissible to round them upwards so that they would be evenly divisible by the number of persons in the household. For instance, the 109.06 amount would become 109.20 or 27.30 per person.

The only item of special needs that will be added back into the standard is the item for essential household equipment. The previous total for such equipment was 50.00 for a single person household and 100.00 for a 2 person household, increasing the amounts to \$51.35 and \$102.70 based on a 2.7% increase in the consumer price index for appliances from June 1967 to July 1969.

It is our intention to adjust all personal need and shelter amounts according to these standards, realizing that some will be increased and others decreased.

RESTRUCTURING OF NEEDS STANDARDS AS REQUIRED
BY THE SOCIAL SECURITY ACT - ADC

Current Policy:

Our current ~~needs standards~~ contain amounts for food, clothing, personal incidentals, ~~and~~ household maintenance under personal needs and a shelter maximum. These amounts were updated, according to the Social Security Act regulations, in May of 1969.

Reason for Change:

The methodology of updating these needs standards has been a topic of discussion between the state and the federal government since 1969. The federal government has finally decided that Nevada's need standards were not properly updated at that time (although no definitive guidelines were given in 1969). These changes are being made to conform to the letter of the requirement for the updating of need standards according to the cost of living increase.

Proposed Policy: - *eff 3/73*

MONTHLY ALLOWANCES, PERSONAL NEEDS

A. ADULT ALONE: \$97.00.

B. TWO ADULTS (incapacitated parent and pregnant spouse):
\$154.00.

C. CHILDREN WITH
NON-NEEDY
CARETAKER

CHILDREN WITH
NEEDY
CARETAKER

CHILDREN WITH
NEEDY CARE-
TAKER & INCAP-
ACITATED PARENT

CHILDREN	AMOUNT	AMOUNT	AMOUNT
1	\$82.00	\$141.00	\$190.00
2	123.00	178.00	226.00
3	162.00	214.00	266.00
4	202.00	254.00	309.00
5	246.00	297.00	351.00
6	287.00	339.00	393.00
7	330.00	381.00	

D. PREGNANCY DIET

If the adult needy caretaker is pregnant, \$1.00 is added to her needs for a pregnancy diet.

E. For each additional child to those listed in the tables,
add \$40.00.

F. SHELTER

The shelter allowance is on an "as paid" basis up to the maximum indicated in the schedule below:

MAXIMUM SHELTER, PER RECIPIENT
(No. of Persons in Household)

1	2	3	4	5 or more
71.00	41.50	32.00	27.50	24.50 (up to a maximum of 122.50)

Items included in the maximum allowance are as follows:

1. Actual cost of taxes, property payments (principal and interest), fire insurance, assessments, rent payments, and irrigation district charges.
2. The cost of water, minor repairs, garbage and sewage is included at the following amount:
 - a. WATER
 - 1) Well - \$3.00.
 - 2) Water district - as paid, up to \$8.00.
 - b. GARBAGE AND SEWAGE - as paid.
 - c. MINOR REPAIRS - \$3.00.

G. ESSENTIAL HOUSEHOLD EQUIPMENT

Allowance may be made for the repair or purchase of essential household equipment as a special need, with the approval of the Field Supervisor or District Office Manager III. Approval for the cost and type of equipment needed will be made on the basis of real hardship or if the health and safety of the recipient would be endangered.

Other conditions which must be met before repair or purchase can be approved:

1. REPAIR

The cost of repair must be less than the purchase price of comparable equipment as verified by statements from two or more reputable dealers.

The repair must be guaranteed for a period not less than 30 days. Guarantee must be in writing and filed in the case record.

2. PURCHASE

The equipment to be replaced must be beyond economical repair. The cost per item per year shall not exceed \$51.00 for a single person household or \$103.00 for a household of two or more. These amounts are subject to the 55% of need provision when added to the personal and shelter need totals.

The equipment purchase must be guaranteed for a period of not less than 30 days. The guarantee must be in writing and filed in the case record.

3. PAYMENT

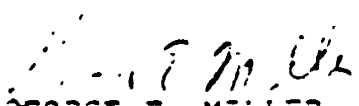

The method of payment will be extended over a period of time, dependent on the cost of the equipment. A maximum of \$10.00 per month will be allowed in need, subject to the 55% limitation, for payment purposes. The recipient, however, is responsible for:

- a. Finding the equipment to be purchased.
- b. Arranging the repair or purchase.
- c. Arranging the terms of payment as allowed by the Welfare Division.
- d. Making payment.

Effect of Change:

The effect of these changes is far reaching. Some of the personal need totals are higher and others lower than currently being granted. The same is true for the shelter maximums. Within shelter itself, the home maintenance item has been deleted and amounts for water, sewage, and minor repairs have been added. These changes are all caused by the federal requirements. The materials have been reviewed by HEW officials in both San Francisco and Washington and they concur with the validity of these changes according to federal law.

FLAT GRANT IN ADC

Current Policy:

There are certain basic items which must be considered for all persons whose needs are included in the assistance budget. These basic need items are divided into two categories:

A. Basic personal need items

CHILDREN WITH NONNEEDY CARETAKER		CHILDREN WITH A NEEDY CARETAKER		CHILDREN WITH NEEDY CARETAKER AND INCAPACITATED PARENT	
No. of Children	Amount	No. of Children	Amount	No. of Children	Amount
1	\$ 87.00	With Unborn	\$102.00	With Unborn	\$159.00
2	128.00	1	146.00	1	195.00
3	167.00	2	183.00	2	231.00
4	207.00	3	219.00	3	271.00
5	251.00	4	259.00	4	314.00
6	292.00	5	302.00	5	356.00
7	335.00	6	344.00	6	398.00
		7	386.00		

PREGNANCY DIET

If the adult, needy caretaker is pregnant, \$1.00 is added to her needs for a pregnancy diet.

FOR EACH ADDITIONAL CHILD TO THOSE LISTED IN THE TABLES, ADD \$40.00.

B. Basic Shelter

Actual cost of taxes, property payments, fire insurance, rent, and irrigation district charges.

MAXIMUM SHELTER, PER ASSISTANCE UNIT
(Number of Persons in the Assistance Unit)

1	2	3	4	5 or more
\$71.00	\$83.00	\$96.00	\$110.00	\$123.00 (Maximum shelter allowed)

MISC22/COPY

EXHIBIT B
Page 32

Reason for Change

Currently, many eligibility errors fall in the area of shelter. The flat grant eliminates the need to verify shelter costs by combining "personal needs" and shelter into a category of "total needs." This process simplifies budgeting, substantially reduces the chance for error, and reduces casework time.

Proposed Policy - Effective 4/1/74

Personal needs and shelter are combined into "total needs."

