

LCB File No. R106-00

**PROPOSED REGULATION OF THE DEPARTMENT
OF MOTOR VEHICLES AND PUBLIC SAFETY**

Authority: NRS 445B.785

Section 1. NAC 445B.581 is hereby amended to read as follows:

NAC 445B.581 Inspection of vehicle: Place and equipment for performance, *Use of gas infrared analyzer and diagnostic equipment; exceptions.* (NRS 445B.785)

1. Except as otherwise provided in this section, An inspection may be performed only at the established place of business by an approved inspector using an exhaust gas analyzer approved by the department.

2. In all areas requiring an emission inspection program:

(a) Test stations that hold a license which was issued before January 31, 2001, may continue to use their existing Nevada 94 exhaust gas analyzers until January 31, 2002. On and after February 1 2002, all test stations must use an NV2000 analyzer to perform emissions test.

(b) Test stations that hold a license which was issued on or after January 31, 2001, must use an NV2000 analyzer to perform two-speed emissions tests.

(c) Analyzers enrolled after January 31, 2001 must be NV2000 analyzers.

[Environmental Comm'n, Engine Emission Control Reg. § 3.10.4, eff. 1/10/78; 8/16/78; 12/20/79]-(NAC A by Dep't of Motor Veh. & Pub. Safety, 8/19/94; 9/13/95; R0079/98, 9/25/98)