CHILDREN WITH NONNEEDY CARETAKER

No. of Children	Amount
1	\$158.00
2	211.00
3	263.00
4	317.00
5	374.00
6	415.00
7	458.00

CHILDREN WITH A NEEDY CARETAKER

No. of Children	Amount
With Unborn	\$173.00
1	229.00
2	279.00
3	329.00
4	382.00
5	425.00
6	467.00
7	509.00

CHILDREN WITH NEEDY CARETAKER AND INCAPACITATED PARENT

No. of Children	Amount
With Unborn	\$242.00
1	291.00
2	341.00
3	394.00
4	437.00
5	479.00
6	521.00

PREGNANCY DIET

If the adult, needy caretaker is pregnant, \$1.00 is added to her needs for a pregnancy diet.

FOR EACH ADDITIONAL CHILD TO THOSE LISTED IN THE TABLES, ADD \$40.00.

Effect of Change

The change will raise our average ADC grant approximately \$2.00 to \$5.00. This will reduce our Q.C. error rate.

3 October 1975

ADC NEEDS CONSOLIDATION

Current Policy:

Three standards are now required to determine need - one for NONNEEDY caretakers, one for NEEDY caretakers, and one for NEEDY caretakers plus an INCAPACITATED parent (see attachment).

Reason for Change:

Simplification of budgeting.

Proposed Policy - Effective 1 December 1975:

Needs for an assistance unit will be determined from a single standard:

TOTAL NEEDS ACCORDING TO PERSONS IN THE ASSISTANCE UNIT

<u>Persons</u>	<u>Amount No Eligible Adult</u>	<u>70%</u>	<u>Amount With Eligible Adult</u>	<u>70%</u>
1	\$ 56	\$ 39.20	\$173	\$121.10
2	112	78.40	229	160.30
3	153	117.60	285	199.50
4	224	156.80	341	238.70
5	280	196.00	397	277.90
6	336	235.20	453	317.10

Add \$56 for each additional person.

Effect of Change:

This will provide a uniform payment standard for all ADC recipients and has no effect on the average grant.

Approved by:

G. E. Miller by W2

7	509	165.6	322.6	94.8%	991
8	565	165.6	322.6	94.8%	1,100

NOTE: Analysis uses urban wage and clerical workers index (CPI-W) and assumes the same rate of increase for varying household sizes.

COST OF LIVING ADJUSTMENT (CPI) OVER THE
MAY 1969 STANDARD OF NEED

<u>Household Size</u>	<u>Standard of Need</u>	<u>CPI 5/1/69</u>	<u>CPI 12/1/85</u>	<u>Percent Increase</u>	<u>Revised Need Stand</u>
1	\$ 88 + \$ 75 = \$163	108.7	322.6	196.8%	\$ 484
2	\$135 + \$ 85 = \$220	108.7	322.6	196.8%	\$ 653
3	\$177 + \$ 96 = \$273	108.7	322.6	196.8%	\$ 810
4	\$212 + \$106 = \$318	108.7	322.6	196.8%	\$ 944
5	\$260 + \$115 = \$375	108.7	322.6	196.8%	\$1,113
6	\$306 + \$115 = \$421	108.7	322.6	196.8%	\$1,250
7	\$350 + \$115 = \$465	108.7	322.6	196.8%	\$1,380
8	\$393 + \$115 = \$508	108.7	322.6	196.8%	\$1,508

NOTE: Analysis uses urban wage and clerical workers index (CPI-W) and assumes the same rate of increase for varying household sizes.

COMPARISON OF 1969 VS. 1985 NEED STANDARD

<u>Household Size</u>	<u>May 1969</u>	<u>December 1975</u>	<u>Percent Increase</u>	<u>CPI Increase Same Period</u>
1	\$163	\$173	6.1%	52.3%
2	220	229	4.1%	52.3%
3	273	285	4.4%	52.3%
4	318	341	7.2%	52.3%
5	375	397	5.8%	52.3%
6	421	453	7.6%	52.3%
7	465	509	9.5%	52.3%
8	508	565	11.2%	52.3%

NOTES: 1969 standard was based upon fixed amounts for personal needs and maximum amounts for shelter costs (if household had no shelter costs, no allowance was given).

CPI increase is based upon index figures of 108.7 for May 1, 1969 and 165.6 for December 1, 1975.

APPENDIX D

ADC Program Standard of Need - Client
Expenditure Survey Analysis

**STUDY OF NEVADA'S
AID TO DEPENDENT CHILDREN PROGRAM
STANDARD OF NEED**

CLIENT EXPENDITURE SURVEY ANALYSIS

SURVEY METHODOLOGY

The Nevada State Welfare Division (NSWD) was requested by a legislative subcommittee to conduct a client expenditure survey. The purpose and objective of the survey was to arrive at a realistic need standard for Aid to Dependent Children (ADC) recipients. With that goal in mind, NSWD staff in conjunction with Nevada Legal Services and NACO devised a survey form itemizing the different expenses that may be incurred by a low income family. These expenses are broken into two groups: basic needs and supplemental components. The sample consisted of 99 active and 96 denied joint ADC and Food Stamp cases. The 96 cases were denied due to excess income (exceeded the current need standard). The survey was a sequential sampling proportional to district office caseload size.

The survey forms were sent to all district offices with a detailed explanation of how to obtain the information. All clients contacted were informed of the reason for the survey and assured their responses would in no way affect their eligibility or grant amount. The survey represents expenses reported by the client and were not verified.

SAMPLE GROUP	ONGOING ADC/FS	DENIED	DATE

EXHIBIT C
Page 2

6. Any other items included in your rent/mortgage:

a. Appliances \$ _____
b. Utilities \$ _____
c. Furniture \$ _____

7. Your necessary monthly Maintenance costs \$ _____
such as plumbing, heating, electrical re-
pairs and replacement of windows.

D. Utilities

1. Average total monthly utility costs (not including \$ _____
arrears):

a. Electricity \$ _____
b. Gas \$ _____
c. Water/Sewer \$ _____
d. Garbage \$ _____
e. Other \$ _____

2. Total monthly amount you pay. \$ _____

3. Amount paid by energy assistance. \$ _____
How often received and when? _____

4. Amount paid by someone else. \$ _____
Who? _____

5. Are you usually current? Yes No
If no, how many months in arrears? _____

E. Telephone

1. Do you have a telephone? Yes No

2. Basic monthly telephone cost. \$ _____

F. Household Supplies/Operating Costs

Your monthly cost of household supplies - includes \$ _____
laundry soap, bleach, household cleaning materials,
toilet paper and postage.

G. Transportation

1. Do you have a car? Yes No

a. Monthly car payment. \$ _____
b. Annual registration fee. \$ _____ ÷ 12 = \$ _____
c. Monthly maintenance (gas, oil, tires, \$ _____
repairs).
d. Insurance payment. \$ _____ ÷ _____ = \$ _____
How often? Monthly Quarterly Semi-Annually

2. If you do not have a car, what kind of transportation do you use?

a. Do you pay for this transportation? Yes No
b. Amount you pay monthly. \$

3. How many trips do you make per month:

a. Shopping and medical
b. Work, looking for work and
to and from child care

Average number of miles per trip

H. Clothing

1. Total monthly amount you spend on clothes. \$

a. Amount spent on Adults. \$
b. Amount spent on Children \$

2. Where do you get most of your clothes?

I. Medical

1. Your monthly cost of medicine chest supplies - \$
includes over-the-counter medications,
vitamins, first aid items.

2. Do you have medical insurance? Yes No
Monthly payment amount? \$

3. Your out-of-pocket costs for medical and dental \$
care not covered by Medicaid (Active ADC only).

J. Personal Care

Your monthly cost for personal care items - includes \$
haircuts, toothpaste, shampoo, soap, sanitary supplies.

K. Recreation

Your monthly cost for recreation - includes TV \$
Cable/rental, sports, movie admission, pet supplies,
reading materials.

TOTAL MONTHLY COST FOR BASIC NEEDS \$

II. SUPPLEMENTARY COMPONENTS

A. Child Care

1. Your monthly cost of Child Care. \$ _____
2. For how many children? _____
3. Why is Child Care needed? _____
(Work, Looking for Work, or Other)

B. School Supplies/Fees

1. Your annual cost of school supplies and fees? \$ _____ ÷ 12 = \$ _____
2. For how many children? _____

C. Gifts/Contributions

Yearly amount you spend for:

Christmas	\$ _____
Birthdays	\$ _____
Other Occasions (graduation/weddings)	\$ _____
Child Support	\$ _____
TOTAL	\$ _____ ÷ 12 = \$ _____

D. Burial/Life Insurance

Your monthly cost for:

Burial Insurance	\$ _____
Life Insurance	\$ _____
TOTAL	\$ _____

TOTAL MONTHLY COST FOR SUPPLEMENTARY COMPONENTS \$ _____

RESULTS OF CLIENT EXPENDITURE SURVEY
ADC HOUSEHOLD SIZE 1

Number Surveyed
7

GENERAL HOUSEHOLD CIRCUMSTANCES:

14 % of sample lived alone

86 % of sample lived with others

of those living with others, the average household size was 4

57 % lived in homes, 43 % in apartments, 0 % reported other

0 % were buying, 100 % were renting

Average bedroom size of dwelling was 2.7.

85 % Reported income other than their ADC.

FOOD:

29 % Reported no out-of-pocket cost for food

71 % Reported food costs with an average of \$178.80.

Overall average cost for sample group was \$127.71.

14 % Reported receiving Food Stamps with an average of \$265.00.

86 % Received no Food Stamps.

Overall average Food Stamps for sample group was \$37.86

43 % were participating in the WIC Program.

14 % utilized the Commodity Food Program.

14 % had children enrolled in reduced/free school lunch program.

RENT/MORTGAGE:

0 % Reported no rent/mortgage for entire household.

100 % Reported entire household cost with average of \$277.86 .

Overall average rent/mortgage was \$277.86 .

14 % Reported no cost to the ADC unit.

86 % Reported ADC unit cost with average of \$153.33 .

Overall ADC unit average cost was \$131.43 .

0 % Reported HUD assistance averaging 0 .

57 % Reported non-ADC household members paying with average of \$256.25

85 % Reported housing payments were current.

15 % Reported arrearages averaging 2 months.

57 % had appliances included in rent/mortgage.

57 % had utilities included in rent/mortgage.

42 % had furniture included in rent/mortgage.

0 % Reported paying maintenance costs averaging 0 .

UTILITIES:

71 % Reported no utility cost for entire household.

29 % Reported entire household cost averaging \$117.60

Overall average utility cost was \$33.57

29 % had electric costs, 15 % gas, 15 % water/sewer, 15 % garbage.

71 % Reported no utility cost to the ADC unit.

29 % Reported ADC unit cost with average of \$76.25.

Overall ADC unit average cost was \$21.78.

0 % Reported energy assistance averaging 0.

0 % Reported others paying utilities averaging 0.

86 % Reported utility payments were current.

14 % Reported arrearages averaging 2 months.

TELEPHONE:

57 % had telephones, 43 % did not.

For those with telephones the average reported cost was \$20.50.

Overall average cost for group was \$11.71.

HOUSEHOLD SUPPLIES/OPERATING:

43 % Reported no costs.

57 % Reported costs averaging \$35.00.

Overall average cost for group was \$7.20.

TRANSPORTATION:

43 % had automobiles, 57 % did not.

Of those with automobiles 33 % had monthly payments.

Average monthly automobile costs for those having one was \$220.33.

Overall average for the group was \$94.43.

Of those without automobiles, 29 % paid for transportation averaging \$29.00

Overall average for the group was \$8.28.

86 % Reported average trips of 6 per month for shopping/medical.

57 % Reported average trips of 16.5 per month for work/child care.

CLOTHING:

29 % Reported no clothing costs.

71 % Reported costs averaging \$37.00.

Overall average for the group was \$26.42.

MEDICAL:

57 % Reported no cost for medicine chest supplies.

43 % Reported costs averaging \$13.66.

Overall average cost for the group was \$5.85.

0 % claimed medical insurance costs averaging 0.

Overall average cost for the group was 0.

0 % claimed costs for medical/dental not covered by Medicaid, averaging 0.
Overall average cost for the group was 0.

PERSONAL CARE:

71 % Reported costs for personal care, averaging \$18.00.
Overall average cost for the group was \$12.85.

RECREATION:

29 % Reported costs for recreation, averaging \$9.00.
Overall average for the group was \$2.57.

CHILD CARE:

0 % Reported child care, averaging 0.
Overall average for the group was 0.

SCHOOL SUPPLIES/FEEES:

0 % Reported school costs, averaging 0.
Overall average for the group was 0.

Gifts/Contributions:

86 % Reported spending for gifts/contributions, averaging \$15.69.

Overall average for the group was \$13.45.

BURIAL/LIFE INSURANCE:

0 % Reported costs, averaging 0.

Overall average for the group was 0.

80 % had telephones, 20 % did not.

For those with telephones the average reported cost was \$13.50.

Overall average cost for group was \$10.80.

HOUSEHOLD SUPPLIES/OPERATING:

10 % Reported no costs.

90 % Reported costs averaging \$46.88.

Overall average for group was \$42.20.

TRANSPORTATION:

60 % had automobiles, 40 % did not.

Of those with automobiles 17 had monthly payments.

Average monthly automobile costs for those having one was \$125.63.

Overall average for the group was \$75.98.

Of those without automobiles, 25 % paid for transportation averaging \$20.00

Overall average for the group was \$0.20.

100 % Reported average trips of 10 per month for shopping/medical.

80 % Reported average trips of 21 per month for work/child care.

CLOTHING:

50 % Reported no clothing costs.

50 % Reported costs averaging \$50.26.

Overall average for the group was \$25.13.

MEDICAL:

20 % Reported no cost for medicine chest supplies.

80 % Reported costs averaging \$20.00.

Overall average cost for the group was \$16.00.

-0- % claimed medical insurance costs averaging -0-.

Overall average cost for the group was -0-.

10 % claimed costs for dental not covered by Medicaid, averaging \$2.90 .
Overall average cost for the group was \$0.29 .

PERSONAL CARE:

90 % Reported costs for personal care, averaging \$27.77 .
Overall average cost for the group was \$25.00 .

RECREATION:

50 % Reported costs for recreation, averaging \$27.99 .
Overall average for the group was \$13.99 .

CHILD CARE:

10 % Reported child care, averaging \$400.00 .
Overall average for the group was \$40.00 .

SCHOOL SUPPLIES/FEES:

50 % Reported school costs, averaging \$3.59 .
Overall average for the group was \$1.79 .

GIFTS/CONTRIBUTIONS:

70 % Reported spending for gifts/contributions, averaging \$12.91.

Overall average for the group was \$9.04.

BURIAL/LIFE INSURANCE:

10 % Reported costs, averaging \$25.00.

Overall average for the group was \$2.50.

¹ Assumes that food for all meals and snacks is purchased at the store and prepared at home. Estimates for the thrifty food plan were computed from quantities of foods published in Family Economics Review, 1984 No. 1. Estimates for the other plans were computed from quantities of foods published in Family Economics Review, 1983 No. 2. The costs of the food plans are estimated by updating prices paid by households surveyed in 1977-78 in USDA's Nationwide Food Consumption Survey. USDA updates these survey prices using information from the Bureau of Labor Statistics (CPI Detailed Report, table 3) to estimate the costs for the food plans.

² 10 percent added for family size adjustment. See footnote 3.

³ The costs given are for individuals in 4-person families. For individuals in other size families, the following adjustments are suggested: 1-person--add 20 percent; 2-person--add 10 percent; 3-person--add 5 percent; 5- or 6-person--subtract 5 percent; 7- or more-person--subtract 10 percent.

USDA 1983 Thrifty Food Plan

economists

Consumer Nutrition Division
Human Nutrition Information Service

The thrifty food plan has been revised. The proposal to use the revised thrifty food plan as the basis for benefits in the Food Stamp Program appeared on July 29, 1983, in the Federal Register (6). In July 1983, the revised plan replaced the thrifty food plan developed in 1975 as the basis for the "Cost of Food at Home," released monthly by USDA. The Cost of Food at Home for July 1983 also reflects 1983 revisions of the low-cost, moderate-cost, and liberal food plans.¹

What is the Thrifty Food Plan?

The thrifty food plan is the least costly of four food plans developed by the Human Nutrition Information Service (HNIS) in 1983. Like the more costly plans, this plan specifies the quantities of different types of foods (food groups) that households might use to provide nutritious diets for household members. The thrifty food plan includes larger proportions of the foods that are economical sources of nutrients than the other plans.

The quantities of 31 food groups suggested in the thrifty food plan for men, women, and children of different ages are shown in table 1. These quantities can be totaled for household members to determine the food plan for any household.

Why was the Thrifty Food Plan Revised?

The Department has prepared guides for selecting nutritious diets at different levels of cost for almost 50 years. Such guides, or food plans, are revised from time to time to take into account new information about nutritional needs, nutritive values of foods, food consumption, and food prices.

¹ For information about the other USDA food plans see Family Economics Review 1983(2): 12-21.

Quantities of food groups in the thrifty food plan were last revised in 1975 (3). The 1975 plan was based on the Recommended Dietary Allowances (RDA) released in 1974 by the National Academy of Sciences-National Research Council (NAS-NRC) and food consumption data from a nationwide food consumption survey conducted by USDA in 1965-66.

The thrifty food plan was revised in 1983 for several reasons:

- Dietary standards used in the 1975 food plan needed revision. In 1980 NAS-NRC revised the RDA (2). Recommended amounts of ascorbic acid, vitamin B₆, vitamin B₁₂, thiamin, riboflavin, phosphorus, and magnesium were changed for some sex-age categories. The major changes were increases in ascorbic acid for all categories and in vitamin B₆ for some categories. The 1980 RDA were used to define the lower limit for nutrients and the level of food energy in the plan. Also fat, cholesterol, caloric sweeteners, and sodium were controlled at moderate levels in the 1983 food plan. Of these dietary factors, only fat was controlled in the 1975 plan, although attempts were made to control the level of cholesterol by limiting the number of eggs and to control the level of sweeteners by limiting the amount of sugar and sweets.

- New information on the content of nutrients in foods has become available since 1975. Also, the nutritive values of some foods have changed since 1975. For example, the enrichment levels for certain B vitamins in bread and flour were increased in 1975. The most recent food composition data available in HNIS's Nutrient Data Bank were used to estimate the nutrient content of foods in the food plan. Levels of food energy, fat, protein, calcium, iron, magnesium, vitamin A value, thiamin, riboflavin, niacin, vitamin B₆, vitamin B₁₂, and ascorbic acid were estimated for the earlier plan; in addition, levels of zinc, phosphorus, folacin, vitamin E, cholesterol, caloric sweeteners, and sodium were estimated for the 1983 plan.

¹Quantities are for food as purchased or brought into the household from garden or farm. Food is for preparation of all meals and snacks for a week. About 5 percent of the edible parts of food is assumed to be discarded as plate waste, spoilage, etc.

²Pregnant and lactating females usually require added nutrients and should consult a doctor for recommendations about diet and supplements.

³Quantities in pounds, except milk which is in quarts, and eggs which are by number.

⁴Frozen concentrated juices are included as single-strength juice.

⁵Cereal fortified with iron is recommended.

⁶Quantities of dry and evaporated milk and yogurt included as their fluid whole milk equivalents in terms of calcium.

⁷Count 1 pound of canned dry beans--pork and bean, kidney beans, etc.--as 0.33 pound.

⁸Small quantities of coffee, tea, and seasonings are not shown. Their cost is a part of the estimated cost for food and drink.

. More recent information on food eaten by men, women, and children of different ages on a nationwide basis has become available. USDA's Nationwide Food Consumption Survey 1977-78 (NFCS) provided information on the food intake of individuals in the households eligible to receive food stamps (8). It also provided detailed information on the quantities and money value of food used (purchased, home-produced, or received as gift or pay) by the total household (7). Data from this study were used to estimate the quantities of foods used to prepare meals and snacks for men, women, and children of different ages. These quantities of foods made up the food consumption patterns which were used as starting points in developing the new plan. Quantities were specified for 31 food groups, an increase from the 17 groups in the earlier plan. The number of food groups was increased to group foods with high and low content of certain dietary components not considered in the 1975 plan and to help deal with the increased use of commercially prepared foods.

. Shifts have occurred in food prices since 1975. Prices for most foods increased, but some increased more sharply than others. Prices paid by survey households in 1977-78, updated to 1981 levels, were used in revising the plan.

. Food plans for older adults were changed from individuals 55 years and over in 1975 to 51 years and over in 1983 to be consistent with the RDA age groupings. Food plans for the infant and for pregnant and lactating women were discontinued in 1983.

Data and Procedures Used in Revising the Plan

Data from the Survey of Food Consumption in Low-Income Households, conducted as part of NFCS, were used as the basis for the food consumption patterns and base food prices in the thrifty food plan development. In this part of the survey, conducted from November 1977 through March 1978, data were collected for about 4,400 housekeeping households eligible for the Food Stamp Program. Data included quantities and prices (or costs) of foods used by the household during the week prior to the household interview (7) and the food intake of household members the day

before, the day of, and the day following the interview (8). Food consumption behavior and prices paid by households eligible for the Food Stamp Program were considered most appropriate as a starting point for a thrifty food plan used to determine program benefits.

The food plan was developed by starting with usual food consumption patterns calculated from survey data. This approach was used because researchers believe that a nutritious diet that disrupts usual eating habits the least is most likely to be acceptable to families. These food consumption patterns are estimated quantities as purchased of foods (classified into 31 food groups) that survey households used to prepare a week's meals and snacks for people given sex-age categories. Each food group has an average nutritive value and price associated with it, based on selections within groups typical of those made by survey households. A computerized mathematical model was used to find the combination of food groups at a given total cost that met dietary standards for each sex-age category with the least change from quantities in food groups in the consumption pattern. This combination of food groups is the food plan for the sex-age category.

Dietary standards for the 1983 plan, based on the 1980 RDA (2), were determined after extensive study of the dietary change needed in food consumption patterns to meet various sets of standards (1, 4, 5). These standards and the rationale for their use are described in the March 1983 issue of the Journal of Nutrition Education (1). Briefly they are:

- . RDA for food energy, protein, six vitamins (A, B₁₂, thiamin, riboflavin, niacin and C), and three minerals (calcium, magnesium, and phosphorus).

- . RDA for iron, except 90 percent of the RDA for the child 1 to 2 years old.

- . Eighty percent of RDA for zinc, folacin, and vitamin E. Levels below RDA were used in recognition of the limited food composition

Another consideration was that the U.S. food supply does not provide enough zinc and folacin to meet RDA for the population.

. 0.02 milligrams of vitamin B₆ per gram of protein in the food plan. The Food and Nutrition Board based RDA for vitamin B₆ on this ratio.

. Moderate levels of fat (35 percent of energy or less), cholesterol (350 milligrams per day or less), caloric sweeteners (12 percent of energy or less), and sodium (1,600 milligrams per 1,000 calories or less).

None of the food consumption patterns for the food plan met all of the dietary standards (table 2). Nutritional shortcomings occurred despite the fact that, in deriving the consumption patterns, quantities of food in food groups were proportionately adjusted to make the patterns provide enough food to meet the midpoint of the RDA range

and folacin were the problem nutrients. Young children, teenage girls, and women had the greatest shortages. Levels of fat, sweeteners, and sodium in consumption patterns for almost all categories exceeded the specified standards, and also exceeded the cholesterol standard. Therefore, in developing the food plans, adjustment to the patterns was required for all sex-age categories.

In the food plan there is an allowance for some discard of edible food during preparation, as plate waste, or because of spoilage. Food specified in the 1983 food plan is sufficient to provide the dietary standard for calories and nutrients for each sex-age category and to allow for some food discard

Table 2. Nutritional shortcomings in food consumption patterns¹ used as a basis for the 1983 thrifty food plan

Nutrient	Sex-age category with pattern not meeting dietary standards
Below standard:	
Calcium, zinc	Children, 1-2 years; males, 51 years and over, females 12 years and over
Iron	Children, 1-2 years; females, 12-50 years
Magnesium	Males, 15-19 years and 51 years and over; females 12 years and over
Folacin	Males, 51 years and over; females, 12 years and over
Above standard:	
Fat	Most
Sweeteners	Most
Sodium	All
Cholesterol	Primarily males, 15 years and over

¹ Estimated quantities as purchased of foods in 31 food groups used to prepare all meals and snacks for a week. Developed using data from USDA's Survey of Food Consumption in Low-Income Households.

1983 Thrifty Food Plan

Table 3 summarizes the weekly quantities of food from 11 major food groups in the food consumption patterns and the 1983 and 1975 thrifty food plans, totaled for the four-person household.

The 1983 thrifty food plan meets all dietary standards and food cost specifications. To achieve these, adjustments to food consumption patterns were required. Generally, these adjustments increased the quantities

of economical food sources of these nutrients which were short of goals in consumption patterns (table 2) and contain low moderate levels of fat, cholesterol, calo sweeteners, and sodium.

Differences in the 1983 and 1975 thrifty food plans result from differences in both food consumption patterns and dietary standards used in their development. For most sex-age categories, lower quantities of fats, sugars, bakery products, and eggs in 1983 than in 1975 resulted partly from lower consumption of foods in these food groups in households in the 1977-78 survey than

Table 3. Quantities of food for a week¹ for a 4-person household,² by food consumption pattern, and 1983 and 1975 thrifty food plans

Food group ³	Food consumption pattern	Thrifty food plan	
		1983	1975
<u>Pounds⁴</u>			
Potatoes (fresh weight)	4.7	4.8	6.2
Other vegetables, fruit ⁵	22.7	24.2	20.6
Cereal, flour	5.3	9.3	7.3
Bread	4.2	5.5	6.9
Other bakery products	2.9	2.5	3.9
Milk, cheese, ice cream (milk equivalent in quarts) ⁶	15.4	14.2	14.5
Meat, poultry, fish	17.2	10.9	8.3
Eggs (no.)	16.5	12.9	13.8

Fats, oils	2.2	2.3	2.6
Sugar, sweets	3.8	2.9	3.6

¹Quantities are for food as purchased or brought into the household from garden or farm. Food is for preparation of all meals and snacks for a week. Food quantities are increased 5 percent above the amount required to meet dietary standards for the thrifty food plan to allow for nutrients lost as discarded edible food.

²Man and woman 20-50 years, children 6-8 and 9-11 years.

³Small quantities of coffee, tea, seasonings, soft drinks, punches, and ades that are a part of the food plan are not shown.

⁴Quantities in pounds, except milk which is in quarts, and eggs which are by number.

⁵Frozen concentrated fruit juices are included as single-strength juice.

⁶Quantities of dry and evaporated milk and yogurt included as their fluid whole milk equivalents in terms of calcium content.

⁷Count 1 pound of canned dry beans--pork and beans, kidney beans, etc.--as 0.33 pou

1965-66 survey. More meats, dry beans, vegetables, fruit, cereal, and flour were needed in the 1983 plan than in the 1975 plan, partly to help provide desired levels of folacin and zinc, nutrients not considered in the earlier plan. Lower standards for fat and newly introduced standards for caloric sweeteners and cholesterol for the 1983 plan were also factors.

Another, and perhaps more understandable, way to show the 1983 thrifty food plan is in terms of household measures of food as served on a daily basis. Selected foods in the plan for four individuals are shown in table 4.

Procedures Used to Estimate Costs

To estimate the cost of foods in the thrifty food plan, an assumption is made that families following the plan select the kinds and amounts of foods in each of the food groups that low-income survey households selected on the average. For example, the percentage of total meat used by the selected survey families that was ground beef, beef chuck, stewing beef, and so forth, is assumed in the plan. These average selections are believed to provide the most reliable basis for food guides to be used nationwide.

The average prices paid for almost 2,400 different foods are used as a basis for estimating the costs. These prices reflect differences in container size, brands, quality of food, and price levels of stores selected by low-income families.

Table 4. A day's food as served for 4 individuals: 1983 thrifty food plan

Food ¹	Unit	Child 6-8 years	Child 9-11 years	Woman 20-50 years	Man 20-50 years
- - - - - <u>Number of units</u> - - - - -					
Vegetables, fruit.....	1/2 cup	3.4	4.0	4.9	4.3
Cereal, pasta, dry	1 oz ²	2.7	2.9	2.6	2.7
Bread ³	1 slice	6.2	6.7	5.8	6.4
Bakery products ³	1 slice	.9	1.2	.3	1.2
Milk, yogurt	1 cup	1.7	2.1	1.1	.9
Cheese (per week)	1 oz	1.2	1.6	4.4	2.0
Meat, poultry, fish, boned ⁴	1 oz	2.1	2.4	4.1	4.0
Eggs (per week)	no.	1.8	2.4	4.2	3.9
Cooked dry beans, peas, nuts	1/2 cup	.3	.4	.7	.7
Fats, oils	1 tbsp	2.3	2.7	.9	3.1
Sugar, sweets.....	1 tbsp	3.7	4.2	.7	4.9
Soft drinks, punches, ades	1 cup	.2	.2	.1	.2

¹Excludes commercially prepared mixtures, except bread and bakery products.

²1 oz of dry cereal or pasta is about 1 serving.

³Bread is commercially prepared bread and bread assumed to be made at home from flour and meal and some milk, fat, and sugar, in terms of food as purchased. Ingredients used other than flour and meal in homemade bakery products in excess of those required to make bread are included in the group of the ingredient. Bakery products shown are only commercially prepared types

⁴Lean parts of meat and poultry. Includes some bacon, sausage, and luncheon meats.

Cost of foods in the food plans are estimated each month by use of the following procedures:

1. Prices paid by the low-income survey households are updated by use of the percentage change in price indexes of detailed food expenditure categories from the time of the survey to the month of the estimate. Indexes for these food expenditure categories are based on prices collected each month by the Bureau of Labor Statistics (BLS) from a representative sample of stores in selected cities across the country. For example, survey households used as a basis for the thrifty food plan paid an average price of about \$1.00 a pound for ground beef in 1977-78. If the index for the food expenditure category containing ground beef reported by BLS in a given month were 60 percent higher than the index reported in 1977-78, a price of \$1.60 (\$1.00 plus 60 percent of \$1.00) would be used for ground beef in estimating the cost of the thrifty food plan for that month.

2. The updated prices for foods in each food group for each food plan are weighted by the average amounts of foods used by the survey households to derive prices per unit--pound, quart, or number--for the food groups.

3. The prices per unit are then multiplied by the number of the units of food groups in the plan for each sex-age category (table 1) to determine the cost of foods from each food group.

4. Costs for the food groups for each category are totaled. These totals, rounded to the nearest 10 cents, are released as the cost of food at home for a week. Unrounded weekly costs are multiplied by 4.333, then rounded to the nearest 10 cents to estimate the cost for the month.

The general cost level of the 1983 food plan is the same as for the 1975 food plan; however, the 1983 food plan for some sex-age categories cost more, while the plan for other categories cost less than in earlier plans. Costs for the new plans for women 51 years and over are substantially higher. The new plans for preschool-age children, teenage girls, women 20 to 50 years, and men 51 years and over are also more costly. Conversely, new plans for school-age children, teenage boys, and men 20 to 50 years are

less costly. These changes in food cost relationships result from changes in food consumption patterns and the costs associated with changing patterns to meet the dietary standards for the various sex-age categories.

Sample Meal Plans

Sample meals, with recipes and lists of foods used in their preparation, have been developed for families of four persons following the revised thrifty food plan. These meal plans illustrate some of the many ways food in this revised food plan can be combined into economical and nutritious diets. Copies of the meal plans, Making Food Dollars Count--Nutritious Meals at Low Cost, USDA HIG-240, are available for 50 cents from the Consumer Information Center, Pueblo, Colo. 81009.

Food Plan Development--An Ongoing Project

The maintenance of the USDA food plans--development, interpretation through publications for leaders and consumers, and periodic estimates of costs--is an ongoing project of HNIS. The food plans are evaluated and revised, as required, when new information becomes available on food consumption, food prices, food composition, and nutritional requirements.

Each food plan is only one of many combinations of food groups that could be developed at the given cost level. Amounts in food groups in the food consumption patterns could be changed in other ways to provide nutritious diets. While such other combinations would deviate further from consumption patterns, they might be acceptable to some families.

Other food plans at similar costs could be developed if selections of food groups were not assumed to be typical of the selections of survey households. If the foods within the groups were limited to those that are especially inexpensive or especially nutrient dense, the quantities in food groups in the food plans probably would not be required to deviate from food consumption to the extent the 1983 food plans do. For example, if only nonfat dry and fluid skim milk were used, the extra calories and cost of

the typical assortment of milk assumed in the 1983 food plans could be used for other foods in the food plan. For purposes of establishing food plans at different costs for use nationwide and estimating the nutrient content and cost of foods in the food plans, foods within food groups used on the average by households with different levels of food costs are believed to be most reasonable.

Technical, Conceptual, and Administrative Lessons of the Income Survey Development Program

This publication contains papers presented at a conference in October 1982 evaluating the results of the Income Survey Development Program (ISDP). The ISDP was established in 1975 by the U.S. Department of Health, Education, and Welfare (now known as the U.S. Department of Health and Human Services) and the U.S. Department of Commerce to carry out research on measurement concepts, data collection, and data processing strategies needed for the Survey of Income and Program Participation (SIPP). The SIPP, which is scheduled to begin data collection in October 1983, will be a national longitudinal household survey to collect data on cash and in-kind income, assets and liabilities, taxes, expenses, program eligibility and participation, labor force history and status, disability, and pension coverage. The SIPP will provide more comprehensive household data than either the Consumer Expenditure Survey or Current Population Survey, the primary sources of Federal data on households.

Seventeen papers that were background reading for conference participants are organized into seven chapters and cover what was learned from the ISDP and identify where further research is needed. A paper by the editor that was written after the conference, "Measuring Income and Program Participation," provides an overview by discussing the need for comprehensive income data and summarizing the papers and conference discussions. Extensive references include an annotated ISDP bibliography of materials generated over the 7-year history of the program. This publication is available for \$5 from the Center for Coordination of Research on Social Indicators, Social Science Research Council, 605 Third Avenue, New York, N.Y. 10158.

WEIGHTED AVERAGE/STATEWIDE \$130.29

- NOTES:
- Only eight counties were studied because of the difficulty in obtaining data from the others, however, the eight studied account for 96.6% of the ADC population.
 - Gas and electric averages are based on major suppliers in the area and figures obtained from the Public Service Commission.
 - Water, sewer and electric rates are based on phone calls to the suppliers in the various counties.
 - Garbage rates are average for the area.

PSC chief: Utility bills down, investor faith up

By Mike Norris/Gazette-Journal

The state Public Service Commission has some good news as northern Nevadans greet 1986: gas and electric bills have fallen from this time last year.

"All of the energy costs in northern Nevada are lower this New Year's Day than they were last year at this time," Commission Chairman Scott Craigie reported this week.

In addition, investor confidence remains strong in Nevada power companies — an important factor in helping get money to finance the utility expansion as the population increases — Craigie said.

"Both the customers and the companies

are getting what they need," he said.

Craigie said he was pleased by the reductions because they reflect some success in the commission's 2-year-old effort to stabilize energy rates while maintaining investor confidence in utility companies.

This must also be a "long-term" goal for Nevada, he said.

"The long-term picture has got to be a combination of rate stabilization . . . and, at the same time, keeping utilities financially strong enough to attract investment capital."

The average monthly electrical bill for a Sierra Pacific Power Co. customer has dropped from \$50.75 a month to \$49.90 in

the past year. For gas buyers, prices are down from \$36.33 to \$33.34.

In addition, about 6,000 Sierra Pacific customers whose bills are averaged received rebate checks this week and will also see their monthly bills drop.

The average monthly bill sent to customers of the Southwest Gas Corp., which serves primarily Carson City, has fallen from \$50.63 to \$46.05, Craigie said.

He cited a combination of reduced fuel costs and PSC-ordered reductions in rate-increase requests as reasons for the declining bills. Power companies had sought increases totaling \$48 million, but the PSC eventually approved only \$1.5 million, he said.

Nevada utilities are selling stock above "book value" for the first time in a decade, he said, explaining evidence of investor confidence. He said utility stocks are up to \$20 a share compared to \$12 a share 1½ years ago.

In addition, he said Sierra Pacific's bond rating may be increased from BBB to A. The improved rating is important, he said, because it will allow the utility to obtain more investment capital at a lower cost and permit utilities to "build for growth."

He also noted the utilities' rate of return, which is approved by the PSC, has steadily declined in the last two years from 12.12 percent to 11.4 percent — "but they've earned less than that."

ANALYSIS OF COSTS FOR HOUSEHOLD SUPPLIES/OPERATION,
CLOTHING, MEDICAL SUPPLIES, PERSONAL CARE AND RECREATION

The Need Standard allowances for household supplies/operation, clothing, medical supplies, personal care and recreation have been estimated indirectly based upon factors used by the State of Utah in their 1984 Need Standard Study.

Utah uses information from the ongoing Consumer Expenditure Survey by the Bureau of Labor Statistics. The basis premise of the estimates is that if low income households have attained a minimally acceptable level of food consumption, then minimally acceptable levels of consumption for other expenditure groups may be inferred from the expenditure ratios actually selected by households having the same economic and demographic characteristics.

The following allowances were used based upon the household's food allowance (USDA Thrifty Food Plan):

Household Supplies/Operating:	6.8%
Clothing:	18.4%
Medical Supplies:	3.4%
Personal Care:	6.8%
Recreation:	14.6%

TRANSPORTATION COSTS

FEDERAL REQUIREMENTS - VEHICLES:

Federal Regulations require the state to consider automobiles as a resource. ADC households are allowed to maintain resources up to a \$1,000 maximum. The value of one automobile is exempt from consideration as long as the equity value does not exceed \$1,500. The equity value in excess of \$1,500 is applied towards the family's \$1,000 resource limit. If the \$1,000 resource limit is exceeded the family is not eligible for ADC.

Examples:	<u>Family A</u>	<u>Family B</u>
Value of Vehicle	\$5,000	\$5,000
Encumbrances	2,000	3,000
Equity Value	3,000	2,000
Exempt Portion	1,500	1,500
Considerable Value	1,500	500
Property Limit	1,000	1,000
	NOT ELIGIBLE	ELIGIBLE

AUTOMOBILE OPERATION COSTS:

45% of clients surveyed in the "Expenditure Survey" had automobiles. Costs and usage of the autos varied widely.

Information provided by the Department of Motor Vehicles shows the minimum registration fee is \$25 (for a car probably at least 10 years old with little value). The registration fee for a \$6,500 car value is \$105.

Surveys of automobile insurance carriers show the costs of minimal coverage to be \$126 in Northern Nevada and \$121 in the South per six-month period. This coverage would only meet the mandatory state law requirements and is based on a single, unemployed female over age 25 with a good driving record.

The "Expenditure Survey" showed clients made approximately eight trips per month for necessary shopping/medical with an average round trip mileage of 10.5 miles. Total monthly miles were 84. Using the mileage allowance given to state employees for use of private autos (24¢ per mile), costs for maintenance, gas, oil, etc. would be \$20.16 per month.

Considering the minimums for registration, insurance and operating costs, it is estimated automobile ownership and usage may run \$509 per year or \$42.42 per month.

No figures were included for monthly payments to purchase an automobile because only 11% of people surveyed had a payment.

PUBLIC TRANSPORTATION OPTION:

The 55% of households that do not own automobiles must depend upon public transportation (or friends and relatives) to obtain the necessities for their family.

Citifare rates in Reno are 60¢ for adults and 35¢ for a child over age six for a one-way trip. Las Vegas Transit System charges \$1.00 for adults and 40¢ for a child over age six for a one-way trip. Children age six and under ride free when accompanied by an adult.

Assuming the eight necessary trips reported in the "Expenditure Survey" for an adult and four trips for children over age six, costs for public transportation in the North may be \$12.40 per month and in the South \$19.20.

FAMILIES WITH WORKING HOUSEHOLDERS:

Transportation costs for working mothers have not been included in the Need Study. The reasoning for this is working mother households only represent about 6-8% of the ADC caseload and these households are given a deduction from their income to cover work expenses. Also, some working households receive assistance from the Job Training Program (JTPA) or the Work Incentive Program (WIN) to meet transportation costs.

SUMMARY:

Transportation costs at a minimal level may average between \$18 and \$42 per month.

MW/sm

CHILD CARE ANALYSIS

The average payment being paid by the Work Incentive Program (WIN) to licensed homes and day care centers is \$8.50 per day for children age two and over, and \$10.00 per day for children/infants under age two.

Working mothers, which represent 6-8% of the ADC caseload receive a deduction from their income for the child care they pay up to a maximum of \$160 per month per child.

Also, many working mothers receive assistance from JTPA or WIN to cover the cost of child care.

No allowance for child care is being recommended to include in the Need Standard.

SCHOOL SUPPLIES/FEES ANALYSIS

To determine what a low income family may have to expend for school supplies and fees the Nevada Department of Education and the eight largest school districts were contacted.

Officials from the Department of Education advised the Nevada law requires a free education for children up to age eighteen. In fact, if a family cannot afford paper, pencils and supplies for school, the school district must supply the necessities.

Information obtained from the individual school districts shows that there are generally no mandatory fees. Most all have book and locker deposits, however, they are refundable and may be waived for low income families.

Based on the information obtained, no cost was determinable for school supplies/fees.

APPENDIX G

Letter of Support to Governor Bryan
from NACO and Other Parties

NEVADA ASSOCIATION OF COUNTIES

308 NORTH CURRY STREET, SUITE 205 • CARSON CITY, NEVADA 89701
(702) 883-7863

May 13, 1986

Governor Richard H. Bryan
Capitol Complex
Carson City, NV 89710

Dear Governor Bryan:

As you are aware, one of the priorities of the Nevada Association of Counties is to seek a higher level of funding at the 1987 Nevada Legislative Session for the ADC and Medicaid programs. Attached is a list of those organizations and individuals that join us in support of an increase in the ADC payment levels.

We greatly appreciated your request to the 1985 Legislature to increase the maximum ADC payment level for a family of three from \$233.70 per month to \$270.00 per month. We also were gratified by the Legislature's decision to grant a final payment level of the present \$285.00 per month. While this increase was a historical step in the right direction, much remains to be done.

Even after the 1985 increase, the current payment level of \$285.00 per month is only \$12.00 per month higher than the maximum levels paid in 1969. This level remains woefully inadequate to meet today's needs.

An Interim Committee of the Legislature formed under S.C.R. 45 is in the process of examining the adequacy of the current standard of need in light of today's costs for the basic necessities of life in Nevada. The Committee has utilized four methodologies for studying that adequacy. Although final recommendations have not yet been formulated, the Committee has found:

1. That federal poverty guidelines for a family of three are \$737.50 per month.
2. That the standard of need last fully examined in 1969, adjusted for CPI, would require \$810.00 per month today.
3. That a "market basket survey" of the cost of basic necessities in Nevada today shows to be \$789.00 per month excluding any allocation for such items as phone and transportation.

Governor Richard H. Bryan
May 13, 1986
Page 2.

4. That a "client expenditure survey" which examined how much current ADC recipients as well as those working who come close to qualifying for the program shows that an average of \$515.16 per month is spent by this group on basic necessities. This total excludes contributions from other sources, such as food stamps, housing subsidies, and contributions from non ADC household members.

We ask that you support the recommendations of the Committee for an increased needs standard effective in 1987. While increasing the standard of need in and of itself will not increase benefit levels that new standard will become the key eligibility test for ADC and the Children's Health Assurance Program (CHAP). Because both ADC and CHAP recipients receive Medicaid there will be a need to increase the Medicaid appropriation accordingly. The Welfare Division is currently working on projections of the cost of increasing this standard.

As you are aware persons who cannot qualify for Medicaid often turn to the counties to meet their medical needs. In 1986 and 1987 we project an expenditure by the counties of \$22.2 million an increase of nearly 129% since our 1982/1983 expenditure of \$9.7 million. We consider ourselves to be partners with the state in meeting medical needs of the indigent. We feel that over the past several years the state has failed to assume its share of the responsibilities in this partnership. During the same five year period that our cost have increased by nearly 129%, the state Medicaid appropriation has risen by only seven percent. Increasing the ADC needs standard and therefore the Medicaid caseload will hopefully arrest this trend. Even with this assistance ; however, counties will need continued authority to assess the additional 3¢ ad valorem tax for medical assistance to indigents under N.R.S. Chapter 428, which was passed at the last session of the Legislature. That authority will "sunset" if not renewed at the next session.

We also ask that you appropriate sufficient funds to increase the maximum grant levels provided to ADC recipients. As noted the work of committee under SCR 45 has amply demonstrated the inadequacy of present payment levels. Nevada's inadequate payment levels also negatively affect Native American households even though Indian General Assistance payments are funded solely with federal dollars. By Bureau of Indian Affairs regulation, the maximum Indian General Assistance payment in Nevada cannot exceed the state's ADC levels. In our 1984 letter to you we suggested that funding be provided to increase the maximum payment level for a family of three of the Utah level of \$362.00 per month. We renew that request.

We recognize that other areas of state government will be in financial stress in 1987. Gramm-Rudman or subsequent legislation may require cuts in federal funds to many programs. Despite these pressures,

however, we ask that progress which began in the last session be continued.

As we noted in our letter of 1984 a dramatic increase in Nevada's poverty population is proceeding hand in hand with the rapid growth of our general population. This problem simply will not go away and unless the state makes an adequate response these problems will only be multiplied in the future. County governments and private non-profit agencies are bursting at the seams attempting to meet these needs. We desperately need our partner in state government to do its fair share.

We remind you that two thirds of the recipients of ADC are children. As you have recognized in your support for Nevada's educational system, our children are our future. However, unhealthy and hungry children cannot learn. Please do not forget these children in formulating your budget priorities.

Sincerely,

Mark Schrader

Mark Schrader
NACU President

MS/ljs

The below listed groups, agencies, and individuals have reviewed the contents of this letter and expressed their full support and endorsement of the requests made above:

1. League of Women Voters of Nevada, Sandy Medcalf, Las Vegas, President
2. Soroptomist International, Sierra Nevada Region
3. Women of Nevada, Jan Evans, Legislative Coordinator
4. Greater Nevada Health Systems Agency
5. Inter-Tribal Council of Nevada, Board of Directors
6. Nevada Apartment Association
7. Nevada Network Against Domestic Violence, Mary Jenkins, President
8. American Civil Liberties Union of Nevada, Jim Shields, Director
